Practical: 22 **Internal Assessment: 03**

1. Crop identification based on seed and morphological characteristics.
2. Different inorganic fertilizers, fertilizers recommendation for *Kharif* crops and calculating the fertilizer requirement of various crops as per the recommendation using different combinations.
3. Practice in different methods of fertilizer application.
4. Sowing of important *kharif* crops.
5. Identification of *kharif* weeds and chemical method of weed control.
6. Visit to different farms.
7. Study of morphological characterstics of rice, maize, bajra, groundnut and cotton.

B.A./B.Sc.(General) Agriculture (Major/Minor)

Course Title: Agronomic practices for Cultivation of *Rabi* Crops

Course Code: (AGR-DSC-5Maj/Min-401)
Semester: Fourth

Learning Outcome: To give student basic knowledge of principles and practices for raising vegetable crops.

Max. Marks: 100 **Course Credits** = 3+1=4

1. Theory: 75	Written Exam: 67	Internal Assessment: 8
2. Practical: 25	Written Exam: 22	Internal Assessment: 3

Periods per week: 1. Theory- Four of 45 minutes duration (Three hours)
2. Practical- One of two hours duration

Instructions for Paper Setters:

Question Paper will have four units. Students will attempt **five** questions out of total nine comprising of one **COMPULSORY** question consisting of 10short answer type questions of one and a half mark each covering the whole syllabus. Units 'I', 'II', 'III' and 'IV' will have two questions of 13 marks each and one question is to be attempted out of each unit.

Instruction Aids: Teachers can use lecture, lecture-cum-demonstration, project, assignments, problem solving, inductive and deductive methods and can use L.C.D., L.E.D., and multimedia projector in addition to black/white board.

UNIT – I **12 Hours**

Climatic requirement, Soil requirements, Rotations, Improved varieties, Agronomic practices (land preparation, seed rate & seed treatment, weed control, fertilizer application, irrigation) and harvesting of :- Cereals – Wheat, Barley, Winter Maize.

UNIT – II **11 Hours**

Climatic requirement, Soil requirements, Rotations, Improved varieties, Agronomic practices (land preparation, seed rate & seed treatment, weed control, fertilizer application, irrigation) and harvesting of Oilseeds — Rapeseed and Mustard (Toria, GobhiSarson, Raya, Taramira, Linseed, and Sunflower.

UNIT – III **11 Hours**

Climatic requirement, Soil requirements, Rotations, Improved varieties, Agronomic practices (land preparation, seed rate & seed treatment, weed control, fertilizer application, irrigation) and harvesting of :- Pulses **—** Gram, Field Pea and Lentil, Summer moong.

UNIT – IV **11 Hours**

Climatic requirement, Soil requirements, Rotations, Improved varieties, Agronomic practices (land preparation, seed rate & seed treatment, weed control, fertilizer application, irrigation) and harvesting of sugarcane and Fodders : Barseem, Shaftal, Lucerne, Oat and Senji.

GUIDELINES FOR PRACTICAL EXAMINATION

Time- 3 Hrs **Max Marks: 25**

UNIT – I **12 Hours**

Introductory knowledge of soil: definition of soil, component of soil
Definition, occurrence and classification of soil forming rocks & minerals.
Weathering of rocks and minerals.
Soil Profile, Horizons. Classification of soil based on soil taxonomy.

UNIT – II **11 Hours**

Important physical properties of soil: Soil separates/particles, their mechanical analysis and characteristics.
Soil texture, soil densities and porosity of soil.
Classification of Soil structure, factors effecting soil structure and its importance.
Soil Organic Matter origin, its nature and composition.

UNIT – III **11 Hours**

Decomposition of various organic compounds: Factors affecting decomposition, decompositions of water soluble and water insoluble organic matters.
Advantages and disadvantages of organic matter.
Concept of humus formation.
Soil reactions:- Methods of expressing and factors affecting Soil reactions, its influence on nutrient availability & plant growth.
Buffer action & buffering capacity of soils.Factors affecting buffering capacity of soils.

UNIT – IV **11 Hours**

Formation & problems of Salt effected soils: Different types of Salt effected soils, nature & sources of soluble salt in saline soil, appraisal of saline &sodic soil. Calcareous soil.
Reclamations of saline and alkali or sodic soils: Chemical reactions involving reclamations of salt affected soil. Gypsum requirement.
Plant growth concept and factors affecting plant growth.
Plant nutrition: Essential elements, classification & general function of plant nutrients, forms of nutrient elements absorbed by plants. Process of nutrient uptake.

GUIDELINES FOR PRACTICAL EXAMINATION

Time- 3 Hrs **Max Marks: 25**
Practical: 22 **Internal Assessment: 03**

1. Identification of Important rocks and minerals.
2. Examination of soil profile in the field.
3. Soil sampling and use of augers.
4. Determination of water and soil texture.
5. Study of soil colour using Munsell soil colour charts.
6. Study of soil texture and soil structure of a given sample.
7. Calculations of soil densities and porosity of soil.
8. Calculation of gypsum requirement for given sample
9. Soil survey of a farm.

The student exiting the programme after two years securing 96 credits will be awarded UG Diploma provided he/she secures 4 credits from summer internship												

***Note: Student need to select one MDC, VAC, SEC out of given options, respectively. NO MDC, SEC, VAC will be repeated. All MDC, SEC and VAC are Level-100**
***Note: The candidate will opt for either Template 1 or 2 from Semester III onwards.**

Notes:

1. In the first semester student is offered three different subjects A, B & C.
2. At the end of second semester each student has the option to choose any one of the two streams namely Single Major or Multi-Disciplinary. The student choosing Single Major stream is required to give his/her Major and Minor at the end of the second semester.
3. The student who chooses multi-disciplinary stream will continue with the three subjects and complete his/her three-year degree by securing 36 credits each in the chosen two subjects as Major and 24 credits in Minor subject.
4. A student who secures 75% or more marks in aggregate till semester 6 (up to 3-year degree) shall be eligible for 4 YEAR DEGREE B.Sc. HONOURS with research, on the condition that the Institution is a PU approved Research Centre
5. The student opting for Single Major must secure 50% credits of the total credits in the Major subject and obtain 24 credits from the Minor subject(s). To qualify for Minor in a particular subject, the student must attain atleast 12 credits in that subject(s).
6. The student exiting the programme after one year securing 48 credits will be awarded UG Certificate provided he/she secures 4 credits from summer internship/community work. Further, the student exiting the programme after two years securing 96 credits will be awarded UG Diploma provided he/she secure 4 credits from summer internship. The student successfully securing 144 credits will be awarded BA degree.
7. Language paper chosen as MIL-1 and MIL-2 should be in the same subject.
8. Once Major and Minor papers are chosen in 3rd semester, the same will continue as Major and Minor subject in the subsequent semesters.
9. The candidate opting for Honours in research is required to study a paper of Research Methodology (RM) of 04 credits and write Dissertation of 08 credits in one of the two Major subjects.

Paper Title : Programming in C++
Paper Code:CSA-DSC-3(Maj/Min)-301

Th	Pr	Cr
2	2	4

Theory External Marks: 45
Theory Internal Marks: 05
Number of Th. Hrs. : 30
Practical Ext. Marks : 50
Number of Pr. Hrs. : 60

Time Duration: 3 Hrs.
Level: L-200

Objectives: By the end of the course, students will be able to write C++ programs using the more esoteric language features, utilize Object Oriented techniques to design C++ programs, use the standard C++ library, and explore advanced C++ techniques.

Learning Outcome:
On successful completion of the course, students will be able to:

i. Understand the features and importance of object oriented programming concepts.
ii. Use the concepts like inheritance, polymorphism, and dynamic binding to develop codes.
iii. Gets better understanding of developing reusable components using C++ programming.
iv. Develop of large software that needs bottom up and better modular approach.

Note :

i. The Question Paper will consist of Four Units.
ii. Examiner will set total of NINE questions comprising TWO questions from each Unit and ONE compulsory question of short answer type covering whole syllabi.
iii. The students are required to attempt ONE question from each Unit and the Compulsory question.
iv. All questions carry equal marks unless specified.

UNIT - I

Principles of Object-Oriented Programming (OOP): Introduction to OOP, Difference between OOP and Procedure Oriented Programming; Concepts: Object, Class, Encapsulation, Abstraction, Polymorphism and Inheritance, Applications of OOP. Special operators: scope resolution operator, Member Dereferencing operators, Memory management operators, Manipulators and Type cast operator.

Structure of a C++ Program and Classes and Objects: Class Declaration: Data Members, Member Functions, Private and Public members, Creating Objects, accessing class data members, Accessing member functions; Class Function Definition: Member Function definition inside the class declaration and outside the class declaration.

UNIT - II

Friend function, inline function, Static data members, Function Overloading, Arrays within a class. Arrays of Objects; Objects as function arguments: Pass by value, Pass by reference, Pointers to Objects.

Constructors: Declaration and Definition, Types of Constructors, (Default, Parameterized, Copy Constructors). Destructors: Definition and use.

Operator Overloading: Concept of Operator Overloading, Overloading unary and binary operators.

UNIT - III

Inheritance: Extending Classes Concept of inheritance, Base class, defining derived classes, Visibility modes: Public, Private, Protected; Types of Inheritance: Single inheritance:
Privately derived, publicly derived; Making a protected member inheritable, multilevel inheritance, multiple Inheritance and ambiguity of multiple inheritance, Hierarchal Inheritance, Hybrid, Nesting of classes.
Polymorphism: Definition, Application and demonstration of Data Abstraction, Encapsulation and Polymorphism, Static and Dynamic Polymorphism, Virtual Functions, pure virtual functions.

UNIT - IV

Exception Handling: Definition, Exception Handling Mechanism: Throwing mechanism and Catching Mechanism, Rethrowing an Exception
File Processing: Opening and closing of file, Binary file operations, structures and file operations, classes and file operations, Random file processing.

Objective: This course enables students to create web pages using HTML, CSS, Java script and dream weaver.

Learning Outcome:
After completing this course students will be able to:

i. Get familiar with the terms related to World Wide Web.
ii. Use the front end web site developing technologies like HTML and CSS
iii. Know about the basics of JavaScript.
iv. Use Dreamweaver for creating Web Pages

Note :

i. The Question Paper will consist of Four Units.
ii. Examiner will set total of NINE questions comprising TWO questions from each Unit and ONE compulsory question of short answer type covering whole syllabi.
iii. The students are required to attempt ONE question from each Unit and the Compulsory question.
iv. All questions carry equal marks unless specified.

UNIT-I

Web Terminology: Web Server; Web Client /Browser, Understanding how a Browser communicates with a Web Server, Internet, Intranet, Extranet, WWW, URL

Introduction to HTML : Structure of an HTML program, Paragraph Breaks, Line Breaks; Emphasizing Material in a Web Page (Heading Styles, Drawing Lines); Text Styles (Bold, Italics, Underline); Other Text Effects (Centering (Text, Images etc.) ;Lists: Unordered List, Ordered Lists, Definition lists; Adding Images: Img element using Border, Width, Height, Align, ALT Attributes ;Tables: Caption Tag, Width, Border, Cell padding, Cell spacing, BGCOLOR, COLSPAN and ROWSPAN Attribute

UNIT-II

Linking Documents: Anchor tag, External Document References, Internal Document References and Image Maps

Frames: understanding frames, creating frames, Targeting Named Frames

Cascading style sheets (CSS): Style tag, Link tag, Types of CSS: In-Line, Internal, External Forms: Attributes of Form element, Input element: Text Element, Password, Button, Submit Button, Reset Button, The Checkbox, Radio, Text Area, Select and Option

UNIT-III

Java Script: Features, tokens, data types, variables, operations, control constructs, strings arrays, functions, core language objects, client side objects, event handling. Applications related to client side form validation

Other Built-In Objects in Java Script: The String Object, The Math Object, and The Date Object; User Defined Objects: Creating a User Defined Object, Instances, Objects within Objects

UNIT-IV

Creating Web Pages using Dream weaver: Introduction to Dreamweaver, Understanding Workspace Layout, Managing Websites, Creating a Website, Using Dream weaver Templates, Adding New Web Pages, Text and Page Format, Inserting Tables, Lists, Images, Adding Links.

Time Duration: 3 Hrs. **Number of Hours: 60**
Level: L-200
Objectives: This course enables students to understand Software Engineering Tools and Techniques.

Learning Outcome:
After the completion of this paper, student will be able to: -

(i) Use principles, concepts, methods, and techniques of the software engineering approach to produce quality software.
(ii) Apply software engineering principles and practices in the planning and development of an actual software product.

Note:
The Question Paper will consist of Four Units.

(i) Examiner will set total of **NINE** questions comprising **TWO** questions from eachUnit and **ONE** compulsory question of short answer type covering whole syllabi.
(ii) The students are required to attempt **ONE** question from each Unit and the Compulsory question.
(iii) All questions carry equal marks unless specified.

UNIT – I

Introduction to Software Engineering: Definition, Software Engineering goals, Characteristics of well-engineered software.
Software Process Models: Waterfall Model, Prototyping Model, Spiral Model.
Software Requirement Specification (SRS): Software Requirements, Definition of SRS, Characteristics of SRS, Components of SRS, Designing of SRS.

System Analysis: Principles of Structures Analysis, DFDs, E-R Diagrams, Data Dictionary.

UNIT – II

Software Design: Design Objectives, Design Principles, Concepts, Design Process, Design Methodologies: Structured Design, Modular Design, Object Oriented Design, User Interface Design and its elements and its Characteristics.

Software Project Planning & Scheduling: Objectives, Decomposition techniques, Planning and Scheduling Tools: GANTT Chart, PERT Chart, Critical Path Method and Work Breakdown Structure; Cost estimation, Cost estimation Models: Single Variable Model, COCOMO Model; Software Risks, Risk Assessment and management.

UNIT – III

Software Metrics: Role of Metrics and Measurement, Types of Software Metrics: Product Metrics, Software Size Metrics: LOC and Function Points, Process Metrics, People Metrics.

System Maintenance and Reliability: Software Quality and features, Maintenance and its types; Factors Affecting Software Reliability, Software Reliability vs Hardware Reliability, Software Reliability Metrics.

UNIT-IV

Software Testing Techniques: Introduction to Software Testing Process, Objectives of Software Testing, BBT & its Techniques, WBT & its Techniques. Integration Testing, Functional Testing, Object Oriented Testing, Alpha and Beta Testing.

Hardware and Software Selection: Types of Software, Procedure for Hardware/Software selection: Major phases in selection, Evaluation and Validation, Vendor Selection, Post – Installation Review. Software selection- Criteria for Software Selection, the evaluation process.

Paper Title: Database Management System using Oracle
Paper Code: CSA-DSC-6(Maj)-402

Th	Pr	Cr	Theory External Marks:45
2	2	4	Theory Internal Marks: 05

Time Duration : 3 Hrs
Number of Hours: 30

Level: L-200

Objective: This course aims at giving the students the insight of the underlying concepts of database management system and implement them using Database software.

Learning Outcome:
On successful completion of the course, students will be able to:
(i) Gain a solid grasp of fundamental database concepts, Including database models and schemas.
(ii) Understand the basic elements of a relational database management system
(iii) Master the basics of SQL and construct queries using SQL
(iv) Basic programming concepts using PL/SQL

Note:
(i) The Question Paper will consist of Four Units.
(ii) Examiner will set total of **NINE** questions comprising **TWO** questions from each Unit and **ONE**
Compulsory question of short answer type covering whole syllabi.
(iii) The students are required to attempt **ONE** question from each Unit and the Compulsory question.
(iv) All questions carry equal marks unless specified.

UNIT – I

Database Concepts: Introduction to databases, need, database architecture, Terminology: Tuple, Degree, attributes, Domain, Primary key, foreign keys, candidate keys; The 12 Rules (Codd's Rule) for an RDBMS, Normalization: First, second and third Normal Form, Boyce Codd Normal Form.

UNIT – II

Understanding SQL-1: Data Types, Creating Tables, Creating a Table with data from Another table, Inserting Values into a Table, Updating Column(s) of a Table, Deleting Row(s) from a Table, Dropping a Column, Querying database tables, Conditional retrieval of rows, Working with Null Values, Matching a pattern from a table, ordering the result of a Query Aggregate Functions, Grouping the Result of a Query, creation and deletion of Views

UNIT – III

Understanding SQL-II: Managing privileges with Grant and Revoke Command, COMMIT and ROLLBACK, Functions: Arithmetic Functions, Character Functions, Date Functions, Group Functions, Querying Multiple Tables using Equi-Joins, Cartesian Joins, Outer Joins, Self-Joins, SET Operators: Union, Intersect, Minus.

UNIT – IV

PL/SQL: Introduction to PL/SQL, The Advantage of PL/SQL, PL/SQL Block Structure, PL/SQL Architecture, Fundamentals of PL/SQL, PL/SQL Data Types, Variables and Constants, Scope and Visibility of a Variable, Assignments and Expressions, Operator Precedence, Conditional and Iterative Control, Cursor Management in PL/SQL, Implicit/explicit Cursor Attributes, Exception Handling in PL/SQL; Predefined Exceptions, User Defined Exceptions.

List of Practicals:

Implementation of SQL concepts

DDL, DML, DCL, TCL, Data Retrieval, Functions, Aggregate Functions, Views, Joins, Set Operators

Implementation of Programsin PL/SQL

1. Write PL/SQL blocks to show the declaration of variables.
2. Write a PL/SQL program to check whether a number is even or odd
3. Write a PL/SQL program to find greatest of three numbers
4. Write a PL/SQL program to display the grade of a student using else-if ladder.
5. Write a PL/SQL program to display the description against a grade using CASE statement
6. Write a program in PL/SQL to print 1st n numbers.
7. Write a program in PL/SQL to find factorial of a number.
8. Write a program in PL/SQL to print table of a given number.
9. Write a program in PL/SQL to show implicit/explicit cursor.
10. Write a program in PL/SQL to include implicit/explicit exception.

Objectives: The objective of this course is to familiarize students with Basic Data Structure and its implementation and to develop skills to apply appropriate Data Structure in Problem Solving.

Learning Outcome:
On successful completion of the course, students will be able to:
(i) Understand the Basic types of Data Structure, implementation, Applications.
(ii) Implement Linear and Non-Linear Data Structure.
(iii) Analyze and apply various searching and sorting techniques.
(iv) Develop Programming skills which helps in problem solving.

UNIT – I

Data Structure: Introduction and Classification of Data Structure, Data Structure operations. Applications of Data Structure, Basic data Structures;
Arrays: Introduction, Types of Arrays, Memory representation, Applications and operations.

UNIT – II

Stacks: Introduction, representing stack in memory, Applications and operations.
Linked List: Introduction, Operations: -traversing, searching, inserting, deleting, Types of Linked List, Memory representation.

UNIT – III

Queue: Introduction, Types, Memory Representation.
Trees: Definition and Basic concepts, Representation in Contiguous Storage, Binary Tree, Binary Tree Traversal, Binary Search tree.

UNIT – IV

Graphs: Introduction, Memory Representation, Breadth First Search, Depth First Search.
Searching: Binary and Linear Search; **Sorting**: Bubble Sort, Merge Sort, Quick Sort.

(Practical Based on paper CSA-DSC-7(Maj)-403)

Practical External Marks: 50

Number of Practical Hours :60

Time Duration: 3 Hrs.

Implement Data Structures Operations using C / C++.

LIST OF PRACTICALS

1. Write a program to check whether a string is palindrome or not
2. To read n numbers and display it.
3. To demonstrate the concept of one-dimensional array.
4. Implementation of Program to perform the following operations on an Array
   - Traversal
   - Insertion
   - Deletion
5. Program to Implement Stack
   - Push an Element
   - Pop an Element
6. Write a program to implement linear and binary search algorithm.
7. Write a program to create a linked list and perform following operations:
   - Insertion
   - Deletion
   - Transversing
   - Searching
8. Program to implement Linear Queue using an array
9. Program to Implement Circular Queue using an array
10. Program to implement Linear Linked List
11. Program to implement Doubly Linked List
12. Program to perform Insertion in a Binary tree
13. Program to perform Deletion in a Binary tree
14. Program to perform Searching in a Binary tree
15. Program to perform Traversal in Graph
16. Write a program to sort a given list of number using following algorithm.
    - Bubble sort
    - Merge sort
    - Quick sort

Paper Title: Introduction to Artificial Intelligence

Th	Pr	Cr
4	-	4

Theory External Marks: 90
Theory Internal Marks: 10
Number of Hours: 60

Time Duration: 3 Hrs.

Objective: The course aims at introducing basic concepts of artificial intelligence, understanding of search techniques. To learn working of expert system and natural language processing.

Learning Outcome:

Onsuccessfulcompletionofthecourse,students willbeableto:

(i) Understanding of artificial intelligence, intelligent agents and state-space representation.
(ii) Understanding of working of searching techniques and its algorithms.
(iii) Understand basics of game playing, knowledge representation and expert systems.
(iv) Obtain insight about natural language processing and its components.

Note :

(ix) TheQuestionPaper willconsistofFourUnits.
(x) Examiner willset totalof**NINE**questionscomprising**TWO**questionsfromeachUnitand**ONE** compulsoryquestionofshortanswer typecoveringwholesyllabi.

UNIT-I

Introduction: What is AI?, Intelligent Agents: Agents and environment, the concept of Rationality, the nature of the environment, the structure of agents, Introduction to AI technique, Turing test, History and developments in AI, Applications of AI, State space representation, Production systems and problem characteristics.

UNIT-II

Searching techniques: Breadth First Search, Depth First Search, Generate and test, Hill climbing, Best First Search, A* and AO* algorithms, Constraint Satisfaction Problem, Means-End Analysis.

UNIT-III

Game Playing, Knowledge Representation and Expert Systems: Introduction to Game Playing, Minimax Search, Alpha-Beta pruning. Propositional Logic, First Order Predicate Logic, Resolution Principle, Architecture and role of expert systems, atleast two case studies of Expert Systems.

UNIT-IV

Natural Language Processing: Introduction to Natural Language Processing, Components of Natural Language Processing, Tokenisation and Sentence splitting, Lexical Analysis, Syntactic Analysis, Semantic Analysis, Discourse Integration and Pragmatic Analysis.

SEMESTER-III

SIKH RELIGION AND HISTORY (DSC-3)

Max. Marks : 100 **DSC : 04 Credit**
Written : 90
Internal : 10
Time : 03 hrs.
Level : 101

Objectives:

The course is designed for the students who want to pursue semester based graduate degree programme with Religious Studies as an elective subject. It is open to any student drawn from multiple disciplinary backgrounds after completion of 10+2 course. As one of the elective subject at the graduate level curriculum, it purports to develop a broad understanding of Indian Religions and awareness about the origin, features and purpose of different religions.

INSTRUCTIONS FOR PAPER-SETTER AND CANDIDATES:

Note: (i) For written paper, the students will be required to attempt five questions in all. Question No. I will be compulsory comprising of 12 short answer type questions of 2 marks each and will cover the entire syllabus. The students are required to attempt nine answer type questions out of twelve. Question No. I would carry 18 marks (9X2).

In addition to it, Questions No. II to IX will consist of **eight** long answer (Essay Type) questions which will be further divided into four units with each Unit having **two questions** to ensure internal choice to the candidate. In all, each question in this section shall carry 18 marks and this section shall carry 72 marks (4X18).

Course Contents

Unit - I

Life, Teachings and Contribution: Guru Nanak Dev, Guru Angad Dev, Guru Amar Das, Guru Ram Das and Guru Arjun Dev; Martyrdom and Martyrdom of Guru Arjan Dev.

Unit - II

Credits	**4**
Max. Marks	**100 Marks = Theory 90 marks + Internal Assessment 10 marks**
Time	**3 hours**
Level	**200**

Learning Outcomes: This course is designed to provide a strong foundation in microeconomic theory, enabling students to formally analyze the behavior of individual economic agents. It focuses on the decision-making processes of both consumers and firms, with particular attention to how firms operate under conditions of perfect and imperfect competition. Through this, students will gain a deeper understanding of market structures and the strategic behavior of firms within different competitive environments.

Pedagogy of the Course Work:90%Classroomteaching

Instructions for Paper-setter and candidates:
The maximum mark for the paper will be 100. The question paper will be of 90 marks and continuous evaluation 10 marks. The time allowed will be 3 hours.

The paper-setter must put a note in the question paper in this regard.

There shall be **9** questions in all
The first question is compulsory comprising 12 short answer-type questions spread over the whole syllabus. The candidates are required to attempt 9 questions. Each question shall be of two marks (9 x 2= 18).
Rest of the paper shall contain four units. Two questions shall be asked from each unit and the candidates shall be given internal choice. The candidates shall attempt one question from each unit. Each question will carry 18 marks (18x4=72).

UNIT I

Market structure: Concepts, types of market structure.
Perfectly Competitive Market: Characteristics and Assumptions, Price Determination Under Perfect Competition, Role of Time Element, Equilibrium of Firm and Industry in Short Run and Long Run under Perfect Competition. Supply Curve of a Firm and Industry Under Perfect Competition in Long Run and Short Run.

UNIT II

Monopolistic Competition: Price and Output Determination under Monopolistic Competition in Short and Long run. Selling Cost Equilibrium.
Monopoly: Price and Output Determination under Monopoly in Short and Long run. Discriminating Monopoly.

UNIT III

Oligopoly: Characteristics, types of Oligopoly: Kinked Demand Curve and Price Leadership Model of Oligopoly

Equilibrium: Concept, Existence and Uniqueness of Equilibrium. Types: Static and Dynamic Equilibrium, Partial and General Equilibrium.

UNIT IV

Theory of Distribution: Basic concepts (Derived Demand, Productivity of an Input, Marginal Productivity of Labour, Marginal Revenue Product, Demand for Labour, Supply of Labour).
Marginal Productivity Theory of Distribution Theory and Modern Theory of Wage Determination.
Ricardian and Modern Theory of Rent, Classical, Loanable Fund and Keynesian Theory of Interest.
Risk, Uncertainty and Innovation Theory of Profit.

ECO-DSC-4 (MAJ-3) 302: QUANTITATIVE METHODS FOR ECONOMICS-I

Topology of the code	**Major**
Course Duration/LTP (Lectures, Tutorials, Practical)	**L= 60 hours (4 hours a week for 15 weeks= 01 semester), T=0, P=0**
Credits	**4**
Max. Marks	**100 Marks = Theory 90 marks + Internal Assessment 10 marks**
Time	**3 hours**
Level	**200**

Learning Outcomes: This course is designed to train students in the use of fundamental mathematical and statistical tools for analyzing a wide range of economic phenomena. It emphasizes data analysis and the interpretation of results to draw informed conclusions. By engaging with quantitative techniques, students will enhance their decision-making accuracy and develop the ability to test and evaluate new economic ideas, thereby strengthening their analytical and problem-solving skills in an economic context.

Pedagogy of the Course Work: 90% Class room teaching
10% Internal Evaluation

Instructions for Paper-setter and candidates:
The maximum mark for the paper will be 100. The question paper will be of 90 marks and continuous evaluation 10 marks. The time allowed will be 3 hours.

The paper-setter must put a note in the question paper in this regard.

There shall be **9** questions in all
The first question is compulsory comprising 12 short answer-type questions spread over the whole syllabus. The candidates are required to attempt 9 questions. Each question shall be of two marks (9 x 2= 18).
Rest of the paper shall contain four units. Two questions shall be asked from each unit and the candidates shall be given internal choice. The candidates shall attempt one question from each unit. Each question will carry 18 marks (18x4=72).

UNIT - I

Elementary Set Theory, Relations and Functions, limit and Continuity.
Matrices and Determinants: Definition and types of Matrices; Operations (sum, difference product and transpose); Properties of Determinants; Calculation of Values of Determinants up to Third Order, Adjoint and Inverse of a Matrix. Solution of a System of Linear Equations (upto 3) by Matrix Inverse Method and Cramer's Rule.

UNIT – II

Introduction to Statistics: Meaning and Scope, Concepts of Population and Sample. Scales of Measurement - Nominal, Ordinal, Interval and Ratio. Variables and Attributes, Collection and Types of Data, Tabulation and Classification of Data, Graphical and Diagrammatical Presentation of Data.
Central Tendency: Meaning, Significance and Measurement using Mean (Arithmetic mean, Geometric and Harmonic Mean) Median, Partition Values and Mode.

UNIT - III

Dispersion: Meaning, Significance and Characteristics for an Ideal Measure; Measures of Dispersion: Range, Quartile Deviation, Mean or Average Deviation, Standard Deviation and Lorenz Curve.
Skewness and Kurtosis: Meaning and Measures.

UNIT - IV

Simple Correlation: Meaning, Types, Significance, Correlation and Causation; Scatter Diagram, Karl Pearson's and Spearman's Correlation Coefficient. Probable error.
Regression: Meaning and Significance, Difference Between Correlation and Regression, Simple Linear Regression and Estimation of Parameters (Slope and Intercept). Standard Error.

Suggested Practical Work: Use of Microsoft Excel in solving Simple Data Analysis.

Topology of the code	**Major**
Course Duration/LTP (Lectures, Tutorials, Practicals)	**L= 60 hours (4 hours a week for 15 weeks= 01 semester), T=0, P=0**
Credits	**4**
Max. Marks	**100 Marks = Theory 90 marks + Internal Assessment 10 marks**
Time	**3 hours**
Level	**200**

Learning Outcomes: By the end of this course, students will gain a solid understanding of econometrics, including its nature, scope, and methodology, and how to specify and estimate econometric models. They will learn to apply simple and multiple regression models using the Ordinary Least Squares method, understand the properties of least squares estimators, and evaluate model fit using R-squared and Adjusted R-squared. Students will also be able to test the significance of regression coefficients, conduct hypothesis testing, and address econometric problems like multicollinearity, autocorrelation, and heteroscedasticity. The course will cover specification errors, such as the omission of relevant variables or inclusion of irrelevant ones, and the impact of measurement errors in variables. Additionally, students will learn about model selection criteria and the use of dummy variables in regression models.

UNIT- I

Introduction: Nature and Scope of Econometrics, Methodology of Econometrics. Specification of an Econometric Model. Nature of Data Used in Estimation.

Simple and Multiple Regression Models: Estimation of Model by Method of Ordinary LeastSquares; Properties of the Least Squares Estimators, the Gauss-Markov Theorem. The goodness of Fit-R Square & Adjusted R Square.

UNIT –II

Testing Significance of Regression Coefficients: Confidence Interval and Hypotheses Testing.

Econometrics Problems: Nature, Consequences, Detection and Remedial Measures of the Problems of Multicollinearity and Autocorrelation.

UNIT- III

Econometrics Problems: Nature, Consequences, Detection and Remedial Measures of the Problem of Heteroscedasticity.

Specification Errors: Tests of Specification and Misspecification: Omission of a Relevant Variable; Inclusion of Irrelevant Variable.

UNIT- IV

Errors of Measurement: Errors of Measurement in Dependent and Independent Variables: Consequences and Remedial Measures. Model Selection Criteria.

Dummy Variables: Uses of Dummy Variables as Independent Variables.

ECO-DSC-5 (MAJ-4/MIN-4) 401: MACROECONOMICS

Topology of the code	**Major**
Course Duration/LTP (Lectures, Tutorials, Practicals)	**L= 60 hours (4 hours a week for 15 weeks= 01 semester), T=0, P=0**
Credits	**4**
Max. Marks	**100 Marks = Theory 90 marks + Internal Assessment 10 marks**
Time	**3 hours**
Level	**200**

Learning Outcomes: This course is designed to familiarize students with the fundamental principles of macroeconomics. It focuses on the analysis of economic aggregates, such as overall consumer and producer behaviour, government spending and taxation, and the monetary policy of the central bank. The course covers key macroeconomic theories related to the determination of national income, consumption, investment, employment, money and interest rates, inflation, as well as monetary and fiscal policies and business cycles. Through this, students will develop a broad understanding of the functioning of the overall economy and the role of policy in influencing economic outcomes.

UNIT I

Introduction to Macroeconomics: Meaning, nature and scope. Difference between micro and macroeconomics, Measurement of national income: measurement of GDP, Components of GDP, Real vs. nominal GDP, Problems in measuring national income.

UNIT II

Consumption and Saving Function: Average and Marginal Propensity to Consume/save, Keynes' Psychological Law of Consumption.

Investment Function: Types of Investment, Investment Demand Schedule and Factors Affecting Investment Decisions, Marginal Efficiency of Capital. Multiplier (Static and Dynamic Multiplier).

UNIT III

Determination of Income and Employment: Classical Theory of employment, Say's Law of Markets. Keynesian Theory of Income, Output and Employment, Principle of Effective Demand. Classical versus Keynesian theory of Income, Output and Employment.

UNIT IV

Inflation: Meaning, Types and Effects, Cost-Push and Demand-Pull Theories of Inflation, Measures to Control Inflation. Monetary and Fiscal Policies for Stabilization.

Trade Cycles: Meaning and Phases.

Money and Banking: Money: Definition, Functions and Role. Major Functions of Commercial Banks and Process of Credit Creation.

Time	**3 hours**
Level	**200**

Learning Outcomes: This course aims to equip students with a comprehensive understanding of the principles of public finance, taxation systems, and government expenditure, with a focus on their implications for societal welfare. It explores the complexities of fiscal policy through theoretical frameworks, covering key topics such as deficit financing, public debt management, and budget classifications. Additionally, the course examines the role of Finance Commissions in shaping India's fiscal governance, enabling students to critically analyze the structure and functioning of public financial systems.

UNIT-I

Introduction to Public Finance: Scope; Overview of different Functions of the Government: Allocation, Distribution and Stabilisation. Principle of Maximum Social Advantage.
Theory of Social Goods: Distinction between public, private and merit goods.

UNIT-II

Taxation: Classification and Canons. Characteristics of a Good Tax System.
Incidence and Impact of Taxation in Partial Equilibrium (Demand and Supply Theory).

Taxable Capacity (Absolute and Relative).

UNIT-III

Public Expenditure: Canons, Wagner's Law, Wiseman Peacock Hypothesis. Causes for the Recent Growth of Public Expenditure in India.
Deficit Financing: Objectives, Role and Limitations.
Public Debt: Types and Role. Burden of Public Debt.

UNIT-IV

Budget: Functional and Economic Classification of budgets. Balance and unbalanced budgets. Performance budgets.
Fiscal Federalism: Principles of federal finance. Horizontal and Vertical Equity. Rationale for finance commission in India. Latest finance commission.

UNIT-I

Definition of Money and Functions of Money, Money and Near Money Assets.

UNIT-II

Supply of Money: Components, Determinants, Money creation by the banking system.

Demand for Money: Classical Theory, Keynes Liquidity Preference Theory, Friedman's Restatement of Quantity Theory of Money.

UNIT-III

Central Banking: Main Functions, Targets and Techniques of Monetary Management. **Monetary Policy in India**: Framework, Evolution and Current Scenario; Autonomy of the Reserve

Bank of India. Major developments and Reforms. Critical Evaluation of Digital Currency: Implications and Emerging Issues in Indian Economy.

UNIT-IV

Commercial Banking: Main functions; Credit Creation;

UNIT - I

Differentiation: Simple and Partial Derivatives, Differentiation of Simple functions – Polynomial and Exponential Functions. Maxima and Minima of Functions of One Variable only their applications of micro and macroeconomics.

UNIT – II

Linear programming Problem: Meaning, Advantages, Limitations, Basic Terminology, Formulation of linear programming Problems and Solution by Graphical Method.

Theory of Probability: Introduction, Definitions and Use of Addition and Multiplicative Theorem, Conditional Probability and Bayes' Theorem.

UNIT – III

Time Series: Meaning, Components, Models, Determination of trend and short-term oscillations. Least Square and moving average method.

Interpolation and Extrapolation: Binomial Expansion Method, Newton's Method (Advancing difference) and Lagrange's Method.

UNIT – IV

Index Numbers:Meaning, Types, Uses and Problems in the Construction of Index Numbers; Methods of Constructing Simple and weighted Price and Quantity Indices (Laspeyres's, Paasche's and Fisher's Index numbers for weighted index numbers); Tests of Adequacy. Fixed Base Index, Chain Base Index, Base Conversion, Base Shifting, Splicing, Deflating, Consumer Price Index.

Typology of Course	Major
Level of Course	UG
Course Duration/LTP (Lectures, Tutorials, Practical)	Semester: 15 weeks; 60 hours Field based learning/project/ workshop/activities: 2 hour duration per week
Credits	4 credits
Max. Marks and Time	Max.Marks:100 marks (Theory:90 marks; Internal assessment:10marks) Time: 3 hours
COURSE OUTCOME	By the end of this course, students will be able to: 1. **Explain** the concepts of philosophical, sociological, and technological foundations of education and **analyze** their role in the educational process. 2. **Discuss** the modern concept of the philosophy of education and its relevance in contemporary contexts. 3. **Analyze** the role of ethics in education and **apply** Ethical principles to educational practices. 4. **Describe** the Indian system of education during ancient, medieval, and modern periods and **evaluate** its evolution and impact on current education. 5. **Define** the philosophy of education and **explain** its nature and scope. 6. **Differentiate** between educational philosophy and the philosophy of education and **illustrate** their practical implications. 7. **Examine** the relationship between philosophy and education, with a focus on aims, curriculum, teaching methods, teacher roles, and discipline. 8. **Define** educational sociology, **explain** its nature and scope, and **evaluate** its importance in education. 9. **Analyze** the concepts of social stratification and social mobility and **assess** their implications for education. 10. **Discuss** the role of information and communication technology (ICT) in education and **demonstrate** its practical applications in teaching and learning. 11. **Summarize** the major philosophies of Bharat, including Buddhism, Jainism, and Sankhya, and **evaluate** their contributions to education. 12. **Explain** the key principles of major world philosophies, such as Idealism, Naturalism, and Pragmatism, and **analyze** their influence on educational theory and practice.
Pedagogy of the Course Work	The course will be transacted through lectures, discussions, seminars, workshops, projects, etc.
Instructions for paper	(i) There shall be 9 questions in all. (ii) In Question No. One, 15 short answer type questions be asked spreading

setters and candidates	over whole syllabus to be answered in 10-20 words each. The students shall have to attempt 9 short answer type questions i.e.2 marks of each. It shall carry 18 marks and shall be a compulsory question. (iii) Rest of the paper shall contain 4 units. Each unit shall have2 questions and the candidate shall be given internal choice. The candidates shall attempt 1 question from each unit i.e. in all of1 8 marks each. (iv) For private and re-appear candidates, who have not been assessed earlier for internal assessment, the marks secured by them in theory paper will proportionately be increased to maximum marks of the paper in lieu of internal assessment. The paper-setter must put note(d) in the question paper.
Course Contents	
Unit–I	• Philosophical, Sociological, and Technological Foundations of Education—Concept and their Role in Education. • Indian System of Education: Ancient, Medieval and Modern • Ethics in Education
Unit–II	• Philosophy of Education–Definition, Nature and Scope. • Difference between Educational Philosophy and Philosophy of Education. • Philosophy of Education with special reference to aims, curriculum, methods, teachers and Discipline
Unit–III	• Educational Sociology–Definition, Nature and Scope. • Education and Social Stratification, Education and Social Mobility • Information and Communication Technology—Role in Education.
Unit–IV	• Major Philosophies of the Bharat: Buddhism, Jainism and Sankhya—Main Features and their Contribution to Education. • Major Philosophies of the World—Idealism, Naturalism and Pragmatism—Main Features and their Contribution to Education.

- Conceptual and expressive collage.
- Exploration of texture, layering, and narrative.
- Use of various paper types, printed material, fabric, and ephemera.

Activities:

- Create thematic collages on social, cultural, or personal subjects.
- Mixed media collage with text and imagery.

Unit 3: Assemblage Techniques

- Understanding assemblage as a 3D extension of collage.
- Techniques of layering, attachment, and spatial composition.
- Use of found objects, recycled materials, and symbolic elements.

Activities:

- Create assemblage artworks based on themes such as environment, identity, or memory.
- Small installation-style pieces using mixed materials.

IV. Methods and Materials:

Techniques:

- Sketching and compositional planning
- Cutting, pasting, layering
- Relief work, gluing, assembling found materials

Materials:

- Handmade paper, craft paper, magazine cuttings, fabric scraps
- Acrylics, inks, adhesives, thread, cardboard, wire
- Recycled or found objects (buttons, wood, metal, packaging waste, etc.)

Submission of Artworks: 30 Marks (based on related work)

Marks for submission will be awarded based on the work completed during the session. A minimum of 3 artworks (Size: 15 x 22 inches for Decorative Design and Collage; minimum size of 12 x 12 inches for Assemblage) along with a sketchbook, must be submitted in this section. Submission marks will be awarded jointly by both internal and external examiners. In case of a difference of opinion, each examiner may mark separately, awarding marks out of 50% of the total submission marks.

NOTE :

- Minimum of 7 hours' teaching per week be assigned to the subjects and out of 7 hours, 6 hours be ear marked for practical classes and 1 hour for theory classes (per week).

The students exiting the programme after two years, securing 96 credits, will be awarded UG Diploma provided he/she secures 4 credits from summer internship					

Notes:

1. In the first semester student is offered three different subjects A, B & C.
2. At the end of second semester each student has the option to choose any one of the two streams namely Single Major or Multi-Disciplinary. The student choosing Single Major stream is required to give his/her Major and Minor at the end of the second semester.
3. The student who chooses multi-disciplinary stream will continue with the three subjects and complete his/her three-year degree by securing 36 credits each in the chosen two subjects as Major and 24 credits in Minor subject.
4. A student who secures 75% or more marks in aggregate till semester 6 (up to 3-year degree) shall be eligible for 4 YEAR DEGREE B.A. HONOURS with research, on the condition that the Institution is a PU approved Research Centre
5. The student opting for Single Major must secure 50% credits of the total credits in the Major subject and obtain 24 credits from the Minor subject(s). To qualify for Minor in a particular subject, the student must attain at least 12 credits in that subject(s).
6. The student exiting the programme after one year securing 48 credits will be awarded UG Certificate provided he/she secures 4 credits from summer internship/community work. Further, the student exiting the programme after two years securing 96 credits will be awarded UG Diploma provided he/she secure 4 credits from summer internship. The student successfully securing 144 credits will be awarded BA degree.
7. Language paper chosen as MIL-1 and MIL-2 should be in the same subject.
8. Once Major and Minor papers are chosen in 3rd semester, the same will continue as Major and Minor subject in the subsequent semesters.
9. The candidate opting for Honours in research is required to study a paper of Research Methodology (RM) of 04 credits and write Dissertation of 08 credits in one of the two Major subjects.

SEMESTER III

COURSE TITLE: CARTOGRAPHY (Theory & Practical)
Course Code: **GEOG-DSC-3- (MAJ-3/MIN-3)-301**
Level of Course: **L-200**
Total Credits: **4 (Theory 2+ Tutorial 1+ Practical 1)**
Maximum Marks: **100 (60 Theory + 10 Internal Assessment+ 30 Practical)**
Course Duration: **Total= 75 hours(Lectures- 30 Hours; Tutorial- 15 Hours; Practical-30 Hours)**

Evaluation: Maximum Marks: **100 (60 Theory + 30 Practical+ 10 Internal Assessment)**

- Terminal Examination: 60 Marks
- Internal Assessment: 10 Marks
- Practical Examination: 30 Marks
- Examination Time: 3 Hours

COURSE OBJECTIVE: The course is designed to introduce the concept of cartography and its relevance in Geography. It focuses on explaining the concepts of scale, directions, bearing and map design. It further aims to enable students with necessary skills and techniques to examine, represent and describe maps.

LEARNING OUTCOME: After the completion of this course, students should be able to

- Comprehend the nature, scope and significance of cartography
- Read, analyse and measure directions and bearings
- Demonstrate cartographic knowledge and skills to read, design and produce maps

PEDAGOGY: The introduction of conceptual and practical foundations of cartography shall form the core of teaching and learning. The students are to be encouraged to have active interactions with the teacher and the peer group. The learning shall be based on interactive and practical activities, discussions and learning by going out in the field. A well-equipped cartographic laboratory with necessary apparatus and datasets will provide necessary environment to prepare exercises.

INSTRUCTIONS FOR PAPER SETTER AND CANDIDATES:

1. A compulsory question containing 15 short answer type questions shall be set covering the whole syllabus. The student shall attempt any 10 parts in about 25-30 words each. Each part shall carry 2 marks (Total 10x2= 20 marks).
2. A total of eight questions will be set out of the whole syllabus at least *two* from each unit. The candidates will attempt *four* questions selecting one from each unit and each question will carry 18 marks (Total 4x10= 40 marks). These will be in addition to the compulsory question at serial number 1.
3. Special credit will be given to suitable use of maps and diagrams. Use of unmarked map stencils and colour pens/pencils are allowed.
4. Internal assessment may include written assignments, snap tests, participation in discussion in the class, term papers, attendance etc.
5. For CDOE, reappear/ improvement candidates(s) who have not been assessed earlier for Internal Assessment, the marks secured by them in theory paper will be increased proportionally to maximum marks of the paper in lieu of internal assessment. Paper setter must put note (5) in the question paper.

INSTRUCTIONS FOR PRACTICAL EXAMINATIONS:

1. Each student shall prepare a practical file. They will berequired to complete their practical file and get it signed from the class teacher at least 10 days before the commencement of theirexamination.
2. The practical examination in the form of viva-voce only shall be conducted at the respective college itself except for CDOE. There will be no laboratory exercise at that time of examination.
3. Practical examination at the respective colleges shall be conducted by one internal and one external examiner. The external examiner shall be appointed by the principal of the respective colleges in consultation with the senior most teacher of Geography in the college.
4. For students of CDOE, there will be no viva-voce examination for the candidates. They will be required to submit their Practical Note Book (Practical files) with the Centre for Distance and Online Education (CDOE), Panjab University (Department of Geography) at least 10 days before the commencement of their examination. Their Practical files will be evaluated by two examiners (including at least one from the CDOE.
5. Those students who fail in the practical examination are required to prepare a fresh practical file. However, students who failed in theory paper only or are appearing in improvement examination, their practical marks of previous practical examination will be carried forward.
6. For practical classes, the number of students in one group shall not exceed fifteen.
7. There will be 2 hours of teaching per week for this paper.

COURSE CONTENT

Unit I: Introduction to Cartography

1. Meaning, Nature and Scope of Cartography
2. History of Cartography
3. Cartography and GIS, Future of Cartography

Unit II: Scale and Scale Operations

4. Concept of Scale and methods its representation
5. Graphic scales: Plain, Comparative, Time and Diagonal.
6. Enlargement and Reduction of Maps

Unit III: Knowing the Directions and Bearings

7. Concept of North: True, Magnetic and Grid North; Magnetic Declination
8. Types, Elements, and Applications of Compass; Directions; Method of Finding North
9. Bearing: Types, Taking Bearings and its conversion, Determining Positions

Unit IV: Cartographic Symbolisation and Designs

10. Basic Map Element: Primary and Secondary Elements
11. Map Symbolisation: Point, Line and Area Symbols
12. Map Layouts Design: Lettering & Font, Colours, Features and Symbols

PRACTICAL EXCERISES

1. Construction of scales: plain, comparative, time and diagonal
2. Calculation of True North, Magnetic North, and magnetic declination
3. Bearing and its conversion, determination of positions
4. Methods of Finding north
5. Map symbolisation
6. Map Designing

(A total of 10 exercises covering above mentioned topics shall be prepared by the students)

- Terminal Examination: 90 Marks
- Internal Assessment: 10 Marks
- Examination Time: 3 Hours

COURSE OBJECTIVE: The course aim to develop analytical lens to critically examine the changing nature of human world by enabling students to think geographically about key concepts like place, space and scale. It further focuses on critical appraisal of key topics such as population dynamics, migration, social and culture attributes and political structures.

LEARNING OUTCOME: At the end of the course the students will be able to:

- Comprehend geographical aspects of place and spatial relationships
- Establish intersection of human geography with other disciplines of social sciences
- Conceptualized and critical relate social, cultures and demographic landscapes
- Develop a geographic perspective on globalization, development and sustainability

PEDAGOGY: The introduction of conceptual and foundational knowledge shall form the core of teaching and learning. The students are to be encouraged to have active interactions with the teacher and the peers for interactive activities and discussions.

INSTRUCTIONS FOR PAPER SETTER AND CANDIDATES:

अली कली ही सों बँध्यों आगे कौन हवाल।।

3. घनानंद –

सवैये :

1. गाइहौं देवी गनेस महेस दिनेसहि पूजत ही फल पाइहौं।
पाइहौं पावन तीरथ-तीर सुनेकु जहीं हरि को चित लाइहौं।
लाइहौं आछे द्विजातिन को अरुगोधन दान करौं चर चाइहौं।
चाइ अनेकन सों सजनी घनआनँद मीतहि कंठ लगाइहौं। ।

2. अंतर हौं किधौं अंत रहौ, दृग फारि फिरौं कि अभागिनि भीरौं।
आगि जरौं अकि पानी परौं अब कैसी करौं हिय का बिधि धीरौं।
जौ घनआनंद ऐसी रुची, तौ कहा बस है अहो प्राननि पीरौं।
पाऊँ कहाँ हरि हाय तुम्हैं, धरती में धँसौं कि अकासाहिं चीरौं। ।

3. पर कारज देह को धारे फिरौ, परजन्य जथारथ ह्वै दरसो।
निधि नीर सुधा के समान करौ, सबही बिधि सुंदरता सरसौ।
घनआनँद जीवनदायक हौ, कबौं मेरियौ पीर हिये परसौ।
कबहूँ वा बिसासी सुजान के आँगन मो अँसुवान को हौ बरसौ। ।

कवित्त :

1. तुम्हरे बिरह त बिकल दिन रात गोपी,
रही मुरझाय कबहूँ न देखी हसती।
कोलाहल केलि जहाँ जहाँ कीन्ही तहाँ रची,

चीन्ही वा कालिंदी-कूल-कुंज-डार डसती।
रावरे रहत ते लहत सब ठौर दिल,
अब उन्हें द्वारिका है सोनमई लसती।
मेरे लखें यह ब्रज ऊजर सुजानराइ,
जिहीं ओर बसै कान्ह तिहीं ओर बसती। ।

2. कारी कूर कोकिला! कहाँ को बैर काढ़ति री,
कूकि कूकि अबहि करे जो किन कोरि लै।
पैंड़े परे पापी ये कलापी निसद्यौस ज्यौं ही,
चातक! घातक त्यौं ही तू हूँ कान फोरिलै।
आँनद के घन प्रान-जीवन सुजान बिना,
जानि कै अकेली सब घेरौ दल जोरि लै।
जौ लौं करै आवन बिनोद-बरसावन वे,
तौ लौं रे डरारे बजमारे घन घोरि लै। ।

3. जाहि जीव चाहै सो तहीं पै ताहि दाहै वाहि,
ढूँढ़त ही मेरी मति गति गई खोय है।
करौं कित दौर और रहौं तौ लहौं न ठौर,

SEMESTER III

Course Title: COMMUNICATION THEORY
Course Code: JMC-DSC-3(MAJ/MIN)-301
Course Level: 200
Credits: 04 [Theory (03) + Practical (01)]
Marks: 100 [Theory Exams (67) + Internal Assessment (8) + Practical (25)]

Learning Objectives:

The paper is designed to broaden and deepen the students, understanding of the field of Communication by introducing them to important theories, models and concepts in communication. They will also be appraised with the use of various theories of Communication in carrying out both pure and applied research in the discipline.

Learning Outcomes:

After successful completion of this course, the student should be able to:

1. Understand the concepts of Communication Theory;
2. Develop a deeper understanding of the basic Models and Theories of Communication

Pedagogy of the Course Work:

Pedagogy of the course involves teaching and learning through classroom lectures, industry interaction and expert lectures. The students will be assessed on the basis of theory exam of 67 marks, continuous internal assessment of 8 marks based on Mid Semester exams (comprising class test/snap test/ assignments), attendance and class room participation; Practical projects will be of 25 marks based on assignments and projects.

Instructions for paper-setters and candidates:

- The maximum marks for the course will be 100.
- **Theory Exam: 67 marks**
  Time allowed: 03 hours
  There shall be 7 questions in all. The first question is compulsory comprising 12 short answer type questions spread over the whole syllabus. The candidates are required to attempt 7 questions in about 50 words each. Each question shall be of 1 mark. (1 x 7 = 7 marks). Rest of the paper shall comprise of three units with two questions in each. The candidates shall attempt one question from each unit. Each question will carry 20 marks. (3 X 20 = 60 marks)
- **Internal Assessment: 8 marks**
  Mid-semesters: 5 marks, Class Participation- 1
  Attendance 2 Marks (85% and above attendance=2 marks; 75% and above=1 mark)

Course Contents:

Unit-I

- Importance and scope of Verbal and Non verbal Communication, Mediated and Non Mediated Communication.
- Importance and scope of Intrapersonal Communication, Interpersonal Communication, Group, Public Communication and Mass Communication.

Unit-II

- Introduction to the concept of Models and Theories in Communication.
- S-R Model of Communication; Osgood & Schramm's Circular Model of Communication.

Unit-III

- S-M-C-R Model of Communication.
- Bullet Theory of Communication and Maslow's Hierarchy of Needs.

Practical: 25 Marks

- Prepare and present a report on the current position of a Model/Theory. (10+ 15= 25 marks)

Suggested Readings

SEMESTER III

Course Title: GROWTH AND DEVELOPMENT OF PRESS
Course Code: JMC-DSC-4(MAJ)-301
Course Level: 200
Credits: 04 [Theory (03) + Practical (01)]
Marks: 100 [Theory Exams (67) + Internal Assessment (8) + Practical (25)]

Learning Objectives:

The paper will orient the students towards the study of journalism by giving a historical background and a context to the changes that are visible in the media. They will also be sensitized to the history of the Press in India.

Learning Outcomes:

After successful completion of this course, the student should be able to:

1. Develop an understanding of growth of Press in Global Context.
2. Understand the history of Press in India.

Pedagogy of the Course Work:

Pedagogy of the course involves teaching and learning through classroom lectures, industry interaction and expert lectures. The students will be assessed on the basis of theory exam of 67 marks, continuous internal assessment of 8 marks based on Mid Semester exams (comprising class test/snap test/ assignments), attendance and class room participation; Practical projects will be of 25 marks based on assignments and projects.

Instructions for paper-setters and candidates:

  Mid-semesters: 5 marks, Class Participation- 1
  Attendance 2 Marks (85% and above attendance=2 marks; 75% and above=1 mark)

Course Contents:

Unit-I

- Evolution of Press in Britain: early restrictions and developments.
- Aeropagitica

Unit-II

- Evolution of Press in America: early Newspapers and Revolutions.
- The American Revolution, Party Press, Penny Press, Civil War Journalism

Unit-III

- Evolution of Press in India; early restrictions, major Newspapers and contributions
- Hicky, Buckingham. Vernacular Press Act, Official Secrets Act.

Practical: 25 Marks

- Prepare a report on any one period of History: 10+15= 25 marks

Suggested Readings

SEMESTER IV

Course Title: GRAPHIC DESIGN
Course Code: JMC-DSC-5(MAJ/MIN)-401
Course Level: 200
Credits: 04 [Theory (03) + Practical (01)]
Marks: 100 [Theory Exams (67) + Internal Assessment (8) + Practical (25)]

Learning Objectives:

The course focuses on imparting an understanding of the basics of print journalism which includes concept of news, news values, 5 Ws and 1 H and Leads. The course will also impart an understanding of the organization of a newsroom and qualities of a journalist.

Learning Outcomes:

After successful completion of this course, the student should be able to:

1. Demonstrate an understanding of news values
2. Develop a skill for writing news
3. Understand the organizational structure of a newsroom

Pedagogy of the Course Work:

Pedagogy of the course involves teaching and learning through classroom lectures, industry interaction and expert lectures. The students will be assessed on the basis of theory exam of 67 marks, continuous internal assessment of 8 marks based on Mid Semester exams (comprising class test/snap test/ assignments), attendance and class room participation; Practical projects will be of 25 marks based on assignments and projects.

  Attendance 2 Marks (85% and above attendance=2 marks; 75% and above=1 mark)

Course Contents:

Unit-I

- Definition and importance of Graphic Design in communication.
- Introduction to Typography: Origin and development; Type Properties (Basline, Cap Hight, X-height, Ascenders and Descenders, Weight); Type classification (Serif, Sans Serif, Monospace, Handwriting Display)

Unit-II

- Importance of Legibility
- Text Breakers.

Unit-III

- Illustrations- Thumbnail Graphics, Dingbats, Infographics, Photographs, Images
- White Space

Practical: 25 Marks

- Prepare a file on the following: 25 marks
  1. Structure and Classification of Type

Suggested Readings

Course Contents:

Unit-I

- Definition and concept of News
- Concept of News values: Timeliness, Impact, Prominence, Proximity, Human Interest, Currency, the Bizarre, Conflict, Novelty/Oddity

Unit-II

- Concept of 5Ws and IH
- Importances and types of lead in a news story: Summary Lead, Descriptive Lead, Question Lead, Punch/Caption Lead, Quotation Lead, Contrast Lead, Staccato Lead, **You** Lead, Blind Identification Lead.

Unit-III

- Organization and operations of Newsroom of a Daily Newspaper.
- Qualities and Responsibilities of a Journalist.

Practical: 25 Marks

- Prepare an illustrative file on the following:- 10+15= 25 marks
  1. News values
  2. Types of Leads.

Notes.

1. Members of the Board of Studies unanimously decided not to offer mathematics in Table-3 of Arts stream.

2. Practicals (wherever included in the syllabi) may be conducted into small groups (say 15 – 20 students) to facilitate the smooth conduct of practical sessions.

3. Scientific Calculator is allowed in the Numerical Analysis Paper.

IMPORTANT NOTE: All papers in VAC / SEC / MDC would be floated in each of the first three semesters. However, the students are not allowed to repeat any paper.

Semester - III
MAT-DSC3 (MAJ/MIN)-301: THEORY OF EQUATIONS

Credits = 4
Teaching hours = 6 hrs / week including tutorials /practicals etc. in a semester of 15 weeks.
Exam Time: 3 hours
Max. Marks: 100 (External: 80 + Internal Assessment: 20)

Note: 1. The syllabus has been split into Four Units. The examiner will set in total nine questions including a compulsory question. The compulsory question (QuestionNo.1) will contain 6 parts covering the entire syllabus. Two questions will be set from each Unit.
2. A student will be required to attempt five questions in all, selecting one question from each Unit and the compulsory question. Each question will carry equal marks.
3. The 20 marks of internal assessment has following division
Mid Semester Exam = 10 marks,
Assignment / Project work = 5 marks,
Classroom participation = 3 marks**,**
Attendance = 2 marks for more than 85% and 1 mark for more than 75% attendance.

Objective: The objective of this course is to provide a comprehensive understanding of polynomials and polynomial equations. Students will explore methods for solving these equations, the relationship between roots and coefficients, and various techniques for transforming polynomial equations. Additionally, they will discover key theorems and interesting properties related to polynomials, deepening their problem-solving skills in this area.

Learning Outcomes: After attending this course students will be able to
(i) Analyze the relationship between the roots and coefficients of a polynomial,
(ii) Solve polynomial equations up to degree 4 by learning certain classical methods.
(iii) Apply transformations to polynomial equations and understand their implications.
(iv) Solve complex problems involving polynomial equations and transformations.

Unit-I
Polynomials (definition and examples), Euclid's algorithm, synthetic division, common divisors, G.C.D. of polynomials. Roots of a polynomial equation, repeated roots and their multiplicity, common roots. Fundamental theorem of Algebra, Factor theorem, Complex roots of real polynomials occur in conjugate pairs with same multiplicity. Irrational roots of polynomials over rationals occur in conjugate pairs with same multiplicity.

Unit-II
Relation between roots and coefficients, Vieta's formulae, symmetric functions, diminishing roots of a polynomial equation by h and its application, solution of a cubic when its roots are in A.P. / G.P., solution of a biquadratic when its roots are in A.P. (respect. in G.P.) and sum (resp. product) of two roots is given, Descartes' Rule of Signs, Newton's method of divisors for integral roots.

Unit-III
Transformation of equations: Transform the given polynomial equation into another such that signs of the roots changed, roots multiplied by a constant, roots are symmetric functions of the roots of the original equation. Solutions of cubic and bi-quadratic equations when their roots are in H.P.

Unit-IV
Cardan's method and trigonometric methods for solving cubic equations. Discriminant and nature of roots, of a real cubic equation. Descartes' and Ferrari's method of solving a bi-quadratic equation.

Semester - III
*MAT-DSC3 (MAJ)-302: DIFFERENTIAL EQUATION-I

Credits = 4
Teaching hours = 6 hrs / week including tutorials /practicals etc. in a semester of 15 weeks.
Exam Time: 3 hours
Max. Marks: 100 (External: 80 + Internal Assessment: 20)

Note: 1. The syllabus has been split into Four Units. The examiner will set in total nine questions including a compulsory question. The compulsory question (QuestionNo.1) will contain 4 parts covering the entire syllabus. Two questions will be set from each Unit.

Mid Semester Exam = 10 marks,
Assignment / Project work = 5 marks,
Classroom participation = 3 marks**,**
Attendance = 2 marks for more than 85% and 1 mark for more than 75% attendance.

Objective: The objective of this course is to equip students with essential techniques for solving different types of differential equations. It also introduces the fundamentals of calculus involving two and three variables, which are crucial for understanding and solving differential equations effectively.

Learning Outcomes: By the end of this course, students will be able to:
1. Apply appropriate methods to solve various types of differential equations.
2. To understand calculus concepts for functions of two and three variables.

Unit-I

Limit and continuity of functions of two and three variables. Partial differentiation up to second order. Total differential, differentiation of composite and implicit functions. Euler's Theorem on homogeneous functions, differentiability of real-valued functions of two and three variables. Schwarz and Young's theorems (without proof).

Unit-II

Exact differential equations; Necessary and sufficient condition for a differential equation of the type M(*x, y*) *dx* + N(*x ,y*) *dy* = 0 to be exact. Integrating factor of a D.E. and methods to find it. First order and higher degree differential equations solvable for *x, y, p* = $\frac{dy}{dx}$. Clairaut's form and equations reducible to Clairaut's form. Singular solution as an envelope of general solutions.

Unit-III

Geometrical meaning of a differential equation, orthogonal trajectories. Homogeneous linear differential equations with constant coefficients and its solutions.

Theorems for finding particular integrals $\frac{1}{\mathbf{D-a}}f(x)$, $\frac{1}{f(D)}e^{ax}$, $\frac{1}{f(D)}e^{ax}\mathbf{V}(x)$, $\frac{1}{f(D^2)}\boldsymbol{sin\, x}$, $\frac{1}{f(D^2)}\mathbf{cos}\, x$, $\frac{1}{f(D)}x\, V(x)$, $\frac{1}{f(x)}\, x^n$; n **is non negative integer**. Non-homogeneous linear differential equations with constant coefficients and its solutions.

* For those students who have opted mathematics as a major subject in table-1.

Unit-IV

Solution of Homogenous and non Homogeneous Linear differential equations with variable coefficients-Cauchy and Legendre Equations. Exactness of Linear differential equations of nth order and solution of linear differential equations that can be made exact using integrating factor.

Semester - IV
MAT-DSC4 (MAJ/MIN)-401: Calculus-II

Credits = 4
Teaching hours = 6 hrs / week including tutorials /practicals etc. in a semester of 15 weeks.
Exam Time: 3 hours
Max. Marks: 100 (External: 80 + Internal Assessment: 20)

Note: 1. The syllabus has been split into Four Units. The examiner will set in total nine questions including a compulsory question. The compulsory question (QuestionNo.1) will contain 4 parts covering the entire syllabus. Two questions will be set from each Unit.
2. A student will be required to attempt five questions in all, selecting one question from each Unit and the compulsory question. Each question will carry equal marks.
3. The 20 marks of internal assessment has following division
Mid Semester Exam = 10 marks,
Assignment / Project work = 5 marks,
Classroom participation = 3 marks**,**
Attendance = 2 marks for more than 85% and 1 mark for more than 75% attendance.

Objective: The objective of this course is to analyse plane curves by looking at certain key parameters such as concavity, convexity, points of inflection, multiple points, and asymptotes. Students will also explore concepts of curvature and radius of curvature for various curves. The course will cover integration techniques for hyperbolic and inverse hyperbolic functions, along with reduction formulae for essential integrals.

Learning Outcomes: By the end of this course, students will be able to:
1. Analyse and classify plane curves based on parameters like concavity, convexity, points of inflection, multiple points, and asymptotes.
2. Understand and compute the curvature and radius of curvature for different curves.
3. Perform integration involving hyperbolic and inverse hyperbolic functions.
4. Apply reduction formulae to solve integrals of varying complexity.
5. Implement numerical methods for approximate computation of definite integrals.

Unit-I

Concavity, convexity, points of inflexion, multiple points, double points and its types for curves in a plane. Tangents at origin, asymptote and its types, methods for finding asymptotes of rational algebraic curves. Special methods for finding oblique asymptotes of rational algebraic curves. Intersection of a curve and its asymptotes.

Unit--II

Introduction to the polar coordinate system, tracing of curves represented by equations in Cartesian coordinates, Polar coordinates, and in parametric forms.
Curvature and radius of curvature, at a point, of curves in Cartesian and Polar Co-ordinates including parametric forms as well as curves represented by equation $f(x, y) = 0$ implicitly.

Unit-III

Integral calculus: Integration of hyperbolic and inverse hyperbolic functions. Reduction Formulae for following integrals.
$\int x^n e^x dx$, $\int x^m (\log x)^n dx$,$x > 0$ *m and n natural numbers.* $\int sin^n x\, dx$, $\int cos^n x\, dx$, $\int tan^n x\, dx$, $\int cot^n x\, dx$, $\int sec^n x\, dx$, $\int cosec^n x\, dx$, $\int sin^n x\ e^x\, dx$, $\int cos^n x\ e^x\, dx$, $\int x\ sin^n x\, dx$, $\int x\, cos^n x\, dx$, $\int x^m\ sinnx\, dx$, $\int x^m\ cosnx\, dx$, $\int x^m \cos nx\, dx$, $\int x^m \sin nx\, dx$, $\int cos^m x\ \cos nx\, dx$, $\int cos^m x \sin nx\, dx$, $\int cos^m x\ sin^n x\, dx$

$\int e^{ax} sin^n bx\ dx\ n \geq 2$ **integer,** $\int e^{ax} cos^n bx\ dx\ n \geq 2$ **integer,** $\int_0^{\frac{\pi}{2}} sin^n x\ dx\ \ n \in N$
$\int_0^{\frac{\pi}{2}} cos^n x\ dx\ \ n \in N$, $\int \frac{\sin nx}{\sin x}\ dx$, $\int x^m\ (a + bx^n)^p\ dx$.

Unit-IV

Numerical Integration: Trapezoidal, Prismoidal and Simpson Rules.
Application of definite integral: Summation of Series, Quadrature, rectification, volumes and surfaces of solids of revolution (Cartesian co-ordinates only)

Mid Semester Exam = 10 marks,
Assignment / Project work = 5 marks,
Classroom participation = 3 marks**,**
Attendance = 2 marks for more than 85% and 1 mark for more than 75% attendance.

Objective: To provide basic knowledge about mathematical logic, lattices, Boolean algebra, graph theory and coding theory.

Learning Outcomes: This course will develop logical reasoning and rational thinking of the students.

UNIT – I
Mathematical Logic: Introduction, Conjunction, Disjunction & negation, Propositions and truth table, Tautologies and contradictions, Equivalence of formulas, Duality law, Normal forms: Disjunctive Normal form, Conjunctive Normal form,
Predicate Calculus: Predicates, the statement function, variables and quantifiers, predicate formulas. Methods of proof (Inference Theory).

UNIT – II
Ordered Sets, Latices, Boolean Algebra : Partially Ordered Sets, External elements of POSET, HASSE Diagrams of POSETS, Lattices, Finite Boolean Algebra, Functions on Boolean algebra, Circuit Designs.

UNIT – III
Graphs: Incidence and Degree, Isomorphism, Connectedness, Walk, Path and Circuits, Shortest Path algorithm between two Vertices, Eulerian graph, Directed graphs, Kuratowski's graphs; Detection of planarity.
Trees: Properties of Trees, Rooted and Binary Trees; Directed Tree, Spanning Tree and tree traversals (In-order, Pre-order and Post-order)

UNIT – IV
Functions: Composite functions & their range, domain, Functions for computer science like characteristic function, Hashing function, Growth of a function.
Coding Theory: Recursion, Recurrence Relation, Coding of binary Information & Error detection, Decoding & error correction.

Mid Semester Exam = 10 marks,
Assignment / Project work = 5 marks,
Classroom participation = 3 marks**,**
Attendance = 2 marks for more than 85% and 1 mark for more than 75% attendance.

Objective: The main goal of this course is to deliver basics of plane geometry. The course introduces the concept of pair of straight lines, circles and other conics. The objective is to understand the geometrical concepts related to standard conic sections and their properties.

Learning Outcomes:
The students will be able to determine the joint equation of a pair of lines and angle bisectors, equation of a circle in different forms, equation of tangents, normal and chord of contact. The students will also be able to identify a conic from a general second degree equation.

.

Unit-I

Transformation of axes in two dimensions: Shifting of origin, rotation of axes, invariants. **Pair of Straight lines**: Joint equation of pair of straight lines and angle between them, Condition of parallelism and perpendicularity, Joint equation of the angle bisectors, Joint equation of lines joining origin to the intersection of a line and a curve.

Unit-II

Circle : General equation of circle, Circle through intersection of two lines, tangents, normals, chord of contact, pole and polar, pair of tangents from a point, equation of chord in terms of mid-point, angle of intersection and orthogonality.

Unit-III

Conic : General equation of conics in Cartesian and Polar coordinate system, parametric forms of conics, equations of tangents, normal, chords of contact, pole and polar, pair of tangents from a point, equation of chord in terms of mid-point.

Unit-IV

Diameter and conjugate diameters of the conics. Special properties of Parabola, Hyperbola and Ellipse. Conjugate hyperbola, asymptotes to the hyperbola, rectangular hyperbola. Identification of conic in general second degree equations.

Attendance = 2 marks for more than 85% and 1 mark for more than 75% attendance.

Objective: The objective of this course is to equip students with essential techniques for solving different types of mathematical problems that arise in various fields. It also introduces the fundamentals of calculus involving two and three variables, which are crucial for understanding and solving ordinary differential equations effectively.

Learning Outcomes: By the end of this course, students will be able to:
1. Apply appropriate methods to solve various types of differential equations.
2. To understand calculus concepts for functions of two and three variables.
3. Apply direct methods like Gauss Elimination, LU Decomposition, and Cholesky Decomposition, as well as iterative methods such as Jacobi, Gauss-Seidel, and relaxation methods, to solve systems of linear equations.

Unit-I
Solution of Equations: Bisection Methods, Regula Falsi Method, Secant Method, Newton-Raphson Method, Roots of Polynomials.
Interpolation: Lagrange and Hermite Interpolation, Newton's Divided Differences, Difference Schemes, Interpolation Formulas using Differences.

UNIT II.
Numerical Differentiation Numerical Quadrature: Newton-Cote's Formulas, Gauss Quadrature Formulas , Chebyshev's Formulas.

Unit-III
Linear Equations: Direct Methods for Solving Systems of Linear Equations (Gauss Elimination, LU Decomposition, Cholesky Decomposition), Iterative Methods (Jacobi, Gauss-Seidel, Relaxation Methods).

Unit-IV
The Algebraic Eigenvalue problem: Jacobi's Method, Givens' Method, Householder's Method, Power Method, QR Method, Lanczos' Method.
Ordinary Differential Equations: Euler Method, Single-step Methods, Runge-Kutta's Method, Multi-step Methods.

Unit-I

Limit and continuity of functions of two and three variables. Partial differentiation up to second order. Total differential, differentiation of composite and implicit functions. Euler's Theorem on homogeneous functions, differentiability of real-valued functions of two and three variables. Schwarz and Young's theorems (without proof).

Unit-II

Exact differential equations; Necessary and sufficient condition for a differential equation of the type M(*x, y*) *dx* + N(*x ,y*) *dy* = 0 to be exact. Integrating factor of a D.E. and methods to find it. First order and higher degree differential equations solvable for *x, y, p* = $\frac{dy}{dx}$. Clairaut's form and equations reducible to Clairaut's form. Singular solution as an envelope of general solutions.

Unit-III

Geometrical meaning of a differential equation, orthogonal trajectories. Homogeneous linear differential equations with constant coefficients and its solutions.

Theorems for finding particular integrals $\frac{1}{\mathbf{D}-a}f(x)$, $\frac{1}{f(D)}e^{ax}$, $\frac{1}{f(D)}e^{ax}\mathbf{V}(x)$, $\frac{1}{f(D^2)}\sin x$, $\frac{1}{f(D^2)}\cos x$. Non-homogeneous linear differential equations with constant coefficients and its solutions.

SEMESTER – III

HINDUSTANI CLASSICAL MUSIC – TABLA
(MAJOR)

GENERAL INSTRUCTIONS:

1. In all, nine questions will be set from the entire syllabus of Semester-I. The question paper will be divided into five units. First four units contain 02 questions each, out of which the candidates have to attempt one question from each unit. Unit V is compulsory & it contain of 13 short answer questions (covering entire syllabus i.e. theory and practical) out of which students have to attempt 10 questions of 01 mark each. Each question will carry equal marks.
2. Harmonium/ Sarangi will be allowed to play Nagma/Lehra. No electronic Lehra machine will be allowed for practical examination.
3. **While sending the syllabus to paper-setter in theory, the syllabus prescribed for the practical paper should also be sent**.

THEORY (3 Hours duration)		: 50 Marks (2 Credit)
PRACTICAL (20 minute duration)		: 50 Marks (2 Credit)
(i) Performance& Viva	: 40 Marks	
(ii) Harmonium	: 05 Marks	
(iii) Tabla	: 05 Marks	
	Total :	100 Marks (4 Credit)

Theory: Historical and Theoretical Study of Tabla (30 hours)

Unit-I

1. Defination and explain the following terms:
   Uthan, Peshkar, Laggi, Chakkardar Paran
2. Ten Praans of Taal.
3. Study of Delhi Gharana.

Unit-II

1. Origin of Taal
2. Study of Dhol and Mridang.
3. Classification of Indian Musical Instruments.

Unit-III

1.Life sketch and contribution of the following:

a) Pt. Kanthe Maharaj.
b) Ustad Lachhman Singh seen.
c) Pt. Samta Prasad.

Unit-IV

1. Notstion of the following:
   i) **Roopak Taal**: Peshkar, Qaida with Paltas and Tehai, Paran.
   ii) **Jhap Taal**: Peshkar, Tukra,Damdaar Tehai
2. Notation of Taals Roopak, Tivra and Jhap Taal with their Dugum and Chaugum Layakaries.
3. Recognise of Taals through some Bols asked by paper srtter.

Unit-V

The ninth question of unit V is compulsory and it consists of 13 short answer questions (covering entire syllabus i.e. theory and practical) out of which students have to attempt 09 question of carry 01 marks each.

Practical: Stage Performance and Viva Voce (60 Hours)

1. Taal prescribed: Roopak and Jhap Taal.
   a) **Roopak Taal:** Peshkar, Qaida (with proper Badhat), Tukdas, Parans and Damdaar Tehai.
   b) **Jhap Taal:** Peshkar, Tukdas, Qaida and Damdaar Tehai.
2. Two Laggies in the Dadra and Kehrwa Taals.
3. Practice of playing the above mentioned Taals with Light Vocal.
4. Ability to play Ektaal in 1/2 Layakari.
5. Practice of playing Nagma / Lahra on Harmonium in Roopak and Jhap Taal.
6. Tuning of Tabla.

Learning Objectives of the Programme

11. From the Vedic to Classical Sanskrit, an enormous corpus of texts has been composed, which act as a record of one of the longest surviving human civilisations in the world. Thus a student of Sanskrit language can take a look at ideas, systems, techniques and so forth, spanning across many millennia.
12. Despite being an ancient language, Sanskrit has not stopped adapting to the contemporary needs. New experiments are being done on various dimensions of Sanskrit, making it a very dynamic language of today's world.
13. With the recent emphasis on Indian Knowledge Systems (IKS), the study of Sanskrit is gaining more importance today. This not only is making way for renewed interest in Sanskrit learning, but is also opening up new employment and entrepreneurial opportunities in Sanskrit.
14. Sanskrit is a subject of global interest and research, where various dimensions of Sanskrit, such as social, literary, philosophical, scientific and so forth, are being studied. This calls for a more robust and dynamic participation of Indian Sanskrit scholars, hence providing them a global stage.
15. Studying Sanskrit provides an opportunity of overall development of a student. From aesthetics, poetics, philosophy to formal logic and so forth, a student of Sanskrit gets to look at the world in various ways, thinks critically and analyses keenly working towards providing solutions for contemporary problems.

Descriptive Statistics-II

Objectives: The main objective of this paper isto provide students with a comprehensive understanding of correlation analysis, curve fitting techniques, linear regression, and multivariate data analysis. Additionally, students will learn about multivariate data analysis techniques such as multiple and partial correlation, and gain the ability to interpret and analyze relationships among multiple variables.

Learning Outcomes: On completion of this course students will be able to:

1. Understand the concepts and types of correlation, regression, multivariate data and their utilization in real life.
2. Utilize the principle of least squares for curve fitting, including fitting straight lines, second degree parabolas, power curves, and exponential curves.
3. Analyze multivariate data by understanding the plane of regression, properties of residuals, and variance of the residual.
4. Apply multiple and partial correlation techniques for three variables, including understanding the coefficient of multiple correlation, coefficient of partial correlation, and coefficient of determination.

Note: There will be nine questions in all. Question No.1 will be compulsory covering whole of the syllabus and comprising 5 to 8 short answer type questions. Rest of the eight questions will be set from the four units uniformly i.e. two from each unit. The candidate will be required to attempt five questions in all selecting one question from each unit and the compulsory one. All the questions will carry equal marks except the compulsory question, the distribution of marks for which will be as follows:-

UNIT-I

Correlation: Concept and types of correlation, methods of finding correlation - scatter diagram, Karl Pearson's Coefficient of correlation (r), its properties, coefficient of correlation for a bivariate frequency distribution. Rank correlation with its derivation, its merits and demerits, limits of rank correlation coefficient, tied or repeated ranks.

UNIT-II

Curve Fitting: Principle of least squares, fitting of straight line, second degree parabola, power curves of the type $Y=aX^b$, exponential curves of the types $Y=ab^X$ and $Y=ae^{bX}$, regression curves.

UNIT-III

Linear Regression: Two lines of regression, regression coefficients, properties of regression coefficients, angle between two regression lines, standard error of estimate obtained from regression line, correlation coefficient between observed and estimated values, distinction between correlation and regression.

UNIT-IV

Multivariate Data: Plane of regression, properties of residuals, variance of the residual. Multiple and partial correlation for three variables: coefficient of multiple correlation and its properties, coefficient of partial correlation and its properties, multiple correlation in terms of total and partial correlations and coefficient of determination.

PROBABILITY DISTRIBUTIONS

Objectives: The main objective of the paper is to provide students with a comprehensive understanding of various probability distributions including Bernoulli, Binomial, Poisson, Negative Binomial, Geometric, Continuous Uniform, Gamma, Exponential, and Normal distributions. This includes learning their key characteristics, moments, moment generating functions, mean deviation, mode, characteristic functions, and their applications in real-world scenarios such as modeling and inference.

Learning Outcomes: On completion of this course students will be able to:

1. Understand about various discrete and continuous distributions and their properties.
2. Compute moments, moment generating functions, and characteristic functions for different probability distributions.
3. Analyze various types of numerical problems with the help of probability distributions.
4. Apply properties of discrete as well as continuous probability distributions to solve the real life problems.

Note: There will be nine questions in all. Question No.1 will be compulsory covering whole of the syllabus and comprising 5 to 7 short answer type questions. Rest of the eight questions will be set from the four units uniformly i.e. two from each unit. The candidate will be required to attempt five questions in all selecting one question from each unit and the compulsory one. All the questions will carry equal marks.

UNIT-I

Bernoulli distribution and its moments, Binomial distribution: Moments, recurrence relation for the moments, mean deviation about mean, mode, moment generating function (m.g.f), characteristic function, additive property and recurrence relation for the probabilities of Binomial distribution.

UNIT-II

Poisson distribution: Poisson distribution as a limiting case of Binomial distribution, moments, mode, recurrence relation for moments, m.g.f., additive property of independent Poisson variates. Negative Binomial distribution: m.g.f., deduction of moments of negative binomial distribution from those of binomial distribution. Geometric distribution: moments, m.g.f,and lack of memory.

UNIT-III

Continuous uniform distribution: Moments, m.g.f.,characteristic function and mean deviation. Gamma distribution: m.g.f., and additive property. Exponential distribution: m.g.f., moments and lack of memory.

UNIT-IV

Normal distribution as a limiting form of binomial distribution, chief characteristics of Normal distribution; mode, median, m.g.f.,and moments of Normal Distribution, A linear combination of independent normal variates, points of inflexion, mean deviation about mean, area property of Normal distribution, importance and fitting of normal distribution.

STATISTICAL INFERENCE

Objectives: The learning objectives of this course are as follows:

1. To understand the concept of estimation theory and testing of hypothesis.
2. To draw inferences about the unknown population parameters based on random samples.
3. To validate the estimation/ inference about the population parameters.

Learning Outcomes: After successful completion of this course, students should be able to:

1. Understanding of estimation theory, Point and interval estimations.
2. Get knowledge about various characteristics of a good estimator and different methods of estimation.
3. Develop the best/most powerful statistical tests to test the hypotheses regarding unknown population parameters by using Neyman-Pearson theory.
4. Apply the likelihood ratio test and Sequential probability ratio test (SPRT) to test the different problems.

Note: There will be nine questions in all. Question No.1 will be compulsory covering whole of the syllabus and comprising 5 to 8 short answer type questions. Rest of the eight questions will be set from the four units uniformly i.e. two from each unit. The candidate will be required to attempt five questions in all selecting one question from each unit and the compulsory one. UNIT I

Estimation Theory: Parameter space, sample space, point estimation, requirement of a good estimator, consistency,unbiasedness, efficiency, sufficiency, Minimum variance unbiased estimators, Factorizationtheorem, Fisher- Neyman Criterion: statement and applications, Cramer- Rao inequality:statement and application, MVB estimators and their applications, Statement of Rao-Blackwell theorem.

UNIT II

Method of Estimation: Maximum likelihood, method of moments, least squares and minimum variance, Properties of maximum likelihood estimators (illustration), Interval Estimation: confidence interval and confidence limits for the parameters of normal distribution, confidence intervals for large samples.

UNIT III

Test of Significance: Principles of test of significance: Null and alternative hypotheses, simple and composite, Type-Iand Type-II errors, critical region, level of significance, power of the test, best critical region,most powerful test, uniformly most powerful test, uniformly most powerful unbiased (UMPU)critical region, Neyman- Pearson Lemma: statement and its applications to construct mostpowerful test.

UNIT-IV

Likelihood Ratio Test: Introduction oflikelihood ratio test, its properties, test for the mean of a normal population, test for the equality of means of two normal populations, test for the variance of a normal population, test for equality of variances of two normal populations.

Sequential Analysis: Sequential probability ratio test (SPRT), operating characteristic (OC) Function of SPRT, average sample number (ASN).

The student exiting the programme after two years securing 96 credits will be awarded UG Diploma provided he/she secures 4 credits from summer internship																	

Notes:

1. In the first semester student is offered three different subjects A, B & C.
2. At the end of second semester each student has the option to choose any one of the two streams namely Single Major or Multi-Disciplinary. The student choosing Single Major stream is required to give his/her Major and Minor at the end of the second semester.
3. The student who chooses multi-disciplinary stream will continue with the three subjects and complete his/her three-year degree by securing 36 credits each in the chosen two subjects as Major and 24 credits in Minor subject.

4. A student who secures 75% or more marks in aggregate till semester 6 (up to 3-year degree) shall be eligible for 4 YEAR DEGREE B.A. HONOURS with research, on the condition that the Institution is a PU approved Research Centre
5. The student opting for Single Major must secure 50% credits of the total credits in the Major subject and obtain 24 credits from the Minor subject(s). To qualify for Minor in a particular subject, the student must attain atleast 12 credits in that subject(s).
6. The student exiting the programme after one year securing 48 credits will be awarded UG Certificate provided he/she secures 4 credits from summer internship/community work. Further, the student exiting the programme after two years securing 96 credits will be awarded UG Diploma provided he/she secure 4 credits from summer internship. The student successfully securing 144 credits will be awarded BA degree.
7. Language paper chosen as MIL-1 and MIL-2 should be in the same subject.
8. Once Major and Minor papers are chosen in 3rd semester, the same will continue as Major and Minor subject in the subsequent semesters.
9. The candidate opting for Honours in research is required to study a paper of Research Methodology (RM) of 04 credits and write Dissertation of 08 credits in one of the two Major subjects.

Credits 4	
Max. Marks	**: 100**
Theory	**: 90 marks**
Internal Assessment	**: 10 marks**
Time	**: 3 Hours**
Level of Course	**: 200**

INSTRUCTIONS FOR THE PAPER-SETTER AND THE CANDIDATES:

(i) For written paper, the students will be required to attempt five questions in all. Question No. I will be compulsory comprising of 12 short answer type questions of 2 marks each and will cover the entire syllabus. The students are required to attempt Nine Short Answer type questions out of 12, i.e. 9 X 2 = 18 marks. In addition to it, Question Nos. II to IX will consist of long answer (essay type) questions, Two Questions from each Unit with internal choice carrying 18 marks each i.e. 4 X 18 = 72 marks. The students are required to attempt Four Long Answer questions.

(ii) For private candidates, who have not been assessed earlier for internal assessment, the marks secured by them in theory paper will proportionately be increased to maximum marks of the paper in lieu of internal assessment.
The paper-setter must put note (ii) in the question paper.

Course Objective:
This paper basically introduces students both to conceptual and some theoretical understanding of social structure and social change. Students are introduced to characteristics and elements of social structure and to understand the meaning, process and factors of social change.

Course outcomes: This course will help the students to understand the concepts of Social Structure and Social Change.

Course Content:

Unit-I
Social Structure: Meaning, Characteristics, Elements – Status, Role, Power and Prestige. Norms and Values, Theory of Radcliffe Brown (Social Structure)

Unit-II
Social Change: Meaning and Features.
Types of Social Change: Evolution (Comte), Revolution (Marx), Development – Changing Connotations.

Unit-III
Factors of Social Change: Social, Economic, Demographic, Education, Legislative, Scientific and Technological.

Unit-IV

Processes of Social Change: Sanskritization, Westernization, Modernization, Secularization, Globalization and its impact on Society.

Essential Readings:
