HSS-ECO-DSC4(MAJ)-302: Statistical Methods

Typology of the course: Major Discipline Specific Core

Course Code: HSS-ECO-DSC4(MAJ)-302 Statistical Methods

Level of the course: 200 level

Total Credits: 4

Maximum Marks: 100 (80 Theory + 20 Internal Assessment)

Course Duration: Total = 60 hours

Evaluation: Maximum Marks: 100 (80 Theory + 20 Internal Assessment)

• Terminal Examination: 80 Marks

• Internal Assessment: 20 Marks

• Examination Time: 3 Hours

Learning Outcomes:

- To foster problem-solving competencies by applying theoretical knowledge to real-world situations.
- To encourage independent and collaborative learning through group discussions and projects.
- To teach fundamental economic principles, analytical skills, and how to apply economic theories to real-world issues.

- To develop critical thinking, base to research, and communication skills.

Pedagogy: Written assignments, tests, presentations and class discussions will be an integral part of the teaching programme to supplement the lecture.

Instructions for the Paper Setter and Candidates:

1. Question 1 shall be a compulsory question which contains 12 short answer type questions set from the whole syllabus. The student shall attempt any 10 questions in about 25-30 words each. Each question shall carry 2 marks (10 x 2 = 20 Marks).
2. A total of 8 long questions will be set out of the whole syllabus, at least two from each unit. The candidate will attempt four questions selecting one from each unit and each question will carry 15 marks (Total 4x15=60 Marks). These will be in addition to the compulsory Question 1.
3. Internal assessment may include written assignments, snap tests, participation in discussions in the class, term papers, attendance, presentations etc.
4. For reappear/improvement candidates, who have not been assessed earlier for internal assessment, the marks secured by them in the theory paper will be increased proportionately to maximum marks of the paper in lieu of internal assessment. The paper setter must put instruction (4) in the question paper.

Course Content:

UNIT - I

Introduction: Definition and scope of statistics, concepts of statistical population and sample. Scales of measurement- nominal, ordinal, interval and ratio. Diagrammatical representation of data-1D diagrams.

UNIT -II

Measures of central tendency: Arithmetic mean, Median and Mode. Measures of dispersion: range, mean deviation, standard deviation and coefficient of variation.

UNIT -III

Correlation: simple correlation (Karl Pearson and Rank correlation), partial and multiple correlation analysis. Regression: meaning and significance, difference between correlation and regression, simple linear regression.

UNIT -IV

Index Numbers: meaning, types and tests. Probability: introduction, definition and use of addition and multiplicative theorem and conditional probability.

GEOGRAPHY

HSS-GEO-DSC3(MAJ/MIN)-301: Oceanography

(Also offered as a Minor in Semester III)

Typology of the course: Major Discipline Specific Core

Course Code: HSS-GEO-DSC3(MAJ/MIN)-301

Level of the course: 200 level

Credits: 4

Evaluation: Maximum Marks: 100 (80 Theory + 20 Internal Assessment)

• Terminal Examination: 80 Marks

• Internal Assessment: 20 Marks

• Examination Time**:** 3 Hours

Learning Outcomes:

- To foster problem-solving competencies by applying theoretical knowledge to real-world situations.

- To encourage independent and collaborative learning through group discussions and projects.
- Analyse the elements of oceans and relief and its impacts at different scales.
- Evaluate oceanic dynamics and its bearing on planet Earth and synthesize oceanic processes, resources, and their significance.

Pedagogy: Conscious efforts to be made to make the students aware of the significance of oceans to human life. The learning shall be based on creative assignments, interactive & innovative activities, discussions, and learning by doing activities.

Instructions for Paper Setter and Candidates:

1. Question 1 shall be a compulsory question which contains 12 short answer type questions set from the whole syllabus. The student shall attempt any 10 questions in about 25-30 words each. Each question shall carry 2 marks (10 x 2 = 20 Marks).

For reappear/improvement candidates, who have not been assessed earlier for internal assessment, the marks secured by them in the theory paper will be increased proportionately to maximum marks of the paper in lieu of internal assessment. The paper setter must put instruction (4) in the question paper.

Instructions for Practical Examination:

1. Each student shall prepare a practical file. They will be required to complete their practical file and get it signed from the class teacher at least 10 days before the commencement of their examination.

2. The practical examination in the form of viva-voce only shall be conducted at the respective Department of University itself. There will be no laboratory exercise at the time of examination.

3. Practical examination at the respective Department shall be conducted by one internal and one external examiner. The external examiner shall be appointed by the principal of the respective Departments in consultation with the senior most teachers of Geography in the Department of University.

4. Those students who fail in the practical examination are required to prepare a fresh practical file. However, students who failed in the theory paper only or are appearing in improvement examination, their practical marks of previous practical examination will be carried forward.

5. There will be 2 hours of teaching per week for this paper.

Course Content:

UNIT - I

Introduction to Cartography

Meaning, Nature and Scope of Cartography History of Cartography

Cartography and GIS, Future of Cartography

UNIT - II

Scale and Scale Operations

Concept of Scale and methods of its representation

Graphic scales: Plain, Comparative, Time and Diagonal. Enlargement and Reduction of Maps

UNIT - III

Knowing the Directions and Bearings

Concept of North: True, Magnetic and Grid North; Magnetic Declination

Types, Elements, and Applications of Compass; Directions; Method of Finding North Bearing: Types, Taking Bearings and its conversion, Determining Positions.

UNIT – IV

Cartographic Symbolisation and Designs

Basic Map Element: Primary and Secondary Elements Map Symbolisation: Point, Line and Area Symbols

Map Layouts Design: Lettering & Font, Colours, Features and Symbols

Practical Exercises

Construction of scales: plain, comparative, time and diagonal

Calculation of True North, Magnetic North, and magnetic declination

Bearing and its conversion, determination of positions

Methods of Finding north

Map symbolisation

Map Designing

(A total of 10 exercises covering the above-mentioned topics shall be prepared by the students)

• Examination Time: 3 Hours

Learning Outcomes:

- To foster problem-solving competencies by applying theoretical knowledge to real-world situations.
- To encourage independent and collaborative learning through group discussions and projects.
- To teach fundamental economic principles, analytical skills, and how to apply economic theories to real-world issues.
- To develop critical thinking, base to research, and communication skills.

Pedagogy: Written assignments, tests, presentations and class discussions will be an integral part of the teaching programme to supplement the lecture.

Instructions for the Paper Setter and Candidates:

1. Question 1 shall be a compulsory question which contains 12 short answer type questions set from the whole syllabus. The student shall attempt any 10 questions in about 25-30 words each. Each question shall carry 2 marks (10x2=20 Marks).
2. A total of 8 long questions will be set out of the whole syllabus, at least two from each unit. The candidate will attempt four questions selecting one from each unit and each question will carry 15 marks (Total 4x15=60 Marks). These will be in addition to the compulsory Question 1.
3. Internal assessment may include written assignments, snap tests, participation in discussions in the class, term papers, attendance, presentations etc.
4. For reappear/improvement candidates, who have not been assessed earlier for internal assessment, the marks secured by them in the theory paper will be increased proportionately to maximum marks of the paper in lieu of internal assessment. The paper setter must put instruction (4) in the question paper.

GEOGRAPHY

HSS-GEO-DSC5(MAJ/MIN)-401: Climatology

(Also offered as a Minor in Semester IV)

Typology of the course: Major Discipline Specific Core

Course Code: HSS-GEO-DSC5(MAJ/MIN)-401

Level of the course: 200 level

Credits: 4

Evaluation: Maximum Marks: 100 (60 Theory + 20 Internal Assessment + 20 Practical)

• Terminal Examination: 60 Marks

• Internal Assessment: 20 Marks + 20 Marks Practical

• Examination Time: 3 Hours

Learning Outcomes:

- To support interdisciplinary understanding by integrating knowledge from various fields of study.
- To encourage independent and collaborative learning through group discussions and projects.
- Define climate and weather elements and their distribution and analyse climate and weather processes, mechanisms, and dynamics.
- Evaluate the influence of climate and weather systems.

Pedagogy: A conscious effort shall be made to make the students aware of the significance of climate and weather systems to human life. The teaching aids such as PowerPoint slides, photographs, and documentaries shall be used. Students are to be encouraged to have active interactions with the teacher and the peer group on key concepts and practical understanding. The learning shall be based on creative assignments, interactive & innovative activities, discussions, and learning by doing activities.

Instructions for the Paper Setter and Candidates:

1. Question 1 shall be compulsory question which containing 12 short answer type questions shall be set from the whole syllabus. The student shall attempt any 10 parts in about 25-30 words each. Each part shall carry 2 marks (Total 10x2=20 marks).
2. A total of eight long questions will be set out of the whole syllabus at least two from each unit. The candidates will attempt four questions selecting one from each unit and each question will carry 10 marks (Total 4x10=40 marks). These will be in addition to the compulsory question at serial number 1.
3. Internal assessment may include written assignments, snap tests, participation in discussion in the class, term papers, attendance etc.

4. For reappear/improvement candidates(s), who have not been assessed earlier for internal assessment, the marks secured by them in theory paper will be increased proportionally to maximum marks of the paper in lieu of internal assessment. The paper setter must put note (4) in the question paper.

Instructions for Practical Examination:

1. Each student shall prepare a practical file. They will be required to complete their practical file and get it signed from the class teacher at least 10 days before the commencement of their examination.
2. The practical examination in the form of viva-voce only shall be conducted at the respective Department of University itself. There will be no laboratory exercise at the time of examination.
3. Practical examination at the respective Department shall be conducted by one internal and one external examiner. The external examiner shall be appointed by the principal of the respective Departments in consultation with the senior most teachers of Geography in the Department of University.
4. Those students who fail in the practical examination are required to prepare a fresh practical file. However, students who failed in the theory paper only or are appearing in improvement examination, their practical marks of previous practical examination will be carried forward.
5. There will be 2 hours of teaching per week for this paper.

Course Content:

UNIT - I

Introduction of Climatology

Nature and scope of climatology; elements and controls of weather and climate Earth's atmospheric composition; factors affecting atmospheric composition Structure of the atmosphere: thermal and chemical layering

UNIT - II

Solar Radiation and Mechanisms

Solar Radiation: measurement, mechanisms of heat transfer, factors affecting insolation Solar Energy and atmospheric interaction mechanisms; Albedo, Heat Budget

Horizontal and vertical distribution of insolation

UNIT - III

Atmospheric Pressure and Wind Distribution

Atmospheric Pressure: Measurement and controlling factors Vertical and horizontal distribution of atmospheric pressure Global atmospheric circulation; Seasonal and Local Winds

UNIT -IV

Atmospheric Processes and Disturbances Cyclones: Tropical and temperate cyclones Atmospheric moisture and forms of condensation Precipitation: processes and types.

Practical Exercises:

Temperature: Instruments, scales (Centigrade, Fahrenheit, Kelvin), and conversion

Temperature Indices: Mean, Maximum, Minimum, and Range

Rainfall/Precipitation Measurement Instruments

Rainfall Indices: Daily, Seasonal, Annual Rainfall; Rainy Days and Rainfall Intensity

Simple Graphs for Temperature and Rainfall Analysis

Wind Direction and Speed: Wind Vane and Anemometer, Wind Rose

Climograph and Hythergraph

Weather Maps: Symbols and Interpretation

Course Content:

UNIT -I

Introduction to Maps

Maps: Meaning, essentials, and classification of maps.

Distribution Maps: Types, Merits, and Demerits of Qualitative Maps. Chorochromatic and Choroschematic Maps: Construction and Interpretation.

UNIT - II

Distribution Maps Quantitative Methods

Choropleth: Construction, Interpretation, Merits, and Demerits. Isopleth: Construction, Interpretation, Merits, and Demerits.

Dot Maps: Construction, Interpretation, Merits, and Demerits.

UNIT -III

Topographical Maps

Topographical Maps: Classification, Nomenclature, and Numbering. Reading Conventional signs, Interpretation of Topographical Maps. Grid Referencing; Measuring distance, directions, elevation, and slope.

UNIT -IV

Representation of Relief Features from Topographical Maps

Contours: Salient Features, Vertical Interval (VI) & Horizontal Equivalent (HE), Interpolation, Method of drawing profiles. Hachure, Layer Tint, Hill-shading, Spot Height, and Benchmarks. Profiles: Longitudinal, Transverse, Serial, Composite, Superimposed, and Projected.

Practical Exercises

1. Preparing choropleth maps.
2. Drawing isopleth maps.
3. Construction of dot maps.
4. Classification of Survey of India Maps (Old and New Series).
5. Representing Relief Features by Contour.
6. Profiles: Longitudinal, Transverse Profiles.
7. Profiles: Serial, Composite, Superimposed, and Projected.
8. Interpretation of topographical maps (physical and cultural features).

1. Question 1 shall be a compulsory question which contains 12 short answer type questions set from the whole syllabus. The student shall attempt any 10 questions in about 25-30 words each. Each question shall carry 2 marks (10 x 2 = 20 Marks).
2. A total of 8 long questions will be set out of the whole syllabus, at least two from each unit. The candidate will attempt four questions selecting one from each unit and each question will carry 15 marks (Total 4 x 15 = 60 Marks). These will be in addition to the compulsory Question 1.
3. Internal assessment may include written assignments, snap tests, participation in discussions in the class, term papers, attendance, presentations etc.
4. For reappear/improvement candidates, who have not been assessed earlier for internal assessment, the marks secured by them in the theory paper will be increased proportionately to maximum marks

of the paper in lieu of internal assessment. The paper setter must put instruction (4) in the question paper.

Course Content:

UNIT -I

Concept of development: introduction, Problems of development, causes of underdevelopment. Measures of growth and development: PQLI, HDI, MPI, IHDI and GNH. Goulet's core values of development and Sen's Capabilities Approach.

UNIT -II

Growth models: Classical growth model, Harrod-Domar model and Neoclassical Solow model.

UNIT -III

Poverty, inequality and vulnerability: Vicious cycle of poverty (Nurkse), Low Level Equilibrium Trap (Nelson), Critical Minimum Effort (Lebenstein).

UNIT -IV

Determinants of democracy, alternative institutional trajectories and their relation with economic performance, state ownership and regulation, government failure and corruption. State and planning, planning by direction, planning by market and planning in backward areas. Inequality: definition, measures, mechanism, axioms and comparison of inequality measures.

GEOGRAPHY

HSS-GEO-DSC9(MAJ)-501: Geographic Thought

Typology of the course: Major Discipline specific course

Course Code: HSS-GEO-DSC9(MAJ)-501

Level of course: 300

Total Credits: 4

Maximum Marks: 100 (Theory: 80 + Internal Assessment: 20)

Course duration: Total: 60 hours

Evaluation: Maximum Marks: 100

Theory: 80

Internal Assessment: 20

Time: 3 hours

Learning Outcomes:

- Ability to understand and evaluate the historical development of geography as a discipline, analysing contributions from various scholars and schools of thought. Proficiency in grasping key geographical concepts and theoretical approaches to understanding spatial phenomena and human-environment interactions.
- In-depth knowledge of the contributions of ancient key geographers and their role in shaping early geographic thought. Understanding the contributions of scholars from various cultures, including Arab, Chinese, and Indian geographers, and their impact on the development of geographic knowledge. Familiarity with the different approaches in geography, including empirical, theoretical, systematic, and regional, and key concepts like spatial distribution, man-environment relationships, and areal differentiation.

Pedagogy: Students of geography may be encouraged to interact with their counterparts from other disciplines and discuss the nature of the subject. The students may be encouraged to collect information on any theme amenable to geographical interpretation.

Instructions for the Paper-Setter and Candidates:

1. Question 1 shall be a compulsory question which contains 12 short answer type questions set from the whole syllabus. The student shall attempt any 10 questions in about 25-30 words each. Each question shall carry 2 marks (10 x 2 = 20 Marks).

4. For reappear/improvement candidates, who have not been assessed earlier for internal assessment, the marks secured by them in the theory paper will be increased proportionately to maximum marks of the paper in lieu of internal assessment. The paper setter must put instruction (4) in the question paper.

Course Content:

UNIT - I

1. Nature and Development of Geography as a Discipline.
2. Contribution of Herodotus, Eratosthenes, Strabo and Ptolemy.

UNIT - II

3. Contribution of Arbs, Chinese and Indian scholars.
4. Contribution of Varenius, Kant, Humboldt and Ritter.

UNIT - III

5. Approaches: Empirical/Theoretical, Systematic / Regional, Behavioural.

6. Concepts in Geography: Spatial Distribution; Man-Environment Relationship; Areal Differentiation and Spatial Organisation.

UNIT - IV

7. Darwinism in Geography.

8. Schools of Thought: Determinism, Possibilism, Neo Determinism, Humanism, Radicalism

HSS-GEO-DSC10(MAJ)-502: Geography of India

Typology of the course: Major Discipline specific course

Course Code: HSS-GEO-DSC10(MAJ)-502

Level of course: 300

Total Credits: 4

Maximum Marks: 100 (Theory: 80 + Internal Assessment: 20)

Course duration: Total: 60 hours

Theory: 80

Internal Assessment: 20

Time: 3 hours

Learning Outcomes:

- Ability to analyse and interpret geographical data, particularly in the context of India's physical and human geography, and evaluate regional disparities and development challenges. Proficiency in using various data sources such as census reports, satellite images, and field surveys to study India's geography and its relationship with economic and environmental processes.
- In-depth understanding of India's physical features and how these factors influence regional development. Knowledge of the agricultural landscape of India, as well as an understanding of the challenges such as irrigation and the problems faced by Indian agriculture. Understanding of India's

population, the process of urbanization, along with the factors driving these trends. Familiarity with the major natural hazards affecting India. Knowledge of India's key mineral and energy resources. Ability to understand the distribution and localization factors of key industries in India. Understanding the transportation networks of India, including rail, road, air, and water, and their role in the economic integration and development of the country.

Pedagogy: Use of visual aids especially maps. Students should be encouraged to use an atlas in the classroom. Audio-visual shows on different parts of India. Discussions, assignments

Course Content:

UNIT - I

1. Introduction: India in the context of Asia

2. Physiography: relief, drainage, climate, vegetation, soils.

UNIT - II

3. Agriculture: irrigation, major crops (rice, wheat, maize, sugarcane, cotton, jute and tea) characteristics and problems of Indian Agriculture.

4. Natural Hazards: flood, drought and earthquake

UNIT - III

5. Population: Distribution and Density, Growth, Urbanization.

6. Mineral and Power Resources: Iron ore, manganese, mica, copper and gold; Coal Petroleum, Hydroelectricity and Non-conventional Power resources.

UNIT - IV

7. Industries: Distribution and localization factors of major industries Iron and Steel; and Textiles Industry)

8. Transport: Rail, Road, Airways and Waterways

HSS-GEO-DSC11(MAJ)-503: Bio-Geography

Typology of the course: Major Discipline specific course

Course Code: HSS-GEO-DSC11(MAJ)-503

Level of course: 300

Total Credits: 4

Maximum Marks: 100 (Theory: 80 + Internal Assessment: 20)

Course duration: Total: 60 hours

Maximum Marks: 100

Theory: 80

Internal Assessment: 20

Time: 3 hours

Learning Outcomes:

- Ability to assess and interpret complex ecological and biogeographical data, linking concepts such as energy flow, nutrient cycles, and the interactions between organisms and their environment. Proficiency in conducting field research, collecting data on flora and fauna distributions, and interpreting ecological patterns in the context of India's biodiversity and environmental challenges.
- Understanding the nature and significance of biogeography, and how ecological principles influence biodiversity. Ability to analyze the geographical distribution of plant and animal life in relation to various factors and human activities in India. Knowledge of soil systems, as well as the factors influencing soil formation and classification, with a focus on Indian ecosystems. Understanding the concept of biomes and proficiency in understanding biodiversity, its elements, hotspots, and the significance of wildlife conservation efforts in India, including the role of bio-reserves in preserving.

Pedagogy: Use of visual aids especially maps. Students should be encouraged to use an atlas in the classroom. Audio-visual shows on different parts of India. Discussions, assignments.

4. For reappear/improvement candidates, who have not been assessed earlier for internal assessment, the marks secured by them in the theory paper will be increased proportionately to maximum marks of the paper in lieu of internal assessment. The paper setter must put instruction (4) in the question paper.

Course Content:

UNIT - I

1. Nature, scope, and significance of biogeography.

2. Basic ecological principles: energy flow, Hydrological cycle, Oxygen cycle, Carbon cycle and Nitrogen cycle, tropic levels and food web.

UNIT - II

3. Distribution of plant life on the earth and its relation to soil, climate and human activities.

4. Geographical distribution of animal life on the earth and its relation to vegetation types, climate and human activities.

UNIT -III

5. Soil system: meaning and importance, components and structure.

6. Soil profiles and Horizons, Factor affecting soil formation, classification of soil.

UNIT - IV

7. Biomes: - meaning and concept, types of Biomes, Major Biomes of World.

8. Bio-Reserves: meaning and functional pattern

9. Bio-diversity: meaning, concept, elements, Bio-diversity hotspots, wild-life conservation in India.

HSS-GEO-DSC12(MAJ)-504: Population Geography

Typology of the course: Major Discipline specific course

Course Code: HSS-GEO-DSC12(MAJ)-504

Level of course: 300

Total Credits: 4

Maximum Marks: 100 (Theory: 80 + Internal Assessment: 20)

Course duration: Total: 60 hours

Maximum Marks: 100

Terminal Examination: 80

Internal Assessment: 20

Learning Outcomes:

- Ability to critically assess demographic data and trends to understand population patterns, their causes, and impacts on geographical landscapes. Proficiency in analysing population statistics from diverse sources like the Indian Census, as well as conducting fieldwork and research to gather relevant demographic data.
- To introduce the students to the philosophical and methodological foundations of the population geography and various characteristics of demography.

Pedagogy: Students of population geography may be encouraged to interact with the dynamics of population.

Instructions for the Paper-Setter and Candidates:

1. Question 1 shall be a compulsory question which contains 12 short answer type questions set from the whole syllabus. The student shall attempt any 10 questions in about 25-30 words each. Each question shall carry 2 marks (10x2=20 Marks).
2. A total of 8 long questions will be set out of the whole syllabus, at least two from each unit. The candidate will attempt four questions selecting one from each unit and each question will carry 15 marks (Total 4x15=60 Marks). These will be in addition to the compulsory Question 1.
3. Internal assessment may include written assignments, snap tests, participation in discussions in the class, term papers, attendance, presentations etc.
4. For reappear/improvement candidates, who have not been assessed earlier for internal assessment, the marks secured by them in the theory paper will be increased proportionately to maximum marks

of the paper in lieu of internal assessment. The paper setter must put instruction (4) in the question paper.

Course Content:

UNIT – I

Nature and Scope of Population Geography, Sources of Population Data with special reference to Indian Census.

UNIT – II

Population Size, Distribution and Growth – Determinants and Patterns; Theories of Growth – Malthusian Theory and Demographic Transition Model/Theory.

UNIT – III

Population Dynamics: Fertility and Mortality – Measures and Determinants, Migration – Determinants and Implications.

Dynamics of Population Pyramids and Women Empowerment and Population Policies.

UNIT – IV

Contemporary Issues - Ageing of Population, Demographic Dividends, Global Refugee Crisis.

HSS-GEO-DSC13(MAJ)-505: Introduction to Geospatial Technology

Typology of the course: Major Discipline specific course

Course Code: HSS-GEO-DSC13(MAJ)-505

Level of course: 300

Total Credits: 4

Maximum Marks: 100 (60 Theory + 20 Internal Assessment + 20 Practical)

Course duration: 60 hours

Evaluation: Maximum Marks: 100 (60 Theory + 20 Internal Assessment + 20 Practical)

• Terminal Examination: 60 Marks

• Internal Assessment: 20 Marks + 20 Marks Practical

• Examination Time: 3 Hours

Learning Outcomes:

- Ability to work with geospatial tools and technologies, understanding their role in solving real-world geographic and environmental problems through data analysis and visualization.
- Developing the ability to analyze geospatial data, assess its accuracy, and apply it to address various challenges such as urban planning, environmental management, and disaster response.
- To foster knowledge of the fundamental concepts behind geospatial technologies, including GIS (Geographic Information Systems), GPS, and remote sensing, and their applications in mapping and spatial analysis.
- Enhance Ability to apply geospatial technologies for real-world applications, such as land use planning, natural resource management, environmental monitoring, and infrastructure development.

Pedagogy: Introduce the fundamental concepts related to geospatial technology with emphasis on practical aspects to develop students' decision-making capabilities with scientific orientation.

Instructions for Paper Setter and Candidates:

1. Question 1 shall be a compulsory question which contains 12 short answer type questions set from the whole syllabus. The student shall attempt any 10 questions in about 25-30 words each. Each question shall carry 2 marks (10x2=20 Marks).
2. A total of 8 long questions will be set out of the whole syllabus, at least two from each unit. The candidate will attempt four questions selecting one from each unit and each question will carry 10 marks (Total 4x10=40 Marks). These will be in addition to the compulsory Question 1.
3. Internal assessment may include written assignments, snap tests, participation in discussions in the class, term papers, attendance, presentations etc.
4. For reappear/improvement candidates, who have not been assessed earlier for internal assessment, the marks secured by them in the theory paper will be increased proportionately to maximum marks of the paper in lieu of internal assessment. The paper setter must put instruction (4) in the question paper.

Instructions for Practical Examination:

1. Each student shall prepare a practical file. They will be required to complete their practical file and get it signed from the class teacher at least 10 days before the commencement of their examination.
2. The practical examination in the form of viva-voce only shall be conducted at the respective Department of University itself. There will be no laboratory exercise at the time of examination.
3. Practical examination at the respective Department shall be conducted by one internal and one external examiner. The external examiner shall be appointed by the principal of the respective Departments in consultation with the senior most teachers of Geography in the Department of University.

4. Those students who fail in the practical examination are required to prepare a fresh practical file. However, students who failed in the theory paper only or are appearing in improvement examination, their practical marks of previous practical examination will be carried forward.
5. There will be 2 hours of teaching per week for this paper.

Course Content:

UNIT - I

1. Fundamentals of Remote Sensing Remote Sensing: Definition and Concept of Remote Sensing, Electromagnetic spectrum, Types of Remote Sensing and Remote Sensing Platforms Geographical Uses/Applications of Remote Sensing Technology

UNIT - II

2. Basics of Geographic Information System Concepts of GIS, its Significance and Applications Components of GIS, Nature of Geographic Data: Spatial and Attribute Data Raster and Vector Data Models; Data sources for GIS

UNIT - III

3. Concepts of Global Positioning System: GPS: Concept and Principles of Operation, GPS Basics: GPS Segment, GPS signals, Positioning, Accuracy and Errors Types of GPS devices; Applications of GPS

UNIT - IV

4. Applications of Geospatial Technology: Applications in Environmental Management Geospatial technologies and Disaster Management Use of Geospatial technologies in our daily life.

HISTORY

HSS-HIS-DSC9(MAJ)-501: Economic History of Early India

Typology of Course: Major Discipline Specific Core

Course Code: HSS-HIS-DSC9(MAJ)-501

Level of the Course: 300 Level

Total Credits: 4

Maximum Marks: 100 (80 Theory + 20 Internal Assessment)

Course Duration: Total = 60 hours

Evaluation: Maximum Marks: 100 (80 Theory + 20 Internal Assessment)

- **Terminal Examination**: 80 Marks
- **Internal Assessment**: 20 Marks
- **Examination Time:** 3 Hours

Learning Outcomes:

- Understand and explain the techniques, processes, and social organization of agriculture and irrigation systems, including the role of different peasant groups.
- Analyse the development of craft production, the guild system, and the significance of urban Centers in economic life.
- Evaluate the role of merchants, trade categories, and major trade routes such as the Uttarapath, Dakshinapatha, and Silk Route in shaping regional and interregional economies.
- Assess the functioning of the political economy by studying taxation systems, coinage, and land grants as instruments of state policy and economic control.

Pedagogy: The paper will utilize maps, texts to add to the basic lecture discussion. Students would be encouraged to research some aspects independently.

Instructions for the Paper Setter and Candidates:

2. A total of 8 long questions will be set out of the whole syllabus, at least two from each unit. The candidate will attempt four questions selecting one from each unit and each question will carry 15 marks (Total 4 x 15 = 60 Marks). These will be in addition to the compulsory Question 1.
3. Internal assessment may include written assignments, snap tests, participation in discussions in the class, term papers, attendance, presentations etc.
4. For reappear/improvement candidates, who have not been assessed earlier for internal assessment, the marks secured by them in the theory paper will be increased proportionately to maximum marks of the paper in lieu of internal assessment. The paper setter must put instruction (4) in the question paper.

Course Content:

UNIT - I

Basic concepts of Firm, Industry and market, Organizational forms. Separation of ownership from management and control. Alternative goals of firm: contribution of Marris and Williamson.

UNIT - II

Elements of market structure: Seller's and Buyer's concentration, Product differentiation, Conditions of entry, Measurement of seller's concentration. Determinants: economies of scale and barriers to entry.

UNIT - III

Evolution of market structure – conduct – performance paradigm, Economics of Advertisement: concepts and market structure. Advertisement: Dorfman-Steiner conditions.

UNIT - IV

Issues of productive efficiency and sub-optimal capacity. Factors explaining sub-optimal capacity. International organizations and industry: ILO and WTO.

HSS-ECO-DSC17(MAJ)-604: Environmental Economics

Typology of the course: Major Discipline Specific Core

Course Code: HSS-ECO-DSC17(MAJ)-604

Level of the course: 300 level

Total Credits: 4

Maximum Marks: 100 (80 Theory + 20 Internal Assessment)

Course Duration: 60 hours

Evaluation: Maximum Marks: 100 (80 Theory + 20 Internal Assessment)

• Terminal Examination: 80 Marks

• Internal Assessment: 20 Marks

• Examination Time: 3 Hours

Learning Outcomes:

- To foster problem-solving competencies by applying theoretical knowledge to real-world situations.
- To encourage independent and collaborative learning through group discussions and projects.

- To teach fundamental economic principles, analytical skills, and how to apply economic theories to real-world issues.
- To develop critical thinking, base to research, and communication skills.

Pedagogy: Written assignments, tests, presentations and class discussions will be an integral part of the teaching programme to supplement the lecture.

Instructions for the Paper Setter and Candidates:

1. Question 1 shall be a compulsory question which contains 12 short answer type questions set from the whole syllabus. The student shall attempt any 10 questions in about 25-30 words each. Each question shall carry 2 marks (10 x 2 = 20 Marks).

The paper setter must put instruction (4) in the question paper.

Course Content:

UNIT - I

Economy and environment: meaning, definition and relevance. Neo-classical perspective, ecological perspective. Sustainable development: concept, theories and principles of sustainable development.

UNIT - II

Economics Valuation methods: Stated preference, Revealed preference. Economics of pollution control: damage and abatement cost functions, marginal decision; optimum level of pollution.

UNIT - III

Review of environmental regulations and legislations in India: air, water, land, solid waste management and chemicals/pesticides. Green national accounts and environmental accounting.

UNIT - IV

Climate change and ecosystem services: ecosystem function, Kyoto protocol, Earth Summits 1992 and 2002. Environment Kuznets curve; trade and environment under WTO regime.

Course Content:

UNIT - I

Set theory: meaning, types, operations (union, intersection and complement), sub-sets, super sets. Matrices: review of adjoint and inverse of matrices. Rank of matrix, solution of equation (upto three) by matrix inverse.

UNIT - II

Differentiation: Simple and partial derivatives. Maxima and minima of functions of one variable only.

UNIT - III

Integration: meaning and basic integration formulae. Linear Programming: solution by simplex method.

UNIT - IV

Tests of significance: large and small sample tests based on normal and t-distribution. Tests based on Z (Fischer's Z statistics) and F distribution. Chi-Square test: conditions for Chi-square test.

HSS-GEO-DSC14(MAJ)-601: Theories and Models in Geography

Typology of the course: Major Discipline specific course

Course Code: HSS-GEO-DSC14(MAJ)-601

Level of course: 300

Total Credits: 4

Maximum Marks: 100 (Theory: 80 + Internal Assessment: 20)

Course duration: 60 hours

Evaluation: Maximum Marks: 100 (80 Theory + 20 Internal Assessment)

• Terminal Examination: 80 Marks

• Internal Assessment: 20 Marks

• Examination Time: 3 Hours

Learning Outcomes:

- To inculcate the ability to grasp and analyze various geographical theories and models, understanding their significance and relevance in explaining spatial patterns and human-environment interactions. Developing critical thinking skills to assess and compare different theoretical perspectives in geography, and evaluate how they shape modern geographical research and applications.
- To develop the understanding for importance of theories in geography since early debates like determinism to rise of scientific approaches, and paradigm shifts. To inculcate the proficiency in applying major geographical models.

Pedagogy: Detailed knowledge of geographical theories and models enhance the students with applied part.

Instructions for the Paper-Setter and Candidates

1. Question 1 shall be a compulsory question which contains 12 short answer type questions set from the whole syllabus. The student shall attempt any 10 questions in about 25-30 words each. Each question shall carry 2 marks (10 x 2 = 20 Marks).

The paper setter must put instruction (4) in the question paper.

Course Content:

UNIT - I

Definition and importance of theories in geographical studies.

Early geographical thought: Determinism vs. Possibilism, Quantitative Revolution and the rise of scientific approaches, Paradigm shifts: Positivism, Humanism, and Critical Geography

UNIT - II

Central Place Theory (Walter Christaller), Von Thünen's Agricultural Land Use Model, Weber's theory of industrial location, Core-Periphery Model (John Friedmann), Growth pole theory.

UNIT - III

Cultural landscape theory (Carl Sauer)

Marxian theory of population

Theories of urban structure (Concentric zone Model, Multiple Nuclei Model, Sector Model)

Heartland theory of Mackinder, Spykman's rimland concept,

UNIT - IV

Modern Theoretical Perspectives: Modernism and Postmodernism in geography

Feminist geography and gender perspectives.

HSS-GEO-DSC15(MAJ)-602: Regional Geography of South Asia

Typology of the course: Major Discipline specific course

Course Code: HSS-GEO-DSC15(MAJ)-602

Level of course: 300

Total Credits: 4

Maximum Marks: 100 (Theory: 80 + Internal Assessment: 20)

Course duration: Total: 60 hours

Evaluation: Maximum Marks: 100 (80 Theory + 20 Internal Assessment)

• Terminal Examination: 80 Marks

• Internal Assessment: 20 Marks

• Examination Time: 3 Hours

Learning Outcomes:

- To develop the ability to analyse the geographical, cultural, and economic characteristics of regions, and apply this understanding to identify and classify regions based on various criteria. Developing the ability to compare and contrast regions within South Asia, evaluating their natural, cultural, and economic aspects, and understanding their global significance.

- To develop the understanding of the concept of regions in geography, including the classification of regions. To enhance the knowledge of the physical, demographic and economic structure of South Asia and how these factors influence the region's development.

Pedagogy: Give detailed information of continents using atlas, Ppt and maps

Instructions for the Paper-Setter and Candidates

1. Question 1 shall be a compulsory question which contains 12 short answer type questions set from the whole syllabus. The student shall attempt any 10 questions in about 25-30 words each. Each question shall carry 2 marks (10x2=20 Marks).
2. A total of 8 long questions will be set out of the whole syllabus, at least two from each unit. The candidate will attempt four questions selecting one from each unit and each question will carry 15 marks (Total 4x15=60 Marks). These will be in addition to the compulsory Question 1.

4. For reappear/improvement candidates, who have not been assessed earlier for internal assessment, the marks secured by them in the theory paper will be increased proportionately to maximum marks of the paper in lieu of internal assessment. The paper setter must put instruction (4) in the question paper.

Course Content:

UNIT - I

Concept of region in geography, types and classification of regions (formal and functional), criteria of delimitation and characteristics of natural, cultural, economic and political regions.

UNIT - II

South Asia in the context of world; structure; relief; drainage; climate; natural vegetation and soils.

UNIT - III

South Asia: Demographic characteristics

UNIT - IV

South Asia: Economy; agricultural, minerals, energy resources and Industries.

HSS-GEO-DSC16 (MAJ)-603: Urban Geography

Typology of the course: Major Discipline specific course

Course Code: HSS-GEO-DSC16(MAJ)-603

Level of course: 300

Total Credits: 4

Maximum Marks: 100 (Theory: 80 + Internal Assessment: 20)

Course duration: Total: 60 hours

Evaluation: Maximum Marks: 100 (80 Theory + 20 Internal Assessment)

• Terminal Examination: 80 Marks

• Internal Assessment: 20 Marks

• Examination Time: 3 Hours

Learning Outcomes:

- To enhance the ability to assess and interpret urban phenomena, using theoretical and practical frameworks to understand the development, structure, and challenges of urban areas. Developing the ability to critically evaluate urban issues, such as growth, infrastructure, and planning, and propose solutions for sustainable urban development.
- To enhance the understanding of urban geography, alongside theories of urban origin that explain the formation and development of cities. Inculcate the knowledge of urban morphology theories, including the specific morphology of Indian cities. To increase the ability to analyse urban issues in mega cities of India, Familiarity with urban planning concepts, including master plans, AMRUT, HRIDAY, and the role of urban local bodies in India, along with the governance challenges in managing cities.

Pedagogy: Students of urban geography may be encouraged to interact with the interaction of space with city structures and various process of urbanization.

Course Content:

UNIT - I

Introduction: Definition of urban; Nature and scope of urban geography; Theories of urban origin

UNIT - II

Urban Morphology and Hierarchy: Concept and Theories of morphology Burgess, Harris & Ullman and White' model

Concept and Theories of Hierarchy- Christaller, and Rank size; Morphology of an Indian City

UNIT - III

Urban Issues in Mega Cities of India; heat island, housing and slums

Urban Basic Services Water and sanitation.

UNIT - IV

Urban Planning and Governance

Planning: Concept of Master Plans, AMRUT, HRIDAY, Urban local bodies in India.

Futuristic Cities: Concept of New Urbanism; Concepts of futuristic cities: sustainable city, smart city, compact city, virtual city, network city, world class city, global city and inclusive city.

HSS-GEO-DSC17(MAJ)-604: Quantitative Techniques in Geography

Typology of the course: Major Discipline specific course

Course Code: HSS-GEO-DSC17(MAJ)-604

Level of course: 300

Total Credits: 4

Maximum Marks: 100 (60 Theory + 20 Internal Assessment + 20 Practical)

Course Duration: Total: 60 hours

Evaluation: Maximum Marks: 100 (60 Theory + 20 Internal Assessment + 20 Practical)

• Terminal Examination: 60 Marks

• Internal Assessment: 20 Marks + 20 Marks Practical

• Examination Time: 3 Hours

Learning Outcomes:

- To foster the ability to interpret and analyze various types of data, utilizing statistical techniques to draw meaningful insights and make informed decisions in geographical studies. To Developing the ability to assess the strengths and limitations of quantitative techniques in geography, ensuring the appropriate application of statistical tools to solve geographic problems.
- To foster the ability to interpret and analyse various types of data, utilizing statistical techniques to draw meaningful insights and make informed decisions in geographical studies. To develop the ability to assess the strengths and limitations of quantitative techniques in geography, ensuring the appropriate application of statistical tools to solve geographic problems. To enhance the knowledge of the significance of quantitative techniques in geography, including the different types of data and variables used in spatial analysis. To enhance the proficiency in applying basic probability concepts, normal distribution, and sampling. Ability to calculate and interpret measures of central. Proficiency in conducting correlation and regression analysis.

Pedagogy: Detailed knowledge of statistical techniques to analyse the quantitative data. Understanding of statistical software package to enhance the students with quantitative analysis

Instructions for Paper Setter and Candidates:

1. Question 1 shall be a compulsory question which contains 12 short answer type questions set from the whole syllabus. The student shall attempt any 10 questions in about 25-30 words each. Each question shall carry 2 marks (10x2=20 Marks).
2. A total of 8 long questions will be set out of the whole syllabus, at least two from each unit. The candidate will attempt four questions selecting one from each unit and each question will carry 10 marks (Total 4x10=40 Marks). These will be in addition to the compulsory Question 1.

3. Internal assessment may include written assignments, snap tests, participation in discussions in the class, term papers, attendance, presentations etc.
4. For reappear/improvement candidates, who have not been assessed earlier for internal assessment, the marks secured by them in the theory paper will be increased proportionately to maximum marks of the paper in lieu of internal assessment. The paper setter must put instruction (4) in the question paper.

Instructions for Practical Examination:

1. Each student shall prepare a practical file. They will be required to complete their practical file and get it signed from the class teacher at least 10 days before the commencement of their examination.
2. The practical examination in the form of viva-voce only shall be conducted at the respective Department of University itself. There will be no laboratory exercise at the time of examination.
3. Practical examination at the respective Department shall be conducted by one internal and one external examiner. The external examiner shall be appointed by the principal of the respective Departments in consultation with the senior most teachers of Geography in the Department of University.
4. Those students who fail in the practical examination are required to prepare a fresh practical file. However, students who failed in the theory paper only or are appearing in improvement examination, their practical marks of previous practical examination will be carried forward.
5. There will be 2 hours of teaching per week for this paper.

Course Content:

UNIT - I

Statistics and Statistical Data: Meaning of quantitative techniques in geography and significance in geographical studies.

Data types: Nominal, ordinal, interval, and ratio scales, Spatial and non-spatial data, Variables: Discrete and continuous; importance in spatial analysis and decision-making, Advantages and limitations of quantitative approaches in geography.

UNIT - II

Basic probability concepts, Normal distribution and its geographical applications

Sampling techniques: Random, stratified, and systematic sampling

UNIT - III

Measures of central tendency: Mean, median, mode, Measures of dispersion: Range, variance, standard deviation.

UNIT - IV

Correlation and Regression Analysis: Pearson's correlation coefficient, Spearman's rank correlation, Simple linear regression: Concepts and applications.

HSS-GEO-DSC18(MAJ)-605: Economic Geography

Typology of the course: Major Discipline specific course

Course Code: HSS-GEO-DSC18(MAJ)-605

Level of course: 300

Total Credits: 4

Maximum Marks: 100 (Theory: 80 + Internal Assessment: 20)

Course duration: Total: 60 hours

Evaluation: Maximum Marks: 100 (80 Theory + 20 Internal Assessment)

• Terminal Examination: 80 Marks

• Internal Assessment: 20 Marks

• Examination Time: 3 Hours

Learning Outcomes:

- To enhance the ability to assess and analyse economic activities and their spatial patterns, using various theoretical frameworks and concepts to understand the complexities of economic geography. To enhance the Proficiency in collecting, interpreting, and presenting economic data to analyse trends in development, industry, and trade across different regions.
- To enhance the understanding of core concepts and approaches in economic geography, with a focus on development patterns and knowledge of key locational theories. To familiarize with primary activities, secondary activities including their spatial distribution and significance in economic

geography, the role of tertiary (services) and quaternary activities in the economy, including patterns of transportation, international trade, and global service networks.

Pedagogy: To familiarise them with the major activities in economic geography and describe in detail the regionalization of different economic activities.

Instructions for the Paper-Setter and Candidates

1. Question 1 shall be a compulsory question which contains 12 short answer type questions set from the whole syllabus. The student shall attempt any 10 questions in about 25-30 words each. Each question shall carry 2 marks (10 x 2 = 20 Marks).
2. A total of 8 long questions will be set out of the whole syllabus, at least two from each unit. The candidate will attempt four questions selecting one from each unit and each question will carry 15 marks (Total 4 x 15 = 60 Marks). These will be in addition to the compulsory Question 1.
3. Internal assessment may include written assignments, snap tests, participation in discussions in the class, term papers, attendance, presentations etc.
4. For reappear/improvement candidates, who have not been assessed earlier for internal assessment, the marks secured by them in the theory paper will be increased proportionately to maximum marks of the paper in lieu of internal assessment. The paper setter must put instruction (4) in the question paper.

Course Content:

UNIT - I

Definition, Approaches and Fundamental Concepts of Economic Geography; Patterns of Development.

UNIT - II

Locational Theories – Agriculture (Von Thunen) and Industrial (Weber)

UNIT - III

Primary Activities – Intensive Subsistence Farming, Commercial Grain Farming, Plantation, Commercial Dairy Farming, Commercial Fishing, and Mining (iron ore, coal and petroleum). Secondary Activities– Cotton Textile Industry, Petro-Chemical Industry, Automobile industry, Major Manufacturing Regions.

UNIT - IV

Tertiary and Quaternary Activities – Modes of Transportation, Patterns of International Trade, Information and Communication Technology.

HISTORY

HSS-HIS-DSC14(MAJ)-601: Social and Cultural Trends in Ancient India

Typology of Course: Major Discipline Specific Core

Course Code: HSS-HIS-DSC14(MAJ)-601

Level of the Course: 300 Level

Total Credits: 4

Maximum Marks: 100 (80 Theory + 20 Internal Assessment)

Course Duration: Total = 60 hours

Evaluation: Maximum Marks: 100 (80 Theory + 20 Internal Assessment)

- Terminal Examination: 80 Marks
- Internal Assessment: 20 Marks
- Examination Time: 3 Hours

Learning Outcomes:

- Students will learn about important parts of society in early times, like caste (varna-jati), life stages (ashrama), important ceremonies (samskara), and the lives of marginalized groups like Shudras, slaves, and women.
- Students will understand the traditional education system, how people used to learn, and where the main centres of education were in ancient India.
- Students will explore different early religions like Vedic traditions, Jainism, Buddhism, and later forms of Hinduism such as Vaishnavism and Shaivism.
- Students will get to know about ancient Indian art and architecture, including temple styles (Nagara and Dravida), sculptures (Mathura and Gandhara), and famous paintings like those in the Ajanta caves.

Pedagogy: The use of maps, pictures, texts would complement the classroom discussions. Students would be encouraged to debate on different interpretations /issues in the context of sources.

Instructions for the Paper Setter and Candidates:

1. Question 1 shall be a compulsory question which contains 12 short answer type questions set from the whole syllabus. The student shall attempt any 10 questions in about 25-30 words each. Each question shall carry 2 marks (10 x 2 = 20 Marks).

Course Duration: Lectures-30 Hours

Evaluation*:* Maximum Marks: 50 (40 Theory + 10 Internal Assessment)

Terminal Examination: 40 Marks

Internal Assessment: 10 Marks

Examination Time: 3 Hours

Learning Outcome:

- To familiarize the students with the growing political processes in the early 20th century Punjab.
- To familiarize the students with the response of the Punjabis to British repression.
- To provide students with knowledge of various strands of nationalism in the Punjab.
- To familiarize the students with the process of partition and subsequent rehabilitation.

Pedagogy: There will be direct teaching where the students will be referred to the primary works. There will be continuous evaluation of the students through assignments and semester tests. Towards the end of the session, there will be a written examination.

Instructions for the Paper Setter and Candidates:

1. The syllabus has been divided into Two Units. There shall be 5 questions in all. The first question will be compulsory and will carry 10 marks. It will contain 8 short answer questions set from the entire syllabus. The candidate will be required to attempt any 5 out of 8 in 25-30 words. Each question will carry two marks (5x2=10).
2. Rest of the paper shall contain 2 Units. Each unit shall have two long questions and the candidate shall have to attempt one from each unit. Each question will carry 15 marks (2x15=30).

3. The paper setter would avoid repetition between different types of questions within one question paper.
4. Each long question would cover about one third or one half of a topic detailed in the syllabus.

Note: For Private/Centre for Distance and Online Education Students, who have not been assessed earlier for the internal assessment, the marks secured by them in the written paper will proportionally be increased in lieu of the internal examination.
