General Financial Literacy	2	26 Hrs.	0	4 Hrs.	Pass in 12th Standard	NIL

COURSE OBJECTIVE(S):

Basic purpose of this course is to develop and strengthen the idea of financial literacy among learners. Moreover, target is to acquaint the learners with contemporary financial terminology, instruments and personal financial management.

LEARNING OUTCOMES:

1. Learners will understand the idea and importance of financial literacy.
2. The knowledge of common financial terminology and digital jargon of financial world would facilitate learners in the conduct of various day-to-day financial operations in a smooth and rational manner.
3. The knowledge gained out of the course content regarding financial instruments and functioning of financial institutions will provide learners with a strong foundation to gain and maintain personal financial stability.

Note 1: The whole course shall contain 100 marks:

- 25 marks have been assigned to internal assessment including a MCQ test of 15 marks (based on course content) and 10 marks to be given on the basis of class interaction & group discussion (15+10 = 25 Marks in Total).
- A project report (summary) fully based upon practical practice component of this course will be of 25 marks. This report should highlight/express the details of practical experience during visit to nearby branch of any commercial bank or life/general insurance company branch or ATM. It should clearly encapsulate the activities undertaken over there and the practical experience of the student in detail. The student is required to submit one project report out of the four practical activities mentioned under practical practice component of this course. Submission of report is compulsory for successful completion of course (20 marks out of total 25 marks belong to content and 5 marks to the presentation and viva-voce).
- End semester theory examination will be of 50 marks. The question paper shall be divided into 4 sections. Section I to IV of the question paper shall be based upon Unit I to IV of the syllabus as per their respective order in syllabus. All the four sections of the question paper shall have 2 questions of 12.5 marks each. The candidates shall be required to attempt any 1 question from each section. Maximum time allowed to complete the theory examination will be 2 hours.

Note 2: It should be noted that general financial literacy should not be visualized as confined to the students of economics, commerce and finance only. The cognitive understanding of financial glossary, effective personal financial management, rudimentary operation of financial institutions, and e-banking for students from any discipline is quintessential as financially literate learners are better prepared for specific financial roadblocks which dwindle the chances of personal economic distress. Therefore, learners/students from diverse backgrounds can choose to study this course. Course will be conducted and completed through the combination of lectures, interaction, assignments, field work and theoretical/practical tests. Further, resource person(s) can be drawn from the field of commerce, management, economics and finance and related social sciences.

Course Objective	1. To understand the Foundation of Yoga. 2. To highlight the importance of Yoga and Meditation. 3. To provide a general understanding of Asanas, Kriya, Pranayama
Course Outcome	1. Students will be able to understand the Foundation of Yoga. 2. Students will learn the importance of Yoga and Meditation. 3. Students will learn Asanas, Kriya, Pranayama.
Outline Syllabus	**YOGA**
Credits	**2 (Theory: 1, Practical: 1)**
Contact Hours	45 Hours (Theory: 15 Hours, Practical: 30 Hours) 15 Hours Theory= 1 Credit, 30 Hours Practical = 1 Credit **NOTE:** ➢ One hour per week for theory. ➢ Two hours per week for practical. ➢ One unit contains 60-80 students for theory and 30-40 students for Practical. ➢ A teacher, who is preparing six teams for Inter-College competitions, his/her work-load shall be counted by including four hours per week in the teaching load.
UNITS	**TOPICS**
Unit – 1	**Introduction and Foundation of Yoga** ▪ Origin of Yoga and it's development ▪ Meaning of Yoga and its importance ▪ Meditation; meaning, definition, meditation types and principles

Unit – 2	**Asanas, Pranayama and Kriya** ▪ Principles of Yogic practices ▪ Asanas; meaning and definition of Asanas, its types ▪ Pranayama; meaning and definition of Pranayama, it's types ▪ Kriya; meaning and definition of Kriya, it's types
PRACTICAL	**SYLLABUS**
PRACTICE OF ASANAS	▪ Standing Asanas– Vrikshasana, Tadasana ▪ Sitting Asanas – Padmasana, Vajrasana, Paschimuttanasana ▪ Lying Asanas- (supine position)– Halasana, Sarvangasana, Naukasana ▪ Prone position Asanas – Bhujangasana, Dhanurasna, Naavasana ▪ Suryanaskar ▪ Practice of Pranayama- Bhastrika, Kapalbhati, Anulom Vilom

The college has to opt any one course in each semester (Semester 1 and 2) out of the following courses:

Value Added Course (VAC)-1 (Fundamentals of Solar Energy and Applications)	
Outline Syllabus	**Course Title "Fundamentals of Solar Energy and Applications"**
Credit	**2**
Contact Hours	**30 hours**
Marks	**50 (Theory=40+ Internal Assessment =10)**
Instructions	1. The theory paper will be of 50 marks including 10 marks for internalassessment and three-Hour duration. 2. The question paper for the final examination will consist of three units. Unit I-II will have THREE questions each from the corresponding units of thesyllabus. Unit III in the paper will have one compulsory question consisting of10 short answer type questions covering the whole syllabus and the studentshave to attempt any 8 parts of the compulsory question. Each question willhave a weightage of 8 marks. The candidates will attempt five questions in all,selecting two questions from Unit I and II and the compulsory question fromUnit III. 3. Use of non-programmable calculators will be allowed in the examinationcentre.
Syllabus	**Unit I: Solar Radiation** Sun as a source of energy, Solar radiation at the Earth's surface, Measurement of solar radiation, Solar energy - Importance and Storage of Solar energy. **Unit II: Solar Thermal Systems and solar photovoltaic systems** Principle of Solar radiation conversion into heat, Solar thermal collectors - Flat Plate collectors and Concentrating collectors, Solar Thermal Power Plant, Solar Cookers, Solar Hot Water Systems, Solar Dryers, Solar Distillation, Solar Greenhouse.Photovoltaic effect, Solar Photovoltaic Cell and its working Principle, Types of Solar Cells, PV Module connections: Series and Parallel, Photovoltaic applications - Battery Chargers, Domestic Lighting, Street Lighting, Water pumping.

Value Added Course (VAC)-2 (Basics of Nanoscience and Nanotechnology)	
Outline Syllabus:	**Course Title: Introduction to Nanoscience and Nanotechnology**
Credit:	**2**
Contact Hours:	**30 Hours**
Marks:	**50 (Theory=40+ Internal Assessment =10)**
Instructions	1. The theory paper will be of 50 marks including 10 marks for internalassessment and three-Hour duration. 2. The question paper for the final examination will consist of three units. Unit I-II will have THREE questions each from the corresponding units of thesyllabus. Use of non-programmable calculators will be allowed in the examinationcentre.
Syllabus:	**Unit I**: **Introduction to Nanoscience** Chronological development of nanoscience and nanotechnology (NSNT). Important discoveries in NSNT. Idea about dimension – Light year to atomic scale. Introduction to nanostructures. Glimpse of various applications of NSNT. Emergence of Nanoscience with special reference to Feynman and Drexler, Role of particle size, Spatial and temporal scale, Exciton, Concept of confinement, strong and weak confinement with suitable examples, Development of quantum structures, Basic concept of quantum well, quantum wire and quantum dot. Density of states of 1D, 2D & 3D structure, surface effect. **Unit II:Types of Nanomaterials Nanoclusters and Synthesis** Solid solutions, Thin film, Nanocomposites (Metal Oxide and Polymer based), Core Shell Nanostructure, Buckyballs, Carbon nano tubes and, Zeolites minerals, Dendrimers, Micelles, Liposomes, Block Copolymers, Porous Materials, Metal Nanocrystals, Semiconductor nanomaterials. Properties of nanomaterials mechanical, electrical and optical. Brief description of Physical Methods Chemical Methods and Top-down method of nanoparticle synthesis **Tools and techniques of NSNT and Application** Spectral characterization: Absorption- Emission- Infra Red (IR) - Raman spectroscopy; X-ray diffraction; Photoelectron Spectroscopy. Structural characterization: - X-ray diffraction (XRD) technique, particle size determination using XRD, Introduction to Optical microscopy, TEM- SEM; Surface characterization: STM- AFM. Application of nanoscience in various fiels: Energy storage, Solar cells, Biomedical, Agriculture etc.

Syllabus	**Unit I** Mechanics: Laws of physics applied to human body movement, basic concepts of biomechanics, principles of Joint design and a human joint, mobility and stability, ideas of fluid mechanics associated with human body. Vision: Visible light spectra; concept of color, vision defects. Hearing: Sound waves and hearing, sound intensity; the decibel scale, Temperature Control: Basics of thermal energy, thermodynamics and temperature, human thermodynamics. **Unit II** Radiation and its classification: electromagnetic radiations, acoustic radiations, particle radiations. Electromagnetic Radiations: Introduction to Electromagnetic (EM) spectrum, concept of wavelength, frequency and energy, classification of EM spectra into radio waves, microwaves, terahertz waves, IR, visible, UV, X-rays and gamma rays. Generation and interaction of various components of electromagnetic spectra with matter, its physical significance and applications in different fields. Acoustic Radiations: Classification of acoustic radiations, their interactions with matter and applications in imaging and industry. Particle Radiations: Nuclear radiations and their classification, interactions with matter, significance and applications. Concept of radiation dose and protection

Semester-I

VAC-1: Constitutional Morality as a Value in Contemporary Society
Total Credits: 2 credits (Theory: 15 hrs. + Tutorial: 15 hrs.)

Max.Marks	:	50 marks
Theory	:	45 marks
Int. Ass.	:	05 marks
Time	:	3 hours

Course Objectives:
The course aims at inculcating the values which are enshrined in the Constitution of India, the sacred document. The course content enables students also to get acquainted with the cardinal principles, the vision of the founding fathers for the largest democracy in the world. The course aims to make students better citizens of a modern democratic republic of India.

Course Outcomes:
The students from different disciplines opting this course would be having the basic idea about the need to have a constitution for the well-being of a democracy. It would also impart an understanding of the democratic concepts like constitutionalism, constitutional morality. Most importantly the students would get acquainted with the philosophy and moral values, which are embedded in the constitution. They are modern but are also derived from India's traditional past.

Pedagogy of the Course Work:
The students will be assessed on the basis of written examination comprising of 45 marks and continuous internal assessment of 05 marks on the basis of Unit test, Snap test, Attendance, Class assignments and class room participations.

Instructions for Paper-setter and candidates:

i. There shall be 5 questions in all. The first question shall be compulsory and be short answer type containing 10 short questions spread over the whole syllabus and to be answered in about 25 to 30 words. The candidate is required to attempt any 5 short answer type questions carrying 3 marks (5x3 = 15 marks). Rest of the paper shall contain 2 units. Each unit shall have two questions and the candidates shall be given internal choice i.e. the candidates shall have two questions and the candidates shall attempt one question from each unit i.e. one questions in all. Each question will carry 15 marks (2x15 = 30 marks).

ii. For private candidates who have not been assessed earlier for internal assessment, the marks secured by them in theory paper will proportionately be increased to maximum marks of the paper in lieu of internal assessment.
The paper –setter must put note (ii) in the question paper.

Total Credits: 2 credits(Theory: 15 hrs. + Tutorial: 15 hrs.)

Max.Marks	:	50 marks
Theory	:	45 marks
Int. Ass.	:	05 marks
Time	:	3 hours

Course Objectives:
The course is designed for students who are from other disciplines and wish to have a basic understanding of the various themes that has shaped Indian society and politics.

Course Outcomes:
At the end of the course, the student will be able to identify the concept of Modern Indian Traditional knowledge and help them to understand the importance of knowledge system.

Pedagogy of the Course Work:
The students will be assessed on the basis of written examination comprising of 45 marks and continuous internal assessment of 05 marks on the basis of Unit test, Snap test, Attendance, Class assignments and class room participations.

Semester-I
VAC-1: Information and Communication Technology and Governance

Max. Marks: 50
Theory: 45 Marks
Internal Assessment: 05 Marks
Time: 03 Hours

Course Objectives:
To provide students with a comprehensive understanding of the role of Information and Communication Technology (ICT) in governance, focusing on its applications, benefits, and challenges in various sectors.

Course Outcome:
Students will develop proficiency in utilizing ICT tools and platforms for effective governance, enabling them to contribute to the advancement of digital governance initiatives in diverse contexts.

Pedagogy of the Course:
The course will utilize a combination of lectures, case studies, group discussions, and practical demonstrations to facilitate active learning and practical skill development in the field of ICT and governance.

Instructions for Paper-setter and candidates:

1. There shall be 5 questions in all. The first question shall be compulsory and be short answer type containing 10 short questions spread over the whole syllabus and to be answered in about 25 to 30 words. The candidate is required to attempt any 5 short answer type questions carrying 3 marks (5x3 = 15 marks). Rest of the paper shall contain 2 units.
