Objectives : Political Geography is concerned with the reciprocal impact of spatial patterns, features and structures, and political ideas, institutions. Above all, it focuses on the twin ideas of territory and territoriality. This course is based on the premise that with the Post-World War era coming to a decisive end, a new political geography –one offering fresh perspectives on the relationship between geography and politics—is in the making. Such a political geography recognizes that spatial patterns of political processes are not confined only to national boundaries. The nation-state is a part of a globalizing world, and the resultant geopolitical map contains nested regions with over-lapping boundaries. It is equally important to examine the geopolitical economy of so-called 'resource wars', that is armed conflicts revolving to a significant degree over the pursuit or possession of critical materials. The course will draw upon a number of case studies from different parts of the globe (especially Afro-Asia, Polar Regions and the Indian Ocean region) to enable students develop a better understanding of the politics of space and spaces of politics.

Unit-I

Understanding Key Concepts : Power, Territory/Territoriality, Space and Spatiality.
Globalization and the Regionalization : Integration and Fragmentation.

Unit-II

Territory and the Power of Ethnic Nationalism.
The Geopolitics of 'Resource Wars'.

Unit-III

International Migration, Refugee Flows and Diasporas.

Unit-IV

New States and the Geopolitical Transition (with special reference to Central Asian Republics).
Changing nature and role of international boundaries and border regions.
