Role of Media in Counter Insurgency Operation and Internal Conflicts

Practical: 25 Marks

1. Project Report: 20 Marks
2. Viva-Voce: 05 Marks

Practical Learning Components:

1. To develop practical skills, students must visit sites of significant defence or strategic events. These field visits offer insights into real-time developments, help students understand on-ground realities, and allow them to apply their observations in practical assignments and reporting tasks.
2. A visit to a radio or television station is desirable, as it helps learners observe live presentations and acquire relevant media skills.
3. Students are expected to gain exposure to the policymaking and diplomatic frameworks that underpin national security through internships and academic events.
4. The teacher should assign ample practical work, encouraging learners to participate in activities such as scriptwriting, content development, and oral presentations.
5. Students will be required to prepare a comprehensive project report on a current topic of general interest, assigned during practical hours. This activity encourages them to engage with contemporary issues and develop their research, analytical, and communication skills.

The student successfully securing 144 credits will be awarded B.A.degree.											

Notes:

1. In the first semester student is offered three different subjects A, B & C.
2. At the end of second semester each student has the option to choose any one of the two streams namely Single Major or Multi-Disciplinary. The student choosing Single Major stream is required to give his/her Major and Minor at the end of the second semester.
3. The student who chooses multi-disciplinary stream will continue with the three subjects and complete his/her three-year degree by securing 36 credits each in the chosen two subjects as Major and 24 credits in Minor subject.
4. A student who secures 75% or more marks in aggregate till semester 6 (up to 3-year degree) shall be eligible for 4 YEAR DEGREE B.A. HONOURS with research, on the condition that the Institution is a PU approved Research Centre

5. The student opting for Single Major must secure 50% credits of the total credits in the Major subject and obtain 24 credits from the Minor subject(s). To qualify for Minor in a particular subject, the student must attain atleast 12 credits in that subject(s).
6. The student exiting the programme after one year securing 48 credits will be awarded UG Certificate provided he/she secures 4 credits from summer internship/community work. Further, the student exiting the programme after two years securing 96 credits will be awarded UG Diploma provided he/she secure 4 credits from summer internship. The student successfully securing 144 credits will be awarded BA degree.
7. Language paper chosen as MIL-1 and MIL-2 should be in the same subject.
8. Once Major and Minor papers are chosen in 3rd semester, the same will continue as Major and Minor subject in the subsequent semesters.
9. The candidate opting for Honours in research is required to study a paper of Research Methodology (RM) of 04 credits and write Dissertation of 08 credits in one of the two Major subjects.

SEMESTER-V

ECO-DSC-9 (MAJ-5/MIN-5) 501: INTERNATIONAL ECONOMICS

Topology of the code	Major
Course Duration/LTP (Lectures, Tutorials, Practicals)	L= 60 hours (4 hours a week for 15 weeks= 01 semester), T=0, P=0
Credits	4
Max. Marks	100 Marks = Theory 90 marks + Internal Assessment 10 marks
Time	3 hours
Level	300

Learning Outcomes
This course introduces students to key concepts in international economics. Unit I covers classical and modern trade theories, including Absolute and Comparative Advantage, Heckscher-Ohlin, and Intra-industry trade. Unit II focuses on terms of trade, tariffs, non-tariff barriers, and regional economic integration. Unit III examines foreign exchange markets, exchange rate systems, and balance of payments adjustments. Unit IV explores international monetary systems, the role of the IMF, Eurocurrency markets, and the causes and impacts of financial globalization and crises.

Pedagogy of the Course Work: 90% Class room teaching
10% Internal Evaluation

Instructions for Paper-setter and candidates:
The maximum mark for the paper will be 100. The question paper will be of 90 marks and continuous evaluation 10 marks. The time allowed will be 3 hours.

The paper-setter must put a note in the question paper in this regard.

There shall be **9** questions in all
The first question is compulsory comprising 12 short answer-type questions spread over the whole syllabus. The candidates are required to attempt 9 questions. Each question shall be of two marks (9 x 2= 18).
Rest of the paper shall contain four units. Two questions shall be asked from each unit and the candidates shall be given internal choice. The candidates shall attempt one question from each unit. Each question will carry 18 marks (18x4=72).

UNIT- I

What is international economics about? Theories of Absolute Advantage, Comparative Advantage and Opportunity Costs.
Heckscher-Ohlin Theory of Trade – Its Main Features, Assumptions and Limitations.
New Approaches to Trade Theory: The Product Cycle Theory, Technology Gap Theory, Intra-industry trade.

UNIT- II

Concept and types of Terms of trade.
Effects of Tariff under Partial Equilibrium Analysis. Non-tariff Barriers. Political Economy of Non-tariff Barriers.
Economic Integration: Concept and Forms of Regional Integration; Static and Dynamic Effects of Custom Union.

UNIT-III

Foreign Exchange Market: Fixed versus flexible exchange rates, Concept, Role and Types of Foreign Exchange Transactions: Speculation, Arbitrage and Hedging.
The Process of Adjustment in the Balance of Payments under Fixed and Flexible ExchangeRate Systems.

UNIT-IV

International monetary systems: International Monetary Fund; Eurocurrency Market.
Financial Globalization and Financial crises: Causes and Case Studies.

Level	300

Learning Outcomes: The learning outcomes of this course will equip students with foundational knowledge in mathematics and statistics relevant to economic analysis. In Unit I, students will understand elementary set theory, relations, functions, limits, and continuity, along with the basics of matrices and determinants, and methods for solving linear equations using matrix techniques and Cramer's Rule. Unit II will introduce students to the scope and concepts of statistics, data collection, classification, and presentation, as well as measures of central tendency including mean, median, mode, and partition values. In Unit III, students will learn various measures of dispersion, including standard deviation and Lorenz curve, and understand the concepts of skewness and kurtosis. Unit IV will provide students with the ability to analyze relationships between variables through correlation and regression, including interpretation of Pearson's and Spearman's coefficients, scatter diagrams, and simple linear regression analysis.

UNIT - I

Elementary Set Theory, Relations and Functions, limit and Continuity.
Matrices and Determinants: Definition and types of Matrices; Operations (sum, difference product and transpose); Properties of Determinants; Calculation of Values of Determinants up to Third Order, Adjoint and Inverse of a Matrix. Solution of a System of Linear Equations (upto 3) by Matrix Inverse Method and Cramer's Rule.

UNIT – II

Introduction to Statistics: Meaning and Scope, Concepts of Population and Sample. Scales of Measurement - Nominal, Ordinal, Interval and Ratio. Variables and Attributes, Collection and Types of Data, Tabulation and Classification of Data, Graphical and Diagrammatical Presentation of Data.
Central Tendency: Meaning, Significance and Measurement using Mean (Arithmetic mean, Geometric and Harmonic Mean) Median, Partition Values and Mode.

UNIT - III

Dispersion: Meaning, Significance and Characteristics for an Ideal Measure; Measures of Dispersion: Range, Quartile Deviation, Mean or Average Deviation, Standard Deviation and Lorenz Curve.
Skewness and Kurtosis: Meaning and Measures.

UNIT - IV

Simple Correlation: Meaning, Types, Significance, Correlation and Causation; Scatter Diagram, Karl Pearson's and Spearman's Correlation Coefficient. Probable error.
Regression: Meaning and Significance, Difference Between Correlation and Regression, Simple Linear Regression and Estimation of Parameters (Slope and Intercept). Standard Error.

Suggested Practical Work: Use of Microsoft Excel in solving Simple Data Analysis.

Learning Outcomes: The learning outcomes of this course will provide students with a comprehensive understanding of the evolution of economic thought. In Unit I, students will explore Pre-Classical Economic Thought, focusing on Mercantilism and Physiocracy, with an emphasis on the ideas of Quesnay and Turgot. Unit II will enable students to understand the Classical and Marxian Political Economy, examining the contributions of Adam Smith, Ricardo, J. S. Mill, and Karl Marx on value, distribution, and economic development. In Unit III, students will gain insights into the reaction against Classicism, studying socialist and nationalist thinkers like Sismondi, Saint-Simon, Fourier, and the Subjective School, including Menger, Weiser, and Bohm-Bewark. Finally, Unit IV will provide students with a solid foundation in Neo-Classical Economics, including Marshall's theory of the firm and partial equilibrium, as well as Keynes' concepts of effective demand, consumption, investment, and the inflationary gap.

Learning Outcomes:This course on the Economics of Agriculture covers the nature, scope, and interdependence between agriculture and industry, with a focus on agricultural development challenges in developing countries and its contribution to India's economic growth. Unit II examines models of transforming traditional agriculture, including those by Schultz, Mellor, and Hayami-Ruttan. Unit III discusses land reforms, farming systems, farm size-productivity relationships, agricultural price policy, and taxation in the context of India. Unit IV explores the New Agricultural Strategy and Green Revolution, issues faced by small farmers and agricultural laborers, agricultural credit, and surplus utilization, with a special focus on India. The course also covers agriculture in GATT and WTO negotiations.

Credits	4
Max. Marks	100 Marks = Theory 90 marks + Internal Assessment 10 marks
Time	3 hours
Level	300

Learning Outcomes: This course on Population Economics explores key concepts such as population theories (Malthusian, Optimum, and Demographic Transition) and their relationship with economic development. Students will examine population structure, including age, gender, workforce participation, and fertility-mortality trends, with a focus on India. Migration patterns, urbanization trends, and their socio-economic consequences are also discussed. The course concludes with an analysis of India's post-independence population policy and its impact on demographic changes.

Instructions for Paper-setter and candidates:
The maximum mark for the paper will be 100. The question paper will be of 90 marks and continuous evaluation 10 marks. The time allowed will be 3 hours.

The paper-setter must put a note in the question paper in this regard.

There shall be **9** questions in all
The first question is compulsory comprising 12 short answer-type questions spread over the whole syllabus. The candidates are required to attempt 9 questions. Each question shall be of two marks (9 x 2= 18).
Rest of the paper shall contain four units. Two questions shall be asked from each unit and the candidates shall be given internal choice. The candidates shall attempt one question from each unit. Each question will carry 18 marks (18x4=72).

UNIT – I

Introduction to Population Economics
Theories of Population: Malthus, Optimum; Demographic transition theory.
Population and Economic Development: inter-linkages

UNIT – II

Population Structure and Characteristics: Impact of Population growth on the age and gender structure
Economic Composition of Indian Population: Workforce Participation & Occupational Structure
Fertility Mortality: Concepts and Measurement
Infant Mortality in India: Cause and Trends
Facility: Current Status

UNIT – III

Migration: Meaning, Causes and Consequences. Migration in India (Rular and Urban, Male-Female): Causes and Trends

Urbanisation: Meaning, Determinants and Consequences, Trends of Urbanisations in India.

UNIT – IV

Population Policy in India: Features of the Population Policy in the post-independence era.

Max. Marks	100 Marks = Theory 90 marks + Internal Assessment 10 marks
Time	3 hours
Level	300

Learning Outcomes: By the end of this course, students will gain a solid understanding of econometrics, including its nature, scope, and methodology, and how to specify and estimate econometric models. They will learn to apply simple and multiple regression models using the Ordinary Least Squares method, understand the properties of least squares estimators, and evaluate model fit using R-squared and Adjusted R-squared. Students will also be able to test the significance of regression coefficients, conduct hypothesis testing, and address econometric problems like multicollinearity, autocorrelation, and heteroscedasticity. The course will cover specification errors, such as the omission of relevant variables or inclusion of irrelevant ones, and the impact of measurement errors in variables. Additionally, students will learn about model selection criteria and the use of dummy variables in regression models.

UNIT- I

Introduction: Nature and Scope of Econometrics, Methodology of Econometrics. Specification ofan Econometric Model. Nature of Data used in Estimation.
Simple and Multiple Regression Models: Estimation of Model by Method of Ordinary LeastSquares; Properties of the Least Squares Estimators, the Gauss-Markov Theorem. Goodness of Fit-R Square & Adjusted R Square.

UNIT –II

Testing Significance of Regression Coefficients: Confidence Interval and Hypotheses Testing.
Econometrics Problems: Nature, Consequences, Detection and Remedial Measures of the Problemsof Multicollinearity and Autocorrelation.

UNIT- III

Econometrics Problems: Nature, Consequences, Detection and Remedial Measures of the Problem of Heteroscedasticity.

Specification Errors: Tests of Specification and Misspecification: Omission of a Relevant Variable; Inclusion of Irrelevant Variable.

UNIT- IV

Errors of Measurement: Errors of Measurement in Dependent and Independent Variables: Consequences and Remedial Measures. Model Selection Criteria.

Dummy Variables: Uses of Dummy Variables as Independent Variables.

Learning Outcomes: By the end of this course, students will have a comprehensive understanding of economic growth and development, including key concepts like PQLI and HDI, and the main features of underdeveloped economies. They will analyze various growth models such as the Classical, Harrod-Domar, and Solow models, as well as theories of dualism and income distribution, including Kuznets' inverted U curve. Students will also explore strategies for economic development, including balanced vs. unbalanced growth, Rostow's stages of growth, and the theory of big push. The course covers the role of planning in developing countries, investment criteria, and emerging strategies like export promotion and import substitution. Finally, students will understand the concept of sustainable development, its concerns, indicators, and potential solutions.

UNIT – I

Economic Growth and Development: Concept and Measurement (Concepts of PQLI and HDI) Main Features of an Underdeveloped Economy. Determinants of Economic Development. Capital Formation: It's Source, Nurkse's Thesis of Disguised Unemployment. Lewis Theory of Unlimited Supply of Labour.

UNIT – II

Classical Model of Growth; Harrod-Domar Model of Economic Growth; One Sector Neo-classical Model of Growth. Solow Model of Growth. Dualism: Social and Technological. Relationship between income distribution and economic development (Kuznets' inverted U curve).

UNIT – III

Theory of Big Push. Leibenstein's Critical Minimum Effort Thesis. Strategies of Economic Development: Balanced Vs. Unbalanced Growth. Rostow's Theory of Stages of Growth.

UNIT – IV

Theory of Planning in Developing Countries: Need, Objectives, Strategies and Problems of Planning. Price Mechanism and Planning. Investment Criteria. Choice of Technique. Emerging Strategies: Export Promotion and Import Substitution Strategy.
Sustainable development: Meaning, concerns, indicators and remedial measures**.**

UNIT - I

Differentiation: Simple and Partial Derivatives, Differentiation of Simple functions – Polynomial and Exponential Functions. Maxima and Minima of Functions of One Variable only their applications of micro and macroeconomics.

UNIT – II

Linear programming Problem: Meaning, Advantages, Limitations, Basic Terminology, Formulation of linear programming Problems and Solution by Graphical Method.
Theory of Probability: Introduction, Definitions and Use of Addition and Multiplicative Theorem, Conditional Probability and Bayes' Theorem.

UNIT – III

Time Series: Meaning, Components, Models, Determination of trend and short-term oscillations. Least Square and moving average method.

Interpolation and Extrapolation: Binomial Expansion Method, Newton's Method (Advancing difference) and Lagrange's Method.

UNIT – IV

Index Numbers:Meaning, Types, Uses and Problems in the Construction of Index Numbers; Methods of Constructing Simple and weighted Price and Quantity Indices (Laspeyres's, Paasche's and Fisher's Index numbers for weighted index numbers); Tests of Adequacy. Fixed Base Index, Chain Base Index, Base Conversion, Base Shifting, Splicing, Deflating, Consumer Price Index.

Level	300

Learning Outcomes: This course covers key concepts in industrial economics, including the nature of firms, industries, and markets, as well as different organizational forms and firm motives. It examines market structure factors such as concentration, product differentiation, and economies of scale, and explores how theseinfluence profitability. The course also looks at firm growth through vertical integration, diversification, and innovation, while addressing constraints like demand and managerial factors. It covers the theory of industrial location, focusing on centralized vs. balanced regional development, and the patterns of industrial concentration in India. Finally, it discusses India's industrial policy post-independence, the reasons for decelerating industrial growth, and the role of state industrialization.

UNIT-I

Scope and methods of Industrial Economics: Basic concepts of firm, industry and market; Organisational forms and alternative motives of the firms; Industrial structure and economic development.

UNIT-II

Market Structure: Sellers' concentration, product differentiation, conditions of entry and economies of scale, market structure and profitability. Growth of Firms: Vertical integration, diversification, mergers and innovation; constraints on growth demand, financial and managerial.

UNIT-III

Theory of industrial location: Contribution of Weber and Sergent Florence, centralized vs. balanced regional development, industrial concentration and dispersal in India.

UNIT-IV

Industrial policy since independence: Industrial development under plans and reasons for deceleration of industrial growth, Growth of State industrialization in India.

SEMESTER V

DISCIPLINE SPECIFIC COURSE 11/MAJOR/MINOR-5

Course Title: Approaches to Literary Criticism – I
Course Code: ENG-DSC-11 (MAJ/MIN)-501
Typology of Course: Major/Minor/Discipline Specific Course [**This shall be the syllabus for students of B.A. Semester V English Minor also]**
Level: 300
Course Duration: 75 hours in one semester [45 hours of Lecture (3 hrs per week) + 30 hours (2 hrs per week) of Practical]
Credits: 4 credits
Maximum Marks: 100 (90 Theory +10 Internal Assessment)

Practical & Tutorials in all subjects to the capacity of only 20 students per lecture class.

Note:- There shall be no separate practical exam at the end of the semester.

Learning Objectives of the Course:

- To broaden understanding of the students regarding the various schools of literary criticism and their different methodologies.
- To familiarise the students with the diverse worldviews and help them relate literary texts to their own thoughts and lives.
- To help students understand that a text can yield multiple meanings with none being privileged to the other and thus make them conversant with the vitality of the concept of critical pluralism.
- To equip the students with the skill of critical and comprehensive literary analysis.

Course Outcomes:

At the end of this course, students will be able to:

- Show familiarity with major critical approaches and comprehend diverse methodologies in their specific historical and cultural contexts and positionalities.
- Develop and practice close reading skills; conduct own research and analysis and engage in critical deliberations.
- Navigate through texts with a degree of precision and practically apply these methodologies to literary texts and other forms of cultural production.

Pedagogy of the Course:

a) The paper requires 3 hours of lecture teaching per week and 2 hours of practical per week during which students shall participate in discussions and critical deliberations on the texts.
b) Students will select a theoretical movement and use relevant course readings to describe, analyze and apply methodologies of the selected theoretical movement to a selected text of choice (literature or media, as approved by the teacher). The critical textual analysis (6-8 pages) will be discussed in the class and will be submitted by the student as assignment.

- The course will examine how life writing as a literary genre intersects with politics, identity, gender, caste, and history. It will also explore the role of life writing in the construction of individual and collective memory.
- Students will analyze and define the genre of life writing, and explore how personal narratives represent individual and collective identities, memory, trauma, and the self in relation to historical, cultural, and social contexts.
- The course will sensitize the students about the problem of representing the lives of people from different cultures through critical evaluation of these writings.

Pedagogy of the Course:

- The paper requires 3 hours of lectures/seminars per week, and additionally the students shall be engaged to read life writings of well know personalities, sports and films stars 2 hour per week as part of their practical work.
- Assignments, reviews and critical discourse will be a regular practice of the teaching process.
- Assignments, seminars, test scores and attendance will be the main considerations for internal assessment.

Course Outcomes:
At the end of this course, students will be able to:

- distinguish between different forms of life writing (autobiography, memoir, diary, letters, etc.) and identify key features such as subjectivity, authenticity, memory, and self-representation.
- develop the skills to analyse life writing works in terms of narrative structure, voice, point of view, and themes such as trauma, memory, identity, and social/political context.
- understand how writers negotiate individual and cultural identities through life writing and be able to assess the complexities involved in self-representation.
- discuss the ways in which memory is represented and the role of subjectivity in constructing narratives of selfhood and experience.

Semester VI
Discipline Specific Course-20/Major

Course Title: **Indian Women's Writing**
Course Code: **ENG-DSC-20 (MAJ)-605**
Typology of Course: **Discipline Specific Course/Major**
Level: **300**
Course Duration: 75 hours in a semester (3hrs direct teaching + 2hrs practical)
Credits: 4
Maximum Marks: (90marks theory + 10 marks internal assessment)

Practical & Tutorials in all subjects to the capacity of only 20 students per lecture class.

Note:- There shall be no separate practical exam at the end of the semester.

Learning Objectives of the Course
The objective of the paper is to introduce students to the emerging counter canon of Women's literary production in India. Covering vast sweeps of time, the paper includes voices ranging from the 12th century to the present times. Through the inclusion of linguistically diverse texts in translation the students will be empowered to bridge the gap of cultural and linguistic divides. Translations are included from numerous languages including Kannada, Marathi, Punjabi, Hindi, Bengali and Tamil. Generic variations are offered to allow students a deeper understanding of representative texts. By destabilizing consolidated patriarchal narratives through Women's Writing. This paper will allow students to comprehend their experiences in relation to the anxieties and influences of the contemporary times.

Pedagogy of the Course
The paper requires 3 hours of direct teaching and 2 hours of practical classes per week. In the practical classes, the students should be asked their own autobiographies, and the narratives about their mothers, and other women in the family. Comprehensive critical understanding of the writers age, theme, style, and ideological stances should be ensured through critical discourses and assignments on the subject. Out of a total of 100 marks students would be evaluated externally for 90 marks and internally for 10 marks. The internal assessment would be given on the basis of attendance, class participation and mid-term test score. The suggested reading list is only to provide a background study to the paper. No direct questions will be asked from the same.

The students successfully securing 144 credits will be awarded B.A. Degree					

Notes:

1. In the first semester student is offered three different subjects A, B & C.
2. At the end of second semester each student has the option to choose any one of the two streams namely Single Major or Multi-Disciplinary. The student choosing Single Major stream is required to give his/her Major and Minor at the end of the second semester.
3. The student who chooses multi-disciplinary stream will continue with the three subjects and complete his/her three-year degree by securing 36 credits each in the chosen two subjects as Major and 24 credits in Minor subject.
4. A student who secures 75% or more marks in aggregate till semester 6 (up to 3-year degree) shall be eligible for 4 YEAR DEGREE B.A. HONOURS with research, on the condition that the Institution is a PU approved Research Centre
5. The student opting for Single Major must secure 50% credits of the total credits in the Major subject and obtain 24 credits from the Minor subject(s). To qualify for Minor in a particular subject, the student must attain at least 12 credits in that subject(s).
6. The student exiting the programme after one year securing 48 credits will be awarded UG Certificate provided he/she secures 4 credits from summer internship/community work. Further, the student exiting the programme after two years securing 96 credits will be awarded UG Diploma provided he/she secure 4 credits from summer internship. The student successfully securing 144 credits will be awarded BA degree.
7. Language paper chosen as MIL-1 and MIL-2 should be in the same subject.
8. Once Major and Minor papers are chosen in 3rd semester, the same will continue as Major and Minor subject in the subsequent semesters.
9. The candidate opting for Honours in research is required to study a paper of Research Methodology (RM) of 04 credits and write Dissertation of 08 credits in one of the two Major subjects.

SEMESTER V

COURSE TITLE:GEOGRAPHY OF INDIA

Course Code : GEOG-DSC-9 (MAJ-5/MIN-5)-501
Level of Course : L-300
Total Credits : 4 (Theory 3+ Tutorial 1)
Maximum Marks : 100 (90 Theory + 10 Internal Assessment)
Course Duration : Total= 60 Hours (Lectures- 45 Hours; Tutorial- 15 Hours)

Evaluation: Maximum Marks: **100 (90 Theory + 10 Internal Assessment)**

- Terminal Examination : 90 Marks
- Internal Assessment : 10 Marks
- Examination Time : 3 Hours

COURSE OBJECTIVE: The courseintends to introduce to students the fundamental concepts of Geography of India and enable them to appreciate the physical and human aspects of India.

LEARNING OUTCOME: At the end of the course the students will be able to:

- Analyse the elements of India's physical landscape and its influence of cultural landscape.
- Evaluate nature and dynamics of India's demographic and agricultural attributes.
- Synthesis the resources base and its impacts of India's economic landscape.

PEDAGOGY: Conscious efforts to be made to make the students aware of the significance of India's physical and human geography. The learning shall be based on creative assignments, interactive & innovative activities, discussions and learning by doing activities.

INSTRUCTIONS FOR PAPER SETTER AND CANDIDATES:

1. A compulsory question containing 12 short answer type questions shall be set covering the whole syllabus. The student shall attempt any 9 parts in about 25-30 words each. Each part shall carry 2 marks (Total 9x2= 18 marks).
2. A total of eight questions will be set out of the whole syllabus at least *two* from each unit. The candidates will attempt *four* questions selecting one from each unit and each question will carry 18 marks (Total 4x18= 72 marks). These will be in addition to the compulsory question at S. No. 1.
3. Special credit will be given to suitable use of maps and diagrams. Use of unmarked map stencils and colour pens/pencils are allowed.
4. Internal assessment may include written assignments, snap tests, participation in discussion in the class, term papers, attendance etc.
5. For CDOE, reappear/improvement candidates(s), who have not been assessed earlier for internal assessment, the marks secured in theory paper will be increased proportionally to maximum marks of the paper in lieu of internal assessment. The paper setter must put note (5) in the question paper.

COURSE CONTENT

UNIT-I: Physical Setting of India:

1. Relief, Drainage, and Climate
2. Indian Monsoon, Soils and Vegetation.
3. Hazards and Disasters: Earthquakes, Flood and Drought.

UNIT-II: Human Resources:

4. Population Distribution and Density
5. Population Growth; Sex Composition, Literacy
6. Migration and Urbanization.

UNIT-III: Agriculture Resources:

7. Agriculture: Characteristics, Problems and Challenges.
8. Major Crops: Rice, Wheat, Maize, sugarcane, Cotton
9. Food Security in India: Issues and Challenges

UNIT-IV: Mineral, Power Resources and Industry:

10. Iron ore, Manganese, Mica, Copper and Gold
11. Coal, Petroleum and Hydroelectricity
12. Major Industries: Iron & Steel, Cotton Textiles, Sugar

COURSE TITLE: MAP PROJECTIONS (Theory & Practical)

Course Code : **GEOG-DSC-10 (MAJ-5)-502**
Level of Course : **L-300**
Total Credits : **4 (Theory 2+ Tutorial 1+ Practical 1)**
Maximum Marks : **100 (60 Theory + 10 Internal Assessment+ 30 Practical)**
Course Duration : **Total= 75 hours (Lectures- 30 Hours; Tutorial- 15 Hours; Practical-30 Hours)**

Evaluation: Maximum Marks: **100 (60 Theory + 30 Practical+ 10 Internal Assessment)**

- Terminal Examination : 60 Marks
- Internal Assessment : 10 Marks
- Practical Examination : 30 Marks
- Examination Time : 3 Hours

COURSE OBJECTIVE: The course intends to introduce the concept of map projections and their relevance in Cartography. The course is further designed to explain the types, uses, limitations and construction of map projections.

LEARNING OUTCOME: After the completion of this course, students should be able to

- Understand the usage and significance of map projections
- Understand various types of projection their relevance
- Apply cartographic knowledge to design, produce and interpret projections

PEDAGOGY: The introduction of conceptual and practical foundations of map projections and construction shall form the core of teaching and learning. The students are to be encouraged to actively interact with the teacher and the peer group on themes related to map projections.

INSTRUCTIONS FOR PAPER SETTER AND CANDIDATES:

1. A compulsory question containing 15 short answer type questions shall be set covering the whole syllabus. The student shall attempt any 10 parts in about 25-30 words each. Each part shall carry 2 marks (Total 10x2= 20 marks).
2. A total of eight questions will be set out of the whole syllabus at least *two* from each unit. The candidates will attempt *four* questions selecting one from each unit and each question will carry 10 marks (Total 4x10= 40 marks). These will be in addition to the compulsory question at S. No. 1.
3. Special credit will be given to suitable use of maps and diagrams. Use of unmarked map stencils and colour pens/pencils are allowed.
4. Internal assessment may include written assignments, snap tests, participation in discussion in the class, term papers, attendance etc.
5. For CDOE, reappear/ improvement candidates(s) who have not been assessed earlier for Internal Assessment, the marks secured in theory paper will be increased proportionally to maximum marks of the paper in lieu of internal assessment. Paper setter must put note (5) in the question paper.

INSTRUCTIONS FOR PRACTICAL EXAMINATIONS:

1. Each student shall prepare a practical file. They will berequired to complete their practical file and get it signed from the class teacher at least 10 days before the commencement of theirexamination.
2. The practical examination in the form of viva-voce only shall be conducted at the respective college itself except for CDOE. There will be no laboratory exercise at that time of examination.

3. Practical examination at the respective colleges shall be conducted by one internal and one external examiner. The external examiner shall be appointed by the principal of the respective colleges in consultation with the senior most teacher of Geography in the college.
4. For students of CDOE, there will be no viva-voce examination for the candidates. They will be required to submit their Practical Note Book (Practical files) with the Centre for Distance and Online Education (CDOE), Panjab University (Department of Geography) at least 10 days before the commencement of their examination. Their Practical files will be evaluated by two examiners (including at least one from the CDOE.
5. Those students who fail in the practical examination are required to prepare a fresh practical file. However, students who failed in theory paper only or are appearing in improvement examination, their practical marks of previous practical examination will be carried forward.
6. For practical classes, the number of students in one group shall not exceed fifteen.
7. There will be 2 hours of teaching per week for this paper.

COURSE CONTENT

Unit I: ***Concept of Map Projections***

1. Map Projection: Introduction, Need and Elements
2. Map projections: Classification; Principles of identification and choice of projection

Unit II: ***Properties and Limitations of Cylindrical Projection***

3. Simple Cylindrical Projection
4. Equal area, and Mercator Projection

Unit III: ***Properties and Limitations of Conical Projection***

5. One Standard Parallel
6. Bonne's, and Polyconic Projection

Unit IV: ***Properties and Limitations of Zenithal Projection***

7. Gnomonic, Stereographic, Orthographic
8. Equidistant and Equal Area

PRACTICAL EXERCISES

1. Construction of Simple Cylindrical and Mercator Projection
2. Construction of Conical Projection-One Standard Parallel
3. Construction of Bonne's Projection and Polyconic Projection
4. Construction of Gnomonic and Stereographic Projection
5. Construction of Orthographic Projections
6. Construction of Sinusoidal and Mollweide's projections

2. A total of eight questions will be set out of the whole syllabus at least *two* from each unit. The candidates will attempt *four* questions selecting one from each unit and each question will carry 18 marks (Total 4x18= 72 marks). These will be in addition to the compulsory question at S. No. 1.
3. Special credit will be given to suitable use of maps and diagrams. Use of unmarked map stencils and colour pens/pencils are allowed.
4. Internal assessment may include written assignments, snap tests, participation in discussion in the class, term papers, attendance etc.
5. For CDOE, reappear/improvement candidates(s), who have not been assessed earlier for internal assessment, the marks secured in theory paper will be increased proportionally to maximum marks of the paper in lieu of internal assessment. The paper setter must put note (5) in the question paper.

COURSE CONTENT

Unit I: Foundations to Resource Geography

1. Meaning, nature and scope of resource geography
2. Natural Resource Processes: Zimmermann's Model, Limit to Growth Model
3. Concept, Significance and classification of resources

Unit – II: Understanding Natural Resources

4. Forests Resources: Significance, Types, Distribution and Problems
5. Fisheries: Significance, Types, Distribution and Problems
6. Resource conservation; Sustainable Resource Development

Unit-III: Energy Resources

7. Coal and petroleum: Distribution, Utilisation and Problems
8. Hydro-electric power and Solar Power: Significance, Distribution, and Challenges
9. Politics of Power resources and Development

Unit-IV: Mineral Resources:

10. Mineral Resources: Types, Characteristics and Use
11. Metallic Minerals: Iron, Aluminium, Copper
12. Non-Metallic Minerals: Gypsum, Mica, Limestone

SEMESTER VI

COURSE TITLE: GEOGRAPHY OF MIDDLEEAST

Course Code : **GEOG-DSC-14 (MAJ-6/MIN-6)-601**
Level of Course : **L-300**
Total Credits : **4 (Theory 3+ Tutorial 1)**
Maximum Marks : **100 (90 Theory + 10 Internal Assessment)**
Course Duration : **Total= 60 hours (Lectures- 45 Hours; Tutorial- 15 Hours)**

Evaluation: Maximum Marks : **100 (90 Theory + 10 Internal Assessment)**

- ❖ Terminal Examination : 90 Marks
- ❖ Internal Assessment : 10 Marks
- ❖ Examination Time : 3 Hours

COURSE OBJECTIVE: The course intends to provide an understanding of the Middle East region with respect to Land, People, Polity and Economy; the physical and human resource and its interface with economic development; conflicts, prospects and issues related to regional groupings.

LEARNING OUTCOME: At the end of the course the students will be able to

- ❖ Outline the history and unique geographic personality of Middle East.
- ❖ Explain the physical and cultural features of Middle East region.
- ❖ Analyse and evaluate conflicts, problems and prospects of Middle East.

PEDAGOGY: Teacher shall make efforts to instruct students to make stencils/maps of the Middle East. Students should be encouraged to use atlas and online maps in classrooms. Open Education Resources may be used for teaching and discussions. The students shall be asked to undertake creative assignments on different topics of the Middle East Region to enhance their learning and practical knowledge.

INSTRUCTIONS FOR PAPER SETTER AND CANDIDATES:

1. A compulsory question containing 12 short answer type questions shall be set covering the whole syllabus. The student shall attempt any 9 parts in about 25-30 words each. Each part shall carry 2 marks (Total 9x2= 18 marks).
2. A total of eight questions will be set out of the whole syllabus at least *two* from each unit. The candidates will attempt *four* questions selecting one from each unit and each question will carry 18 marks (Total 4x18= 72 marks). These will be in addition to the compulsory question at S. 5. For CDOE, reappear/improvement candidates(s), who have not been assessed earlier for internal assessment, the marks secured in theory paper will be increased proportionally to maximum marks of the paper in lieu of internal assessment. The paper setter must put note (5) in the question paper.

COURSE CONTENT

Unit-I: Historical Importance and Geographic Personality of Middle East Region

1. History of Middle East; Location, Situation, Size and Constituent countries
2. Regional Grouping and Sub-grouping of Middle East countries

Unit-II: Physical Geography of Middle East Region

3. Physical Features: Relief, Drainage, Soils and Vegetation
4. Climate: Temperature, Rainfall and Climatic Regions
5. Natural Resources: Mineral and Power

Unit-III: Human Geography of Middle East Region

6. Demography: Distribution, Density, Growth and Urbanization
7. Religion and Languages: Religious Significance, Linguistic Diversity
8. Economic Activities: Agriculture, Industries, Trade and Transport

Unit-IV: Conflicts, Organization, Problems and Prospects of Middle East Region

Conflicts: Arab-Israeli War, Iran-Iraq War, Persian Gulf War and Yemini Civil War

9. Organizations: Arab League, GCC and OPEC;
10. Problems and Prospects of Middle East region

COURSE TITLE: QUANTITATIVE GEOGRAPHY (Theory & Practical)

Course Code : **GEOG-DSC-15 (MAJ-6)-602**
Level of Course : **L-300**
Total Credits : **4 (Theory 2+ Tutorial 1+ Practical 1)**
Maximum Marks : **100 (60 Theory + 10 Internal Assessment+ 30 Practical)**
Course Duration : **Total= 75 hours (Lectures- 30 Hours; Tutorial- 15 Hours; Practical-30 Hours)**

Evaluation: Maximum Marks: **100 (60 Theory + 30 Practical+ 10 Internal Assessment)**

- Terminal Examination : 60 Marks
- Internal Assessment : 10 Marks
- Practical Examination : 30 Marks
- Examination Time : 3 Hours

COURSE OBJECTIVE: This course aims to introduce basic statistical techniques in geography and impart applied knowledge on computational procedures, usage and application of various statistical techniques.

LEARNING OUTCOME: After the completion of this course, students should be able to

- Outline the sources of data, basic of tabulations and data classification.
- Learn measures of central tendency and their uses.
- Compute and apply measures of dispersion, correlation and use of these measures.

PEDAGOGY:A conscious effort shall be made to make the students understand statistics through learning by doing approach. Students will be encouraged to undertake practical exercises based on various statistical methods to analyse the datasets and derive meaningful information.

INSTRUCTIONS FOR PAPER SETTER AND CANDIDATES:

1. A compulsory question containing 15 short answer type questions shall be set covering the whole syllabus. The student shall attempt any 10 parts in about 25-30 words each. Each part shall carry 2 marks (Total 10x2= 20 marks).
2. A total of eight questions will be set out of the whole syllabus at least *two* from each unit. The candidates will attempt *four* questions selecting one from each unit and each question will carry 10 marks (Total 4x10= 40 marks). These will be in addition to the compulsory question at S. No. 1.
3. Special credit will be given to suitable use of maps and diagrams. Use of unmarked map stencils and colour pens/pencils are allowed.
4. Internal assessment may include written assignments, snap tests, participation in discussion in the class, term papers, attendance etc.
5. For CDOE, reappear/ improvement candidates(s) who have not been assessed earlier for Internal Assessment, the marks secured in theory paper will be increased proportionally to maximum marks of the paper in lieu of internal assessment. Paper setter must put note (5) in the question paper.

INSTRUCTIONS FOR PRACTICAL EXAMINATIONS:

1. Each student shall prepare a practical file. They will berequired to complete their practical file and get it signed from the class teacher at least 10 days before the commencement of theirexamination.
2. The practical examination in the form of viva-voce only shall be conducted at the respective college itself except for CDOE. There will be no laboratory exercise at that time of examination.

3. Practical examination at the respective colleges shall be conducted by one internal and one external examiner. The external examiner shall be appointed by the principal of the respective colleges in consultation with the senior most teacher of Geography in the college.
4. For students of CDOE, there will be no viva-voce examination for the candidates. They will be required to submit their Practical Note Book (Practical files) with the Centre for Distance and Online Education (CDOE), Panjab University (Department of Geography) at least 10 days before the commencement of their examination. Their Practical files will be evaluated by two examiners (including at least one from the CDOE.
5. Those students who fail in the practical examination are required to prepare a fresh practical file. However, students who failed in theory paper only or are appearing in improvement examination, their practical marks of previous practical examination will be carried forward.
6. For practical classes, the number of students in one group shall not exceed fifteen.
7. There will be 2 hours of teaching per week for this paper.

COURSE CONTENT

Unit I: Introduction, Sources of Data and Frequency Distribution

1. Statistical methods in geography: definition, types and significance;
2. Tabulation and Classification of Data; Frequency Distribution, Histogram,
3. Frequency Polygon and Ogive Curve.

Unit II: Measures of Central Tendency

4. Mean: Concept, Characteristics and Measures
5. Median: Concept, Characteristics and Measures
6. Mode: Concept, Characteristics and Measures

Unit III: Measures of dispersion

7. Concept, Characteristics and Measures of Range and Quartiles
8. Concept, Characteristics and Measures of Mean Deviation
9. Concept, Characteristics and Measures of Standard Deviation and CV.

Unit IV: Correlation

10. Concept and Characteristics of Scatter Diagram
11. Karl Pearson's Coefficient of Corelation
12. Spearman's rank correlation coefficient.

PRACTICAL EXERCISES

1. Preparation of Frequency Distribution and Histogram,
2. Preparation of Frequency Polygon and Ogive Curve.
3. Mean, Median and Mode
4. Range, Quartiles
5. Standard Deviation and CV.
6. Establishing Corelation using Scatterplot/Scatter Diagram
7. Karl Pearson coefficient of Corelation
8. Spearman's rank correlation coefficient.

Evaluation: Maximum Marks : **100 (90 Theory + 10 Internal Assessment)**

- ❖ Terminal Examination : 90 Marks
- ❖ Internal Assessment : 10 Marks
- ❖ Examination Time : 3 Hours

COURSE OBJECTIVE: To understand the Physical and Cultural Landscape of Europe, its human resources, and distributional patters and trends of its resources and industries

LEARNING OUTCOME: After the completion of this course, students should be able to

- ❖ Comprehend the nature, scope and significance of Geography of Europe
- ❖ Read, analyse and critique geographical aspects of Europe.
- ❖ Demonstrate knowledge to interpret Europe's physical and cultural landscape

PEDAGOGY: Use of visual aids is essential for showing and explaining maps in the classroom teaching. Students will be encouraged to use an Atlas, Audio- video aids, and class discussion to examine and critique different aspects of Geography of Europe.

INSTRUCTIONS FOR PAPER SETTER AND CANDIDATES:

1. A compulsory question containing 12 short answer type questions shall be set covering the whole syllabus. The student shall attempt any 9 parts in about 25-30 words each. Each part shall carry 2 marks (Total 9x2= 18 marks).

COURSE TITLE: FIELD BASED PROJECT REPORT (Practical Only)

Course Code : **GEOG-DSC-17 (MAJ-6)-604**
Level of Course : **L-300**
Total Credits : **4 (Tutorial 1+ Practical 3)**
Maximum Marks : **100 (60 Project Report + 10 Internal Assessment+ 30 Viva Voce)**
Course Duration : **Total= 75 hours (Tutorial- 15 Hours; Report Preperation-60 Hours)**

Evaluation: Maximum Marks**:** 100 (60 Project Report + 30 Viva Voce+ 10 Internal Assessment)

- Project Report Evaluation : 60 Marks
- Viva Voce : 30 Marks
- Internal Assessment : 10 Marks
- Examination Time (Viva Voce) : 3 Hours

COURSE OBJECTIVES: To acquaint the students with the importance of field work as one of the methodologies in geography and sharpen their skills to conduct field-based research.

LEARNING OUTCOMES: After the completion of this course, students should be able to

- Familiarise with pre-field work and post-field work
- Carryout data collection using various field methods/activities
- Analyse data and write a project report based on field work.

Pedagogy: A conscious effort shall be made to make the students understand the tools and techniques of field work. Student shall be encouraged to learn field-based research approach in geography.

INSTRUCTIONS FOR EXAMINERS AND CANDIDATES:

1. There will be no written paper for CDOE and college students.
2. Each student shall prepare a project report based on field work. They will berequired to complete their report and get it signed from the class teacher at least 10 days before the commencement of theirsemester examination.
3. Viva Voce Examination at the respective colleges shall be conducted by one internal and one external examiner. The external examiner shall be appointed by the principal of the respective colleges in consultation with the senior most teacher the geography in the college.
4. Evaluation of field-based project report will be done at the time of viva-voce examination. There will be no laboratory exercise at that time.
5. There will be no viva-voce examination for the candidates appearing through the CDOE. They will be required to submit their field report with the centre for distance and online education (department of geography) at least 10 days before the commencement of their examination. Their field report will be evaluated by two examiners (including at least one from the CDOE).
6. For the students of CDOE there will be an internal assessment of 40 marks in lieu of the viva-voce examination. The marks obtained by the candidate will be added to the marks awarded by the internal and external examiners evaluating the field report.
7. All students are required to submit a project report prepared based on fieldwork
8. A fresh field report shall be prepared by failed /improvement candidates.

Instruction for Field Based Research Report

The research report shall be prepared based on following guidelines:

- Theme/Title of Project Report
- Outline the relevance of theme
- Outline objectives and research questions

- ❖ Define the scale of study and fieldwork methodology
  - Scale of field study of: a farm, a village, a market, , Institution, and a town etc.
  - Methods of primary data collection: observation, interview and questionnaire
- ❖ Organisation of material/report
- ❖ Data analysis and representation
- ❖ Discussion
- ❖ Summary and conclusion

Note: The teachers should familiarize the students about the process and different aspect of field-based report in the class during the tutorials. Students shall prepare the report of minimum 40 pages based on primary data on the given theme/research problems.

HIS-DSC-17(MAJ)- 604: USA AND THE WORLD c. 1800-1960s

Credits	: 4
Theory Examination	: 90
Internal Assessment	: 10
Level of Course	: 300

Course Objective:
The paper will equip the students with a basic/conceptual understanding of the history of the USA

Learning Outcome:
1 Understanding of the rise of the USA
2 Understanding of the foreign policy of the USA
3 Understanding of the role of the USA in the world wars
4 Understanding of economic and political dominance of the USA

PedagogyoftheCourse
There will be direct teaching where the students will be referred to the secondary works onthe history of USA. There will be continuous evaluation of the students through assignments and semester tests. Towards the end of the session,there will be a written examination.

Instructions for the Paper Setters and the candidates:
1. The duration of the examination shall be three hours, with a maximum of 90 marks. There will be 9 questions overall, and the student is expected to attempt five. Question no. 1 is compulsory. There will be 12 questions, and students have to attempt any 9 questionsin 25-30 words. Each short question carries 2 marks each. The students have to attempt one essay-type question (in 700-1000 words) from each unit. Each essay-type question carries 18 marks.

2. Internal Assessment will be divided into the following criteria:
   Mid-Semester Test : 5 marks;
   Assignment Report and Class presentation : 3 marks
   Attendance : 2 marks

Note:
For Private/Centre for Distant and Online Education Students, who have not been assessed earlier for the internal assessment, the marks secured by them in the written paper will proportionally be increased in lieu of the internal examination.

UNIT I

1. US Foreign Policy 1789-97-Response to France; issues with Britain; Jay's Treaty 1799; Pinckney's Treaty 1797; Peace with France
2. Diplomatic Achievements 1800-1820's-Louisiana Purchase; Settlement with Britain; Acquisition of Florida; non colonization of Alaska; liberation of Latin America; Monroe Doctrine
3. Industrial Revolution in America- expansion of transportation, manufacturing, foreign trade and shipping

UNIT II

4. Expansion to the West in the 1830s –Early settlement in the West; Texas question; migration to Oregon
5. Manifest Destiny –Annexation of Texas; Oregon Treaty; Relations with Mexico; conquest of California
6. USA as a World Power- Expansion in the Pacific region; Dispute with Venezuela; Results of War with Spain 1898; Policy in the Caribbean and Mexico; Open Door Policy in South East Asia

UNIT III

7. USA and World War I- US attitude to War, entry into the War; 14 Point Programme, role in Paris peace conference 1919
8. Foreign Policy 1920s-30s- Washington Treaties, Locarno Treaty, Relations with Mexico, Change in 'Big Stick' Policy, Good Neighbour policy, reaction to Chinese situation
9. USA and World War II- US attitude, US aid to the War and War Production, Pearl Harbour

UNIT IV

10. New World Order-US Peace Programme and United Nations, Relations with Soviet Union and Containment, Pan-American Conference 1945, post-war Europe
11. US in East Asia-American response to China, Japan, Korea, Vietnam
12. US in Europe and West Asia- US and NATO, issues with Egypt, support to Israelis, Eisenhower Doctrine

Credits	: 4
Theory Examination	: 90
Internal Assessment	: 10
Level of Course	: 300

Course Objective:
The paper will equip the students with a basic/conceptual understanding of the history of Canada.

Learning Outcome:
1 Understanding of Canada's early contact with European countries
2 Understanding of the transformation of Canada.
3 Understanding of the impact of World Wars on Canada
4 Understanding of economic development in Canada

Pedagogy of the Course
There will be direct teaching where the students will be referred to the secondary works onthe history of Canada. There will be continuous evaluation of the students through assignments and semester tests. Towards the end of the session, there will be a written examination.

*MAT-DSC5 (MAJ/MIN)-501: LINEAR ALGEBRA

Credits = 4
Teaching hours = 6 hrs / week including tutorials / practicals etc. in a semester of 15 weeks.
Exam Time: 3 hours
Max. Marks: 100 (External: 80 + Internal Assessment: 20)

Note:

1. The syllabus has been split into Four Units. The examiner will set in total nine questions including a compulsory question. The compulsory question (QuestionNo.1) will contain 4 parts covering the entire syllabus. Two questions will be set from each Unit.
2. A student will be required to attempt five questions in all, selecting one question from each Unit and the compulsory question. Each question will carry equal marks.
3. The 20 marks of internal assessment has following division

   Mid Semester Exam = 10 marks,
   Assignment / Project work = 5 marks,
   Classroom participation = 3 marks**,**
   Attendance = 2 marks for more than 85% and 1 mark for more than 75% attendance.

Objective. This syllabus aims to introduce students to the foundational concepts and structures of linear algebra, with a focus on vector spaces, linear transformations, matrices, and inner product spaces. The course is designed to equip students with the theoretical understanding and practical skills necessary to apply these concepts in various mathematical fields.

Learning Outcomes:

1. Understand and apply the concepts of vector spaces, subspaces, and their properties, including basis, dimension, and direct sums.
2. Analyze and solve problems related to linear transformations, including the use of the Rank-Nullity theorem and invertible transformations.
3. Use matrix representations to solve problems involving linear transformations, characteristic roots, and change of basis.
4. Apply advanced techniques like the Cayley-Hamilton theorem, orthogonal projections, and the Gram-Schmidt process to diagonalize matrices and work with inner product spaces.

Unit-I

Definition of a Group, Ring, Field and examples. Definition and Examples of Vector Spaces, Subspaces, Algebra of subspaces, Linear span, Linear dependence and independence of vectors, Basis and dimension of a vector space and its subspaces. Direct sums and complements.

Unit-II

Linear transformations, kernel and range of linear transformation Rank and Nullity of a linear transformation, Rank-Nullity theorem, invariant sub space, Vector space of linear transformations, invertible linear transformations.

Unit-III

Linear transformations and matrices, Matrix representation of a linear transformation relative to an ordered basis. Matrix of an inverse operator, Change of basis. Characteristic roots and characteristic vectors, Algebraic and Geometric multiplicity of characteristic roots.

Unit-IV

Cayley-Hamilton theorem, Diagonalizable operators and matrices. Minimal polynomial of a linear operator (matrix). Inner product and inner product spaces, Orthogonal sets, Orthogonal projections, The Gram Schmidt process.

* MAT-DSC5 (MAJ)-502: SEQUENCE AND SERIES OF REAL NUMBERS

Credits = 4
Teaching hours = 6 hrs / week including tutorials /practicals etc. in a semester of 15 weeks.
Exam Time: 3 hours
Max. Marks: 100 (External: 80 + Internal Assessment: 20)

Note:

1. The syllabus has been split into Four Units. The examiner will set in total nine questions including a compulsory question. The compulsory question (QuestionNo.1) will contain 4 parts covering the entire syllabus. Two questions will be set from each Unit.

   Assignment / Project work = 5 marks,
   Classroom participation = 3 marks**,**
   Attendance = 2 marks for more than 85% and 1 mark for more than 75% attendance.

Objective: The objective of this course is to develop a comprehensive understanding of sequences and series, emphasizing their convergence properties and criteria. Students will learn to analyze and test the convergence of sequences and series using various methods, including Cauchy's Criterion, Condensation Test, Integral Test, and Root Test etc. The course will also cover practical applications of convergence, preparing students for advanced mathematical studies and research.

Learning Outcomes: By the end of this course, students will be able to:

1. Understand the fundamental properties of Sequences and Series
2. Analyze convergence of sequences and series by using established tests including Cauchy's Condensation Test, Integral Test, and Root Test, to determine the behavior of series.
3. Develop skills for advanced mathematical proofs and Problem-Solving

Unit-I

Definition of a real sequence, Bounds of a sequence, Convergent, Divergent and Oscillatory sequences. Limit of a sequence, Algebra of limits, sandwich theorem or squeeze principal, application of squeeze principal, Monotonic Sequences, Theorems on monotonic sequences, applications of monotonic sequence in numerical questions, Cauchy's theorems on limits. Cauchy's first theorem on limits, Cauchy's seconds theorem on limits. Application of Cauchy's theorems on limits.

Unit-II

Subsequences of a real sequence, subsequential limit (cluster point), peak point, Bolzano-Weierstrass Theorem, Cauchy's sequence, Cauchy's general principal of convergence. Application of Cauchy's sequence in numerical questions of real sequences.
Sequential continuity and uniform continuity of functions of single real variable. Numerical questions related to sequential continuity and uniform continuity of function.

* For students who follow either template-1 or opted mathematics as a major subject in template-2.

Unit-III

Infinite Series, convergence of series, convergence of geometric series, Series of non-negative terms. Convergences of series of non-negative terms, P-Test. Comparison tests, Cauchy's Condensation test, Cauchy's Integral test, Cauchy's Root test.

Unit-IV

Ratio tests: Kummer's Test, D'Alembert's test, Raabe's test, De Morgan and Bertrand's test, Gauss Test, Logarithmic test. Alternating series. Leibnitz's theorem. Absolute and conditional convergence, Rearrangement of absolutely convergent series, Riemann's rearrangement theorem.

   Assignment / Project work = 5 marks,
   Classroom participation = 3 marks**,**
   Attendance = 2 marks for more than 85% and 1 mark for more than 75% attendance.

Objective. The objective of this course is to introduce students to special types of differential equations, particularly Bessel and Legendre equations, and solving these using power series methods. The course will explore the properties of these solutions, such as recurrence relations and orthogonality. Additionally, students will learn partial differential equations. An important technique of solving differential equations by using Laplace and Inverse Laplace transformations will be discussed.

Learning Outcomes: By the end of this course, students will be able to:

1. Identify and solve Bessel and Legendre differential equations using power series methods.
2. Analyze the properties of Bessel and Legendre functions, including recurrence relations and orthogonality.
3. Understand the formulation and solution of partial differential equations.
4. Apply Laplace and Inverse Laplace transformations to solve ordinary differential equations.

Unit-I

Series solution of differential equations, Power Series and Frobenius method, Bessel and Legendre equations. Bessel functions of First and Second kind. Legendre function. Generating function. Equation reducible to Bessel's equation and its solution.

Unit-II

Recurrence relation and orthogonality of Bessel and Legendre function. Partial Differential Equations: Origin of first order Partial Differential Equations, Linear Equation of first order, Integral surfaces passing through a given curve, surfaces orthogonal to a given system of surfaces.

* Only for those students who have opted mathematics as major subject in table-1.

Unit-III

Laplace Transformation-Linearity of the Laplace transformation. Existence theorem for Laplace transformations, Shifting Theorems, Laplace transforms of derivatives and integrals, Multiplication of t^n, division by t.

Unit-IV

Inverse Laplace Transforms-Linearity property, shifting properties, Change of Scale Property.
Inverse Laplace transforms of derivatives and integrals, Convolution theorem. (without proof)
Applications of Laplace Transforms- solution of integral equation, Solution of differential equations with constant coefficients, Solution of differential equations with variable coefficients,

   Assignment / Project work = 5 marks,
   Classroom participation = 3 marks**,**
   Attendance = 2 marks for more than 85% and 1 mark for more than 75% attendance.

Objective: The main goal of this course is to deliver basics of the solid geometry. The course introduces the concepts of plane, sphere, cone and cylinder. Methods will be taught to write various kinds of equations of these objects embedded in multiple ways in the 3-dimensional space.

Learning Outcomes:

The students will be able to write equations of plane, sphere, cone, cylinder and conicoids. Students will learn various properties of these objects, their tangents and normals.

Unit-I

Sphere: Section of a sphere and a plane, spheres through a given circle, intersection of a line and a sphere, tangent line, tangent plane, angle of intersection of two spheres and condition of orthogonality, power of a point w.r.t. a sphere, radical axis, radical center, co-axial family of spheres, limiting points.

Unit-II

Transformation of axes: Shifting of origin and rotation of axes.
Cylinder: Cylinder as a surface generated by a line moving parallel to a fixed line and through a fixed curve, different kinds of cylinders such as right circular, elliptic, parabolic and hyperbolic cylinders in standard forms, enveloping cylinders.

Unit-III

Cone: Cone with a vertex at the origin as the graph of a homogeneous equation of second degree in x,y,z, cone as a surface generated by a line passing through a fixed curve and a fixed point outside the plane of the curve, Reciprocal cones, elliptic cones, , enveloping cones.

Unit-IV

* Only for those students who have opted mathematics as major subject in table-1.

Right circular cones, right circular cone as a surface of revolution obtained by rotating the curve in a plane about an axis.
Conicoid: Equations of ellipsoid, hyperboloid and paraboloid in standard form. Reduction of second degree equation inthree variables in standard form.

Objective: The objective of this course is to provide students with a fundamental understanding of forces, their effects on bodies at rest, and the conditions required for equilibrium. Key topics include the Parallelogram Law, the Triangle Law, Lami's Theorem, and Varignon's Theorem, along with the study of moments, couples, and friction.

Learning Outcomes: Upon completion of this course, students will be able to:

1. Apply fundamental laws, such as the Parallelogram and Triangle Laws, to resolve and combine forces acting on a body.
2. Determine the resultant and equilibrium conditions for coplanar forces, including concurrent and non-concurrent force systems.
3. Analyze moments, couples, and use Varignon's Theorem to simplify complex force systems.

Unit-I

Basic notions. Composition and resolution of concurrent forces–Parallelogram law of forces, Components of a force in given directions, Resolved parts of a force, Parallel Forces, resultant of two like (unlike) parallel forces acting at distinct points and its applications.

Unit-II

Resultant of any number of coplanar concurrent forces, Equilibrium conditions for coplanar concurrent forces, equilibrium of a body resting on a smooth inclined plane. Equilibrium of three forces acting at a point – Triangle law of forces, converse of Triangle law of Forces, $\lambda - \mu$ theorem, Lami's theorem.

* Only for those students who have opted mathematics as major subject in table-1.

Unit-III

Moments and Couples – Moment of a force about a point and a line, Centre of Parallel forces, theorems on moment of a couple, Equivalent couples, Varignon's theorem, generalized theorem of moments, resultant of a force and a couple, resolution of a force into a force and a couple, reduction of a system of coplanar forces to a force and a couple.

Unit-IV

Equilibrium conditions for any number of coplanar non-concurrent forces. Friction; definition and nature of friction, laws of friction, equilibrium of a particle on a rough plane, Problems on ladders, rods, spheres and circles.

   Attendance = 2 marks for more than 85% and 1 mark for more than 75% attendance.

Objective:The main goal of this course is to deliver basics of plane geometry. The course introduces the concept of pair of straight lines, circles, conic sections, sphere, cone and cylinder. Methods will be taught to write equations of these objects whenever requisite information is given.

Learning Outcomes: Students will be able to write joint equation of a pair of straight lines, equations of circle and other conics, equations of tangents, normal and chord of contact in case of circle and other conics. Equations and various properties of sphere, cone, cylinder and their tangents and normal will be learnt.

.

Unit-I

Change of axes: Translation and rotation of axes.
Pair of Straight lines : Equation of a straight line in polar coordinates, Joint equation of pair of straight lines (Cartesian coordinates), angle between them, Condition of parallelism and perpendicularity.

Circle: General equation of circle, parametric equations, tangents, normals, chord of contact, pair of tangents from a point, equation of chord in terms of mid-point.
Scope. Chapters 3, 4 and 5 of [1].

Unit-II

Conic sections : Equations of parabola, ellipse and hyperbola in Cartesian coordinate system, parametric forms of conics, equations of their tangents, normal, chords of contact, pole and polar, tangents from a point, equation of chord in terms of mid-point, some important results and properties of conics (e.g. see [1]).
Scope. Chapters 7, 8 and 9 of [1].

Unit-III

More on conic section. Polar equation of conic, diameter and conjugate diameters of the conics. Special properties of Parabola, Hyperbola and Ellipse. Conjugate hyperbola, asymptotes to the hyperbola, rectangular hyperbola. Identification of conic in general second degree equations.

Unit-IV

Sphere, Cone, Cylinder. Sphere and its intersections with plane. Polar plane, radical plane, intersection of two spheres. Equation of a cone, intersections of cone with a plane. Enveloping cone, right circular cone. Equation of a cylinder, Enveloping cylinder, right circular cylinder.
Scope. Chapters 15, 16 and 17 of [1].

Teaching hours = 6 hrs / week including tutorials / practicals etc. in a semester of 15 weeks.
Exam Time: 3 hours
Max. Marks: 100 (External: 80 + Internal Assessment: 20)

Note:

1. The syllabus has been split into Four Units. The examiner will set in total nine questions including a compulsory question. The compulsory question (QuestionNo.1) will contain 4 parts covering the entire syllabus. Two questions will be set from each Unit.
2. A student will be required to attempt five questions in all, selecting one question from each Unit and the compulsory question. Each question will carry equal marks.
3. The 20 marks of internal assessment has following division

   Mid Semester Exam = 10 marks,
   Assignment / Project work = 5 marks,
   Classroom participation = 3 marks**,**
   Attendance = 2 marks for more than 85% and 1 mark for more than 75% attendance.

Objective: The objective of this course is to provide students with a solid foundation in advancedcalculus, focusing on multivariable functions, special functions, integration, and vector calculus. Students will explore key theorems, including Euler's theorem on homogeneous functions, Taylor's theorem for multivariable functions, and the Mean Value Theorems of integral calculus. They will also study improper integrals, convergence tests, and special functions such as Beta and Gamma functions. The course further covers vector differentiation, equipping students with analytical skills applicable to physics, engineering, and advanced mathematics.

Learning Outcomes: Upon successful completion of this course, students will be able to:

1. Apply Euler's and Taylor's theorems to solve mathematical problems.
2. Differentiate between countable and uncountable sets.
3. Determine integrability conditions for functions and apply the fundamental theorem of calculus, mean value theorems, and change of variables in integral calculations.
4. Evaluate improper integrals and analyze their convergence using comparison, Abel's, and Dirichlet's tests.
5. Calculate gradients, divergence, and curl, and apply these concepts in solving problems in vector calculus.

Unit-I

Maxima and minima of functions of two variables, Taylor's theorem for functions of two and three variables. Jacobians. Envelopes. Evolutes. Countable and uncountable sets.

* Not for students who opted mathematics as a minor subject in table-II.

Unit-II

Riemann integral, Integrability of continuous and monotonic functions, Integrability of a function having finite points of discontinuity, Properties of integrable functions. The fundamental theorem of integral calculus, change of variables, Mean value theorems of integral calculus (First Mean Value Theorem, Generalised first Mean Value Theorem , Bonet's Mean value Theorem, Weierstrass' Mean Value Theorem).

Unit-III

Improper integrals and their convergence, Comparison tests, Absolute and conditional convergence, Abel's and Dirichlet's tests. Beta and Gamma functions.

Unit-IV

Frullani's integral, convergences Integral as a function of a parameter. Continuity, derivability and integrability of an integral of a function of a parameter. Vector differentiation, Gradient, Divergence and Curl with their properties and applications.

Objective: This course is application oriented which introduces the concepts of linear programming to the students.

Course outcomes: After the completion of the course, the students will be able to formulate and solve linear programming problems.

UNIT-I

Introduction –General Linear programming problem (LPP) and examples, Formulation of LPP, Standard and canonical form of LPP, Convex set and its properties, Hyperplane, Open and Closed half-spaces, Feasible, Basic Feasible and Optimal Solutions, Extreme Point & graphical methods (Chapter-2, Reference [3])

UNIT-II

Simplex method, Artificial variable techniques- Two Phase Method; Big M Method, Special cases in LPP.
Finding Inverse of a matrix using Simplex method, Solving system of linear equations using Simplex method. (Chapter-3, Reference [3])

UNIT-III

Sensitivity analysis- removal of constraint, change in cost of basic or non-basic variable. Duality: Definition of the dual problem, Primal-dual relationships, Economic Interpretation of Duality, Dual simplex Method. (Chapter-4, Reference [3])

UNIT-IV

LP Formulation of Transportation Problem, Existence of Solution in Transportation Problem.
Assignment Problem, Mathematical Formulation of the Problem Test for Optimality by using Hungarian Method – Maximization Case in Assignment Problem

   Attendance = 2 marks for more than 85% and 1 mark for more than 75% attendance.

Objective: The objective of this course is to introduce some useful topics, to the students, of probability theory, which will be helpful in solving problems in other areas of mathematics as well as in daily life. Continuous as well as discrete random variables will be studied at length. Many illustrations will be given to convince their applications in mathematics as well as in other areas.

Learning Outcomes: By the end of this course, students will be able to:

1. Compute mean, variance, moment generating functions.
2. Apply Bayes' theorem in computing probabilities.
3. Use random variable in computing probability.

Unit-I

Review of notion of Probability, conditional Probability and independence, Bayes' Theorem. Random variables, probability density function, cumulative distribution function, discrete and continuous random variables, expectations, mean, variance, moment generating function, skewness and kurtosis.

Unit-II

Discrete Random Variables: Bernoulli random variable, binomial random variable, negative binomial random variable, geometric random variable, Poisson random variable.

Unit-III

Continuous Random Variables: Uniform random variable, exponential random variable, Beta random variable, Gamma random variable, Chi-square random variable, normal random variable.

Unit-IV

Bivariate Random Variables: Joint distribution, joint and conditional distributions, Conditional Expectations, Independent random variables, the correlation coefficient, Bivariate normal distribution.

Objective: The objective of teaching Dynamics is to provide students with an understanding of the fundamental principles governing the motion of particles and rigid bodies. This includes studying linear and curvilinear motion, analyzing forces, and understanding energy transformations in dynamic systems. Key concepts include Newton's Laws of Motion, work-energy principles, impulse-momentum relationships, etc.

Learning Outcomes: By the end of this course, students will be able to:

1. Apply Newton's laws to solve problems involving motion with constant or variable acceleration.
2. Analyze simple harmonic motion and motion of particles connected by elastic strings.
3. Understand and calculate work, power, and potential energy, and evaluate work done in gravitational fields and conservative systems.
4. Analyze relative motion, including displacement, velocity, and acceleration in rotating reference frames.

Unit-I

Motion of a particle with constant acceleration, acceleration of falling bodies, motion under gravity, motion of a body projected vertically up wards: Newton's Laws of Motion, Motion of two particles connected by a string, motion along a smooth inclined plane.

Unit-II

Constrained motion along a smooth inclined plane. Variable acceleration: Simple harmonic motion, elastic string.

Unit-III

Curvilinear motion of a particle in a plane: Definition of velocity and acceleration, projectiles, motion in a circle. Work, power, conservative fields and the potential energy, work done against gravity, potential energy of a gravitational field.

*For students who have opted mathematics as a major subject in table-1.

Unit-IV

Relative motion, relative displacement, velocity and acceleration, motion relative to a rotating frame of reference. Linear momentum, angular momentum, conservation of angular momentum, impulsive forces, principle of impulse and momentum, motion with respect to centre of mass of a system of particles, collisions of elastic bodies, loss of energy during impact.

Objective: The objective of this course is to introduce some foundational concepts from group theory and ring theory which include definitions of groups, subgroups, cosets, homomorphisms, class equation, rings, integral domains, ideals, quotient rings, and polynomial rings etc. Some important theorems will also be introduced. The application of these topics in other fields of mathematics will also be discussed.

.

Learning Outcomes: By the end of this course, students will be able to:

1. Apply algebraic concepts in advanced mathematical contexts and related fields.
2. Analyze and construct homomorphisms and isomorphisms in group and ring theory,
3. Differentiate between rings, integral domains, and division rings, and work with ideals, quotient rings, and polynomial rings.

Unit-I

Groups, Elementary Properties of Groups, order of element of a group, cyclic group, Subgroups, Cosets and Lagrange's Theorem, Normal subgroups, Normalizer of of element in Group, Centre of group and Quotient Groups.

Unit-II

Group Homomorphism and Isomorphism, Theorems on Homomorphism, Permutation Groups, Caley's Theorem, cyclic Permutation, even and odd permutation, disjoint permutation, Alternating groups, Simplicity of An, $n \geq 5$ (without proof). Conjugate elements, conjugate class, Class equation of finite group and its applications. Similar permutation, relation between similar and conjugate permutation, number of conjugate class of Sn is partition of n

*For students who have opted mathematics as a major subject in table-1.

Unit-III

Rings, Integral domains, unit element, Division Ring, some general properties of Rings, Characteristic of a ring, idempotent and nilpotent elements. Subrings, properties of sub ring, Centre of a ring , Ideals, properties of Ideals, principal Ideals, Product of Ideals, Modular Law.

Unit-IV

Prime and Maximal Ideals, Quotient Rings, Ring Homomorphisms, Types of Ring Homomorphism , Theorems on Ring Homomorphism, Polynomial rings, Division algorithm in ring of polynomials, Roots of polynomials, remainder Theorem

SEMESTER-V

HINDUSTANI CLASSICAL MUSIC - TABLA
(Discipline Specific)
MAJOR A - 6

GENERAL INSTRUCTIONS:-

1. In case of the private candidates, there will be no internal assessment and the marks obtained in theexternal assessment of the practical examination shall be proportionately increased.
2. There would be up to 10 students in one section in practical class.
3. **There should not be more than 10 students in a batch for practical examination.**
4. Harmonium can be used while singing Alankars.
5. In all, *nine* questions will be set. The question paper will be divided into five Units. Four Units willcontain two questions each and the candidates are required to attempt four questions selecting atleast one question from each Unit. **The ninth question of unit V is compulsory & it consists of 13short answer questions (covering entire syllabus i.e. theory and practical) out of whichstudents have to attempt 09 questions of 01 marks each.**
6. In Instrumental Music, the candidates have the option to take any one of the following instruments:Sitar, Sarangi, Veena, Sarod, Dilruba, Violin, Guitar, Bansuri, Shahnai, Santoor.
7. **While sending the syllabus to paper-setter in theory, the syllabus prescribed for the practicalpaper should also be sent.**
8. The candidate can take vocal music or Tabla along with instrumental music.
9. The candidate can take instrumental music or Tabla along with vocal music.

THEORY (3 hours duration) : 45 Marks , Credits 02

PRACTICAL (Duration 20 minutes) **:** 45 Marks, Credits 02

(i) Viva : 35 marks
(ii) Gayan : 05 marks
(iii) Tabla : 05 marks

Internal Assessment (Theory + Practical) (05 +05) : 10 Marks
Total : 100 Marks (4 Credits)

(Duration 45 minutes, 02 Theory periods per week)

THEORY

Unit-I

1. Historical Development of Percussion Instruments.
2. Evolution of Taal.

Unit-II

1. The Life Sketches and Contributions Towards Music of the Following Tabla Exponents:MianQadarBaksh, Ustad Ahmed Jan Thirkava, Baba Malang Khan.
2. Knowledge of Rhythmic Instruments of Punjabi Folk.

Unit-III

1. Notation of the Following Material:
   (a) SwariTaal: Uthaan, Peshkar with Badhat, Qaida with Paltas, Tukra, Paran and Rela.
   (b) DhamaarTaal: Uthaan, Mukhra, Tukda, Paran, ChakardarParan, FarmaishiParan.
2. Notation of Swari and DhamaarTaal with their Dugun, Tigun, Chaugun, and ArhLayakaries.

Unit-IV

1. Recognition of the Following Taals Through Some Bols Asked by the Paper Setter: EkTaal, Chautaal, Deepchandi, Dhamaar, SwariTaal.
2. Composition of Rela, Qaida, Peshkar, and Paran Based on the Bols Set by the Paper Setter.

Unit-V

The ninth question of Unit V is compulsory, consisting of 13 short-answer questions (covering the entire syllabus, both theory and practical). Students must attempt 09 questions of 01 mark each.

MAJOR- B 6

Stage Performance and Viva- Voce (60 Hours)

Practical -

1. Taals Prescribed: SwariTaal and Dhamar Taal.
   (a) SwariTaal: Uthaan, Peshkar, Qaida - Palta, Tukra, Paran, and Rela.
   (b) DhamarTaal: Uthaan, Mukhra, Tukda, Paran, ChakardarParan, FarmaishiParan.
2. Knowledge of Accompaniment of Tabla with Vocal and Instrumental Music.
3. Practice of Playing Nagma on Harmonium in Prescribed Taals.
4. Ekgun, Dugun, and ChaugunLayakaries of the Prescribed Taal through Padhant, Showing Khali.
5. Tuning of Tabla.

THEORY

Unit-I

1. Historical development of Gharanas of Tabla playing and their salient features.
2. Elemantry knowledge of staff notation system.

Unit-II

1. Brief knowledge of Dhrupad, Khyal,Thumri,Bhajan, Gazal and Kawali and also the Taals used to accompany these styles.
2. Principles of Solo and Tabla accompaniment .

Unit-III

1. Notation of the following:
   (a) PanchamSwari and FarodastTaal :Uthaan, Peshkar, Qaida-Palta, Tukra,Farmaishi Paran and Rela.
   (b) Ability of writing different Layakaries in notation system Aad,Kuaad and Biaad.
2. Write the Notation of Teevra and RoopakTaal in Tigun and Chougun within one Avartan .

Unit-IV

1. Composition of Rela, Qaida andParan based on the Bols set by the paper setter.
2. Recognition of Taals through some Bols asked by the paper setter.

Unit-V

- The ninth question of Unit V is compulsory. It consists of 13 short-answer questions (covering the entire syllabus, both theory and practical), out of which students have to attempt 9 questions of 1 mark each.

MAJOR B- 7

Practical - Stage Performance and Viva-Voce (60 hours)

1. Prescribed Taals :PanchamSwariTaal , FarodastTaal and TeevraTaal :
   (a) PanchamSwariTaal and FarodastTaal :Uthaan, Peshkar, Qaida-Palta, Tukra,Farmaishi Paran and Rela
   (b) DeepchandiTaal and Ektaal :VilambitTheka in 1/4 Layakari.
   (c) TeevraTaal :Paran, ChakradarParan, FarmayashiParan and Gat.
2. Tuning of Tabla.
3. Ekgun, Dugun, and ChaugunLayakaries of the prescribed Taals through Padhant, demonstratingTali and Khali.
4. Practice of playing Nagma on the Harmonium in the prescribed Taals.

Unit - I

1. Defination and explain the following terms :
   Qaida ,Tihai , Paran, Duppali.
2. Method of TIhaiComposition .

Unit - II

1. Brief introduction of Khyal and TaranaGyanShallies..
2. Study of Dhol and Pakhawaj.

Unit - III

1. Life sketch and contribution of the following:
   a) UstadZakirHussain.
   b) Pt.AnokheLal Mishra
2. Merits and Demerits of TablaVadak.

Unit – IV

1. Notation of the following:
   i) **Ada Chautaal:**Peshkar , Qaida with Paltas and Tehai, Tukda, DamdaarTehai
   ii) Laggis in **Roopak** and **Dadra Taals**
2. Notation of TaalsRoopak ,Tivra and JhapTaal with their Dugun and ChaugunLayakaries.

THEORY

Unit-I

1. Study of Laya and Taal in Music.
2. Importance of Tabla in Music.

Unit-II

1. Comparative study between the Uttari and DakshiniTaal systems and the ability to write UttariTaals (prescribed in the syllabus) in the DakshiniTaal system.
2. Principles of Tabla accompaniment with Dance.

Unit-III

1. Notation of the following:
   (a) BasantTaal and FarodastTaal:Uthaan, Peshkar, Qaida-Palta, Tukra,FarmaishiParan and Rela.
   (b) JhumraTaal: VilambitTheka in 1/4 Layakari.
2. Notation of Tilwada and TappaTaal with their Dugun, Tigun, Chaugun, and ArhLayakaries.

Total Credits: 4 (Theory: 3 lectures + Tutorial: 1 lecture)

Max. Marks : 100
Theory : 90 marks
Int. Ass. : 10 marks
Time : 3 Hours

Course Objective

The course has been designed to impart knowledge to the students on the law governing the 'prevention and detection of crime' i.e. Code of Criminal Procedure 1973, as without the adequate knowledge of this law, an academic course on police administration would be insufficient, incomplete and inadequate.

Learning Outcomes

This paper has been designed to impart knowledge to the students with respect to the different sections of Code of Criminal Procedure 1973 relating to trial of offences, arrest of persons, summons and warrants, maintenance of public order and tranquility, preventive actions of police, powers of police in investigation and initiations of criminal procedures. The knowledge of these sections would enable the students to understand the procedures involved in police functioning and inculcate critical thinking to apply the sections in real-life situations.

POL-DSC-11(MAJ)-503: Major or Discipline-Specific Core
POL-DSC-11: International Relations: Theories and Practices

Total Credits: 4 credits (Theory: 45 hrs. + Tutorial: 15 hrs.)

Max.Marks	**:**	**100 marks**
Theory	**:**	**90 marks**
Int. Ass.	**:**	**10 marks**
Time	**:**	**3 hours**
Level of Course	**:**	**300**

Course Objectives: The course aims to develop thestudents' understanding and perspective on international relations from the basics to the intermediate level. It explains various emerging approaches and theories reflecting on how and why nations engage with one another on issues of domestic and international significance.

Learning Outcomes: This course enables students to build on the previously taught basic concepts through their introduction to the intermediate level in understanding international relations. This course is designed to incorporate the relatively recent theoretical and conceptual interventions in international relations that build on the previously taught basic concepts and classical theoretical frameworks. The course also enables students to explore international governance institutions and issues.

Pedagogy of the Course: Classroom discussions, key readings' analysis, debates and live examples will be utilised as pedagogical tools. Students will be assessed based on a written examination of 80 marks and continuous internal assessment of 20 marks, including unit tests, snap tests, attendance, class assignments, and classroom participation.

Instructions for Paper Setter and Candidates:

I. Question 1 shall be a compulsory question containing 12 short-answer type questions from the entire syllabus. Students shall attempt any 10 parts in about 25-30 words each. Each part shall carry 2 marks (Total 10 x 2 = 20 marks). 2. A total of eight long questions will be set from the entire syllabus, at least two from each unit. Candidates will attempt four questions, selecting one from each unit. Each question will carry 15 marks (Total 4 x 15 = 60 marks). These are in addition to the compulsory question at serial number 1. 3. Internal assessment may include written assignments, snap tests, participation in class discussions, term papers, attendance, etc. 4.

II. For reappear/improvement candidates who were not assessed earlier for internal assessment, the marks secured in the theory paper will be increased proportionally to the maximum marks of the paper in lieu of internal assessment. The paper setter must include a note (4) in the question paper.

Studying the course would enable the students to study the political, economic and social issues which are part of the ongoing debates and discussions in contemporary India. Students would come to be acquainted with different political perspectives and ideological positions that inform these discussions and debates. And, in the process, they would be able to make sense of the way democracy as an institution works on the ground in India.

Teaching/Learning Methods : Learning methods include classroom lectures and student-teacher interactions, students doing mandated assignments and also making presentations in the classroom on the themes.

Learning Outcomes:

- Understanding of the major themes in contemporary Indian politics and economy.
- Understanding and contextualising the ongoing academic debates veering around the themes/issues which concern contemporary India's society, economy, and politics.

POL-DSC-18(MAJ)-605: Major or Discipline-Specific Core
POL-DSC-18: Major Themes in International Relations

Total Credits: 4 credits (Theory: 45 hrs. + Tutorial: 15 hrs.)

Max.Marks	**:**	**100 marks**
Theory	**:**	**90 marks**
Int. Ass.	**:**	**10 marks**
Time	**:**	**3 hours**
Level of Course	**:**	**300**

Course Objectives: The course aims to enhance thestudents' understanding and perspective on international relations from intermediate to advanced levels. It puts various emerging approaches and theories into perspective by exposing the students to major themes in current international relations.

Course Learning Outcomes: This course enables students to build on the previously taught basicand intermediate concepts through their introduction to advanced-level understanding of major themes in international relations. Expected learning outcomes from the course are:

1. Critically examine the emerging perspectives in conflict and security in International Relations.
2. Analyse the International environmental regimes and governance.
3. Debate different development and economic models.
4. Develop an understanding of the humanitarian interventions, related debates, and the intersection of migration, refugees, and human rights.

Pedagogy of the Course: Classroom discussions, key readings' analysis, debates, and live examples will be utilised as pedagogical tools. Students will be assessed based on a written examination of 80 marks and a continuous internal assessment of 20 marks, including unit tests, snap tests, attendance, class assignments, and classroom participation.

Instructions for Paper Setter and Candidates:

I. Question 1 shall be a compulsory question containing 12 short-answer type questions from the entire syllabus. Students shall attempt any 10 parts in about 25-30 words each. Each part shall carry 2 marks (Total 10 x 2 = 20 marks). 2. A total of eight long questions will be set from the entire syllabus, at least two from each unit. Candidates will attempt four questions, selecting one from each unit. Each question will carry 15 marks (Total 4 x 15 = 60 marks). These are in addition to the compulsory question at serial number 1. 3. Internal assessment may include written assignments, snap tests, participation in class discussions, term papers, attendance, etc. 4.

II. For reappear/improvement candidates who were not assessed earlier for internal assessment, the marks secured in the theory paper will be increased proportionally to the maximum marks of the paper in lieu of internal assessment. The paper setter must include a note (4) in the question paper.

The students successfully securing 144 credits will be awarded B.A. Degree					

Notes:

1. In the first semester student is offered three different subjects A, B & C.
2. At the end of second semester each student has the option to choose any one of the two streams namely Single Major or Multi-Disciplinary. The student choosing Single Major stream is required to give his/her Major and Minor at the end of the second semester.
3. The student who chooses multi-disciplinary stream will continue with the three subjects and complete his/her three-year degree by securing 36 credits each in the chosen two subjects as Major and 24 credits in Minor subject.
4. A student who secures 75% or more marks in aggregate till semester 6 (up to 3-year degree) shall be eligible for 4 YEAR DEGREE B.A. HONOURS with research, on the condition that the Institution is a PU approved Research Centre
5. The student opting for Single Major must secure 50% credits of the total credits in the Major subject and obtain 24 credits from the Minor subject(s). To qualify for Minor in a particular subject, the student must attain at least 12 credits in that subject(s).
6. The student exiting the programme after one year securing 48 credits will be awarded UG Certificate provided he/she secures 4 credits from summer internship/community work. Further, the student exiting the programme after two years securing 96 credits will be awarded UG Diploma provided he/she secure 4 credits from summer internship. The student successfully securing 144 credits will be awarded BA degree.
7. Language paper chosen as MIL-1 and MIL-2 should be in the same subject.
8. Once Major and Minor papers are chosen in 3rd semester, the same will continue as Major and Minor subject in the subsequent semesters.
9. The candidate opting for Honours in research is required to study a paper of Research Methodology (RM) of 04 credits and write Dissertation of 08 credits in one of the two Major subjects.

Development Administration
(Offered as Minor)

Max. Marks	**: 100**
Theory	**: 90 Marks**
Internal Assessment	**: 10 Marks**
Time	**: 03 Hours**

Course Objective

The objective of this paper is to familiarize students with the concept, evolution, and significance of development administration and its role in achieving sustainable development. It explores the machinery for planning, public enterprise reforms, and the role of various stakeholders, including bureaucracy, civil society, and the voluntary sector, with a special emphasis on gender and people's participation in development.

Learning outcomes

1. Understand what development administration means, why it is important, and how it has changed over time. Build critical ability by comparing the features of developed and developing countries.
2. Learn how government planning works at the central, state, and district levels. Improve decision-making skills by studying the role of NITI Aayog and how the United Nations supports global goals like the Sustainable Development Goals.
3. Know how public sector companies are formed and managed in India. Use creativity to explore different ways they are being improved through reforms.
4. Analyze how government officers, social groups, and voluntary organizations help in development. Understand how gender equality and people's involvement make development more effective.

Pedagogy of the Course

The students will be assessed on the basis of written examination comprising of 90 marks and continuous internal assessment of 10 marks, based on class test, academic activities, Attendance, Class assignments and class room participation.

INSTRUCTIONS FOR PAPER-SETTERS AND CANDIDATES:

- For Private/University School of Open Learning (USOL) students, who have not been assessed earlier for the internal assessment, the marks secured by them in the paper will proportionately be increased in lieu of the internal assessment.

  The Paper-Setter must put a note in question paper in this regard.
- The candidate shall attempt 5 questions in all (one compulsory and one each from four units). The first compulsory question shall comprise of 12 short-answer type questions, covering the whole syllabus, to be answered in 25-30 words each, out of which the candidate would be required to attempt any 9. Each question will carry 2 marks. Rest of the paper shall contain 4 units, each unit having two questions, out of which the candidate would be required to attempt one. Each question will carry 18 marks.

Public Policy and Governance

Max. Marks	**: 100**
Theory	**: 90 Marks**
Internal Assessment	**: 10 Marks**
Time	**: 03 Hours**

Course Objective

The objective of this paper is to provide students with an in-depth understanding of public policy, its formulation, implementation, and evaluation. It covers key models, processes, and actors involved in policymaking while examining the role of institutions, interest groups, and societal values in shaping and assessing policies.

Learning outcomes

1. Understand what public policy is, why it matters, and the different types and models used to study it. Build critical ability by comparing ideas like systems theory and group dynamics in policymaking.
2. Learn how policies are made by different institutions like the legislature, executive, and judiciary. Improve decision-making by exploring how media, public values, and interest groups shape policies.
3. Know how public policies are carried out and what factors help or block their implementation. Use creativity to understand how civil services, civil society, and businesses play their roles.
4. Learn how to check whether a policy is working well or not. Gain critical thinking by studying who evaluates policies and what challenges they face in doing so.

Pedagogy of the Course

The students will be assessed on the basis of written examination comprising of 90 marks and continuous internal assessment of 10 marks, based on class test, academic activities, Attendance, Class assignments and class room participation.

Citizen Centric Administration

Max. Marks	**: 100**
Theory	**: 90 Marks**
Internal Assessment	**: 10 Marks**
Time	**: 03 Hours**

Course Objective

The objective of this paper is to acquaint students with the principles and practices of citizen-centric administration, focusing on the functions of government, citizen participation, grievance redressal mechanisms, and consumer protection. It emphasizes the significance of transparency, accountability, and engagement in governance through laws, charters, and participatory initiatives.

Learning outcomes

1. Understand what the government does in terms of rules, services, and development. Build critical ability by learning how citizen-focused administration has grown and why it matters.
2. Explore how citizens take part in governance through tools like Citizens' Charters, social audits, and platforms like MyGov. Strengthen decision-making and creativity by studying real-life participation initiatives from across India.
3. Learn about important laws like the Right to Information Act and Right to Service Act. Improve critical thinking by examining how public complaints are handled and the role of institutions like DARPG.
4. Understand why consumer protection is needed and how the Consumer Protection Act works. Learn to evaluate how consumer complaints are resolved at the national, state, and district levels.

Pedagogy of the Course

The students will be assessed on the basis of written examination comprising of 90 marks and continuous internal assessment of 10 marks, based on class test, academic activities, Attendance, Class assignments and class room participation.

Learning Objectives of the Programme

1. From the Vedic to Classical Sanskrit, an enormous corpus of texts has been composed, which act as a record of one of the longest surviving human civilisations in the world. Thus a student of Sanskrit language can take a look at ideas, systems, techniques and so forth, spanning across many millennia.
2. Despite being an ancient language, Sanskrit has not stopped adapting to the contemporary needs. New experiments are being done on various dimensions of Sanskrit, making it a very dynamic language of today's world.
3. With the recent emphasis on Indian Knowledge Systems (IKS), the study of Sanskrit is gaining more importance today. This not only is making way for renewed interest in Sanskrit learning, but is also opening up new employment and entrepreneurial opportunities in Sanskrit.
4. Sanskrit is a subject of global interest and research, where various dimensions of Sanskrit, such as social, literary, philosophical, scientific and so forth, are being studied. This calls for a more robust and dynamic participation of Indian Sanskrit scholars, hence providing them a global stage.
5. Studying Sanskrit provides an opportunity of overall development of a student. From aesthetics, poetics, philosophy to formal logic and so forth, a student of Sanskrit gets to look at the world in various ways, thinks critically and analyses keenly working towards providing solutions for contemporary problems.

The paper setter must put note (ii) in the question paper.

Course Objective
The course on ***Sociological Thought*** aims to provide students with a comprehensive understanding of the development of sociological theories and perspectives. It introduces classical thinkers like Auguste Comte, Karl Marx, Max Weber, and Emile Durkheim, helping students critically analyze society, social structures, and change. The course cultivates analytical and theoretical skills, encouraging students to relate sociological theories to contemporary social issues. It fosters a deep appreciation of how social thought evolves in response to historical, political, and cultural contexts. Overall, it equips students with the intellectual tools to engage meaningfully with complex societal phenomena.

Learning Outcomes

1. Learners will be able to explain how sociology emerged as a distinct discipline in response to major social changes like the Industrial Revolution and political revolutions in Europe. They will understand how early thinkers like Auguste Comte, Karl Marx, and Emile Durkheim laid the foundation for studying society systematically. This outcome enables students to grasp the historical and intellectual context in which sociology developed.
2. Encourages students to adopt a sociological lens to understand social issues objectively and empathetically.
3. Learning outcome fosters analytical skills to apply appropriate theoretical lenses to various social phenomena.

Course Outline:

Unit-I

Auguste Comte: Emergence of Sociology, Positivism, Laws of Three Stages, Hierarchy of Sciences,

Unit-II

Karl Marx: Dialectical Materialism; Historical Materialism, Class Conflict, Capitalism and Theory of Social Change.

Unit-III

SOCIOLOGY OF GENDER

Credits 4
Max. Marks: 100
Theory: 90 marks
Time: 3 Hours
Internal Assessment: 10 Marks
Level of Course: 300

INSTRUCTIONS FOR THE PAPER-SETTER AND THE CANDIDATES:

(i) For the written paper, the students will be required to attempt five questions in all. Question No. I will be compulsory comprising 12 short-answer type questions of 2 marks each and will cover the entire syllabus. The students are required to attempt nine short-answer type questions out of 12, i.e. 9 × 2 = 18 marks. In addition to it, Question Nos. II to IX will consist of long answer (essay type) questions, Two Questions from each

Unit with internal choice carrying 18 marks each, i.e. 4 x 18 = 72 marks. The students are required to attempt four long-answer questions.

(ii) For private candidates, who have not been assessed earlier for internal assessment, the marks secured by them in the theory paper will proportionately be increased to the maximum marks of the paper in lieu of internal assessment.
The paper setter must put note (ii) in the question paper.

Course Objective

The objective of the course is to sensitize the students regarding the basic concepts and approaches used for explaining gender. The purpose of the paper is to equip students of sociology to understand gender in all dimensions and not merely as women's issues. Note the difference in gender roles, responsibilities, rights and relations. The student will be able to explore gender dynamics, trace out the growth of feminism and analyse how gender shapes experiences and contributes to social patterns. Additionally, studying this Paper may foster critical thinking about gender related issues, promote awareness of inequalities, and encourage discussions on creating more inclusive and equitable societies. Finally, it exposes the student to specific problems and legal provisions made available to counter these problems relating to gender inequality in the Indian context.

Learning Outcomes

1. Learners will be able to define the concept of gender and identify various gender identities beyond the traditional male-female binary, appreciating gender as a social and cultural construct.
2. Learners will be able to distinguish between the terms 'sex' and 'gender', understanding their biological and sociological dimensions and their relevance in addressing gender inequalities.
3. Learners will gain knowledge of different theoretical approaches to understand gender.
4. Learners will comprehend the importance of women empowerment for achieving social justice and development, and will be able to explain key strategies for promoting women's rights and participation in various spheres of life.
