PANJAB UNIVERSITY, CHANDIGARH-160014 (INDIA)

(Estd. under the Panjab University Act VII of 1947—enacted by the Govt. of India)

FACULTY OF ARTS

SYLLABI

FOR

M.A. ECONOMICS (SEMESTER SYSTEM) EXAMINATIONS, 2014-2015

--:o:--

© The Registrar, Panjab University, Chandigarh.
All Rights Reserved.

APPLICABILITY OF REGULATIONS FOR THE TIME BEING IN FORCE

Notwithstanding the integrated nature of a course spread over more than one academic year, the regulations in force at the time a student joins a course shall hold good only for the examinations held during or at the end of the academic year. Nothing in these regulations shall be deemed to debar the University from amending the regulations subsequently and the amended regulations, if any, shall apply to all the students whether old or new.

GUIDELINES FOR CONTINUOUS INTERNAL ASSESSMENT (20%) FOR REGULAR STUDENTS OF POST-GRADUATE COURSES of M.A. Economics (Semester System)
(Effective from the First Year Admissions for the Academic Session 2005-2006)

1. The Syndicate has approved the following guidelines, mode of testing and evaluation including Continuous Internal Assessment of students :
   (i) Terminal Evaluation : 80 %
   (ii) Continuous Assessment : 20 %
   (iii) Continuous Assessment may include written assignment, snap tests, participation in discussions in the class, term papers, attendance etc.
   (iv) In order to incorporate an element of Continuous Internal Assessment of students, the Colleges/Departments will conduct **one** written test as quantified below :

(a)	Written Test	:	25 (reduced to 5)
(b)	Snap Test	:	25 (reduced to 5)
(c)	Participation in Class Discussion	:	15 (reduced to 3)
(d)	Term Paper	:	25 (reduced to 5)
(e)	Attendance	:	10 (reduced to 2)
		Total :	**100 reduced to 20**

2. Weightage of 2 marks for attendance component out of 20 marks for Continuous Assessment shall be available only to those students who attend 75% and more of classroom lectures/seminars/workshops. The break–up of marks for **attendance component** for theory papers shall be as under :

Attendance Component			*Mark/s for Theory Papers*
(a)	75 % and above upto 85 %	:	1
(b)	Above 85 %	:	2

3. It shall **not be compulsory** to pass in Continuous Internal Assessment. Thus, whatever marks are secured by a student out of 20% marks, will be carried forward and added to his/her score out of 20 %, i.e. the remaining marks allocated to the particular subject and, thus, he/she shall have to secure pass marks both in the University examinations as well as total of Internal Continuous Assessment and University examinations.

4. Continuous Internal Assessment awards from the affiliated Colleges/Departments must be sent to the Controller of Examinations, by name, **two weeks before** the commencement of the particular examination on the *proforma* obtainable from the Examination Branch.

SPECIAL NOTE :

(i) The theory paper will be of 80 marks and 20 marks will be for internal assessment.

(ii) In the case of Postgraduate Courses in the Faculties of Arts, Science, Languages, Education, Design & Fine Arts, and Business Management & Commerce, falling under the purview of Academic Council, where such a provision of Internal Assessment/Continuous Assessment already exists, the same will continue as before.

OUTLINES OF TESTS, SYLLABI AND COURSES OF READING FOR M.A. ECONOMICS (SEMESTER SYSTEM) FOR THE EXAMINATION OF 2014-2015

Course Structure :

The M.A. in Economics will be a four semester full time programme. The course will be organized over two years, each year consisting of two semesters—the summer semester and the winter semester.

The programme of study consists of sixteen courses out of which **12** are core courses—**compulsory** for all students—and **4** are **elective courses**. Each of these courses will carry 100 marks, of which 20 marks will be for internal assessment and 80 marks for the end semester examinations to be held in December (Semesters I and III) and April (Semesters II and IV). The teaching hours will be 50 per course per semester. The courses will be offered according to the following schedule :

SEMESTER-I

All Compulsory Papers :

MAECO-101	Micro Economics-I	100 Marks
MAECO-102	Contemporary Issues in Indian Economy-I	100 Marks
MAECO-103	Quantitative Methods	100 Marks
MAECO-104	History of Economic Thought	100 Marks

SEMESTER-II

All Compulsory Papers :

MAECO-201	Micro Economics-II	100 Marks
MAECO-202	Contemporary Issues in Indian Economy-II	100 Marks
MAECO-203	International Economics	100 Marks
MAECO-204	Economics of Public Finance	100 Marks

SEMESTER-III

There will be two Compulsory Papers :

MAECO-301	Macro Economics-I	100 Marks
MAECO-302	Economics of Growth and Development-I	100 Marks

*Any **two** of the following options for Papers MAECO-303 & 304*

(i)	Economics of Agriculture-I	100 Marks
(ii)	Economics of Industry-I	100 Marks
(iii)	Basic Econometrics	100 Marks
(iv)	Economics of Population	100 Marks
	OR	
	Economics of Human Resource Development	100 Marks

SEMESTER-IV

There will be two Compulsory Papers :

MAECO-401	Macro Economics-II	100 Marks
MAECO-402	Economics of Growth and Development-II	100 Marks

*Any **two** of the following options for Papers MAECO-403 & 404*

(i)	Economics of Agriculture-II	100 Marks
(ii)	Economics of Industry-II	100 Marks
(iii)	Mathematical Economics	100 Marks
(iv)	Economics of Money and Banking	100 Marks
	OR	
	Economics of Financial Markets & Institutions	100 Marks
(v)	Advanced Econometrics	100 Marks

SEMESTER–I

Paper-MAECO-101 : MICRO ECONOMICS-I

Max. Marks	:	100
Theory	:	80 Marks
Internal Assessment	:	20 Marks
Time	:	3 Hours
Teaching Hours	:	50

Objective :

The objective of this paper is to rigorously and comprehensively equip the students with theoretical concepts, methodology and process of reasoning involved in analysing economic behavior of individuals, firms and markets using, in general, a static and partial equilibrium framework.

The students would be evaluated at the end of each semester through subjective type questions/answers (both short and essay type). The scripts would be evaluated by the examiners having adequate postgraduate teaching experience in the paper/option concerned.

Pedagogy of the Course Work :

The course relies on a combination of lectures, solving problems, and discussing of academic articles or real-life situations. Teacher will assign topic for assignments on contemporary themes and issues from the syllabi. Special tutorials/contact hour for one-to-one student-teacher interactions.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES :

1. *The syllabus of this paper has been divided into four units.*
2. There shall be 9 questions in all.
3. The first question, which would be **compulsory**, shall be short answer type (word limit 25-30 each). It would carry 15 short questions, spread over the entire syllabus. The candidate will be required to attempt any 10 short answer type questions. Each short answer type question would carry 2 marks ($10 \times 2 = 20$).
4. Rest of the paper shall contain 4 units. Each unit shall have two questions and the candidates shall be required to attempt one question from each Unit— 4 in all. Each question shall carry **15** marks ($15 \times 4 = 60$).

UNIT- I

Central Ideas of Economics :

How do People Make Decisions? People : face 'Trade Offs' ; Incur Opportunity Costs and Gain Benefits of Decisions; Think at the Margin and Respond to Incentives. How do People Interact? Specialization and Exchange can make each party 'Better Off' Market often work efficiently, The Invisible Hand; Three Coordination Tasks in the Economy: Which Commodity be Produced and How much of it? Who should produce it and how? Who should Consume and How much of it?

Methodology of Economics as a Social Science: Alternative Processes of Construction and Appraisal of Positive Economic Theories.

Equilibrium: Concept, Stability, Existence and Uniqueness of Equilibrium.
Types: Static and Dynamic Equilibrium. Partial and General Equilibrium.
Stability Analysis: Marshallian and Walrashallian Approaches.

UNIT- II

Analysis of Consumer Choice under Certainty :
Cardial Analysis, Elasticity of Demand, Revisiting Consumer Equilibrium and Effects of Changes in Relative Prices and Money Incomes through Ordinal Utility Approach and Derivation of 'Marshallian' and 'Compensated' Demand Curves.

Consumer Surplus: Hicks' and Marshall's Approach.
Application of Indifference Curves: Cash Subsidy Vs. Kind Subsidy: Income Leisure Choice; Inter-temporal Choice of Consumption.
Revealed Preference Theory and Consistency of Choice.

UNIT- III

Analysis of Consumer Choice under Uncertainty :
Measurement of Risk. Expected Utility and Preferences towards Risk. Why do people gamble (insure)? Risk Return Trade–Off. Reducing Risk.

Analysis of Consumer Behavior under Asymmetric Information :
Hidden Actions: Principals, Agents and Moral Hazard.
Hidden Characteristics : Adverse Selection Problem. Market and Government Responses to the Problems of Moral Hazard and Adverse Selection.

Empirical Estimation of Demand. From Individual to Market Demand**:** The Role of Network Externalities: 'Bandwagon' and 'Snob' Effects.

UNIT-IV

Theory of Production and Costs:

Production, Input Choice and Cost with One Variable Input. Law of Returns to Variable Proportions and Choice of Optimum Quantity of an Input. Derivation of Short Run Cost Curves from Productivity Curves of a Variable Factor of Production. Reserve Capacity and the Shape of Short Run Cost Curves.

Multiple Input Decisions : The Choice of Optimal Techniques of Production and Factor Combinations. Factor Price Changes: Substitution and Output Effects. Elasticity of Input Substitution. Constant, Increasing and Decreasing Returns to Scale. Expansion Path and derivation of Long Run Cost of Production Curves.
Economies and Diseconomies of Scale*:* Shape of Short and Long Run Costs Curves: Theory versus Empirical Evidence. Multi Product Firms and Dynamic Changes in Costs: Economies of Scope; The Learning Curve Analysis.

Recommended Readings :

Essential Readings :

2. Pindyck, Robert S., Rubinfel Daniel, L. and Gupta, P.L. (2006) : Micro-Economics, Prentice Hall of India, New Delhi.
3. Maddala, G.S. and Miler Ellen (2004) : Micro-Economic Theory and Applications, Tata McGraw Hill.

Further Readings :

1. Boumol,William J. and Blinder Alan S. (2007) : Microeconomics: Principles and Policy, 9th Edition, Thomson, 1st Indian Edition.
2. Salvatore Dominick (2003) : Microeconomics : Theory and Applications, 4th Edition, Oxford Univ. Press.
3. Koutsoyiannis, A. (1977) : Modern Micro Economics, McMillan Press, London.
4. Ryan, W.J.L. and Pearce, D.W. (1977) : Price Theory, McMillan India, New Delhi.
5. Ferguson, C.E. and Gould, J.P. (1989) : Micro Economic Theory (6th Edition), All India Book Seller.
6. Briet, W. and Hochman, H.M. (Ed.) (1977) : Readings in Micro Economics, Dryden Press.

PAPER – MAECO 102: CONTEMPORARY ISSUES IN INDIAN ECONOMY – I

Max. Marks	:	100
Theory	:	80 Marks
Internal Assessment	:	20 Marks
Time	:	3 Hours
Teaching Hours	:	50

Objective:

The objective of this paper is to acquaint the students with the performance of different sectors of the Indian economy and the policy framework governing them. This will provide them an insight into the past, present and future functioning of the Indian economy and strengthen their analytical capability.

The students would be evaluated at the end of each semester through subjective type questions/answers (both short and essay type). The script would be evaluated by the examiners having adequate postgraduate teaching experience in the paper/option concerned.

Pedagogy of the Course Work:

The course relies on a combination of lectures, solving problems, and discussing of academic articles or real-life situations. Teacher will assign topic for assignments on contemporary themes and issues from the syllabi. Special tutorials/contact hour for one-to-one student-teacher interactions.

Instructions for Paper-setter and candidates:

1. *The syllabi of this paper has been divided into four units.*
2. There shall be 9 questions in all.
3. The first question, which would be **compulsory,** shall be short answer type (word limit 25-30 each). It would carry 15 short questions, spread over the entire syllabus. The candidate will be required to attempt any 10 short answer type questions. Each short answer type question would carry 2 marks (10×2 = 20).
4. Rest of the paper shall contain four units. Each unit shall have two questions and the candidates shall be required to attempt one question from each unit – 4 in all. Each question shall carry 15 marks (15×4 = 60).

UNIT- I

Growth and Structural Change in the Indian Economy:
State of Indian Economy During Pre-Reform Period(1950-1990): Nature, Causes and Changes in Sectoral Income Distribution and Occupational Structure.

State of Indian Economy in 1990-91;
Features and Appraisal of Economic Reform Programme
Second Generation Reforms.
State of Indian Economy during Post Reform Period.

UNIT- II

Labour Force Growth and Occupational Structure Since Economic Reforms.
Poverty and Unemployment: Nature, Extent and Estimates and Policy Initiatives since Economic Reforms.
Inter-state Disparities in the Pattern of Development in the Post-Reform Period.

UNIT- III

Agriculture: Pattern of Growth of Indian Agriculture since 1950. Deceleration in the 1990s – Extent and Causes. Regional Imbalances in Indian Agriculture. Food Security - Problem and Policy Options.

UNIT- IV

Industry: Trends in Growth and Structure of Indian Industry since 1950. Industrial Policy Initiatives during Post-reform Period. Impact of New Economic Policy on Indian Industry.

PAPER –MAECO–103: QUANTITATIVE METHODS

Max. Marks	:	100
Theory	:	80 Marks
Internal Assessment	:	20 Marks
Time	:	3 Hours
Teaching Hours	:	50

Objective:

The objective of this paper is to train the students in the use of mathematical and statistical tools in analyzing economic problems. The course content contains simple tools and techniques, thought necessary for data collection, presentation, analysis and drawing inferences about various statistical hypotheses.

The students would be evaluated at the end of each semester through subjective type questions/answers (both short and essay type). The scripts would be evaluated by the examiners having adequate postgraduate teaching experience in the paper/option concerned.

Pedagogy of the Course Work:

The course relies on a combination of lectures, solving problems, and discussing of academic articles or real-life situations. Teacher will assign *topic for assignments on contemporary themes and issues from the syllabi. Special tutorials/contact hour for one-to-one student-teacher interactions.*

INSTRUCTIONS FOR PAPER-SETTER AND CANDIDATES:

1. *The syllabi of this paper has been divided into four units.*
2. There shall be 9 questions in all.
3. The first question, which would be **compulsory,** shall be short answer type (word limit 25-30 each). It would carry 15 short questions, spread over the entire syllabus. The candidate will be required to attempt any 10 short answer type questions. Each short answer type question would carry 2 marks (10×2 = 20).
4. Rest of the paper shall contain four units. Each unit shall have two questions and the candidates shall be required to attempt one question from each unit – 4 in all. Each question shall carry 15 marks (15×4 = 60).

Note : Candidates are allowed to use Simple, Non-Scientific and Non-Programmable Calculator in the Examination Hall.

UNIT - I

Differentiation and Optimization

Partial and Total Derivatives, Homogenous Functions, Euler's rule, Finding the Maximum and Minimum of a Function with Two Variables: With and Without a Single Equality Constraint. Simple Economic Applications such as Elasticity and Nature of Commodity, Consumer's and Producer's Optimization Problems.

UNIT – II

Integration, Differential Equations, Linear Programming

Integration: Indefinite and Definite Integration of a Function with a Single Variable, Method of Substitution. Economic Applications.
Differential Equations: Variable Separable Case, Homogenous Case, Standard Linear Differential Equations, Bernoulli's Form, Exact Equations, Linear Differential Equations with Constant Coefficients.
Linear Programming: Setting up of the Problem, Various Definitions, Solution by Simplex Method.

UNIT – III

Correlation, Probability and Probability Distribution

*Correlation***:** Multiple and Partial Correlation Involving Three Variables.

Probability: Classical and Axiomatic Definitions, Additive and Multiplicative Rules, Random Variable and Expected Values.

Probability Distributions: Cases of Binomial, Poisson, Normal Distributions.

UNIT – IV

Statistical Inference and Hypothesis Testing

Parameters and Estimates, Sampling Distribution of a Statistic (mean), Standard Error; Properties of an Ideal Estimator and Confidence Interval.

Hypothesis Testing: Large and Small Sample Tests, Tests of Significance of Means, Single Proportion, Difference between Two Proportions, Simple Correlation Coefficient, Difference in Variance (F-test), Testing Goodness of fit and Independence based on Chi-square (χ^2) test.

***Essential Readings* :**

Unit I and II:

1. Aggarwal, S. C. and R. K. Rana. Basic Mathematics for Economists (latest edition), *V.K.* (India), Enterprises, Delhi.
2. Allen, R. G. D. Mathematical Analysis for Economists, Macmillan, 1983.
3. Chiang, A. C. and K.Wainwright. Fundamental Methods of Mathematical Economics. McGraw Hill, 4th edition, McGraw Hill, New York, 2005.

4. Kandoi, Balwant — Mathematics for Business and Economics with Applications, Vol. 1, Himalaya, Mumbai, 2012.

5. Kandoi, Balwant — Mathematics for Business and Economics with Applications, Vol. 2, Himalaya, Mumbai, 2012.

6. Weber J.E. — *Mathematical Analysis (*Business and Economic Applications) 4th Edition, Harper and Row, New York, 1982.

7. Yamane, Taro — Fundamental Methods for Mathematics Economics, Prentice-Hall, New Delhi, 1972.

Unit III and IV:

1. Arora, P. N., Sumeet Arora and S. Arora. — Comprehensive Statistical Methods, S. Chand & Company Ltd, New Delhi, 2007.
2. Aggarwal, S. C. and R. K. Rana. — *Basic Statistics for Economists* (Latest Edition), V K (India) Enterprises, Delhi.

3. Freund, J. E. — Mathematical Statistics, Prentice Hall India, 5th Edition, Prentice-Hall, New Delhi, 1992.

4. Gupta S.P — Statistical Methods (latest Edition), Sultan Chand & Sons, New Delhi.

5. Spiegel, M. R. and Stephens L.J. — Theory and Problems of Statistics 3rd Edition, Schaum's Series, Tata McGraw Hills, New Delhi, 2000.

Paper-MAECO-104 : HISTORY OF ECONOMIC THOUGHT

Max. Marks	:	100
Theory	:	80 Marks
Internal Assessment	:	20 Marks
Time	:	3 Hours
Teaching Hours	:	50

Objectives :

Evolution of economic ideas is both a response to contemporary economic problems and a self-conscious attempt to refine earlier ideas to integrate them as a part of current social thought. The objective of this course is to familiarize the students with the historical evolution of economic ideas into the contemporary economics.

The students would be evaluated at the end of each semester through subjective type questions/answers (both short and essay type). The scripts would be evaluated by the examiners having adequate postgraduate teaching experience in the paper/option concerned.

Pedagogy of the Course Work :

The course relies on a combination of lectures, solving problems, and discussing of academic articles or real-life situations. Teacher will assign topic for assignments on contemporary themes and issues from the syllabi. Special tutorials/contact hour for one-to-one student-teacher interactions.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES :

1. *The syllabus of this paper has been divided into four units.*

2. There shall be 9 questions in all.

3. The first question, which would be **compulsory**, shall be short answer type (word limit 25-30 each). It would carry 15 short questions, spread over the entire syllabus. The candidate will be required to attempt any 10 short answer type questions. Each short answer type question would carry 2 marks ($10 \times 2 = 20$).

4. Rest of the paper shall contain 4 units. Each unit shall have two questions and the candidates shall be required to attempt one question from each Unit— 4 in all. Each question shall carry **15** marks ($15 \times 4 = 60$).

UNIT-I

Nature and Importance of Economic Thought, Mercantilism : Views on Trade, Money and Prices, Wages and Employment. Physiocracy : Natural Order; Net product and Circulation of Wealth.

UNIT-II

Adam Smith : Theories of Value, Distribution and Growth; *Ricardian Economics :* Value Analysis, Theories of Trade and Distribution, Views on Machinery and Employment, Ricardo-Malthus glut controversy.

UNIT-III

Marxian Economics : From Harmony to Class–Conflict, Historical Materialism and Marx's Interpretation of History, Development and Decay of Capitalism.

UNIT-IV

Essential features of Marginalism. Jevon's Theory of Value. Walras's Theory of General Equilibrium. An Overview of Marshall's Contribution.

Essential Readings :

1.	A.K. Dasgupta (1986)	:	Epochs of Economic Theory, Oxford University Press, New Delhi.

SEMESTER–II

Paper-MAECO-201 : MICRO-ECONOMICS–II

Max. Marks	:	100
Theory	:	80 Marks
Internal Assessment	:	20 Marks
Time	:	3 Hours
Teaching Hours	:	50

Objectives :

The objective of this paper is to rigorously and comprehensively equip the students with theoretical concepts, methodology and process of reasoning involved in analyzing economic behavior of individuals, firms and markets using, in general, a static and partial equilibrium framework.

The students would be evaluated at the end of each semester through subjective type questions/answers (both short and essay type). The scripts would be evaluated by the examiners having adequate postgraduate teaching experience in the paper/option concerned.

Pedagogy of the Course Work :

The course relies on a combination of lectures, solving problems, and discussing of academic articles or real-life situations. Teacher will assign topic for assignments on contemporary themes and issues from the syllabi. Special tutorials/contact hour for one-to-one student-teacher interactions.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES :

1. *The syllabus of this paper has been divided into four units.*

2. There shall be 9 questions in all.

3. The first question, which would be **compulsory**, shall be short answer type (word limit 25-30 each). It would carry 15 short questions, spread over the entire syllabus. The candidate will be required to attempt any 10 short answer type questions. Each short answer type question would carry 2 marks ($10 \times 2 = 20$).

4. Rest of the paper shall contain 4 units. Each unit shall have two questions and the candidates shall be required to attempt one question from each Unit— 4 in all. Each question shall carry **15** marks ($15 \times 4 = 60$).

UNIT-I

Analysis of Competitive Markets : Profit Maximization and Equilibrium of a Firm and Industry in the Short Run and Long Run under Perfect Competition including the Supply Curve.
Consumers' and Producers' Surplus and Efficiency of Perfect Competition. Welfare Effects of an Excise Tax, Import Tariff, Price controls (supports) and Production Quotas.

Monopoly : Sources, Measurement and Welfare Costs and Dynamic benefits of Monopoly Power. Monopoly Price Discrimination. Output and Welfare Comparisons with Single Price Monopoly. Inter–temporal Price Discrimination and Peak Load Pricing. Two part tariffs and Tie-in Sales.

Public Policy toward Monopolies : Increasing Competition. Price Regulation. Public ownership of Monopolies.

UNIT-II

Monopolistic Competition : Characteristics. A firm's Short and Long Run Equilibrium with Differentiated Products and Selling Costs (Advertisement). Group equilibrium. The Issue of Excess Capacity under Monopolistic Competition. The debate over Advertising.

Oligopoly : Cournot, Stackellberg and Kinked demand Curve. Price Leadership Models. Collusion and Cartels. Game Theory and Economics of Cooperation: Dominant Strategy and Nash Equilibrium. The Prisoner's Dilemma, Mixed Strategies, Repeated Games, Collusion and Tit-for-Tat Strategy. Public Policy towards Oligopoly. Contestable Markets.

UNIT-III

Markets for Factor Inputs:
Factor Pricing under Perfect Competition:
Demand for a Factor Input when One Input is Variable.
Demand for a Factor Input when Several Inputs are Variable.
Market Demand for a Factor Supply of Labour.
Supply of Labor by an Individual: Trade Off between Work and Leisure.
Market Supply Curve.

Factor Pricing under Imperfect Competition:
Monopolistic Power in Product Market.
Monoposonistic Power in Factor Market.
Bilateral Monopoly.
Competitive Buyer Firm versus Monopoly Union.

UNIT-IV

Welfare Economics :
Social Welfare Function: Utilitarian, Rawlsian and Bergson-Samuelson Social Welfare Functions and Optimization of Social Welfare.
General Equilibrium and Efficiency: Pareto-Optimality Conditions. Perfect Competition and Economic Efficiency. First and Second Theorem of Welfare Economics. Compensation Criteria.
Market Failure and Role of Government under:
Externalities: Externalities and Market Efficiency, Coase, Theorem and Public Policies towards Externalities.
Common Property : Overuse of Common Property, Solving Common Problems.
Public Goods : Types of Public Goods, Markets for Public Goods and Reducing Free Riding.
Asymmetric Information.

Recommended Readings :

Essential Readings :

Paper-MAECO-202 : CONTEMPORARY ISSUES IN INDIAN ECONOMY–II

Max. Marks	:	100
Theory	:	80 Marks
Internal Assessment	:	20 Marks
Time	:	3 Hours
Teaching Hours	:	50

Objective :

The objective of this paper is to acquaint the students with the performance of different sectors of the Indian economy and the policy framework governing them. This will provide them an insight into the past, present and future functioning of the Indian economy and strengthen their analytical capability.

The time-tested method of imparting verbal instructions through lectures would be used. Examples, in so far as possible, would be selected from everyday life/experience. The feedback would be sought through the students writing assignments, tutorials and seminars.

The students would be evaluated at the end of each semester through subjective type questions/answers (both short and essay type). The script would be evaluated by the examiners having adequate postgraduate teaching experience in the paper/option concerned.

Pedagogy of the Course Work :

The course relies on a combination of lectures, solving problems, and discussing of academic articles or real-life situations. Teacher will assign topic for assignments on contemporary themes and issues from the syllabi. Special tutorials/contact hour for one-to-one student-teacher interactions.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES :

1. *The syllabus of this paper has been divided into four units.*

2. There shall be 9 questions in all.

3. The first question, which would be **compulsory**, shall be short answer type (word limit 25-30 each). It would carry 15 short questions, spread over the entire syllabus. The candidate will be required to attempt any 10 short answer type questions. Each short answer type question would carry 2 marks ($10 \times 2 = 20$).

4. Rest of the paper shall contain 4 units. Each unit shall have two questions and the candidates shall be required to attempt one question from each Unit— 4 in all. Each question shall carry **15** marks ($15 \times 4 = 60$).

UNIT - I

Development Process of the Indian Economy in the Post-reform Era :
Service Sector in India – Growth, Pattern and Future Prospects.

Infrastructure Development - Need, Performance and Government Strategy on infrastructure Development with Special Emphasis on Special Economic Zones (SEZs).

Changes in Public Policy with Special Reference to Competition Policy and Consumer Protection Act.

UNIT - II

Financial Sector in the Post-reform Era :
Structure of the Financial System in India. Financial Sector Reforms. Capital Market—Growth, Problems and Reforms.
Role of Securities Exchange Board of India (SEBI).

UNIT – III

Public Finance in the Post-reform Era:
Fiscal Imbalances in the Indian Economy - Sustainability of Public Debt and Fiscal Deficits in Central and State Finances.
Fiscal Responsibility and Budget Management Act, 2003. Need for Expenditure Reforms.

Unit- IV

External Sector the Post-reform Era:
Trade Policy during Post Reform Period. Liberalised Exchange Rate Management System. Foreign Direct Investment – Trends and Issues. India and the World Trade Organisation.

Paper-MAECO-203 : INTERNATIONAL ECONOMICS

Max. Marks	:	100
Theory	:	80 Marks
Internal Assessment	:	20 Marks
Time	:	3 Hours
Teaching Hours	:	50

Objective:

The course intends to provide a deep understanding about the broad principles and theories, which tend to govern the free flow of trade in goods, services and capital – both short-term and long-term – at the global level. The contents of the paper spread over different modules, lay stress on the theory and nature of the subject which, in turn, will greatly help them to examine the impact of the trade policies followed both at the national and international levels as also their welfare implications at macro level and the distribution of gains from trade.

Pedagogy of the Course Work :

The course relies on a combination of lectures, solving problems, and discussing of academic articles or real-life situations. Teacher will assign topic for assignments on contemporary themes and issues from the syllabi. Special tutorials/contact hour for one-to-one student-teacher interactions.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES :

1. *The syllabus of this paper has been divided into four units.*
2. There shall be 9 questions in all.
3. The first question, which would be **compulsory**, shall be short answer type (word limit 25-30 each). It would carry 15 short questions, spread over the entire syllabus. The candidate will be required to attempt any 10 short answer type questions. Each short answer type question would carry 2 marks ($10 \times 2 = 20$).
4. Rest of the paper shall contain 4 units. Each unit shall have two questions and the candidates shall be required to attempt one question from each Unit - 4 in all. Each question shall carry 15 marks ($15 \times 4 = 60$).

UNIT - I

Theories of International Trade - Theories of Absolute Advantage, Comparative Advantage and Opportunity Costs. Heckscher Ohlin Theory of Trade, Factor Price Equalization. Empirical Testing of Heckscher Ohlin Theory. New Approaches to Trade Theory: The Product Cycle theory. Technology Gap Theory.

UNIT - II

Imperfect Competition and International Trade: Economies of Scale, Intra-industry Trade.
Terms of Trade: Concepts and Measurement of Terms of Trade.
Theory of Tariff and Non-tariff Barriers: Partial equilibrium Analysis of Tariff; Effects of Tariff on Consumer's and Producer's Surplus; Various Non-tariff Barriers. Regionalism: Various Forms of Economic Integration; The Theory of Customs Union.

UNIT - III

The Balance of Payments and Adjustments: Concepts and Components of Balance of Payments. Causes of Disequilibrium in the Balance of Payments.

The Process of Adjustment Under:
Gold Standard - Specie Flow Mechanism;

Fixed Exchange Rate - Devaluation, Marshal Lerner's Conditions, Keynesian Absorption Approach, J-Curve Effect.
Flexible Exchange Rate - Mundell Fleming model.
Foreign Trade Multiplier.

UNIT – IV

Foreign Exchange Markets: Euro Currency Markets, International Bond Markets. Contemporary Exchange Rate Systems. Foreign Exchange Transaction Forms. Foreign Exchange Arbitrage and Market Hedging. World Trading System - WTO.

Paper- MAECO-204 : ECONOMICS OF PUBLIC FINANCE

Max. Marks	:	100
Theory	:	80 Marks
Internal Assessment	:	20 Marks
Time	:	3 Hours
Teaching Hours	:	50

Objective :

Role and functions of the Government in an economy have been changing with the passage of time. The term 'Public Finance' has traditionally been applied to the package of those policies and operations which involve the use of tax and expenditure measures while budgetary policy is an important part to understand the basic problems of use of resources, distribution of income etc. There are vast array of fiscal institutions – tax systems, expenditure programmes, budgetary procedures, stabilization instruments, debt issues, levels of government etc., which raise a spectrum of issues arising from the operation of these institutions. Further, the existing of externalities, concern for adjustment in the distribution of income and wealth, etc. require political processes for their solution in a manner which combines individual freedom and justice. This paper combines a thorough understanding of fiscal institutions with a careful analysis of the issues which underline budgetary policies in general and Indian experience in particular.

The students would be evaluated at the end of the academic year through subjective type questions/answers (both short and essay type). The scripts would be evaluated by the examiners having adequate postgraduate teaching experience in the paper/option concerned.

Pedagogy of the Course Work :

The course relies on a combination of lectures, solving problems, and discussing of academic articles or real-life situations. Teacher will assign topic for assignments on contemporary themes and issues from the syllabi. Special tutorials/contact hour for one-to-one student-teacher interactions.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES :

1. *The syllabus of this paper has been divided into four units.*

2. There shall be 9 questions in all.

3. The first question, which would be **compulsory**, shall be short answer type (word limit 25-30 each). It would carry 15 short questions, spread over the entire syllabus. The candidate will be required to attempt any 10 short answer type questions. Each short answer type question would carry 2 marks ($10 \times 2 = 20$).

4. Rest of the paper shall contain 4 units. Each unit shall have two questions and the candidates shall be required to attempt one question from each Unit— 4 in all. Each question shall carry **15** marks ($15 \times 4 = 60$).

UNIT-I

Scope of Public Finance. Private and Public Goods : Allocation Function, Efficient Provision of Public Goods in a Partial and General Equilibrium Approach. Role of Budget with Special Reference to the Goal of Distribution.

UNIT-II

Various Approaches of Equity in Taxation; Benefit Principle, Lindahl Theory and Ability to Pay Approach. Incidence analysis in a partial and General Equilibrium Setting. Excess burden. Effects of Taxation on Work Efforts, Savings and investment.

UNIT-III

Growth and Structure of Public Expenditure. Wagner's Law and Peacock - Wiseman Hypothesis. Pattern of Public Expenditure in India and Recent Reforms in India.

UNIT-IV

Deficit Finance. Issues relating to Public debt : Debt Burden Analysis and Management of Public Debt; Recent Policy in India.
Central State Financial Relations in India.

Recommended Readings :

SEMESTER-III

Paper-MAECO-301 : MACRO - ECONOMICS-I

Max. Marks	:	100
Theory	:	80 Marks
Internal Assessment	:	20 Marks
Time	:	3 Hours
Teaching Hours	:	50

Objective :

Macroeconomics or aggregative economics analysis establishes the functional relationship between the large aggregates. The aggregate analysis has assumed such a great significance in recent times that a prior understanding of macroeconomic theoretical structure is considered essential for the proper comprehension of the different issues and policies. Macroeconomics now is not only a scientific method of analysis; but also a body of empirical economic knowledge.

The paper entitled "Macro-Economics-I" equips the students at the postgraduate level to understand systemic facts and latest theoretical developments for empirical analysis.

The students would be evaluated at the end of each semester through subjective type questions/answers (both short and essay type). The scripts would be evaluated by the examiners having adequate postgraduate teaching experience in the paper/option concerned.

Pedagogy of the Course Work :

The course relies on a combination of lectures, solving problems, and discussing of academic articles or real-life situations. Teacher will assign topic for assignments on contemporary themes and issues from the syllabi. Special tutorials/contact hour for one-to-one student-teacher interactions.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES :

1. *The syllabus of this paper has been divided into four units.*

2. There shall be 9 questions in all.

3. The first question, which would be **compulsory**, shall be short answer type (word limit 25-30 each). It would carry 15 short questions, spread over the entire syllabus. The candidate will be required to attempt any 10 short answer type questions. Each short answer type question would carry 2 marks ($10 \times 2 = 20$).

4. Rest of the paper shall contain 4 units. Each unit shall have two questions and the candidates shall be required to attempt one question from each Unit— 4 in all. Each question shall carry **15** marks ($15 \times 4 = 60$).

UNIT-I

Consumption Function : Absolute Income Hypothesis, Relative Income Hypothesis, Permanent Income and Life Cycle Hypotheses, Consumption under Uncertainty – Modern approach.

UNIT-II

Investment Function : Keynesian Approach, Accelerator Theory and Neo-Classical Theory of Investment and Tobin's Q Theory of Investment.

UNIT-III

Demand for Money : Quantity Theory of Money, Keynesian Approach, Baumol and Tobin's Contribution, Friedman's Restatement of Quantity Theory of Money.

UNIT-IV

Supply of Money : Definition of Money and its importance in Macroeconomics. Money Multiplier and Credit Creation by Commercial Banks.
Derivation, Properties and Shifts of IS and LM Curves and Simultaneous Equilibrium in Money and Product Markets. Effects of Monetary and Fiscal Policies under Different Cases in the IS-LM Framework.

Essential Readings :

Paper-MAECO-302 : ECONOMICS OF GROWTH AND DEVELOPMENT –I

Max. Marks	:	100
Theory	:	80 Marks
Internal Assessment	:	20 Marks
Time	:	3 Hours
Teaching Hours	:	50

Objective :

As a sequel to the post-second war developments, the study of Economic Development gained impetus because three-fourths of humanity was experiencing wretched conditions of existence. There was a pressing need in those countries for uplifting their economic conditions by restructuring their economies to acquire greater diversity, efficiency and equity, in consonance with their priorities.

Since a variety of perspectives were available, the policy makers were eager to acquaint themselves with various policy options in their bid to re-construct their dilapidated economies. In addition, various international bodies were also keen to help and guide the laggards. Consequently, the study of development economics assumed greater significance.

In recent times, the resurgence of marketism and greater focus on areas like education, health, sanitation, energy and environment, and infrastructure development, hitherto relegated to the background, have reopened some of the old debates besides opening up new areas of investigation. Growth and Development economists are making earnest efforts at theorizing to break fresh grounds. Consequently, study of this discipline continues to be of prime importance.

Modules incorporated in this paper are devoted to the theories of growth and development, importance of agriculture, and the rational and pattern of industrialization in developing countries. The other important issues in the context of development such as infrastructure-linkages, role of international trade, importance of economic policies and relevance of planning have been included in the modules of this paper.

The time-tested method of imparting verbal instructions through lectures would be used. Examples, in so far as possible, would be selected from everyday life/experience.

The students would be evaluated at the end of each semester through subjective type questions/answers (both short and essay type). The scripts would be evaluated by the examiners having adequate postgraduate teaching experience in the paper/option concerned.

Pedagogy of the Course Work :

The course relies on a combination of lectures, solving problems, and discussing of academic articles or real-life situations. Teacher will assign topic for assignments on contemporary themes and issues from the syllabi. Special tutorials/contact hour for one-to-one student-teacher interactions.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES :

1. *The syllabus of this paper has been divided into four units.*
2. There shall be 9 questions in all.
3. The first question, which would be **compulsory**, shall be short answer type (word limit 25-30 each). It would carry 15 short questions, spread over the entire syllabus. The candidate will be required to attempt any 10 short answer type questions. Each short answer type question would carry 2 marks ($10 \times 2 = 20$).
4. Rest of the paper shall contain 4 units. Each unit shall have two questions and the candidates shall be required to attempt one question from each Unit— 4 in all. Each question shall carry **15** marks ($15 \times 4 = 60$).

UNIT-I

Understanding Development : Living in a heterogeneous World - Islands of Prosperity and How the other Three Quarters Live. Dividing the World and Levels of Development (Development as an Evolving Concept i.e. Development, Growth and Change; Goulet's Three Core Values of Development; Sen's Conception of Development; Income/Output based Measures and Their Inadequacies; PQLI and HDI as Indicators of Development).

UNIT-II

Diverse Structure and Common Characteristics of Developing Nations : Size and Income Level (The Vicious Circle of Poverty and Low Level Equilibrium Trap), Historical Background (Colonialism and Dependence), Meaning of Dualism, its Characteristics and Forms, Resources and Technology (Quantum and Quality of Natural Resources, Physical Capital, and Technology); Values and Institutions.

UNIT-III

Theories of Development : David Ricardo; Karl Marx; Schumpeter and Rostow's Theory of Stage of Economic Growth.

UNIT-IV

Population Growth, Economic Development and Environment : The Historical Changes in World Population, Demographic Transition, Interrelation between Population Growth and Economic Development (from Pessimism to Optimism), Sustainable Development (Conceptualization, Concern, Indicators and Remedial Measures).

Essential Readings :

1. Meier, Gerald M. and James E. Raunch (2003) : Leading Issues in Economic Development, Oxford University Press, New York.
2. Thirlwall, A. P. (2003) : Growth and Developing, Seventh Edition, Palgrave Macmillan, New York.
3. Todaro, Michael P. and Stephen C. Smith (2004) : Economic Development, Pearson Education (Singapore) Pvt. Ltd., Indian Branch, Delhi.
4. Ray, Debraj (2004) : Development Economics, Seventh Impression, Oxford University Press, New Delhi.

Paper-MAECO-303 & 304 : (OPTION i) : ECONOMICS OF AGRICULTURE-I

Max. Marks	:	100
Theory	:	80 Marks
Internal Assessment	:	20 Marks
Time	:	3 Hours
Teaching Hours	:	50

Objective :
The focus of this course is to introduce students to the importance of agricultural sector and to the issues associated with agricultural transformation, agricultural production, and demand of and supply for agricultural commodities. The objective is to equip students to analyze and critically assess issues, policies and programmes in these areas with particular emphasis on Indian agriculture.

Pedagogy of the Course Work :
The course relies on a combination of lectures, solving problems, and discussing of academic articles or real-life situations. Teacher will assign topic for assignments on contemporary themes and issues from the syllabi. Special tutorials/contact hour for one-to-one student-teacher interactions.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES :

1. *The syllabus of this paper has been divided into four units.*
2. There shall be 9 questions in all.
3. The first question, which would be **compulsory**, shall be short answer type (word limit 25-30 each). It would carry 15 short questions, spread over the entire syllabus. The candidate will be required to attempt any 10 short answer type questions. Each short answer type question would carry 2 marks ($10 \times 2 = 20$).
4. Rest of the paper shall contain 4 units. Each unit shall have two questions and the candidates shall be required to attempt one question from each Unit— 4 in all. Each question shall carry **15** marks ($15 \times 4 = 60$).

UNIT-I

Introduction : Nature and Scope of Economics of Agriculture; Specificities of Farm Organisation and Agricultural Production and Markets; Inter-sector Linkages of Agriculture [Backward and Forward Linkages and Feedback Effects].

Role of Agriculture in Economic Development : Contribution of Agriculture to Economic Development; Historical Perspective [Experience of England, United States, Australia, Latin America, Soviet Russia, Japan, and India]; Declining Role of Agriculture and Dilemmas of Development.

UNIT-II

Agricultural Production:
Uniqueness of Agricultural Production; Various Types of Factor-Product, Factor-Factor, and Product-Product Relations; Cobb-Douglas and CES production functions.
Role of Farm Size and Structure in Equilibrium, Productivity, and Return to Scale.
Sources and Barriers Barriers to Agricultural Development.

UNIT-III

Agricultural Transformation:
Schultz Theory of Transformation of Traditional Agriculture
Mellor's Model of Agricultural Development
Hayami-Ruttan Induced Innovation Model of Agricultural Development.
Agricultural Transformation: Indian Experience

UNIT-IV

Risk and Uncertainty in Agriculture:
Nature and Types of Risks and Uncertainties in Agriculture, Public Policies and Farm Level Measures to Reduce Risk and Uncertainties.

Demand for and Supply of Farm Products:
Characteristics of Demand for Farm Products; Quantity and Quality Components of Demand for Food; Forecasting of Demand for Food Products.

Characteristics of Supply of Farm Products, Supply Response of Farm Products; Role of Price and Non-Price Factors in Inducing Aggregate Supply, Empirical Supply Response Functions and Evidence.

Basic Readings:

1. Bruce L. Gardener and Gordon C. Rausser (Eds.) : Handbook of Agricultural Economics Vol.1A Agricultural Production, Amersterdam, Elsevier Science B.V. 2002.
2. Bruce L. Gardener and Gordon C. Rausser (Eds) : Handbook of Agricultural Economics Vol.1B Marketing, Distribution and Consumption, Amersterdam, Elsevier Science B.V., 2002.

Paper-MAECO-303 & 304 : (OPTION ii) : ECONOMICS OF INDUSTRY-I

Max. Marks	:	100
Theory	:	80 Marks
Internal Assessment	:	20 Marks
Time	:	3 Hours
Teaching Hours	:	50

Objective :

In the contemporary world with globalization and liberalization, more and more attention is being given to industry. Since industry performance critically depends on firms' behavior allowing equilibrium outcome, the course intends to provide a rigorous knowledge of different long-run equilibrium outcome of firms under different conditions from the point of view of public policy. The students are also equipped to deal with debates involved in the industrial development in a cogent and analytical manner, particularly in the Indian context. However, it should be noted that Game Theoretic approach to any topic/problem is outside the scope of the present syllabus.

The students would be evaluated at the end of each semester through subjective type questions/answers (both short and essay type). The scripts would be evaluated by the examiners having adequate postgraduate teaching experience in the paper/option concerned.

Pedagogy of the Course Work :

The course relies on a combination of lectures, solving problems, and discussing of academic articles or real-life situations. Teacher will assign topic for assignments on contemporary themes and issues from the syllabi. Special tutorials/contact hour for one-to-one student-teacher interactions.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES :

1. *The syllabus of this paper has been divided into four units.*

2. There shall be 9 questions in all.

3. The first question, which would be **compulsory**, shall be short answer type (word limit 25-30 each). It would carry 15 short questions, spread over the entire syllabus. The candidate will be required to attempt any 10 short answer type questions. Each short answer type question would carry 2 marks ($10 \times 2 = 20$).

4. Rest of the paper shall contain 4 units. Each unit shall have two questions and the candidates shall be required to attempt one question from each Unit— 4 in all. Each question shall carry **15** marks ($15 \times 4 = 60$).

UNIT-I

Modern Corporation Enterprise. Size and Ownership Structure of Industrial Enterprise. Dominant Position of Corporate and its Characteristics. Issue of Separation of Ownership from Management and Control Models Alternative to Profit Maximization : Baumol, Williamson, Marris and Cyert and March.

UNIT-II

Monopoly Power and Oligopolistic Market Structure. Measures of Sellers' Concentration. Determinant of Sellers' Concentration: Economies of Scale, Barriers to Entry, Mergers, Size and Growth of Markets.

UNIT-III

Market Conduct under Oligopoly : Rivalry and Collusive Conduct. Dominant Firm Behavior and Potential Competition. Limit Price and Contestable Markets. Non-Price Competition with Reference to Advertising.

UNIT-IV

Market Performance : Allocative Efficiency. Market Structure and Profitability. Productive Efficiency and Sub-Optimal Capacity. Allocative versus Productive Efficiency.

Essential Readings :

1. Cohen, K. L. & Cyert R. M. (1976) : Theory of the Firm, Prentice Hall.

Paper-MAECO-303 & 304 : (OPTION iii) : BASIC ECONOMETRICS

Max. Marks	:	100
Theory	:	80 Marks
Internal Assessment	:	20 Marks
Time	:	3 Hours
Teaching Hours	:	50

Objective :

Application of economic theory need a reasonable understanding of economic relationships and relevant statistical methods. The econometric theory thus becomes a very powerful tool for understanding of applied economic relationships and for meaningful research in economics. This paper accordingly is devoted to equip the students with basic theory of econometrics and relevant applications of the methods. The topics covered in the course include various problems faced in estimation of both single equations and simultaneous equation models.

Besides the time-tested method of imparting verbal instructions through lectures, description and derivation of econometric models would be demonstrated by extensive use of blackboard. Examples, in so far as possible, would be selected from everyday life/experience. The feedback would be sought through the students writing assignments, tutorials and seminars.

The students would be evaluated at the end of each semester through subjective type questions/answers (both short and essay type). The scripts would be evaluated by the examiners having adequate postgraduate teaching experience in the paper/option concerned.

Pedagogy of the Course Work :

The course relies on a combination of lectures, solving problems, and discussing of academic articles or real-life situations. Teacher will assign topic for assignments on contemporary themes and issues from the syllabi. Special tutorials/contact hour for one-to-one student-teacher interactions.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES :

1. *The syllabus of this paper has been divided into four units.*

2. There shall be 9 questions in all.

3. The first question, which would be **compulsory**, shall be short answer type (word limit 25-30 each). It would carry 15 short questions, spread over the entire syllabus. The candidate will be required to attempt any 10 short answer type questions. Each short answer type question would carry 2 marks ($10 \times 2 = 20$).

4. Rest of the paper shall contain 4 units. Each unit shall have two questions and the candidates shall be required to attempt one question from each Unit— 4 in all. Each question shall carry **15** marks ($15 \times 4 = 60$).

UNIT-I

Nature & Types of Econometrics, Methodology Followed & Type of Data Used in Econometric Models. Estimation of the Two Variable and Multiple Regression Models with the Method of Ordinary Least Squares (OLS) ; BLUE Properties and Testing of Hypothesis, Maximum Likelihood Estimation (MLE).

UNIT-II

Nature, Consequences, Detection & Remedial Measures for the problems of :
Multicollinearity, Hetroscedasticity and Autocorrelation.

UNIT-III

Distributed Lag and Autoregressive Models:

Introduction and Nature of Distributed Lag (DL) & Auto Regressive (AR) Model. Koyck Approach for Estimation of DL & AR Models Rationalization of Koyck Approach by Adaptive Expectation and Partial Adjustment Hypothesis; Almon's Polynomial Approach.

UNIT-IV

Estimation of Regression Models using Standard Statistical/Econometric Packages [SPSS/E-View/STATA].

Interpretation of Estimates and Hypothesis Testing.

Testing for and redressal of Multicollinearity, Hetroscedasticity, Autocorrelation using Computer Techniques.

Essential Readings :

1. Gujarati Damodar (2002) : Basic Econometrics, 4th Ed., McGraw Hill.
2. Kemanta, J. (2008) : Elements of Econometrics (2nd Ed.), Macmillan, New York.
3. Maddala, G. S. (2007) : Introduction to Econometrics (3rd ed.), Wiley India.

5. Johnston, J. and D. Nardo (1997) : Econometric Methods, 4th Ed., McGraw Hill.
6. Wooldridge, Jeffery M. (2000) : Introductory Econometrics, South Western College Publishing.

Paper-MAECO-303 & 304 : (OPTION iv) : ECONOMICS OF POPULATION

Max. Marks	:	100
Theory	:	80 Marks
Internal Assessment	:	20 Marks
Time	:	3 Hours
Teaching Hours	:	50

Objective :

The main objective of this paper is to make the students aware of the importance of population in economic development and the various theories that explain the growth of population in a country. The study of Quantitative and Qualitative composition of population is also required to understand the dynamics of population growth. Migration and urbanization are the characteristics of structural changes taking place in the economy.

The students would be evaluated at the end of each semester through subjective type questions/answers (both short and essay type). The scripts would be evaluated by the examiners having adequate postgraduate teaching experience in the paper/option concerned.

Pedagogy of the Course Work :

The course relies on a combination of lectures, solving problems, and discussing of academic articles or real-life situations. Teacher will assign topic for assignments on contemporary themes and issues from the syllabi. Special tutorials/contact hour for one-to-one student-teacher interactions.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES :

1. *The syllabus of this paper has been divided into four units.*
2. There shall be 9 questions in all.
3. The first question, which would be **compulsory**, shall be short answer type (word limit 25-30 each). It would carry 15 short questions, spread over the entire syllabus. The candidate will be required to attempt any 10 short answer type questions. Each short answer type question would carry 2 marks ($10 \times 2 = 20$).
4. Rest of the paper shall contain 4 units. Each unit shall have two questions and the candidates shall be required to attempt one question from each Unit— 4 in all. Each question shall carry **15** marks ($15 \times 4 = 60$).

UNIT-I

Theories of Population; Malthus, Marxian, Liebenstein, Becker.

Demographic Transition Theory and Optimum Population Theory.

Population and Economic Development. Population as "Limits to Growth and as Ultimate Source".

UNIT-II

Population Structure and Characteristics : Impact of Population Growth on Age and Gender Structure. Aging of Population.
Concept of Fertility Transition. Measurement of Fertility and Fertility Differentials in India.
Mortality : Components and Measurement. Mortality Differentials in India: Rural-Urban, Age and Gender.

UNIT-III

Migration : Concepts, Measurement, Migration Selectivity, Causes and Consequences of Migration.
Migration in India : Causes and Trends. Migration Differentials in India : Rural-Urban, Male-Female.

UNIT-IV

Estimation of Population in India : Census, Sampling Vital Registration Methods.
Growth and Structure on Indian Population since Independence.
Population Policy in India since Independence.

OR

Paper-MAECO – 303 & 304 –OPTION iv) : ECONOMICS OF HUMAN RESOURCE DEVELOPMENT

Max. Marks	:	100
Theory	:	80 Marks
Internal Assessment	:	20 Marks
Time	:	3 Hours
Teaching Hours	:	50

Objective :

The objective of this paper is to rigorously and comprehensively equip the students with theoretical concepts, methodology and process of reasoning involved in analysing economic behaviour of individuals, firms and markets using, in general, a static and partial equilibrium framework.

The students would be evaluated at the end of each semester through subjective type questions/answers (both short and essay type). The scripts would be evaluated by the examiners having adequate postgraduate teaching experience in the paper/option concerned.

Pedagogy of the Course Work :

The course relies on a combination of lectures, solving problems, and discussing of academic articles or real-life situations. Teacher will assign topic for assignments on contemporary themes and issues from the syllabi. Special tutorials/contact hour for one-to-one student-teacher interactions.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES :

1. *The syllabus of this paper has been divided into four units.*
2. There shall be 9 questions in all.
3. The first question, which would be **compulsory**, shall be short answer type (word limit 25-30 each). It would carry 15 short questions, spread over the entire syllabus. The candidate will be required to attempt any 10 short answer type questions. Each short answer type question would carry 2 marks ($10 \times 2 = 20$).
4. Rest of the paper shall contain 4 units. Each unit shall have two questions and the candidates shall be required to attempt one question from each Unit— 4 in all. Each question shall carry 15 marks ($15 \times 4 = 60$).

UNIT-I

Human Resource Development (HRD):
Human Resource Development in National Perspective. Relevance of Human Resource Development in India.

Human Resource Development in Organizational Perspective. Traditional and Modern Approaches to Human Resource Development.

Human Resource Development in Global Perspective. Emerging Human Resource Management Concepts in New Millennium; Human Resource Information System.

UNIT-II

Human Capital:
Concept and Measurement of Human Capital.

Investing in Human Capital: Becker's Model. Concept of 'On the Job Training' and Re-training.

Endogenous Growth: Role of education, Research and Knowledge: Arrow, Romar and Lucas Models.

UNIT-III

Managing Human Resources:
Techniques of Labour Demand Forecasting, Establishing Pay Plans, Various Incentive Schemes.
Internal Labour Market.

Asymmetric Information in the Functioning of the Human Resource Market: Principal Agent Problem, Market Signaling, Efficient Wage Theory.

Government and Labour Market: Employment, Expenditure and Legislation.

Brain Drain and Migration (Theories, and the Emerging Challenges).

UNIT-IV

***Human Resources Development and Challanges*:**

Migration as Human Capital Investment, Rural-Urban Migration (Harris-Todaro Model), Welfare Implications of International Migration; Emerging Challenges of Migration and Issue of Brain Drain.

Economics of Discrimination - Concept, Types, Models of Discrimination. (Becker, Crowding Model, Monopsony Model and Theory of Statistical Discrimination).

Recommended Readings :

Essential Readings :

SEMESTER-IV

Paper-MAECO-401 : MACRO - ECONOMICS-II

Max. Marks	:	100
Theory	:	80 Marks
Internal Assessment	:	20 Marks
Time	:	3 Hours
Teaching Hours	:	50

Objective :

Macroeconomics or aggregative economic analysis and establishes the functional relationship between the large aggregates. The aggregate analysis has assumed such a great significance in recent times that a prior understanding of macroeconomic theoretical structure is considered essential for the proper comprehension of the different issues and policies. Macroeconomics now is not only a scientific method of analysis; but also a body of empirical economic knowledge.

The paper entitled "Macro Economics" equips the students at the postgraduate level to understand systemic facts and latest theoretical developments for empirical analysis.

The students would be evaluated at the end of each semester through subjective type questions/answers (both short and essay type). The scripts would be evaluated by the examiners having adequate postgraduate teaching experience in the paper/option concerned.

Pedagogy of the Course Work :

The course relies on a combination of lectures, solving problems, and discussing of academic articles or real-life situations. Teacher will assign topic for assignments on contemporary themes and issues from the syllabi. Special tutorials/contact hour for one-to-one student-teacher interactions.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES :

1. *The syllabus of this paper has been divided into four units.*
2. There shall be 9 questions in all.
3. The first question, which would be **compulsory**, shall be short answer type (word limit 25-30 each). It would carry 15 short questions, spread over the entire syllabus. The candidate will be required to attempt any 10 short answer type questions. Each short answer type question would carry 2 marks ($10 \times 2 = 20$).
4. Rest of the paper shall contain 4 units. Each unit shall have two questions and the candidates shall be required to attempt one question from each Unit — 4 in all. Each question shall carry **15** marks ($15 \times 4 = 60$).

UNIT-I

Demand and Supply of Labour : Classical and Keynesian Views. Keynesian and Classical Models of Income and Employment Determination. Wage-Price Flexibility and Automatic Full Employment – Classical versus Keynesian Approach.

UNIT-II

Inflation : Its effects, Kaldorian Theory of Distribution. Quantity Theory View, Keynes' view. Phillips Curve Analysis, Long Run Phillips Curve, Monetarist and Structuralist Views of Inflation.

Trade Cycle Theories : Accelerator-Multiplier Interaction Models, Kaldor Model.

UNIT-III

Balance of Payments : Current and Capital Accounts, Mundell-Flemming Open Economy Model, Disequilibrium in Balance of Payments and Its Consequences, Balance of Payments Adjustment Policies under Fixed and Flexible Exchange Rates.

UNIT-IV

Monetary and Fiscal Policies : Objectives, Conflicts Among Objectives, Mundell Model, Swan Model.

Recent Developments : Monetarism. New-Classical Macroeconomics : Rational Expectation Revolution and Real Business Cycle Theory. New-Keynesian Macroeconomics.

Recommended Readings :

Essential Readings :

Paper-MAECO-402 : ECONOMICS OF GROWTH AND DEVELOPMENT –II

Max. Marks	:	100
Theory	:	80 Marks
Internal Assessment	:	20 Marks
Time	:	3 Hours
Teaching Hours	:	50

Objective :

The main objective of this course is to look at the process of growth and development in terms of its characteristics such as structural transformation, pattern of distribution of income, its inter-sectoral interface. In addition, it also aims to take up issues pertaining to the emerging global scenario and the debate concerning the planning vs marketism which is so vital for development theorists and practitioners.

Pedagogy of the Course Work :

The course relies on a combination of lectures, solving problems, and discussing of academic articles or real-life situations. Teacher will assign topic for assignments on contemporary themes and issues from the syllabi. Special tutorials/contact hour for one-to-one student-teacher interactions.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES :

1. *The syllabus of this paper has been divided into four units.*
2. There shall be 9 questions in all.
3. The first question, which would be **compulsory**, shall be short answer type (word limit 25-30 each). It would carry 15 short questions, spread over the entire syllabus. The candidate will be required to attempt any 10 short answer type questions. Each short answer type question would carry 2 marks ($10 \times 2 = 20$).
4. Rest of the paper shall contain 4 units. Each unit shall have two questions and the candidates shall be required to attempt one question from each Unit— 4 in all. Each question shall carry **15** marks ($15 \times 4 = 60$).

UNIT-I

Economic Growth and Structural Change: Structural Changes in the Composition of Gross Domestic Product, Occupational Structure, Structure of Capital Accumulation; and Accumulation of Human Capital; Exploring the Relationship between Economic Development and Income Distribution (Kuznets' inverted U – Shaped Curve and Augmented Kuznets' Curve).

UNIT-II

***Agriculture-Industry Interface*:** Interdependence between Agriculture and Industry; Industrialization and Urbanization (The Models of Lewis, Fei and Ranis and Harris-Todaro); The Balanced Growth Doctrine (Review of Rosenstein, Nurkse and Lewis); The Strategy of Unbalanced Growth (Hirschman's version), and the Reconciliation of the Two.

UNIT-III

Economic Isolation and Integration with the Global Market: International Trade and Economic Development (Three Stories about Trade and Development Relationship); Developmental Aid - Role, Trends and Constraints; Role of Foreign Direct Investment (FDI) and Multi-National Corporations (MNCs) in the Emerging Scenario.

UNIT-IV

Market and State: An Overview of the Economic Functions of the Market and State; Efficiency of the Competitive Market, Market Failure, Government Failure, on the Choice of Economic System, Market Failure in a Dynamic Economy.

Recommended Readings:

Essential Readings :

Paper-MAECO-403 & 404 : (OPTION – i) : ECONOMICS OF AGRICULTURE-II

Max. Marks	:	100
Theory	:	80 Marks
Internal Assessment	:	20 Marks
Time	:	3 Hours
Teaching Hours	:	50

Objective :

The focus of this course is to introduce students to issues associated with agricultural finance, agricultural markets, food security and international trade in agricultural commodities, and also to expose students to the recent developments in Indian agriculture. The objective is to equip students to analyse and critically assess issues, policies and programmes in these areas.

Pedagogy of the Course Work :

The course relies on a combination of lectures, solving problems, and discussing of academic articles or real-life situations. Teacher will assign topic for assignments on contemporary themes and issues from the syllabi. Special tutorials/contact hour for one-to-one student-teacher interactions.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES:

1. *The syllabus of this paper has been divided into four units.*
2. There shall be 9 questions in all.
3. The first question, which would be **compulsory**, shall be short answer type (word limit 25-30 each). It would carry 15 short questions, spread over the entire syllabus. The candidate will be required to attempt any 10 short answer type questions. Each short answer type question would carry 2 marks ($10 \times 2 = 20$).
4. Rest of the paper shall contain 4 units. Each unit shall have two questions and the candidates shall be required to attempt one question from each Unit— 4 in all. Each question shall carry **15** marks ($15 \times 4 = 60$).

UNIT-I

Agricultural Finance :

Financial Characteristics of Agriculture, Imperfect Information [Agency Relationship, Adverse Selection, and Moral Hazard] and Enforcement Problems in Credit Markets; Segmented Rural Credit Markets, Resolving Information and Incentive Problems; Managing Borrowers' Credit Risks; Agribusiness and Trade Financing; and Rationale for Government Intervention in Rural Credit Markets.

Structure and Functioning of Rural Credit Market in India.

UNIT-II

Agricultural Markets :

Nature, Types and Problems of Agricultural Commodity Markets; Marketing Margins and Marketing Margin Determinants; and Evaluation of Marketing Efficiency.

Horizontal Structure of Agricultural Marketing, Vertical Market Relationships, Institutional and Organizations in Agricultural Markets [Farmers Cooperatives, Marketing Orders, Marketing Boards and Trading Enterprises].

Instability in Agricultural Markets, Price Stabilization and Social Benefits, Storage and Market Stabilization, Role of Commodity Futures and Options in Stabilization.

UNIT-III

Food Security and International Trade :

Concept, Threat, Indicators and Mechanism to Food Security; Food Assistance Programmes [both Domestic and International].

Main Features of International Trade in Agricultural Commodities, Domestic Agricultural and Trade Policies of Developed Countries and Their Impact on World Trade, Agriculture in GATT Negotiations and WTO.

UNIT-IV

Recent Developments in Indian Agriculture :

Indian Agricultural Development Strategy Since Independence.

Opportunities and Challenges [Expectations, Performance, and Emerging Constraints and Potentials] for Indian Agriculture in the Post Reform Period.

National Agricultural Policy (Latest) and the Agricultural Development Strategy in the Latest Five Year Plan.

Essential Readings :

1. Besley, Timothy : **"** How Do Market Failures Justify Interventions in Rural Credit Markets?" The World Bank Research Observer, Vol. 9, No.1 (1994)

Paper-MAECO-403 & 404 : OPTION (ii) ECONOMICS OF INDUSTRY-II

Max. Marks	:	100
Theory	:	80 Marks
Internal Assessment	:	20 Marks
Time	:	3 Hours
Teaching Hours	:	50

Objective :

In the contemporary world with globalization and liberalization more and more attention is being given to industry. Since industry performance critically depends on firms' behavior allowing equilibrium outcome, the course intends to provide a rigorous knowledge of different long-run equilibrium outcome of firms under different conditions from the point of view of public policy. The students are also equipped to deal with debates involved in the industrial development in a cogent and analytical manner, particularly in the Indian context. However, it should be noted that Game Theoretic approach to any topic/problem is outside the scope of the Present syllabus.

The time-tested method of imparting verbal instructions through lectures would be used. Examples, in so far as possible, would be selected from everyday life/experience. The feedback would be sought through the students writing assignments, tutorials and seminars.

The students would be evaluated at the end of each semester through subjective type questions/answers (both short and essay type). The scripts would be evaluated by the examiners having adequate postgraduate teaching experience in the paper/options concerned.

Pedagogy of the Course Work :

The course relies on a combination of lectures, solving problems, and discussing of academic articles or real-life situations. Teacher will assign topic for assignments on contemporary themes and issues from the syllabi. Special tutorials/contact hour for one-to-one student-teacher interactions.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES :

1. *The syllabus of this paper has been divided into four units.*
2. There shall be 9 questions in all.
3. The first question, which would be **compulsory**, shall be short answer type (word limit 25-30 each). It would carry 15 short questions, spread over the entire syllabus. The candidate will be required to attempt any 10 short answer type questions. Each short answer type question would carry 2 marks ($10 \times 2 = 20$).
4. Rest of the paper shall contain 4 units. Each unit shall have two questions and the candidates shall be required to attempt one question from each Unit— 4 in all. Each question shall carry **15** marks ($15 \times 4 = 60$).

UNIT-I

Nature of Industrial Data for Organized Industry. Annual Survey of Industries – Scope and Coverage. Uses and Critique of ASI Data. Major Classification of the Organized Industry – by Economic Activities, Type of Organization, Type of Ownership, Size of Employment, Size of Output and Net Value Added and by States.

UNIT-II

Public Policy for Industrial Development in India since Independence – A Critique. Pattern of Industrial Growth and Changes in Industrial Structure in India since 1951. National Manufacturing Policy.

UNIT-III

Analysis of Business Groups in India. Ownership Pattern of Indian Corporate Sector. MRTP and Nature of Concentration in Indian Industry. Liberalization and Privatization in Indian industry. Mergers and Takeovers. Competition Policy and Consumer Protection in India.

UNIT-IV

India's FDI Inflows – Nature and Extent. FDI and Acquisition of Technology in India. Trends in Indian Direct Investment Abroad. Impact of Economic Reforms on Industrial Sector in India.

Paper-MAECO-403 & 404 (OPTION – iii) : MATHEMATICAL ECONOMICS

Max. Marks	:	100
Theory	:	80 Marks
Internal Assessment	:	20 Marks
Time	:	3 Hours
Teaching Hours	:	50

Objective :

This course is designed to equip students to understand the economic concepts and theories by using mathematical tools and techniques to refine the verbal logic. The use of calculus has permitted formulation of economic problems in multivariable mode and yield valuable insight about optimizing human behavior. Modern algebraic tools allow convenient handling of simultaneous equations in the context of linear programming, game theory and input-output analysis.

Mathematical economics deals with various applications of mathematical tools and techniques in defining and developing economic relationships. This course has been accordingly designed to include various mathematical techniques/methods/models related to the different parts of economic theory like consumer

theory, theory of production, pricing, trade cycles, growth models etc. The paper covers important aspects of microeconomics; macroeconomics and development theory and the various modules have been accordingly designed.

The students would be evaluated at the end of each semester through subjective type questions/answers (both short and essay type). The scripts would be evaluated by the examiners having adequate postgraduate teaching experience in the paper/option concerned.

Pedagogy of the Course Work :

The course relies on a combination of lectures, solving problems, and discussing of academic articles or real-life situations. Teacher will assign topic for assignments on contemporary themes and issues from the syllabi. Special tutorials/contact hour for one-to-one student-teacher interactions.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES :

1. *The syllabus of this paper has been divided into four units.*
2. There shall be 9 questions in all.
3. The first question, which would be **compulsory**, shall be short answer type (word limit 25-30 each). It would carry 15 short questions, spread over the entire syllabus. The candidate will be required to attempt any 10 short answer type questions. Each short answer type question would carry 2 marks ($10 \times 2 = 20$).
4. Rest of the paper shall contain 4 units. Each unit shall have two questions and the candidates shall be required to attempt one question from each Unit— 4 in all. Each question shall carry **15** marks ($15 \times 4 = 60$).

UNIT-I

Theory of Consumer Behaviour : Concept of Elasticities – Generalization to n-Variable Case; Linear Expenditure Function and Indirect Utility Function; Roy's Identity; Expenditure Function; Consumer's Surplus; Choice under Risk, Von Neumann Utility Function; Intertemporal Utility Maximization.

Production Analysis : Homogeneous and Homothetic Production Functions; Elasticity of Substitution; Cobb-Douglas, CES and VES Production Functions; Output and Profit Maximization, Cost Minimization; Analysis of Joint Profit Maximization and Multi-Product Firm; Production Possibility Curve.

UNIT-II

Market Equilibrium : Existence and Uniqueness of Equilibrium; Stability of Equilibrium; Dynamic Equilibrium with Lagged Adjustment; Cobweb Model. Multi-Market Equilibrium, Walras's Law and the Existence of General Equilibrium.

Input-Output Analysis : Static Open and Closed Models; Viability Conditions; Activity Analysis Interpretation of Input-Output Model; Aggregation Problem; Substitution Theorem; Cost and Price Determination; Dynamic Leontief-System.

UNIT-III

Macro Economics : Relative Efficiency of Fiscal and Monetary Policy under Different Regimes of IS-LM Model : A Mathematical Representation, the Balanced Budget Multiplier.

Growth Models : An Overview of Neo-Classical Growth Models and Golden Rule of Capital Accumulation. Growth Accounting; Models of Endogenous Growth.

UNIT-IV

Linear Programming : Simplex Method; Dual and its Economic Interpretation; Complimentary Slackness Conditions; Duality Theorems; Applications of Linear Programming in Economics.

Game Theory : Two person Zero Sum Game, Max-Min Strategy. Non-Zero Sum Game, Static Games in Complete Information, Strongly and Weakly Dominant Strategies, Dominant Strategy Equilibrium; Pure and Mixed Strategies; Concept of Nash Equilibrium–Examples such as Prisoner's Dilemma, Battle of Sex, Matching Pennies, Co-ordination Problem and Multiple Equilibria, etc., Focal Points, Dynamic Games in Complete Information, Sub-Games and Sub-Game Perfect Nash Equilibrium.

Paper-MAECO-403 & 404 : (OPTION - iv) : ECONOMICS OF MONEY AND BANKING

Max. Marks	:	100
Theory	:	80 Marks
Internal Assessment	:	20 Marks
Time	:	3 Hours
Teaching Hours	:	50

Objective :

Money and banking constitute important components towards understanding of economics. A clear understanding of the operations of money and banking and their interaction with the rest of the economy is essential to realize how monetary forces operate through a multitude of channels – market, non-market, institutions and among others, the state. The operation of financial markets and their regulations are to be studied to appreciate their key-role in an economy, especially after the far reaching banking and financial sector reforms in India and elsewhere. The present course is designed to acquaint the students fully with the changing role of financial institutions in the process of growth and development. Accordingly, the paper on 'Economics of Money and Banking' is an optimal integration of monetary theory, banking and non-banking financial institutions, which combines with itself a systematic discussion of the theory, institutions and policy with special reference to India.

The students would be evaluated at the end of each semester through subjective type questions/answers (both short and essay type). The scripts would be evaluated by the examiners having adequate postgraduate teaching experience in the paper/option concerned.

Pedagogy of the Course Work :

The course relies on a combination of lectures, solving problems, and discussing of academic articles or real-life situations. Teacher will assign topic for assignments on contemporary themes and issues from the syllabi. Special tutorials/contact hour for one-to-one student-teacher interactions.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES :

1. *The syllabus of this paper has been divided into four units.*
2. There shall be 9 questions in all.
3. The first question, which would be **compulsory**, shall be short answer type (word limit 25-30 each). It would carry 15 short questions, spread over the entire syllabus. The candidate will be required to attempt any 10 short answer type questions. Each short answer type question would carry 2 marks ($10 \times 2 = 20$).
4. Rest of the paper shall contain 4 units. Each unit shall have two questions and the candidates shall be required to attempt one question from each Unit— 4 in all. Each question shall carry **15** marks ($15 \times 4 = 60$).

UNIT-I

The Definition of Money : Function and Types of Money, Post-War Controversy on the Definition of Money and Money Supply – The Theoretical Debate and Empirical Attempts.

Demand for Money : The Classical Quantity Theory of Money, The Keynesian Approach, Friedman's Theory.

Supply of Money : Money Creation by the Banking System. High Powered Money and Money Multiplier. Measures of Money Supply in India.

UNIT-II

Term Structure of Interest Rates :
The Expectations Theory, Liquidity Premium Theory, Market Segmented Theory, Preferred Habitat Theory.

Monetary Policy :
Targets, Goals and the Trade Offs Among Alternate Goals, Lags in Operation, Transmission Mechanism – Classical Model, Keynesian Model and Monetarist Model, Rules vs. Discretion.

UNIT-III

Central Banking :
Origin and Evolution, Main Functions, Policy Tools, RBI – Monetary Policy and Autonomy.

Commercial Banking :
Functions, Major Developments in Commercial Banking in India since Nationalization. Banking Sector Reforms.

UNIT-IV

Development Financial Institutions : Role, Growth and Structure of Development Financial Institutions in India. Types and Control of Non - Banking Financial Companies (NBFCs) by RBI.

International Monetary System :
IMF and International Liquidity. European Monetary System – Features of the Maastricht Treaty and Post Maastricht Treaty Developments.

Recommended Readings :

Essential Readings :

1. Bofinger Peter (2001) : Monetary Policy : Goals, Institutions, Strategy and Instruments, Oxford University Press.
2. Dennis Geoggrey, E.J. (1981) : Monetary Economics, Longman.
3. Dinlio, A. Eugene (Latest Edition) : Theory and Problems of Money and Banking, International Edition (Schaum's Outline Series).

2. Reserve Bank of India : Various Reports.

OR

Paper-MAECO-403 & 404 : (OPTION – iv) : ECONOMICS OF FINANCIAL MARKETS AND INSTITUTIONS

Max. Marks	:	100
Theory	:	80 Marks
Internal Assessment	:	20 Marks
Time	:	3 Hours
Teaching Hours	:	50

Objective :

The positive and significant role of financial institutions in the process of growth and development has been very well recognized in the literature and indeed has become more important during the last two decades as the financial systems of different countries have become integrated in the process of globalization. India is no exception and has taken far reaching measures since 1991 in this direction. It is, therefore, essential that the students of economics should be well conversant with the theory and practice of different financial institutions and markets to understand and analyse the interconnection between the monetary forces and real forces, their developmental role and limitations in shaping and influencing the monetary and related policies both at the national and international levels.

The students would be evaluated at the end of each semester through subjective type questions/answers (both short and essay type). The scripts would be evaluated by the examiners having adequate postgraduate teaching experience in the paper/option concerned.

Pedagogy of the Course Work :

The course relies on a combination of lectures, solving problems, and discussing of academic articles or real-life situations. Teacher will assign topic for assignments on contemporary themes and issues from the syllabi. Special tutorials/contact hour for one-to-one student-teacher interactions.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES :

1. *The syllabus of this paper has been divided into four units.*
2. There shall be 9 questions in all.
3. The first question, which would be **compulsory**, shall be short answer type (word limit 25-30 each). It would carry 15 short questions, spread over the entire syllabus. The candidate will be required to attempt any 10 short answer type questions. Each short answer type question would carry 2 marks ($10 \times 2 = 20$).
4. Rest of the paper shall contain 4 units. Each unit shall have two questions and the candidates shall be required to attempt one question from each Unit— 4 in all. Each question shall carry **15** marks ($15 \times 4 = 60$).

UNIT-I

Financial Markets and Financial Institutions :
The role and structure of Financial Markets in the Economy. Functions of Financial Institutions.

Introduction to Corporate Finance :
Various Methods of Corporate Finance, Goals of Financial Management, The Cost of Capital and the Capital Structure.

UNIT-II

The Supply of Securities :
Regulations Governing Supply of Securities, General Characteristics of Securities – Government Bonds – Index Linked Bonds – Corporate Securities, Mutual Funds and Money Market Funds.

The Demand for Securities :
The Time Dimension – Present Value and Duration, Yields on Zero-Coupon Bonds. Measurement of risk, Expected Utility Approach, Mean Variance Portfolio Theory, Portfolio Diversification.

UNIT-III

Efficiency of Securities Markets :
The Efficient Market Hypothesis (EMH), The Capital Asset Pricing Model (CAPM), The Arbitrage Pricing Theory (APT).

Regulation of Financial Markets :
Securities and Exchange Board of India (SEBI) – Role and Functions. Recent Reforms in the Indian Financial Market.

UNIT-IV

Foreign Exchange Market :
Nature, Organisation and Participants.

Paper-MAECO-403 & 404 : (OPTION v) : ADVANCED ECONOMETRICS

Max. Marks	:	100
Theory	:	80 Marks
Internal Assessment	:	20 Marks
Time	:	3 Hours
Teaching Hours	:	50

Objective :

Application of economic theory need a reasonable understanding of economic relationships and relevant statistical methods. The econometric theory thus becomes a very powerful tool for understanding of applied economic relationships and for meaningful research in economics. This paper accordingly is devoted to equip the students with basic theory of econometrics and relevant applications of the methods. The topics covered in the course include various problems faced in estimation of both single equations and simultaneous equations models.

Besides the time-tested method of imparting verbal instructions through lectures, description and derivation of econometric models would be demonstrated by extensive use of blackboard. Examples, in so far as possible, would be selected from everyday life/experience. The feedback would be sought through the students writing assignments, tutorials and seminars.

The students would be evaluated at the end of each semester through subjective type questions/answers (both short and essay type). The scripts would be evaluated by the examiners having adequate postgraduate teaching experience in the paper/option concerned.

Pedagogy of the Course Work :

The course relies on a combination of lectures, solving problems, and discussing of academic articles or real-life situations. Teacher will assign topic for assignments on contemporary themes and issues from the syllabi. Special tutorials/contact hour for one-to-one student-teacher interactions.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES :

1. *The syllabus of this paper has been divided into four units.*
2. There shall be 9 questions in all.
3. The first question, which would be **compulsory**, shall be short answer type (word limit 25-30 each). It would carry 15 short questions, spread over the entire syllabus. The candidate will be required to attempt any 10 short answer type questions. Each short answer type question would carry 2 marks ($10 \times 2 = 20$).
4. Rest of the paper shall contain 4 units. Each unit shall have two questions and the candidates shall be required to attempt one question from each Unit— 4 in all. Each question shall carry **15** marks ($15 \times 4 = 60$).

UNIT-I

Test Procedures and Model Selection:
Specification Errors, Tests of Specification and Misspecification, Errors of Measurement, Encompassing Models and Criteria for Model Selection.

Dummy Variables and Their Use to Test Equality to Two Regressions.

UNIT-II

Qualitative Response Regression Models:
Nature of Qualitative Response Regression Models.
Description and Estimation of Linear Probability, Logit, Probit and Tobit Models.

UNIT-III

Simultaneous Equations Models (SEM):
Nature of SEM's Simultaneous Equation Bias, Identifications Problem.
Rank and Order Conditions. Testing Identification of Economic Models.
Estimation of SEM'S : ILS, 2SLS, 3SLS, LVR and LIML Methods.

UNIT-IV

Time Series Analysis:
Testing Casuality in Economics: Granger Causality Test.
Stationary, Test of Stationary, Spurious Regression, Unit Roots, Dickey-Fuller Test, Cointegration, Engle Granger Test.

Forecasting: AR, MA and ARIMA processes, Box Jenking Methodology.
Vector Auto Regression (VAR) Model, Introduction, Formulation and Estimation.

Panel Data Models:
Introduction: Advantages and Issues Involved in Utilizing Panel Data.
Simple Panel Data Models: Fixed Effects Models – LSDV Approach, Random Effects Models.
Dynamic Panel Model: Random, Coefficient Model.
