SIT 201	Internship	Summer Industrial Training (SIT)*	-	4	4	-	-	100	-	100
Total Credits					**24**					**600**

Job Roles:- Web Designer , Marketing Executives.

* Summer Industrial Training of 2-4 weeks in a relevant Industry after 2nd Semester Examinations during summer break. Training report by the student to be submitted within one week of start of 3rd Semester. Viva-Voce examination to be held within 3-weeks of the start of 3rd semester.

**Minimum Credits required to get Certificate Course in E- Commerce and Digital Marketing=48+4#.
#Exit1: Certificate Course-Studentcanexitaftercompletionof1styearhavingsecured48Creditsandwillbeawardeda UG Certificate provided they complete a vocational course/internship of 4 credits during the summer vacation of the first year, in addition to the 6 credits from skill enhancement courses earned during first and second semester.

1. Skill Enhancement Courses (SEC): Annexure I
2. Multidisciplinary Courses (MDSC): Annexure II
3. Value Added Courses (VAC): Annexure III

ESSENTIAL COMPONENTS OF COURSE OF B.Voc (E-Commerce & Digital Marketing) (SEMESTERS I & II)

PROGRAMME OUTCOMES

PO1.Understanding online business models, payment gateways, and logistics.

PO2. Basics of creating and maintaining an e-commerce website.

PO3. Covering SEO, SEM, social media marketing, and email campaigns.

PO4. Building and maintaining customer relationships for loyalty.

PO5. Using tools to measure website performance and customer behavior.

PO6. Strategies for reaching customers on mobile devices.

PO7. Keeping up with the latest technologies and market trends.

SEMSTER-I

1.	Course Title	BASICS OF COMPUTER SYSTEM
2	**Course Code**	EDM 101
3	**Typology of Course**	Core Discipline
4	**Course Duration/LP (Lectures) (Practical)**	60 hours of lectures for Theory (1credit=15hours of theory learning based on 4 hrs./week) (1Semester=15weeks)
5	**Credits**	4 Credits
6	**Max .Marks and Time**	100Marks (80TH+20 IA) a. The exam of this course will be of 3 hours duration. b. There will be no objective type questions. c. Students are required to have the knowledge of the developments in the subject up to 6 months before the examination. d. Use of non-programmable calculators by the students in the Examination Hall is allowed. The calculators will not be provided by the University/College to the examinees
7.	**Course Objectives**	The fundamental IT course seeks to provide a comprehensive foundation in information technology by addressing key objectives. Students will gain an introduction to the world of computing, delving into the historical evolution and core concepts shaping the field. The course navigates through the intricacies of computer systems, unraveling the interactions between hardware and software components. It places a strong emphasis on programming basics, cultivating coding proficiency, logical thinking, and problem-solving skills. Students will explore the realm of data management, databases, and data manipulation. Networking fundamentals will be elucidated, covering the essentials of computer networks and communication.
8.	**Course Outcomes**	CO1. Comprehensive Understanding:- Develop a holistic comprehension of the fundamental concepts, history, and evolution of information technology. CO2. Proficiency in Computer Systems:- Gain expertise in the components and workings of computer systems, encompassing both hardware and software. CO3. Programming Competence:- Attain the ability to write and understand basic code, enhancing logical reasoning and problem-solving skills. CO4. Data Management Skills:- Acquire proficiency in handling data, including the principles of databases and basic data manipulation. CO5. Networking Knowledge:- Understand the essentials of computer networks and communication, enabling effective interaction in a connected world.
9.	**Pedagogy of the Course Work**	Class Room Lecture, Interactive sessions ,PPT, Group Discussions, Case Studies etc.
10.	**Instructions for paper setters and candidates**	1. The syllabus of this paper has been divided into FOUR units. 2. Examiner will set a total of NINE questions comprising two questions from each unit, including Question No. 1 (compulsory) of short answer type covering the whole syllabus. 3. The students are required to attempt one question from each unit and the entire Compulsory Question No. 1. 4. All questions carry equal marks.

11.	**Course Content**	**UNIT-I** Computers: Characteristics, Historical development of computers, Evolution of computing devices, Generations of Computers: First Generation (Vacuum Tubes, Batch Processing), Second Generation (Transistors), Third Generation (Integrated Circuits, Time-Sharing Systems), Fourth Generation (Microprocessors, Personal computers), Fifth Generation (Artificial intelligence). Hardware, Software and Firmware, Data and Information. Computer Codes: Decimal System, Binary System, Hexadecimal System, Octal System and ASCII Code. Decimal to Binary conversion, Binary to Decimal Conversion. **UNIT-II** Introduction to Computer Networks: Definition and Importance of Computer Networks, Basic Components of a Computer Network, Classification of Networks, Network Topologies. Internet: Historical Overview of The Internet, Evolution of The World Wide Web (WWW), WWW Components, Internet Governance and Standards, Internet Services and Applications (Email Protocols, Telnet, FTP, IRC, Usenet News). Internet Access Methods (Dial-Up, DSL, Cable, Fiber-Optic), Browser Technologies and Features. **UNIT-III** Computer Virus: Types of Viruses, Impact of Virus, Virus Detection and Prevention techniques, Malware. Antivirus and Its Types. Multimedia: Hardware and Software for Multimedia, Multimedia: Component of Multimedia, Basic File Formats, Audio File Formats, Image File Formats, Video File Formats. Multimedia Storage Devices. **UNIT-IV** Emerging Technologies: Basics of Internet of Things (IoT), Components of IoT, Applications of IoT, Basics of Parallel Computing and Distributed Computing, Difference between Parallel computing and Distributed Computing, Advantages and Limitations of Parallel computing and Distributed Computing, Cloud Computing: Component of Cloud Computing, Types of Cloud Computing, and their applications. **Job Roles:- Web Designer , Marketing Executives**
12.	**Suggested Resources for Reading**	1. Fundamentals of Computers, V. Rajaraman, PHI Publication. 2. Computer Fundamentals, P. K. Sinha, BPB Publication. 3. Computers Today, Basandra, S. K., Galgotia Publications.

1.	**Course Title**	FUNDAMENTALS OF E- COMMERCE
2	**Course Code**	EDM 102
3	**Typology of Course**	Core Discipline
4	**Course Duration/LP (Lectures) (Practical)**	60 hours of lectures for Theory (1credit=15hours of theory learning based on 4 hrs./week) (1Semester=15weeks)
5	**Credits**	4 Credits
6	**Max .Marks and Time**	100Marks (80TH+20 IA) a. The exam of this course will be of 3 hours duration. b. There will be no objective type questions. c. Students are required to have the knowledge of the developments in the subject up to 6 months before the examination. d. Use of non-programmable calculators by the students in the Examination Hall is allowed. The calculators will not be provided by the University/College to the examinees
7.	**Course Objectives**	The course in E-commerce is designed to equip students with a comprehensive understanding of the digital marketplace and its intricate dynamics. Participants will delve into the foundational concepts, exploring various e-commerce models and types. The curriculum emphasizes the development of practical skills, encompassing the creation and design of effective e-commerce websites. Students will gain insights into the technological backbone, including payment systems and security protocols critical for secure online transactions. Digital marketing strategies specific to e-commerce, such as SEO and social media marketing, will be explored to enhance visibility and customer reach. Through these objectives, the course aims to prepare individuals for successful engagement in the multifaceted world of e-commerce.
8.	**Course Outcomes**	CO1. In-Depth E-commerce Knowledge:- Develop a profound understanding of e-commerce concepts, models, and the broader digital marketplace. CO2. Proficient Website Development:- Acquire practical skills in creating, managing, and designing effective e-commerce websites. CO3. Technological Competence:- Understand the infrastructure supporting e-commerce, including payment systems, security protocols, and other essential technologies. CO4.Digital Marketing Expertise:- Apply digital marketing strategies specific to e-commerce, including SEO, social media marketing, and online advertising, to enhance visibility and attract customers. CO5.Legal and Ethical Awareness:-Navigate the legal and ethical considerations inherent in online transactions, ensuring compliance with regulations and protecting intellectual property.
9.	**Pedagogy of the Course Work**	Class Room Lecture, Interactive sessions ,PPT, Group Discussions, Case Studies etc.
10.	**Instructions for paper setters and candidates**	5. The syllabus of this paper has been divided into FOUR units. 6. Examiner will set a total of NINE questions comprising two questions from each unit, including Question No. 1 (compulsory) of short answer type covering the whole syllabus. 7. The students are required to attempt one question from each unit and the entire Compulsory Question No. 1. 8. All questions carry equal marks.
11.	**Course Content**	**UNIT- I** Electronic Commerce Framework, History, Basics and Tools of E-Commerce,

		Comparison of E- Commerce with Traditional Commerce; Growth of E-Commerce – Present and potential. **UNIT II** E- Business: Meaning, Importance, Models Based on the Relationships of Transacting Parties (B2B, B2C, C2C and C2B), Present Status of E-Commerce in India, Regulatory Aspects of Ecommerce **UNIT III** Changing Structure of Organization: The Impact of E-Commerce on Various Business Sectors such as Entertainment, Education, Health Services, Publishing and Financial Services. Socio- Economic Impacts of E-Commerce. **UNIT IV** Electronic Payment System: features of effective Payment Systems, Types of Payment System— E-Cash and Currency Servers, Debit Cards, Credit Cards, E-Cheques, Smart Cards, E-Wallet. Electronic Data Interchange: Significance and types, Digital Signatures, Cryptography. Job Roles:- Web Designer , Marketing Executives
12.	**Suggested Resources for Reading**	1.Diwan, Prag and Sushil Sharma: Electronic Commerce, A Manager's Guide to E,BusinessVanity Books International,Delhi. 2.Kalakota, Ravi and Shinston Andrew B: Frontiers of Eletronic Commerce, AddisionWesley. 3.Minoli and Minoli: Web Commerce Technology Handbook, Tata McGraw Hill, NewDelhi. 4.Schneider, Gray P: Electronic Commerce, Course Technology,Delhi.

1.	Course Title	PC SOFTWARE
2	**Course Code**	EDM103
3	**Typology of Course**	Core Discipline
4	**Course Duration/LP** (Lectures) (Practical)	120 hours of practical's (4 CREDIT) (1 credit = 30 hours of practical based on 8 hrs./week) (1Semester=15weeks) 3-groups will be created for the purpose of Practical for each unit
5	**Credits**	4 Credits
6	**Max. Marks and Time**	100Marks (80PR+20 IA) c. The exam of this course will be of 3 hours duration. d. There will be no objective type questions. e. Students are required to have the knowledge of the developments in the subject up to 6 months before the examination. f. Use of non-programmable calculators by the students in the Examination Hall is allowed. The calculators will not be provided by the University/College to the examinees
7.	**Course Objectives**	The course in PC Software aims to provide students with a comprehensive understanding of various software applications and their functionalities in the context of personal computing. Participants will delve into the fundamentals of operating systems, gaining insights into the core principles that govern the interaction between hardware and software. The curriculum emphasizes proficiency in common productivity tools such as word processors, spreadsheets, and presentation software. Practical skills in troubleshooting and problem-solving related to software issues will be developed. By the end of the course, participants will possess a well-rounded knowledge of PC software, enabling them to use and manage various applications efficiently for personal and professional purposes.
8.	**Course Outcomes**	1. Proficient Operating System Navigation:-Develop a deep understanding of operating systems, enabling efficient navigation and management of files on personal computers. 2. Software Application Mastery:- Attain proficiency in commonly used software applications, including word processors, spreadsheets, and presentation tools, enhancing productivity in various tasks. 3. Effective Use of Productivity Tools:-Demonstrate the ability to use productivity tools to create, edit, and manage documents, spreadsheets, and presentations for personal and professional purposes. 4. Troubleshooting Skills:- Acquire practical skills in identifying and resolving common software issues, contributing to a smoother computing experience.9. *Enhanced Digital Communication Skills:* Utilize software applications for effective digital communication, including email, messaging, and collaboration platforms. 5. Applied Software Knowledge:- Apply acquired software knowledge

		in real-world scenarios, demonstrating the ability to leverage software tools for diverse personal and professional needs.
9.	**Pedagogy of the Course Work**	Class Room Lecture, Interactive sessions ,PPT, Group Discussions, Case Studies etc.
10.	**Instructions for paper setters and candidates**	1.The syllabus of the is paper has been divided into FOUR units. 2.Examiner will set a total of FOUR questions comprising two questions from each unit. 3.The students are required to attempt one question from each unit and the entire Compulsory Question No. 1. 4.All questions carry equal marks.
11.	**Course Content**	**Word Orientation:** The instructor needs to give an over view of word processor. Details of the four tasks and features that would be covered Using word–Accessing, overview of toolbars, saving files, Using help and resources, rulers, format painter. 1.Using word to create Resume Features to be covered :Formatting Fonts in word, Drop Cap in word, Applying Text effects, Using Character Spacing, Borders and Colors, Inserting Header and Footer, Using Date and Time option in Word. 2. Creating an Assignment Features to be covered:-Formatting Styles, Inserting table, Bullets and Numbering,ChangingTextDirection,Cellalignment,Footnote,Hyperlink, Symbols, SpellCheck, Track Changes 3. Creating a Newsletter Features to be covered:-Table of Content, Newspaper columns, Images from files and clipart, Drawing toolbar and Word Art, Formatting Images, Textboxes and Paragraphs. 4. Creating a Feedback form Features to be covered :- Forms, Text Fields, Inserting objects, Mail Merge in Word. **Excel Orientation:** The instructor needs to tell the importance of Excel as a Spreadsheet tool, give the details **o**fthefourtasksandfeaturesthatwouldbecoveredExcel–Accessing,overviewof toolbars, saving excel files, 1. Creating a Scheduler Featurestobecovered:-Gridlines,FormatCells,Summation,autofill, Formatting Text 2. Calculations Features to be covered:-Cell Referencing, Formulae in excel–average, std.deviation,Charts, Renaming and Inserting worksheets, Hyper linking, Count function, LOOKUP/VLOOKUP 3. Performance Analysis Features tobe covered :- Splitcells, freeze panes, group and outline, Sorting,Boolean and logical operators, Conditional formatting 4. Game(like Cricket ,badminton)Score Card Features to be covered:-Pivot Tables, Interactive Buttons, Importing Data, Data Protection, Data Validation **Presentation Orientation:** 1.Students will be working on basic power point utilities and tools which help them create basic power point presentation. 1. Topic covered includes:-PPT Orientation, Slide Layouts, Inserting Text, Word Art, Formatting Text, Bullet sand Numbering, AutoShapes, Line sand Arrows 2. This session helps students in making their presentations interactive. Topics covered includes: Hyperlinks, Inserting–Images, ClipArt, Audio, Video, Objects, Tables and Charts 3. Concentrating on the in and out of Microsoft powerpoint. Helps them

		Learn best practices in designing and preparing power point presentation. Topics covered includes: -Master Layouts(slide ,template, and notes),Types of views (basic, presentation, slide slotter, notes etc), Inserting – Background, textures,DesignTemplates,Hiddenslides.Autocontentwizard,SlideTransition, Custom Animation, Auto Rehearsing 4. Power point test would be conducted. Students will be given model powerpoint Presentation which needs to be replicated **Job Roles:- Web Designer , Marketing Executives**
12.	**Suggested Resources for Reading**	1.Basandra, S.K. : Computers Today,Galgotia. 2. Sinha P.K. & Sinha Priti : Computer Fundamentals, BPBPublications 3. MathurRajiv,1995:DOS6.2 Quick Reference,Galgotia. 4.Singleton,RoderickG.:OpenOffice.orgUserGuide.

SEMSTER-II

1.	**Course Title**	Fundamentals of Management
2	**Course Code**	EDM 201
3	**Typology of Course**	Core Discipline
4	**Course Duration/LP (Lectures) (Practical)**	60 hours of lectures for Theory (1credit=15 hoursoftheorylearningbasedon 4 hrs./week) (1 Semester= 15weeks)
5	**Credits**	4 Credits
6	**Max .Marks and Time**	100Marks (80TH+20 IA) 1.The exam of this course will be of 3 hours duration. 2.There will be no objective type questions. 3.Students are required to have the knowledge of the developments in the subject up to 6 months before the examination. 4.Use of non-programmable calculators by the students in the Examination Hall is allowed. The calculators will not be provided by the University/College to the examinees
7.	**Course Objectives**	Understanding Management Basics: The course aims to provide students with a solid grasp of management principles and their historical context. Participants will explore the fundamental functions of management, including planning, organizing, leading, and controlling. This involves understanding how to accomplish tasks through others, leveraging influence, and effectively hiring, engaging, and retaining talent. Building Managerial Skills: The course equips aspiring managers with the essential toolkit required for success. It covers topics such as decision-making, teamwork, and leading change.
8.	**Course Outcomes**	CO1.Differentiating Managers and Leaders: Upon completing the course, you will be able to describe the difference between managers and leaders. Understanding these distinct roles is crucial for effective organizational management. CO2.Managerial Focus and Skills: You'll explore the focus of a manager's job and learn about the required skills for a new manager's success. This includes competencies such as delegating, objective setting, and problem-solving. CO3.Hierarchy of Planning and SMART Goals: You learn about the hierarchy of planning and how to set SMART (Specific, Measurable, Achievable, Relevant, Time-bound) goals. Effective planning is essential for achieving organizational objectives. CO4.Evolution of Leadership and Customer Satisfaction: The course delves into the evolution of leadership
9.	**Pedagogy of the Course Work**	Class Room Lecture, Interactive sessions ,PPT, Group Discussions, Case Studies etc.
10.	**Instructions for paper setters and candidates**	1.The syllabus of this paper has been divided into FOUR units. 2.Examiner will set a total of NINE questions comprising two questions from each unit, including Question No. 1 (compulsory) of short answer type covering the whole syllabus. 3.The students are required to attempt one question from each unit and the entire Compulsory Question No. 1. 4. All questions carry equal marks.

11.	**Course Content**	**UNIT 1** Management: Nature, Definitions, Scope, Levels, Process and Significance of Management. Development of Management Thoughts: Classical, Neo-Classical Systems, Contingency and Contemporary Approaches to Management (Drucker, Porter, Prahalad, Senge and Tom Peters) **UNIT II** Planning: Concept, Process, Nature, Steps in Planning, Significance and Types. Decision Making: Concept and Process, Types of Decisions, Management By Objectives (MBO). Organization: Concept, Nature, Process, Significance, Types, Organisational Structure, Committees, Span of Control. Authority and Responsibility. Delegation, Decentralization and Departmentation. **UNIT III** Direction: Concept, Features, Importance and Limitations of Direction. Elements of Direction- Supervision, Motivation, Leadership and Communication Coordination: Concept, Features, Importance and Limitations of Coordination. Internal and External Coordination **UNIT IV** Control: Concept, Features, Importance and Limitations of Control. Control Process. Essentials of a Good Control System. Techniques of Control. Relationship between Planning and Control . Job Roles:- Web Designer , Marketing Executives
12.	**Suggested Resources for Reading**	1. Peter F. Drucker, 'The Practice of Management' 2. Weihrich and Koontz, 'Essentials of Management' 3. Stoner and Freeman,'Management' 4. David R Hampton, 'Modern Management' 5. Stephen P Robbins, David A DeCenzo

1.	**Course Title**	Web Designing using HTML &DHTML
2	**Course Code**	EDM 203
3	**Typology of Course**	Core Discipline
4	**Course Duration/LP (Lectures) (Practical)**	30 hours of lectures of theory (1credit=15hoursoftheorylearningbasedon 2 hrs./week) (1 Semester=15weeks)
5	**Credits**	2 Credits
6	**Max .Marks and Time**	50Marks (40TR+10 IA) a. The exam of this course will be of 3 hours duration. b. There will be no objective type questions. c. Students are required to have the knowledge of the developments in the subject up to 6 months before the examination. d. Use of non-programmable calculators by the students in the Examination Hall is allowed. The calculators will not be provided by the University/College to the examinees
7.	**Course Objectives**	Understanding Web Design Basics: This course introduces you to the realm of web design. The first step is to understand how HTML works, and then we proceed to more advanced and complicated structures and concepts of web design, such as CSS and layout control. Practical Experience:
8.	**Course Outcomes**	CO1. Create pages with simple tags in HTML CO2. Design webpages with multiple sections or frames CO3. Explain how to link webpages through hypertext or images a links CO4. Outline the key web designing concepts using java script CO5. Design forms with special controls using HTML
9.	**Pedagogy of the Course Work**	Class Room Lecture, Interactive sessions ,PPT, Group Discussions, Case Studies etc.
10.	**Instructions for paper setters and candidates**	Prerequisite: Student must have the basic knowledge of any text editor like notepad, notepad++ and Edit plus etc. Co requisite: Student must know the background of Markup Language. Additional material required in ESE: Demonstration of the website of college/ specific department/specific cells etc. will be presented by the students during the final practical. Developed Website/s must be made online by the student/s. Printouts of the Main Page of the website must be arranged on Practical file during daily lab work and must be submitted in the final examinations.

11.	**Course Content**	**Unit I** Introduction to HTML 1.Elements of Web page (Text , Image & Hyperlink Elements) 2.Html Tags **Unit II** Using Tools 1.Structure of a page 2.Links & Navigation 3.Backgrounds 4.Animated Graphics Working with Tables 1.Page Design & Layout with Links 2.Advanced Layout with Tables 3.Working style sheets **Unit III** Forms & Frame HTML Forms (<form> element, Form controls, creating labels for control, structuring forms, focus, sending form data to server) Using Frame (<frame>, <frameset><noframes> element, creating links between frames, nested framesets) **UNIT IV** Introduction to DHTML, Understanding DOM, Drop Down Menus, Text Effects and Animation. Web Supportive Formats & validating HTML Job Roles:- Web Designer , Marketing Executives
12.	**Suggested Resources for Reading**	1. HTML: The complete reference by Thomas A.Powell 2. New perspectives on creating Web pages with HTML/DHTML by Patrick Carey, MarkKemper

1.	**Course Title**	Web Designing using HTML &DHTML (Practical)
2	**Course Code**	EDM 203 (P)
