Learning Objectives of the Programme

- English is not merely a language but also a complete subject in itself. Thus, while training in the language, one is introduced to the rich reservoir of English literature. So, a student is trained both in language as well as literature.
- Since English is a global language, learning it opens several and varied avenues across borders. It is a language of transaction and transformation. Even within the nation, it is English that brings the North and the South of the country closer and bridges all gaps. Thus, a student is equipped with a tool that is universally recognized, accepted and promoted.
- English is no longer an alien or a colonial language. It has been Indianized with Indian Writings in English forming an essential subset of the English curriculum across the universities of the country.
- English as a language and English literature are studied in the context of postcolonial emancipation and are regarded as tools of not only critiquing the colonial project but also rewriting the native and indigenous histories. Thus, the subject of English has come to acquire a greater relevance from political as well as socio-cultural perspectives.
- The domain of English has borrowed from various other fields like sociology, philosophy and political science, and hence allows students to engage with other disciplines.
- Within its frame, it has also incorporated new trajectories like Cultural Studies, including cinema. music and art, and the New Media Writings.

Learning Objectives of the Programme

- From the Vedic to Classical Sanskrit, an enormous corpus of texts has been composed, which act as a record of one of the longest surviving human civilisations in the world. Thus a student of Sanskrit language can take a look at ideas, systems, techniques and so forth, spanning across many millennia.

- Despite being an ancient language, Sanskrit has not stopped adapting to the contemporary needs. New experiments are being done on various dimensions of Sanskrit, making it a very dynamic language of today's world.

- With the recent emphasis on Indian Knowledge Systems (IKS), the study of Sanskrit is gaining more importance today. This not only is making way for renewed interest in Sanskrit learning, but is also opening up new employment and entrepreneurial opportunities in Sanskrit.

- Sanskrit is a subject of global interest and research, where various dimensions of Sanskrit, such as social, literary, philosophical, scientific and so forth, are being studied. This calls for a more robust and dynamic participation of Indian Sanskrit scholars, hence providing them a global stage.

- Studying Sanskrit provides an opportunity of overall development of a student. From aesthetics, poetics, philosophy to formal logic and so forth, a student of Sanskrit gets to look at the world in various ways, thinks critically and analyses keenly working towards providing solutions for contemporary problems.
