ANNEXURE - I

MULTIDISCIPLINARY COURSES

SEMESTERS I, II and III

COMMON FOR ALL B.VOC PROGRAMMES

Semester	Course Code	Course Title
I	B.Voc. MDSC 101	Fundamentals of Information Technology
II	B.Voc. MDSC 201	Soft Skills and Personality Development
III	B.Voc. MDSC 301	Entrepreneurship Development

	COURSE TITLE	FUNDAMENTALS OF INFORMATION TECHNOLOGY
1	**Course Code**	B.Voc. MDSC 101
2	**Typology of Course**	MULTIDISCIPLINARY COURSE
3	**Course Duration**	45 hours of lectures for Theory Theory credits = 3 (1 credit = 15 hours of theory learning based on 3hrs./week) (1 Semester = 15 weeks)
4	**Credits**	3 Credits
5	**Max. Marks and Time**	75 Marks (60 TH + 15 IA) i. The exam of this course will be of 3 hours duration. ii. There will be no objective type questions. iii. Students are required to have the knowledge of the developments in the subject up to 6 months before the examination. iv. Use of non-programmable calculators by the students in the Examination Hall is allowed. The calculators will not be provided by the University/College to the examinees
6	**Course Objectives**	The course aims to equip students with a profound understanding of computer fundamentals, hardware, software, and networking. To empowers the ability to analyze advantages and disadvantages, design computer system architectures, apply input and output devices, and comprehend emerging technologies and well-rounded expertise in basics concepts.
7	**Course Outcomes**	On successful completion of the course, the students will be able to: CO1. Demonstrate a comprehensive understanding of computer fundamentals, including the historical development and characteristics of computers. CO2. Apply knowledge of input and output devices, computer memory, and different types of software in practical scenarios. CO3. Analyze and evaluate the functions and types of operating systems, data processing systems, and translators. CO4. Demonstrate proficiency in understanding computer networks, the Internet, and emerging technologies, with the ability to classify and describe different types of networks.
8	**Pedagogy of the Course Work**	Classroom Lecture, Interactive sessions, PPT, Group Discussions etc.
9	**Instructions for paper setters and candidates**	i. The syllabus of this paper has been divided into FOUR units. ii. Examiner will set a total of NINE questions comprising two questions from each unit, including Question No. 1 (compulsory) of short answer type covering the whole syllabus (6 short questions will be set, students are to attempt 4 questions, each short question will be of 3 marks each). iii. The students are required to attempt one question from each unit and the entire Compulsory Question No. 1. iv. All questions carry equal marks (12 marks each).

10 **Course Content**

UNIT-I

Introduction to Computers: Definition and concept of computers, Characteristics of Computers. Advantages and Disadvantages of Computers. Components of a Computer System. Block Diagram of a Computer: Input Unit, Central Processing Unit, Memory Unit, Output Unit, Storage Unit. Types of Computers: Classification based on Purpose (Digital computers, Analog Computers, Hybrid Computers), Classification based on Size (Microcomputers, Mini Computers, Mainframe Computers, Supercomputers, Specific Types of Computers (Personal Computers (PCs), Laptops, Workstations, Personal Digital Assistants (PDAs)).

UNIT-II

Introduction to Input Devices: Keyboard, Mouse, Trackball, Touchpad, Pointing Stick, Light Pen, Touch Screen, Gamepads, Joysticks, Microphone, Digital Camera, Web Cams, Scanners and its Types, Optical Readers (OCR, OMR, Bar Code, RFID Reader, MICR). Introduction to Output Devices: Visual Display Devices, Speakers, Headphones, Fax Machines, Projectors, Printers: Non-Impact Printers (Ink-Jet, Laser), Impact Printers (Dot-matrix, Line), Plotters.

UNIT-III

Introduction to Computer Memory: BIT, BYTE, Types of Memory: Primary Memories and their functionality (RAM-Static RAM, Dynamic RAM, ROM-EROM, EPROM, EEPROM), Secondary Memories and their functionality (Magnetic disk, Hard disk, Floppy disk, Optical disk, Compact disk (CD-ROM), Digital Versatile Disc (DVD) and Solid-State Storage Devices).

UNIT-IV

Introduction to Software: Types of Software (Application Software, System Software). Operating system: Functions of Operating System, Types of Operating System. Data Processing Systems: Batch Processing, Online Processing, Time Sharing, Real-Time Applications, Single-User, Multi-User and Client-Server Systems, Distributed and Parallel Processing Systems. Translators: Compilers, Interpreters and Assemblers.

11 **Suggested Resources for Reading**

1. Fundamentals of Computers, V. Rajaraman, PHI Publication.
2. Computer Fundamentals, P. K. Sinha, BPB Publication.
3. Computers Today, Basandra, S. K., Galgotia Publications.
4. Fundamentals of Information Technology, Anshuman Sharma, Lakhanpal Publications.
5. PC Hardware: The Complete Reference, Craig Zacker., TMH Publication.

Note: Latest edition of text books may be used.

	COURSE TITLE	SOFT SKILLS AND PERSONALITY DEVELOPMENT
1	**Course Code**	B.Voc. MDSC 201
2	**Typology of Course**	MULTIDISCIPLINARY COURSE
3	**Course Duration**	45 hours of lectures for Theory Theory credits = 3 (1 credit = 15 hours of theory learning based on 3hrs./week) (1 Semester = 15 weeks)
4	**Credits**	3 Credits
5	**Max. Marks and Time**	75 Marks (60 TH + 15 IA) i. The exam of this course will be of 3 hours duration. ii. There will be no objective type questions. iii. Students are required to have the knowledge of the developments in the subject up to 6 months before the examination.
6	**Course Objectives**	The course aims to expose the students to the concept of 'Human Development' (Personal and interpersonal) with emphasis on the latent resources that every human being possesses.
7	**Course Outcomes**	On successful completion of the course, the students will be able to: CO1.
