iii.	Term Paper	30 marks reduced to 6 marks
iv.	Class Participation	20 marks reduced to 4 marks
v.	Attendance	15 marks reduced to 3 marks
	Total	125 marks reduced to 25 marks

*****Except for Psychology and Public Administration, distribution of marks and evaluation pattern for all Social Sciences having 16 credits and 1600 marks in aggregate, evaluation pattern for theory papers shall be as follows:

Marks for Theory Papers:	100x4= 400 Marks per semester
Continuous Assessment Marks:	25x4= 100 marks per semester
Aggregate Marks (Theory+Cont. Ass.):	125x4= 500 marks per semester

Instructions for paper setters and candidates to specify division of marks for theory papers in subjects other than Psychology and Public Administration shall be as follows:

1. There shall be 9 questions in all including question number I which will be compulsory and shall comprise 15 short answer type questions out of which candidates will be required to attempt any 10 in about 25-30 words each. Short answer type questions shall carry 2 marks each and shall cover the entire syllabus of a given paper.
2. Rest of the question paper shall carry 80 marks and shall be divided into 4 units comprising 8 long answer type questions. Candidates will be asked to select one long answer type question of 20 marks each from each of the four Units.

***Evaluation pattern for Psychology and Public Administration will be as follows:**

In Psychology, break up of marks shall be 450 marks per semester on the pattern applicable in Psychology department

Marks of theory papers 100 x 4= 400 Marks per semester

Marks of two Practical papers 50x 2 = 100 Marks per semester

Aggregate marks (Theory + Practical) =500 marks per semester

Evaluation pattern for Public Administration break up of marks shall be as follows:

Marks for theory papers (of 4 credits papers) 100x4= 400 per semester

Marks for theory papers (of 2 credits papers) 50x2=100 per semester

Aggregate marks (of 4 credits+2 credits papers) =500per semester

Variation in evaluation is in tune with variation in number of papers taught in different Social Science subjects.

5.1 POL 501 GEOPOLITICS: CLASSICAL AND CRITICAL

Maximum Marks	**:**	**50**
Theory	**:**	**25**
Internal Assessment	**:**	**25**
Time	**:**	**3 hours**

Objective: This optional course is aimed at making students understand that there is a complex history and geography --both given and written—to the term 'Geopolitics'. The term was coined at the very end of the 19th century at the service of new forms of nationalism, colonial projects and inter-imperialist rivalry in Europe and the world. With the complex interplay between space and power at its conceptual core, geopolitics has most often been associated with a 'realist' and state-centric approach to international relations. But recent decades have witnessed the rise of a critical geopolitics that focuses on a far wider range of social actors, experiences (including non-Western) and practices. This course provides a concise survey of *classical* geopolitics from a *critical* geopolitical perspective. It draws attention to politics behind the production of geographical knowledge (in plural) of international relations. Illustrations/cases used in this course are drawn largely from both continental and maritime Asia and the Indian Ocean Region.

Each unit shall have two long questions and the candidate shall be given internal choice of attempting **one question from each Unit I-IV.** Each question will carry 5 marks. 4x5=20

2. Each long question would cover about one third or one half of a topic detailed in the syllabus.
3. The paper setter would avoid repetition between different types of questions within one question paper.

Unit I

1. Geometry of Earth: Latitude, Longitude (Time Zones and International Date Line)
2. Size and Shape of the Earth.

Unit II

3. Types of Maps: Wall Maps, Atlas Maps, Topographical Maps, Cadastral Maps.
4. Enlargement and Reduction of Maps: Graphic and Square Method.

Unit III

5. Profiles (Transverse and Longitudinal)
6. Slopes and Inter visibility

Unit IV

7. Map Projections: Classification of Map projections
8. Reading Topographical Maps

6.1 GEO 602 WORLD REGIONAL GEOGRAPHY-2

Maximum Marks	**:**	**100**
Theory	**:**	**50**
Internal Assessment	**:**	**50**
Time	**:**	**3 hours**

Objectives: To provide an understanding of the concept of world regions with respect to Land, People, Polity and Economy; the physical and human resource base and their interface with economic development; development problems and prospects.

Pedagogy: Teacher should involve maximum use of detailed maps of the countries and continents. Students should be encouraged to use atlas in classrooms. Video shows about culture, physiography and economy of these countries may be arranged if possible.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES

1. The syllabus has been divided into four units. There shall be 9 questions in all, the first question is compulsory and shall be short answer type containing 8 short questions spread over the whole syllabus, to be answered in about 25 to 30 words each. The candidates are required to attempt any 5 short answer type question of 2 marks each, i.e. 5x2=10 marks. Rest of the paper shall contain 4 units. Each unit shall have two long questions and the candidate shall be given internal choice of attempting **one question from each Unit I-IV.** Each question will carry 10 marks. 4x10=40
2. Each long question would cover about one third or one half of a topic detailed in the syllabus.
3. The paper setter would avoid repetition between different types of questions within one question paper.
4. **Course Content:** Study of the following regions of the world in terms of constituent countries: strategic location, salient physical, demographic and economic features, cultural patterns, resource base, economic development, problems, prospects and issues related to regional groupings (South Asian Association of Regional Cooperation, Association of South East Asian Nations, Organization of Petroleum Exporting Countries and Organization of African Unity).

6.1 GEO 603: INTRODUCTION TO GEOSPATIAL TECHNOLOGY

Maximum Marks	**:**	**100**
Theory	**:**	**50**
Internal Assessment	**:**	**50**
Time	**:**	**3 hours**

Objectives: This course intend to expose the young mind to a cutting-edge geographical technology of remote sensing, GIS and GPS, together known as geospatial technology. The main objective to introduce the fundamental concepts related to geospatial technology with emphasis on practical aspects to develop students' decision making capabilities with scientific orientation.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES

1. The syllabus has been divided into four units. There shall be 9 questions in all, the first question is compulsory and shall be short answer type containing 8 short questions spread over the whole syllabus, to be answered in about 25 to 30 words each. The candidates are required to attempt any 5 short answer type

question of 2 marks each, i.e. 5x2=10 marks. Rest of the paper shall contain 4 units. Each unit shall have two long questions and the candidate shall be given internal choice of attempting **one question from each Unit I-IV.** Each question will carry 10 marks. 4x10=40

2. Each long question would cover about one third or one half of a topic detailed in the syllabus.

3. The paper setter would avoid repetition between different types of questions within one question paper.

Unit I

1. **Fundamentals of Remote Sensing**
   Remote Sensing: Definition and Concept of Remote Sensing,
   Types of Remote Sensing and Remote Sensing Platforms
   Geographical Uses/Applications of Remote Sensing Technology

Unit II

2. **Basics of Geographic Information System**
   Concepts of GIS, its Significance and Applications
   Components of GIS, Nature of Geographic Data: Spatial and Attribute Data
   Raster and Vector Data Models; Data sources for GIS

Unit III

3. **Concepts of Global Positioning System:**
   GPS: Concept and Principles of Operation,
   GPS Basics: GPS Segment, Positioning, Accuracy and Errors
   Types of GPS devices; Applications of GPS

Unit IV

4. **Applications of Geospatial Technology:**
   Applications in Environmental Management
   Geospatial technologies and Disaster Management
   Use of Geospatial technologies in our daily life

6.1 ECO 603 INTERMEDIATE MACROECONOMICS- II

Maximum Marks	**:**	**100**
Theory	**:**	**50**
Internal Assessment	**:**	**50**
Time	**:**	**3 hours**

Objective: This course is a sequel to intermediate Macroeconomics I. In this course, the students are introduced to the long run dynamic issues like growth and technical progress. It also provides the micro-foundations to the various aggregative concepts used in the previous course.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES

1. The syllabus has been divided into four units. There shall be 9 questions in all, the first question is compulsory and shall be short answer type containing 8 short questions spread over the whole syllabus, to be answered in about 25 to 30 words each. The candidates are required to attempt any 5 short answer type question of 2 marks each, i.e. 5x2=10 marks. Rest of the paper shall contain 4 units. Each unit shall have two long questions and the candidate shall be given

internal choice of attempting **one question from each Unit I-IV.** Each question will carry 10 marks. 4x10=40

2. Each long question would cover about one third or one half of a topic detailed in the syllabus.
3. The paper setter would avoid repetition between different types of questions within one question paper.

Unit I

Economic Growth: Harrod-Domar model; Solow model; golden rule; technological progress and elements of endogenous growth.

Unit II

Microeconomic Foundations: Consumption: Keynesian consumption; fisher's theory of optimal intertemporal choice; life cycle and permanent income hypotheses; rational expectations and random-walk of consumption expenditure.

Investment: determinants of business fixed investment; residential investment and inventory investment. Demand and money.

Unit III

Fiscal and Monetary Policy: Active or Passive; monetary policy objectives and targets; rules versus discretion: time consistency; the government budget constraint; government debt and Ricardian equivalence.

UNIT IV

Schools of Macroeconomic thought:

Classical School.

Keynesian theory of Income, Output and employment.

6.1 SOC 604 : SOCIAL DEMOGRAPHY

Maximum Marks	**:**	**100**
Theory	**:**	**50**
Internal Assessment	**:**	**50**
Time	**:**	**3 hours**

Objective: The course exposes students to various concepts of population, data sources and basic theoretical contributions of Malthus, Marx, and Demographic Transition to Population Studies. It also discusses the steps taken towards population stabilization through the population policy in India**.**
Pedagogy: Teaching and learning will be through lectures, seminars, group work, assignment writing, tutorials and presentations.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES

1. The syllabus has been divided into four Units. There shall be 9 questions in all, the first question is compulsory and shall be short answer type containing 8 short questions spread over the whole syllabus, to be answered in about 25 to 30 words each. The candidates are required to attempt any 5 short answer type question of 2 marks each, i.e. 5x2=10 marks. Rest of the paper shall contain 4 Units. Each Unit shall have two long questions and the candidate shall be given internal choice of attempting **one question from each Unit I-IV.** Each question will carry 10 marks. 4x10=40
2. Each long question would cover about one third or one half of a topic detailed in the syllabus.
3. The paper setter would avoid repetition between different types of questions within one question paper.

Unit I

1. Population: Definition, Scope, Nature;
2. Sources of Population Data: Census, Vital Registration and Survey Method

Unit II

3. Theoretical Contributions: Malthus, Marx;
4. Demographic Transition Theory and their critical assessment.

Unit III

5. Mortality: Concepts of Mortality, causes of Mortality, Mortality rate in India;
6. Fertility: Concept of Fertility, Factors affecting fertility-biological and socio-cultural, Fertility rate in India.

Unit IV

7. Regulating Population in India: National Population Policy 2000, Reproductive and Child Health Programme; MTP and PNDT Acts.

6.2 GEN 608 CLIMATE CHANGE AND SUSTAINABLE DEVELOPMENT

Maximum Marks	**:**	**100**
Theory	**:**	**50**
Internal Assessment	**:**	**50**
Time	**:**	**3 hours**

Objective: Climate change poses unprecedented serious ethical and political challenges to current institutions and ways of life. This course is based on the assumption that the concepts of 'sustainable development' and 'climate change', and the complex phenomena they represent, should be approached, understood and analyzed in juxtaposition, rather than divorce, with each another. The course aims to provide an understanding of the various aspects of interrelated challenges associated with sustainability and climate change, both on land and at sea, largely from an interdisciplinary social science perspective.

Pedagogy: The paper would be taught using original texts and research papers to encourage students to read more extensively and understand the theme through this reading.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES

1. The syllabus has been divided into FOUR Units. There shall be 9 questions in all, the first question is compulsory and shall be short answer type containing 8 short questions spread over the whole syllabus, to be answered in about 25 to 30 words each. The candidates are required to attempt any 5 short answer type question of 2 marks each, i.e. 5x2=10 marks. Rest of the

paper shall contain 4 Units. Each Unit shall have TWO long questions and the candidate shall attempt **four** questions in all selecting at least **one question from each Unit .** Each question will carry 10 marks.4x10=40

2. Each long question would cover about one third or one half of a topic detailed in the syllabus.

3. The paper setter would avoid repetition between different types of questions within one question paper.

UNIT I

1. Understanding Sustainable Development

Concept of sustainable development by familiarising students with major reports and publications on global environmental governance, and critical literature on the politics of sustainability. It provides a means of engaging with the idea of climate change (in Units 2, 3 & 4), through an appreciation of aspects of social justice and equity, central to the narrative(s) of the Global South.

UNIT II

2. Introducing the Idea of Climate Change

This Unit first introduces students to the key documents of the past three decades that emphasise the 'global' nature of the issue of climate change. Additionally, it creates the basis for students to engage independently with the multi-scale politics of climate change, using knowledge and interdisciplinarity as starting points. Students are exposed to the ethical-normative dimensions of climate change through the notions of climate justice with regard to both mitigation and adaptation.

UNIT III

3. Climate Change as a Project for the Social Sciences

This Unit introduces students to the politics of development and globalization, providing a social science frame with which to interrogate climate change, through 'a view from somewhere'. Questions of location and situation are granted relevance and attention in this manner.

UNIT IV

4. Climate Politics, Policy and International Relations

This Unit explores the contours of political and policy engagement with climate change in international relations. It begins with critical appraisals of 'spaces' of climate change, and branches into more detailed analyses of climate diplomacy and the Indian case.

7.3 Skill Development Paper (to be taught at ISSER)

GEN 709	Basic Soft Skills	2	50

Total Credits & Total Marks for Semester VII 26 650

Break up of Internal Assessment marks for 5 credit papers taught at specific departments: 125 marks reduced to 25.

i.	Written Test	30 marks reduced to 6 marks
ii.	Snap Test	30 marks reduced to 6 marks
iii.	Term Paper	30 marks reduced to 6 marks
vi.	Class Participation	20 marks reduced to 4 marks
v.	Attendance	15 marks reduced to 3 marks
	Total	125 marks reduced to 25 marks

*****Except for Psychology and Public Administration,distribution of marks and evaluation pattern for all Social Sciences having 16 credits and 1600 marks in aggregate, evaluation pattern for theory papers shall be as follows:

Marks for Theory Papers: 100x 4= 400 Marks per semester Continuous Assessment Marks: 25x4= 100 marks per semester
Aggregate Marks (Theory+Cont. Ass.): 125X4= 500 marks per semester

Instructions for paper setters and candidates to specify division of marks for theory papers in subjects other than Psychology and Public Administration shall be as follows:

1. There shall be 9 questions in all including question number I which will be compulsory and shall comprise 15 short answer type questions out of which candidates will be required to attempt any 10 in about 25-30 words each. Short answer type questions shall carry 2 marks each and shall cover the entire syllabus of a given paper.

2. Rest of the question paper shall carry 80 marks and shall be divided into 4 units comprising 8 long answer type questions. Candidates will be asked to select one long answer type question of 20 marks each from each of the four Units.

***Evaluation pattern for Psychology and Public Administration will be as follows:**

In Psychology, break up of marks shall be 450 marks per semester on the pattern applicable in Psychology department

Marks of theory papers 100 x 4= 400 Marks per semester

Marks of two Practical papers 50x 2 = 100 Marks per semester

Aggregate marks (Theory + Practical) =500 marks per semester

Evaluation pattern for Public Administration break up of marks shall be as follows:

Marks for theory papers (of 4 credits papers) 100x4= 400 per semester

Marks for theory papers (of 2 credits papers) 50x2=100 per semester

Aggregate marks (of 4 credits+2 credits papers) =500per semester

Variation in evaluation is in tune with variation in number of papers taught in different Social Science subjects.

Objective:

The objective is to familiarise students with the discourses of globalisation – in its economic, cultural, anthropological and geographic dimensions. It equips students to understand how these dimensions intersect with ideas about development and international political economy. It also extends the application of these ideas to analyses of trade and the constitution of democracies, while drawing attention to the cross-cutting challenges of political geography by situating these nested lenses in relation to global actors and institutions. Finally, it aims to impress upon that globalisation as a process is intertwined with the politics of environment through contemporary perspectives from the spheres of ecology, resistance and citizenship. The phenomenon of globalisation has immediate consequences for the framing of political discourse in the global South. It brings with it numerous opportunities and challenges for the contemplation of global politics in ways that are far from uniform and continually emphasise the centrality of development, democracy and new technologies of resistance to the framing of individual and collective identities. It is in the light of these factors that globalisation presents a provocative site for interdisciplinary inquiry from within the social sciences.
