Total Credits					**24**					**600**

Job Role – Retail Team Leader

* Summer Industrial Training of 2-4 weeks in a relevant Industry after 2nd Semester Examinations during summer break. Training report by the student to be submitted within one week of start of 3rd Semester. Viva-Voce examination to be held within 3 weeks of the start of 3rd semester.

** Minimum Credits required to get Certificate Course in Retail Management = 48 + 4 #.

#Exit 1: Certificate Course - Student can exit after completion of 1st year having secured 48 Credits and will be awarded a UG Certificate provided they complete a vocational course/internship of 4 credits during the summer vacation of the first year, in addition to the 6 credits from skill enhancement courses earned during first and second semester.

1. Multidisciplinary Courses (MDSC): Annexure I
2. Skill Enhancement Courses (SEC): Annexure II
3. Value Added Courses (VAC): Annexure III

ESSENTIAL COMPONENTS OF COURSE OF B.VOC (RETAIL MANAGEMENT)

PROGRAMME OUTCOMES

PO1. The course aims to provide comprehensive knowledge and coherent understanding of retail sector operations and link theory with practice in the context of competency development for retail employees.

PO2. The course further aims to provide deeper understanding of the disciplinary, Multidisciplinary, value-added, skill enhancement and ability enhancement courses with practical orientation to make the students ready to make a mark in the industry with strong human and moral values.

PO3. The course will help develop skills related to different job roles such as retail sales associate, team leader, departmental manager and store manager including knowledge required for undertaking self-employment initiatives, and knowledge and mindset required for entrepreneurship involving enterprise creation, improved product development, or a new mode of organization.

PO4. To enhance skills for efficiently using different software, interpret and use various acts and laws related to retail sector.

PO5. To develop communication skills and build confidence to face the challenges of the job market.

SEMESTER I

	COURSE TITLE	INTRODUCTION TO RETAILING
1.	**Course Code**	BRM 101
2.	**Typology of Course**	Core Discipline
3.	**Course Duration/ LP** (Lectures) (Practical)	60 hours of lectures for Theory (1 credit= 15 hours of theory learning based on 4hrs./week) (1 Semester=15 weeks)
4.	**Credits**	4 Credits
5.	**Max. Marks and Time**	100 Marks (80 TH + 20 IA) i) The exam of this course will be of 3hours duration. ii) There will be no objective type questions. iii) Students are required to have the knowledge of the developments in the subject up to 6 months before the examination. iv) Use of non-programmable calculators by the students in the Examination Hall is allowed. The calculators will not be provided by the University/College to the examinees
6.	**Job Role**	Retail Team Leader
7.	**Course Objectives**	The objective of this paper is to help students to acquire conceptual knowledge of the basics of retailing, evolution of retailing, retailing strategy and global retail markets.
8.	**Course Outcomes**	On successful completion of the course, the students will be able to: CO1. Students will gain a comprehensive understanding of the basics, evolution, and strategic approaches in retailing, including the ability to classify and evaluate different retail formats. CO2. Students will learn to devise and implement retail strategies, understand retail organizational structures, and adapt to dynamic retail environments. CO3. Students will apply merchandising concepts, retail development theories, and business models, particularly in the context of the retail lifecycle. CO4. Students will analyze the characteristics and development of organized and rural retail sectors in India, considering the impact of environmental factors and legislation. CO5. Students will integrate knowledge from multiple disciplines, employing critical and creative thinking to address challenges and opportunities in retailing. CO6. Students will be cognizant of ethical issues and the importance of sustainable practices within the retail industry, prepared to make decisions that balance profitability with social responsibility.
9.	**Pedagogy of the Course Work**	Class Room Lecture, Interactive sessions, PPT, Group Discussions, Case Studies, etc.
10.	**Instructions for paper setters and candidates**	i) The syllabus of this paper has been divided into FOUR units. ii) Examiner will set a total of NINE questions comprising two questions from each unit, including Question No. 1 (compulsory) of short answer type covering the whole syllabus. iii) The students are required to attempt one question from each unit and the entire Compulsory Question No. 1. iv) All questions carry equal marks.

11. Course Content

UNIT-I

Retailing- Meaning, Nature, Classification, Scope and Importance
Factors influencing Retailing, Functions under Retailing, Retailing as a career.

UNIT-II

Developing and applying Retail Strategy, Strategic Retail Planning Process,
Retail Organization, The changing structure of retail, Classification of Retail Units, Retail Formats: Corporate chains, Retailer Corporative and Voluntary system, Departmental Stores,
Discount Stores, Super Markets, Warehouse Clubs.

UNIT-III

Merchandising Mix, Retail Models and Theory of Retail Development, Business Models in Retail, Concept of Life cycle Retail.

UNIT-IV

Emergence of Organized Retailing, Traditional and Modern Retail Formats in India, Retailing in Rural India, Environment and Legislation for Retailing, FDI in Retailing.

Practical work: Discussion of Case Study on Retail Industry

COURSE TITLE	COMPUTERIZED ACCOUNTING AND ENTERPRISE RESOURCE PLANNING
1. Course Code	BRM 103
2. Typology of Course	Core Discipline
3. Course Duration/ LP (Lectures) (Practical)	60 hours of lectures for Theory (1 credit = 15 hours of theory learning based on 4hrs./week) (1 Semester =15 weeks)
4. Credits	4 Credits
5. Max. Marks and Time	100 Marks (80 TH + 20 IA) i) The exam of this course will be of 3hours duration. ii) There will be no objective type questions. iii) Students are required to have the knowledge of the developments in the subject up to 6 months before the examination. iv) Use of non-programmable calculators by the students in the Examination Hall is allowed. The calculators will not be provided by the University/College to the examinees
6. Job Role	Retail Team Leader
7. Course Objectives	The objective of this paper is to provide students with a comprehensive understanding of computerized accounting systems including the benefits and limitation of computerized accounting, role of ERP systems in modern organizations and features and functionalities of ERP systems.
8. Course Outcomes	On successful completion of the course, the students will be able to: CO1. Students will be able to explain the meaning, importance, and differences between computerized and traditional accounting, as well as understand the underlying principles and limitations of computerized systems. CO2. Students will gain the skills to accurately record financial transactions using computerized systems, including the preparation of journals, ledgers, trial balances, cash books, and bank reconciliation statements. CO3. Students will understand the concepts and methods of accounting for depreciation, and be able to prepare final accounts, including trading, profit and loss accounts, and balance sheets for sole proprietorships, using accounting database management tools. CO4. Students will gain comprehensive knowledge of ERP systems, including their functionalities, benefits, typical business process workflows, and their impact on modern business concepts such as e-commerce, business analytics, and service-oriented architecture. CO5. Students will learn to navigate the challenges and considerations involved in ERP implementation, including system purchasing or outsourcing decisions, managing implementation partners, and understanding ERP strategy options and risk mitigation.
9. Pedagogy of the Course Work	Class Room Lecture, Interactive sessions, PPT, Group Discussions, Case Studies, etc.

10. Instructions for Paper setters and Candidates	i) The syllabus of this paper has been divided into FOUR units. ii) Examiner will set a total of NINE questions comprising two questions from each unit, including Question No. 1 (compulsory) of short answer type covering the whole syllabus. iii) The students are required to attempt one question from each unit and the entire Compulsory Question No. 1. iv) All questions carry equal marks.

11. Course Content

UNIT-I

Introduction of Computerized Accounting: Basic of Computerized Accounting: Meaning Importance Difference of Computerized and traditional accounting; Origin, Meaning, Definition, Need, Importance, Functions, Limitations, Accounting principles, Generally accepted accounting principles, Accounting equation, Double entry system.

Recording Transactions: Journal, Ledger and Trial Balance

UNIT-II

Cash Book and Bank Reconciliation Statement.

Accounting for Depreciation: Meaning, Importance, Methods of providing depreciation (straight line, diminishing, annuity), Reserves and Provisions

Final Accounts: Trading, Profit and Loss Account and Balance Sheet of a Sole Proprietary Concern. Accounting Database Management MS excel and its applications in Accounts and Statistics. Brief Introduction of different software available Tally 6.3 Busy Wings SAP etc.

UNIT-III

Introduction to ERP: Overview, Typical Business Process Workflow in ERP, Fundamentals, Functionalities, Benefits, Modern Business Concepts, E-Commerce, Advance Planning and Scheduling, Business Analytics, Service oriented architecture.

UNIT-IV

Issues, Concerns and Purchasing: Disadvantages of ERP Solutions, Users, Developers, Customers of ERP, Purchasing or Outsourcing, Planning, Purchasing and Selection of ERP, Managing implementation partners, ERP strategy options and risk mitigation.

SEMESTER II

COURSE TITLE	RETAIL STORES OPERATIONS
1. Course Code	BRM 201
2. Typology of Course	Core Discipline
3. Course Duration/ LP (Lectures) (Practical)	60 hours of lectures for Theory (1 credit = 15 hours of theory learning based on 4hrs./week) (1 Semester =15 weeks)
4. Credits	4 Credits
5. Max. Marks and Time	100 Marks (80 TH + 20 IA) i) The exam of this course will be of 3hours duration. ii) There will be no objective type questions. iv) Students are required to have the knowledge of the developments in the subject up to 6 months before the examination. v) Use of non-programmable calculators by the students in the Examination Hall is allowed. The calculators will not be provided by the University/College to the examinees.
6. Job Role	Retail Team Leader
7. Course Objective	The objective of the course is to provide students with a deep understanding of the concepts of management of retail stores and their operations.
8. Course Outcomes	On successful completion of the course, the students will be able to: CO1. Students will be able to design effective store layouts, understand the principles of retail merchandising, and apply strategies for optimal pricing in retailing, with a strong grasp of the importance of supply chain management in the retail sector. CO2. Students will be able to design effective store layouts, understand the principles of retail merchandising, and apply strategies for optimal pricing in retailing, with a strong grasp of the importance of supply chain management in the retail sector. CO3. Students will gain a deep understanding of the roles and responsibilities of a store manager, including store security, record-keeping, and accounting systems, as well as the ability to effectively handle materials within the store. CO4. Students will learn the processes of recruitment, selection, motivation, evaluation, and compensation of store employees, along with strategies for cost control and minimizing inventory loss. CO5. Students will acquire knowledge about the factors influencing mall establishment and management, gaining insights into the complexities of managing large retail spaces. CO6. Students will understand logistics and information systems within the retail context, enabling them to improve product availability and assortment strategies, and implement quick response systems to meet consumer demands.
9. Pedagogy of the Course Work	Class Room Lecture, Interactive sessions, PPT, Group Discussions, Case Studies, etc.

10. Instructions for Paper setters and Candidates	i) The syllabus of this paper has been divided into FOUR units. ii) Examiner will set a total of NINE questions comprising two questions from each unit, including Question No. 1 (compulsory) of short answer type covering the whole syllabus. iii) The students are required to attempt one question from each unit and the entire Compulsory Question No. 1. iv) All questions carry equal marks.

11. Course Content

UNIT-I

Store Planning: Design and Layout, Retail Merchandising, Pricing in Retailing, Importance of Supply Chain Management in Retailing; Setting up Retail organization, Size and space allocation, location strategy, Factors affecting the location of Retail, Retail location Research and Techniques.

UNIT-II

Objectives of Good store Design. Store Layout and Space planning, Types of Layouts, role of Visual Merchandiser, Visual Merchandising Techniques, Controlling Costs and Reducing Inventories Loss, Exteriors, Interiors.

UNIT-III

Store Management, Responsibilities of Store Manager, Store Security, Store Record and Accounting System, Coding System, Material Handling in Stores, Mall Management, Factor influencing Mall establishments.

UNIT-IV

Recruitment & Selection of Store Employees, Motivating & Managing Store employee, Evaluation of Store Employee, Compensation & Reward for Store Employees, Cost Control, Inventory loss. Logistic and Information system, Improved product availability, Improved assortments, Strategies, Quick Response System.

6. Job Role	Retail Team Leader
7. Course Objective	The objective of the course is to help the students understand the importance and purpose of inventory management, various type of inventory, including raw materials, work-in progress, finished goods, spare parts, inventory cost management strategies and inventory optimization techniques.
8. Course Outcomes	On successful completion of the course, the students will be able to: CO1. Students will understand the importance, purpose, and scope of inventory control, and will be able to categorize different types of inventories such as raw materials, work- in-progress, and finished goods. CO2. Students will learn strategies for managing various costs associated with inventory, including how to set up an organizational structure for effective inventory management. CO3. Students will gain proficiency in selective inventory control techniques, comprehend economic order quantity (EOQ), safety stocks, and apply forecasting techniques for materials requirement planning. CO4. Students will understand the principles of Manufacturing Resource Planning (MRP-II), Just in Time (JIT) inventory systems, make-or-buy decisions, and the role of outsourcing in inventory management. CO5. Students will learn various inventory optimization techniques and how to manage finished goods inventories, including the use of computers in inventory management and methodologies for performance evaluation of materials functions. CO6. Students will develop analytical skills through ratio analysis on inventory and profit margins, enhancing their decision-making capabilities in the context of core competency and inventory management trends.
9. Pedagogy of the Course Work	Class Room Lecture, Interactive sessions, PPT, Group Discussions, Case Studies, etc.

10. Instructions for Paper setters and Candidates	i) The syllabus of this paper has been divided into FOUR units. ii) Examiner will set a total of NINE questions comprising two questions from each unit, including Question No. 1 (compulsory) of short answer type covering the whole syllabus. iii) The students are required to attempt one question from each unit and the entire Compulsory Question No. 1. iv) All questions carry equal marks.

11. Course Content

UNIT-I

Inventory: Inventory Management – Inventory Control – Importance and Scope of Inventory Control – Types of Inventory – Costs Associated with Inventory – Organizational set up for Inventory Management.

UNIT-II

Selective Inventory Control: Economic Order Quantity – Safety Stocks – Inventory Management Systems – Forecasting Techniques – Material Requirement Planning and Execution – Ratio Analysis on Inventory – Profit Margin.

UNIT-III

Manufacturing Planning (MRP-II): Just in Time (JIT) – Work in Process Inventories – Make or Buy Decisions – Concept of Outsourcing – Factors Influencing Make or Buy Decisions – Trends in Make or Buy Decisions in context of core competency.

UNIT-IV

Purpose of Inventory: Goods – Types of Goods – Finished Goods Inventories – General Management of Inventory – Stocks _ Types of Stocks – Tracking the Paper Life. Spare Parts Inventories: Use of Computers in Inventory Management – Evaluation of Performance of Materials Function – Criteria and methodology of evaluation.
