5.1 POL 501 GEOPOLITICS: CLASSICAL AND CRITICAL

Maximum Marks	**50**
Theory	**25**
Internal Assessment	**25**
Time:	**3 hours**

Objective: This optional course is aimed at making students understand that there is a complex history and geography --both given and written—to the term 'Geopolitics'. The term was coined at the very end of the 19th century at the service of new forms of nationalism, colonial projects and inter-imperialist rivalry in Europe and the world. With the complex interplay between space and power at its conceptual core, geopolitics has most often been associated with a 'realist' and state-centric approach to international relations. But recent decades have witnessed the rise of a critical geopolitics that focuses on a far wider range of social actors, experiences (including non-Western) and practices. This course provides a concise survey of *classical* geopolitics from a *critical* geopolitical perspective. It draws attention to politics behind the production of geographical knowledge (in plural) of international relations. Illustrations/cases used in this course are drawn largely from both continental and maritime Asia and the Indian Ocean Region.

6.1 GEO 603 INTRODUCTION TO GEOSPATIAL TECHNOLOGY

Maximum Marks	**100**
Theory	**50**
Internal Assessment	**50**
Time:	**3 hours**

Objectives: This course intend to expose the young mind to a cutting-edge geographical technology of remote sensing, GIS and GPS, together known as geospatial technology. The main objective to introduce the fundamental concepts related to geospatial technology with emphasis on practical aspects to develop students' decision making capabilities with scientific orientation.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES

1. The syllabus has been divided into four units. There shall be 9 questions in all, the first question is compulsory and shall be short answer type containing 8 short questions spread over the whole syllabus, to be answered in about 25 to 30 words each. The candidates are required to attempt any 5 short answer type question of 2 marks each, i.e. 5x2=10 marks. Rest of the paper shall contain 4 units. Each unit shall have two long questions and the candidate shall be given internal choice of attempting **one question from each Unit I-IV.** Each question will carry 10 marks. 4x10=40.

2. Each long question would cover about one third or one half of a topic detailed in the syllabus.

3. The paper setter would avoid repetition between different types of questions within one question paper.

Unit-I

Fundamentals of Remote Sensing

Remote Sensing: Definition and Concept of Remote Sensing,
Types of Remote Sensing and Remote Sensing Platforms
Geographical Uses/Applications of Remote Sensing Technology

Unit-II

Basics of Geographic Information System

Concepts of GIS, its Significance and Applications
Components of GIS, Nature of Geographic Data: Spatial and Attribute Data
Raster and Vector Data Models; Data sources for GIS

Unit-III

Concepts of Global Positioning System:

GPS: Concept and Principles of Operation,
GPS Basics: GPS Segment, Positioning, Accuracy and Errors
Types of GPS devices; Applications of GPS

Unit-IV

Applications of Geospatial Technology:

Applications in Environmental Management
Geospatial technologies and Disaster Management
Use of Geospatial technologies in our daily life

Essential Readings:

6.2 GEN 608 CLIMATE CHANGE AND SUSTAINABLE DEVELOPMENT

Maximum Marks	**100**
Theory	**50**
Internal Assessment	**50**
Time:	**3 hours**

Objective: Climate change poses unprecedented serious ethical and political challenges to current institutions and ways of life. This course is based on the assumption that the concepts of 'sustainable development' and 'climate change', and the complex phenomena they represent, should be approached, understood and analyzed in juxtaposition, rather than divorce, with each another. The course aims to provide an understanding of the various aspects of interrelated challenges associated with sustainability and climate change, both on land and at sea, largely from an interdisciplinary social science perspective.

Pedagogy: The paper would be taught using original texts and research papers to encourage students to read more extensively and understand the theme through this reading.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES

1. The syllabus has been divided into FOUR units. There shall be 9 questions in all, the first question is compulsory and shall be short answer type containing 8 short questions spread over the whole syllabus, to be answered in about 25 to 30 words each. The candidates are required to attempt any 5 short answer type question of 2 marks each, i.e. 5x2=10 marks. Rest of the paper shall contain 4 units. Each unit shall have TWO long questions and the candidate shall attempt **four** questions in all selecting at least **one question from each unit.** Each question will carry 10 marks.4x10=40
2. Each long question would cover about one third or one half of a topic detailed in the syllabus.
3. The paper setter would avoid repetition between different types of questions within one question paper.

UNIT I

Understanding Sustainable Development

Concept of sustainable development by familiarising students with major reports and publications on global environmental governance, and critical literature on the politics of sustainability. It provides a means of engaging with the idea of climate change (in Units 2, 3 & 4), through an appreciation of aspects of social justice and equity, central to the narrative(s) of the Global South.

UNIT II

Introducing the Idea of Climate Change

This unit first introduces students to the key documents of the past three decades that emphasise the 'global' nature of the issue of climate change. Additionally, it creates the basis for students to engage independently with the multi-scale politics of climate change, using knowledge and interdisciplinarity as starting points. Students are exposed to the ethical-normative dimensions of climate change through the notions of climate justice with regard to both mitigation and adaptation.

UNIT III

Climate Change as a Project for the Social Sciences

This unit introduces students to the politics of development and globalization, providing a social science frame with which to interrogate climate change, through 'a view from somewhere'. Questions of location and situation are granted relevance and attention in this manner.

UNIT IV

Climate Politics, Policy and International Relations

This unit explores the contours of political and policy engagement with climate change in international relations. It begins with critical appraisals of 'spaces' of climate change, and branches into more detailed analyses of climate diplomacy and the Indian case.

6.3 SKILL ENHANCEMENT PAPERS

REM 604 USE OF SURVEYS AND INTERVIEWS IN SOCIAL SCIENCES

Maximum Marks	**50**
Theory	**25**
Internal Assessment	**25**
Time:	**3 hours**

Objective: To introduce the students to the research method of survey and interview to enhance their skills and understanding of research in social sciences.

Pedagogy: The paper shall ensure practical application of theory through assignments and project work.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES

1. The syllabus has been divided into TWO units. There shall be 7 questions in all, the first question is compulsory and shall be short answer type containing 8 short questions spread over the whole syllabus, to be answered in about 25 to 30 words each. The candidates are required to attempt **any 5 short** answer type question of 1 mark each, i.e. 5x1=5 marks. Rest of the paper shall contain 2 units. Each unit shall have THREE long questions and the candidate shall attempt **four** questions in all selecting at least **two questions from each unit .** Each question will carry 5 marks.4x5=20
2. Each long question would cover about one third or one half of a topic detailed in the syllabus.

3. The paper setter would avoid repetition between different types of questions within one question paper.

UNIT I

Science: Definition; Characteristics; Functions; Aims; Science and Commonsense; Sources of knowledge.

Scientific Method: Definition; Characteristics; Use in social sciences-Problems

Research: Meaning; Uses; Limitations in Social sciences; Ethics in Social Research

UNIT II

Survey Method: Meaning; Types of Data; Types of Survey; Survey Protocols; Fieldwork and problems

Interview: Meaning; Types; Uses; Limitations; Qualities of a Good Interviewer

Questionnaire: Meaning; Types; Uses; Limitations; Question Content; Comparison between interview and questionnaire

Practical Exercise: Constructing and Interview Schedule/Questionnaire
