“This moving many-coloured (Moon) has arrived, he has sat down before his mother (earth) in the east,and advances to his father heaven.”

The Moon, being the satellite of the earth, revolves round its mother planet and follows it in its revolution round the self-luminous father planet (the Sun).

There are in all thirty two satellites in the Solar System. The Moon is the only satellite of the Earth with a distinct nature, while all other satellites have sizes below 1/8th size of their mother planet, the earth. Therefore this is the only satellite in the solar system which is very big.

7. Cause & Effect

कारणाभावात्कार्याभावः। न तुकार्याभावात्कारणाभावः ।। -(Vaiseshikadarshanam 1.2)

There is no effect possible without a cause. But the absence of effect does not mean the absence of cause.
