Total Credits					**24**					**600**

Job Role – Industrial Engineer, Sourcing Manager and Boutique Manager

***One credit of theory lecture is of 1 hour duration and one credit of practical is of 2 hours duration.

1. Skill Enhancement Courses (SEC): Annexure I
2. Multidisciplinary Courses (MDSC): Annexure II
3. Value Added Courses (VAC): Annexure III

ESSENTIAL COMPONENTS OF COURSE OF B.Voc (Fashion Technology and Apparel Design)

PROGRAMME OUTCOMES

PO1. Students will become proficient in Fashion illustration and Apparel design skills with hand and computers.

PO2. Students will be able to visualize and communicate design concepts through sketches, renderings and prototypes and will be able to understand the application of various elements and principles of design.

PO3. Students will be able to handle pattern making and construction of men's wear and women's wear garments independently after completing the course.

PO4. Students will be having complete knowledge of textile fibers, yarns and fabric. They will be able to analyze the suitability of different fibers and fabrics for specific functions.

PO5. Students will be able to understand the evolution of historical costumes across different eras and culture.

PO6. The course will open up job avenues as assistant designers and sampling coordinator in export houses or with designers. The students will be able to work as free-lance designers.

PO7. The skills learned during the course make them eligible as sampling coordinators and production floor managers

PO8. Students will learn the skill of hand embroidery and can work as embroider. They will be able to develop decorative articles for commercial market.

PO9. The students will be able to work as free-lance designers. They can open up boutique for kids garment.

PO10. The course will open up job avenues as free-lance designers, assistant designers and production floor managers in export houses or with designers.

Theory Paper:
(1X8 or 4 X 2 marks) = 8 marks
(4 X 8 marks) = 32 marks

i) The exam of this course will be of 3 hours duration.
ii) There will be no objective type questions.
iii) Students are required to have the knowledge of the developments in the subject up to 6 months before the examination.
iv) Use of non-programmable calculators by the students in the Examination Hall is allowed. The calculators will not be provided by the University/College to the examinees.

Instructions for theory paper setters and candidates:
i) The syllabus of this paper has been divided into FOUR units.
ii) All questions carry equal marks
iii) Examiner will set a total of NINE questions comprising two questions from each unit, including Question No. 1 (COMPULSORY) of short answer type covering the whole syllabus.
iv) The students are required to attempt one long question of 8 marks from each unit.

Instructions for practical paper setters and candidates:
i) Examiner will set total of four questions covering the whole syllabus.
ii) Student will attempt any two questions
iii) Each question carries 10 marks.
iv) Practical work carries 15 marks and 5 marks for viva-voce.

Practical paper will be conducted by the college in collaboration with the respective experts and marks will be submitted to Panjab University.

6	**Job Role**	Assistant Designer
7	**Course Objective**	i. To introduce fundamentals of design which are basics for embroideries, prints for interiors and fashion. ii. To make students aware of the various aspects of color in everyday life.
8	**Course Outcomes**	On successful completion of the course, the students will be able to: CO1. Identify different colors and color schemes CO2. Identify different styles of designs and surface embellishments CO3. Create prints for various surfaces CO4. Draw silhouettes of various garments
9	**Pedagogy of the Course Work**	Class Room Lecture, Interactive sessions, PPT, Practical demonstrations and Group Discussions, Case Studies etc.
10	**Course Content**	

BFT-101 (Theory)

UNIT– I

- Application of fundamentals of design in apparel illustrations and its importance with relation to:
  - **Elements of Art** – Line, Form/Shape, Texture, Color - Dimensions of colour- hue, value and intensity, Color schemes- related colour schemes, contrasting colour scheme, colour relationship
  - **Principles of design –** Balance, Emphasis, Rhythm, Proportion, Harmony

UNIT– II

- **Basic Terminologies -** Haute Couture, Custom clothes, Pret-e-porter, Fashion, Fads, Classics, Taste, Hi-Style, Silhouette, Design, Motif, Yokes, Fray, Notch, Pucker, Stay Line, Princess Line, Empire Line.

UNIT– III

- **Basic Terminologies-**
  - Accessories- Bows, Appliqué, Patch, Accessories, Notions,
  - Trimmings- Trims-Functional and Decorative.
  - Checks and Plaids

UNIT– IV

- Incorporation and application of the elements and principles of design to alter the appearance of the person of following figure types –
  - short and thin,
  - short and stout,
  - tall and thin,
  - tall and stout,
  - average

BFT- 101P (Practical)

1. **Sketching Techniques –** Hatching, Scribbling, Stippling, Shading, Smudging
2. **Motif drawing** - Traditional, Realistic, Geometrical, Stylized, Abstract, Futuristic
3. **Color wheel** – Primary, Secondary and Tertiary
4. **Value scale** - light to dark

5. **Intensity scale-** brightness and dullness with hue and tone
6. **Color harmonies –** complementary, split complementary, analogous, triadic, tetradic, monochromatic, color ways
7. **Different types of repeats** – Block Repeat (Rectilinear Repeats), Offset Repeat. Brick/Half Brick (Staggered Horizontal Repeat) Drop/Half Drop (Staggered Vertical Repeat), Mirror Repeat, Diamond Repeat
8. **Tracings of motifs with different mediums** – Light box, Carbon paper, Chalk or pastel stick, Iron on transfer paper
9. **Enlargement and reduction** of structural and decorative motif with scale factor
10. **Introduction to Perspective** - One-point, Two point

7	**Course Objective**	i) To make students proficient in various hand embroidery stitches and fabric surface enrichment. ii) To make students familiarize about various traditional textiles of India.
8	**Course Outcomes**	On successful completion of the course, the students will be able to: CO1. They will be able to work as hand embroider. CO2.They will be able to make decorative articles for the commercial market
9	**Pedagogy of the Course Work**	Class Room Lecture, Interactive sessions, PPT, Practical demonstrations and Group Discussions, Case Studies etc.
10	**Course Content**	

BFT-102 (Theory)

UNIT– I

- Traditional embroideries of India:
  - Kantha of Bengal
  - Phulkari of Punjab
  - Chamba of Himachal Pradesh
  - Kashida of Kashmir
  - Chikankari of Lucknow, UP
  - Kasuti of Karnataka

UNIT-II

- **Traditional Woven Textiles**
  - Brocade
  - Jamdani
  - Baluchar
  - Carpets of UP
- **Traditional Non-Woven Textiles**
  - Namda and Gaba

UNIT-III

- **Resist Dyed textiles:**
  - Tie and dye
  - Patola, Ikat and Pochampalli
  - Batik
  - Bagru

UNIT-IV

- **Printed & Painted Textiles:**
  - Ajrakh
  - Sanganeri
  - Kalamkari
  - Madhubani

BFT- 102P (Practical)

- **Basic embroidery stitches:**
  - Flat Stitches - Running Stitch, Back Stitch, Stem Stitch, Satin Stitch, Couching Stitch, Cross Stitch, Herringbone Stitch,
  - Loop Stitches- Chain Stitch, Lazy-daisy Stitch, Button hole Stitch, Blanket Stitch, Fishbone Stitch, Feather Stitch, fly Stitch,
  - Knotted Stitches- French knot Stitch, Double knot Stitch, Bullion knot Stitch
- **Traditional embroideries of India:**
  - Kantha of Bengal
  - Phulkari of Punjab
  - Chamba of Himachal Pradesh
  - Kashida of Kashmir
  - Chikankari of Lucknow, UP
  - Kasuti of Karnataka
- **Different placement** of design on carpets, bedcovers – Allover, Central, Corner with scale factor
- **Product Development** using above mentioned technique

iii) Each question carries 15 marks.
iv) Practical work carries 30 marks and 5 marks for viva-voce.

Practical paper will be conducted by the college in collaboration with the respective experts and marks will be submitted to Panjab University.

6	**Job Role**	Assistant Designer
7	**Course Objective**	i) To make students aware of appropriate tools of stitching. ii) To create awareness about application of various hand and machine seams
8	**Course Outcomes**	On successful completion of the course, the students will be able to: CO1. Handle and take care sewing machine CO2.Operate sewing machine independently CO3. Do hand stitching and mending of clothing with different seams CO4. Create child pattern.
9	**Pedagogy of the Course Work**	Class Room Lecture, Interactive sessions, PPT, Practical demonstrations and Group Discussions, Case Studies etc.
10	**Course Content**	

BFT-103P (Practical)

Section I- Seams

- **Basting-** Even, Uneven, Diagonal; Tailor's Tacks
- **Hemming**- Visible, Invisible.
- **Different types of seams**– Plain, French, Run and Fell, Mantua Maker, Slot, Lap, Piped, and Counter Seam.
- **Different types of finishes**– Overcast Seam Finish, Double Stitched Finish, Herringbone Finished, Edge Stitched Seam, Bound Seam Finish, and Pinked Seam
- **Plackets:** Overlap, one side extended, both side extended, concealed placket with buttons Application of fasteners- Buttons and Buttonholes, Hooks and Eyes, Hammer On.
- **Application of different types of trimmings**- Laces, Piping, Bindings
- **Pleats:** knife, box, inverted box, kick pleat
- Gathers, Shirring

- **Tucks:** pin, cross and shell

Section II- Draftings

- Drafting of following:
  - Child bodice and Sleeve block
  - Collar- Peter pan, Sailor's, mandarin
  - Sleeves- Puff, Bell, Cap, Magyar, Kimono
  - Yokes- Straight and round

6	**Job Role**	Assistant Designer
7	**Course Objective**	i) To impart knowledge about fashion cycle and theories of fashion ii) To create awareness about fashion communication and expression iii) To make students proficient in hand illustrations
8	**Course Outcomes**	On successful completion of the course, the students will be able to: CO1. Understands the concept of fashion CO2. Explore various careers in fashion industry CO3. Illustrate fashion figures and accessories CO4. Render various textures on apparel
9	**Pedagogy of the Course Work**	Class Room Lecture, Interactive sessions, PPT, Practical demonstrations and Group Discussions, Case Studies etc.
10	**Course Content**	

BFT-201 (Theory)

UNIT – I

- Fashion cycle and stages of fashion in relation to its acceptance by people, broken fashion cycle, Length of fashion cycle.
- Sources of inspiration for fashion designing - History, media, architecture, films, theatre in reference to production of apparel line for a fashion show

UNIT – II

- Fashion forecasting – long term and short-term forecasting,
- Fashion Prediction Agencies-WGSN, Trendstop, the Doneger group, Neli Rodi etc.
- Procedure for predicting trends

UNIT – III

- Understanding importance of Fashion Adoption Theories – Trickledown theory, Trickle across theory, Bottom- up theory.
- Factors affecting fashion- Social, Economic, and Psychological.

UNIT – IV

- Factors affecting design application and preference based on-
  - Various Age Groups- Children, Teenagers, Adults, Elderly
  - Seasons- Autumn, Winters, Summer
  - Occupation-Player, Corporate Executive, Retired
  - Occasions-Social Gathering, Office, Home
- Profile of Indian and Western fashion designers-any five renowned designers in each category along with their achievements and contribution in fashion industry.
- Career in fashion industry- opportunities for job and being an entrepreneur

BFT- 201P (Practical)

Section- I

- Introduction to basic features: hands, legs & feet,
- Facial- proportions
- Drawing of hairstyles
- Introduction to Human Figure Anatomy:
  - Stick figures- Straight and Bend,

- Block figure- Child block and Female block (eight, ten and twelve head figures),
- Fleshing of block figures.

- Fashion figures

Section- II

- Flat Sketching of different types of -
  - Shirts - Oxford, Dress, Cuban, Over shirt, Flannel
  - Skirts - A-Line, Bubble, Circular, Gathered, Godet
  - Trousers - Cargo, Denims, Joggers, Trouser, Corduroy
  - Sleeves - Puff, Leg-O- Mutton, Flare, Bishop, Petal
  - Collars - Peter Pan, Sailor, Mandarin, Roll
  - Necklines - Cowl, Boat, Halter, Asymmetrical, Keyhole
- Accessories- Shoes, Bags, Purses, Belts, Hats and Caps.
- Jewelry- bridal jewelry, fashion jewelry, tribal jewelry

Section-III

- Fabric Rendering and Print Development - Traditional textile prints
- Texture Rendering: Fur, Denim, Corduroy, Net, Sequin, Velvet, Jute, Tweed, Silk/Satin
- Seasonal prints: Spring, Summer, Fall, Winter
- Print Replication.

5	**Max. Marks, Time and Instructions**	<table><tr><th>External Theory</th><th>Internal Theory</th><th>External Practical</th><th>Internal Practical</th></tr><tr><td>40</td><td>10</td><td>40</td><td>10</td></tr></table> Theory Paper: (1X8 or 4 X 2 marks) = 8 marks (4 X 8 marks) = 32 marks

		i) The exam of this course will be of 3 hours duration. ii) There will be no objective type questions. iii) Students are required to have the knowledge of the developments in the subject up to 6 months before the examination. iv) Use of non-programmable calculators by the students in the Examination Hall is allowed. The calculators will not be provided by the University/College to the examinees. **Instructions for theory paper setters and candidates:** i) The syllabus of this paper has been divided into FOUR units. ii) All questions carry equal marks iii) Examiner will set a total of **NINE** questions comprising two questions from each unit, including Question No. 1 (**COMPULSORY**) of short answer type covering the whole syllabus. iv) The students are required to attempt **one long question of 8 marks from each unit**. **Instructions for practical paper setters and candidates:** i) Examiner will set total of four questions covering the whole syllabus. ii) Student will attempt any two questions iii) Each question carries 10 marks. iv) Practical work carries 15 marks and 5 marks for viva-voce. Practical paper will be conducted by the college in collaboration with the respective experts and marks will be submitted to Panjab University.
6	**Job Role**	Assistant Designer
7	**Course Objective**	i) To impart practical knowledge of pattern and product development for kid's wear. ii) To impart theoretical knowledge of various kinds of sewing machines and their handling
8	**Course Outcomes**	On successful completion of the course, the students will be able to: CO1. Stitch various types of kid's garments CO2. Locate landmarks and take body measurement
9	**Pedagogy of the Course Work**	Class Room Lecture, Interactive sessions, PPT, Practical demonstrations and Group Discussions, Case Studies etc.
10	**Course Content**	

BFT-202 (Theory)

UNIT – I

- Introduction and handling of sewing machines and its parts with the help of a diagram including function and maintenance,
- Pattern making & Garment construction tools and equipment: measuring, marking, cutting and finishing tools.
- Sewing problems, their defects and remedies.

UNIT– II

- Different types of sewing machines and their advantages in garment manufacturing- Mechanical sewing machine, Electronic sewing, Embroidery machine, Computerized sewing machine
- Awareness about special purpose machines and their usage in Apparel market

UNIT – III

- Terminology of fabric - Balance, Bias, Cover, Dimensional Stability, Fabric Weight, Grain, Selvedge and Its Types.
- Study of anthropometric/ body measurements for development of garments considering - List of measurements, Locating landmarks and symbol keys, Taking body measurements

UNIT – IV

- Adding Fullness Principle in working patterns during garment construction with the help of:
    - Tucks - plain, cross, shell, released, group.
    - Pleats - knife, box, inverted box, cartridge and kick
    - Gathers- smocking, shearing, frills, flounces, ruffles

- Methods of Pattern Making: Flat pattern – Drafting, Slash and spread, Pivot; Draping - Preparation of muslin- tearing and blocking

BFT- 202P (Practical)

- Drafting and construction of
    - Jhabla/A-line frock
    - Panty
    - Bloomer
    - Romper
    - Night suit
    - Party-wear frock

<u>BFT-203P (Practical)</u>

Section-I

- **Develop sample using following techniques-**
  - Shadow work,

- Mirror work,
- Smocking- English Smocking and Canadian Smocking
- Cut work
- Ribbon Embroidery
- Bead & Sequin work
- Patch Work

Section-II

- Up-cycle used clothes and waste fabrics for making samples with the following techniques –
  - Hand Quilting,
  - Machine Quilting, Hawaiian Quilt Patterns, Amish Quilt, Block and Patchwork Quilting and Appliqué- Hand Applique, Fused Applique, Applique, Reverse Applique, Raw Edge and Smooth Edge Applique, Decorative Stitch Applique

Section-III

- Handling & Preparation of Computerized Embroidery Machine and preparation of one article by this method.

Product development using the taught techniques to make Bags, Apron, as per market demand and latest trend.

		and properties. ii. To provide students with the knowledge of yarn science and yarn properties. iii. To create awareness about handling of special fabrics.
8	**Course Outcomes**	On successful completion of the course, the students will be able to: CO1. Identify and classify various natural and manmade fibers CO2. Understand the processes involved in yarn manufacturing. CO3. Learn techniques for removing specific stains using appropriate methods. CO4. Understand how fabric properties influence handling techniques and end-use applications.
9	**Pedagogy of the Course Work**	Class Room Lecture, Interactive sessions, PPT, Practical demonstrations and Group Discussions, Case Studies etc.
10	**Course Content**	

BFT-301 (Theory)

UNIT– I

- Definition- Textile, Textile fiber, yarn and fabric
- Classification of textile fibers on the basis of their sources and origin.
- Properties of textile fibers - Strength, Length, Shape, Luster, Resiliency, Absorbency, Elasticity, Drapability, Twist, Blend, Moisture regain and Moisture Content, Wickability, Heat conductivity, Electrical Conductivity, Flammability, Waterproof and Water Repellency

UNIT– II

- Manufacturing process and properties of various natural cellulosic fibres – cotton and linen.
- Manufacturing process and properties of various natural protein fibres- wool and silk.

UNIT– III

- Manufacturing process and properties of synthetic fibres –nylon, polyester and acrylic
- Basic understanding of regenerated fibers- cellulosic origin and protein origin.

UNIT– IV

- Methods for stain removal from white cotton and linen, colored cotton and linen, wool and silk and synthetic fabrics.
  - **Vegetable stain-** tea, coffee, fruit, chocolate, fruit juice, turmeric
  - **Protein stain-** blood**,** milk, egg, meat
  - **Grease stain-** oil, butter, lipstick, wax, curry
  - **Dye and mineral stain-** ink and rust.
- Laundering of special garments: - Terrycot shirt, Woolen garment (pullover/cardigan) , Silk scarf , Table cloth

BFT- 301P (Practical)

Section-I

1. Fiber Identification by visual, burning, microscopic and chemical tests.
2. Stain Removal
3. Determination of dimensional stability of various fabrics.

Section-II

11. Hand Knitting – knit stitch, purl stitch, rib stitch, basket weave stitch, cable stitch, chevron seed, moss stitch, garter stitch, herringbone stitch.
12. Crocheting – single crochet, half double, double crochet, triple crochet, double triple crochet,

slip stitch, crochet in the back loop

Instructions for theory paper setters and candidates:
i) The syllabus of this paper has been divided into FOUR units.
ii) All questions carry equal marks
iii) Examiner will set a total of **NINE** questions comprising two questions

		from each unit, including Question No. 1 (**COMPULSORY**) of short answer type covering the whole syllabus. iv) The students are required to attempt **one long question of 8 marks from each unit**. **Instructions for practical paper setters and candidates:** i) Examiner will set total of four questions covering the whole syllabus. ii) Student will attempt any two questions iii) Each question carries 10 marks. iv) Practical work carries 15 marks and 5 marks for viva-voce. Practical paper will be conducted by the college in collaboration with the respective experts and marks will be submitted to Panjab University.
6	**Job Role**	Sampling Coordinator
7	**Course Objective**	1. To provide students with an understanding of the historical development and characteristics of Historic Indian clothing. 2. To teach the fundamental concepts of linings, interlinings, facings, and interfacings in garment construction. 3. To enhance students' ability to plan pattern layouts effectively for better fabric management. 4. To equip students with techniques for managing the challenges of sewing and constructing garments with light, heavy weight and sheer fabrics. To develop hands-on skills in pattern making and garment construction with special attention to seams and garment details.
8	**Course Outcomes**	On successful completion of the course, the students will be able to: CO1. Identify and describe the clothing, jewelry, and overall fashion elements of the Indus Valley Civilization, Mauryan and Sunga, Satvahana Periods CO2. Evaluate the development and distinct features of Gupta, Mughal, British clothing, including textiles, embellishments, and accessories. CO3. Define and distinguish between lining and interlining, including their purposes in garment construction. CO4. Demonstrate ways to minimize fabric waste during pattern layout planning for efficient garment production. CO5. Understand methods for sewing and constructing garments with light, heavy weight and sheer fabrics. CO6. Demonstrate proficiency in pattern making and garment construction with attention to seams and detailed techniques.
9	**Pedagogy of the Course Work**	Class Room Lecture, Interactive sessions, PPT, Practical demonstrations and Group Discussions, Case Studies etc.
10	**Course Content**	

BFT-302 (Theory)

UNIT-I

- **Indus Valley Civilization Costumes –** Evidence of clothing, Textile fibers, dyes and motifs used, Men's and women's clothing, hairstyles and headdresses, Makeup.
- **Vedic period Costumes-** Textiles and dyes, Aryans personal care, Men's and women's clothing, jewelry, hairstyles and headdresses, Costumes of God

- **Mauryan and Sunga period-** Textiles and dyes, Men's and women's clothing, jewelry, hairstyles and headdresses, Military costume, Costumes of religious persons- Hinduism, Buddhism and Jainism
- **Satvahana period-**
  - Early Satavahana- Clothing, jewelry, Headgear and hairstyles
  - Late Satavahana- Textile and dyes, Clothing, jewelry, headgear and hairstyles, Military costumes

UNIT-II

- **Gupta period-** Textiles and dyes, Men's and women's clothing, jewelry, hairstyles and headdresses, Military costume, Costumes of religious persons- Hinduism, Buddhism and Jainism
- **Mughal period-** Textile, dyes and motifs used, Royal men's and women's costumes, Costume of common men, Difference between Muslim and Rajput/ Hindu Costumes
- **British period-** Impact of British raj on clothing of Indians

UNIT-III

- **Define - Lining, Interlining, Types of Interlining-**
  - According to application (Sewn/non-fusible interlining Fusible Interlining)
  - According to fabric (Woven, Knit and Non- Woven)
- **Define -** Facing, Interfacings, Types of Interfacings- Woven, Knit, Non- Woven, Fusible, Non-fusible
- **Define Pattern layout planning-**
  - Types of Pattern Layouts- Open layout, Lengthwise centre fold, Off-centre length wise fold, Crosswise outer fold, Off centre crosswise fold, Double fold or combination fold.
  - Different ways of minimizing waste

UNIT-IV

Handling of Special fabrics while garment construction –

- Slippery fabrics- satin,
- Sheer fabric - organza, net and lace
- heavy weigh fabric like denim and drills
- reversible fabric
- leathers

BFT- 302P (Practical)

Pattern making and construction with special emphasis to seems and details –

- Petticoat with continuous placket and bound buttonhole
- Blouse/ Basic Bodice Block
- Ladies Shirt
- Basic Salwar / Pyzami with casing
- Men's Kurta with kurta pocket and miter placket
- Men's Pyjama with inseam pocket and elasticated back and front belt.

8	**Course Outcomes**	On successful completion of the course, the students will be able to: CO1. Illustrate various textures, falls and silhouettes CO2. Create fashion boards required for visualizing the themes. CO3. Operate MS Office CO4. Edit images through Adobe Photoshop
9	**Pedagogy of the Course Work**	Class Room Lecture, Interactive sessions, PPT, Practical demonstrations and Group Discussions, Case Studies etc.

10 Course Content

BFT-303P (Practical)

Section I- Hand Illustrations

Develop following theme based boards and illustration of -

- Traditional theme
- Western theme
- Festive theme
- Public figure

Section II- Introduction to computer

- MS Word: (i) Writing a letter in word document; (ii) Formatting, Editing and saving files.
- MS Excel: (i) Making Excel spread sheets; (ii) Mathematical operations in excel.
- MS Powerpoint : (i) Using PPT to make presentations.
- Use of Internet: (i) Making an email id.; (ii) Searching different topics
- ADOBE PHOTOSHOP-
    - Study in detail different tools of Photoshop
    - Make colourways of garment
    - Editing and correction of background and images
    - Making visiting card and flyers

BFT-401 (Theory)

UNIT – I

- Weaving Terms – weaving, warp, weft, fabric balance, fabric weight, fabric density.
- Basic loom - Parts of a simple loom and its functions , Basic motions of weaving

UNIT – II

- Types of weaves – a. Basic weaves – plain, twill, satin b. Novelty weaves- pile, lappet, leno, swivel, jacquard, dobby
- Types of yarns - Spun, filament, simple, novelty, bulk and textured
- Effect of twist and direction of twist

UNIT – III

- Types of fabric construction - Weaving, Knitting, Bonded fabric, Felted fabric, Lace making, Braiding Techniques

UNIT – IV

- Yarn defects, weaving defects, piling and raising defects, processing b. Knitted fabric defects c. Embroidered fabric defects d. Dyed fabric defects e. Printed fabric defects

BFT-401P (Practical)

Section-I

1. Yarn Identification
2. Wickability test
3. Determine the thread count, balance and yarn difference
4. Fabric Stiffness test

Section-II

1. Identification of weaves. Project work: Collection of samples of different weaves
2. Weaving- Graphical representation of Basic weaves and making samples of the following:
   i. Plain weave- Rib & Basket
   ii. Twill weave- warp faced, filling faced, right hand twill, left hand twill.
   iii. Satin & Sateen weaves
   iv. Fancy weaves

3. Braiding and knotting – Square knot, spiral knot, larks head knot, gathering knot, clove hitch knot, half hitch, double half hitch knot, overhand knot, half knot, alternating square knot.

3	**Course Duration/LP (Lectures) (Practical)**	30 hours of lectures for Theory + 60 hours of practical Theory credits= 2 and Practical credits= 2 (1 credit= 15 hours of theory learning based on 2 hrs./week) + (1 credit = 30 hours of practical learning based on 4 hrs./week) (1 Semester= 15 weeks) 2- groups will be created for the purpose of Practical for each unit
4	**Credits**	2 Credits Theory + 2 Credits Practical
5	**Max. Marks, Time and Instructions**	

External Theory	**Internal Theory**	**External Practical**	**Internal Practical**
40	10	40	10

Theory Paper:
(1X8 or 4 X 2 marks) = 8 marks
(4 X 8 marks) = 32 marks

i) The exam of this course will be of 3 hours duration.
ii) There will be no objective type questions.
iii) Students are required to have the knowledge of the developments in the subject up to 6 months before the examination.
iv) Use of non-programmable calculators by the students in the Examination Hall is allowed. The calculators will not be provided by the

		University/College to the examinees. **Instructions for theory paper setters and candidates:** i) The syllabus of this paper has been divided into FOUR units. ii) All questions carry equal marks iii) Examiner will set a total of **NINE** questions comprising two questions from each unit, including Question No. 1 (**COMPULSORY**) of short answer type covering the whole syllabus. iv) The students are required to attempt **one long question of 8 marks from each unit**. **Instructions for practical paper setters and candidates:** i) Examiner will set total of four questions covering the whole syllabus. ii) Student will attempt any two questions iii) Each question carries 10 marks. iv) Practical work carries 15 marks and 5 marks for viva-voce. Practical paper will be conducted by the college in collaboration with the respective experts and marks will be submitted to Panjab University.
6	**Job Role**	Sampling Coordinator
7	**Course Objective**	i. To provide students with an in-depth understanding of the key features of clothing, footwear jewelry, hairstyles, and makeup in ancient Egyptian, Greek, Roman, Byzantine, French, and Renaissance periods. ii. To familiarize students with essential terminology and foundational concepts used in patternmaking. iii. To provide a comprehensive understanding of pattern drafting, flat pattern making, and commercial paper patterns. iv. To teach the basic principles and methods of altering patterns for customized garment fitting.
8	**Course Outcomes**	On successful completion of the course, the students will be able to: **CO1.** Identify and describe the key elements of clothing, footwear, jewelry, hairstyles, and makeup in Egyptian, Greek, and Roman cultures. **CO2.** Understand and explain the distinctive costume characteristics of the Byzantine, French, and Renaissance periods. **CO3.** Define and explain essential pattern-making terminology and concepts. **CO4.** Apply various alteration techniques to achieve a proper fit for bust, waist, hip, shoulder, back, and sleeves.
9	**Pedagogy of the Course Work**	Class Room Lecture, Interactive sessions, PPT, Practical demonstrations and Group Discussions, Case Studies etc.
10	**Course Content**	

BFT-402 (Theory)

UNIT – I

Explain clothing, footwear's, jewelry, hairstyles and makeup of following era-

- Egyptian Costume
- Greek Costumes
- Roman Costumes

UNIT– II

Explain clothing, footwear's, jewelry, hairstyles and makeup of following era-

- Byzantine Costumes
- French Costumes
- Renaissance Costumes

UNIT – III

Terminology Used in Pattern Making- Pattern Drafting, Flat Pattern Making, Commercial Paper Pattern, Pattern Envelop, Template, Production Pattern, Design Specification Sheet, Pattern Chart, Cost Sheet, Trueing, Blending and Equalizing, Style Lines.

UNIT – IV

Define **Altering Patterns**; Basic Rules or Techniques of Pattern Alteration

- Lengthening and Shortening of Pattern
- Bust Alterations
- Waist and Hip Alterations
- Shoulder Back and Sleeve

BFT-402P (Practical)

Section-I Pattern Making and Construction of -

- Skirts- Basic skirt, A-line, Flared, Full circular, half circular, Yoke (make pattern of all and construct any 2 of your choice)
- Waistcoat
- Formal Trouser

Section-II Draping

- Basic bodice block
- Basic skirt block
- Princess line
- Empire line
- Halter neck
- Cowl
- Draping and construction of one-piece garment

		development 2. To understand the role of sample coordinator and merchandiser 3. To impart knowledge about visual display
8	**Course Outcomes**	On successful completion of the course, the students will be able to: CO1. Understand design development processes CO2. Create effective merchandising strategies CO3. Develop brand identities and visual merchandising plans
9	**Pedagogy of the Course Work**	Class Room Lecture, Interactive sessions, PPT, Practical demonstrations and Group Discussions, Case Studies etc.
10	**Course Content**	

BFT-403 (Theory)

UNIT– I

- **Design development process-**
  1. **First level**
     i. The brief
     ii. Research inspiration and trend forecast, sources of inspiration
     iii. Research- The fashion cycle, Fashion and Art.
     iv. Choosing a concept or theme- mood board, story board, concept board b.
  2. **Second level**
     i. Design Development
     ii. Style selection and prototype development- silhouette, textures, drape, handle and surface ornamentation
     iii. Developing collection or range planning, tech-pack
     iv. Promotion- Product and portfolio promotion

UNIT– II

- **Role of the designer in fashion industry and new product development**
  i. The influence of Haute-couture on fashion industry
  ii. Organization of Fashion industry
  iii. The sequence of events

UNIT– III

- **Visual Merchandising**
  i. Store location
  ii. Floor plans and layout
  iii. Types of displays
  iv. Elements of Visual Merchandising

- Merchandising and Merchandiser, Role and Responsibilities of Merchandiser

UNIT-IV

- Fashion Distribution Channels (Definition, characteristics, distribution process and limitations)
  i. Departmental stores,
  ii. Specialty stores,
  iii. Chain stores,
  iv. Mill Show rooms,
  v. Factory Outlets,
  vi. Catalogue retail stores,
  vii. Discount store,
  viii. Designers retail stores,
  ix. Franchise retail stores,
  x. Boutique

BFT- 403P (Practical)

Section-I Design Development

i. Maintain sketch file with inspirations, sketches, swatches for reference
ii. Starting from research to Design development- sketch three theme based collection

Section- II Visual Merchandising

i. Maintain a file of various store displays for understanding themes used by them.
ii. Research file on materials for making props
iii. Layout in order to understand the elements and principles of Visual merchandising.
iv. Select and get an approval from outlet for visual display.
v. With their theme and ideology design three different layouts of window display for the outlet.
vi. Execute the thematic work at the site.

Practical paper will be conducted by the college in collaboration with the respective experts and marks will be submitted to Panjab University.
6	**Job Role**	Sampling Coordinator

7	**Course Objective**	**1.** To teach students how to create inspiration, mood, research, and client boards using Adobe Photoshop for a cohesive design presentation. **2.** To provide an introduction to the tools, interface, and capabilities of Adobe Illustrator for fashion design **3.** To enable students to create fashion flats. **4.** To instruct students on developing comprehensive brand kits and brand identity.
8	**Course Outcomes**	On successful completion of the course, the students will be able to: CO1. Demonstrate proficiency in creating inspiration, mood, research, and client boards using Adobe Photoshop. CO2. Navigate and utilize the tools and interface of Adobe Illustrator confidently. CO3. Create fashion flats for tops, skirts, trousers, dresses, and accessories, enhancing their technical illustration skills. CO4. Design Logos, business cards, packaging, and labels that reflect the brand's aesthetic and professional standards.
9	**Pedagogy of the Course Work**	Class Room Lecture, Interactive sessions, PPT, Practical demonstrations and Group Discussions, Case Studies etc.
10	**Course Content**	

BFT-404P (Practical)

Section I:

- Design Process: Finalising Two Themes and Create Following Boards using ADOBE PHOTOSHOP:
  - Inspiration Board
  - Moodboard
  - Research Board
  - Client Board
- Digital Illustration
- Print Development

Section II:

- Introduction to Adobe Illustrator, Tools and Interface
- Tracing of Fashion Figure and poses.
- Creating Fashion flats of the following:
  - Tops
  - Skirts
  - Trousers
  - Dresses
  - Accessories

Section III: Creating a brand kit including

- Logos (Primary, Secondary and Logo mark)
- Fonts
- Mood board
- Business cards
- Packaging and labels
- Mockups

11	**Suggested Resources for Reading**	1. Logo that last by Allen Peters. 2. Designing Brand Identity by Alina Wheeler and Rob Meyerson. **Note:** Latest edition of text books may be used.

		ii. To familiarize students with various textile finishes that enhance the appearance, texture and performance of fabrics. iii. To introduce special and technical textiles along with their properties and applications.
8	**Course Outcomes**	**On successful completion of the course, the students will be able to:** **CO1.** Explain the classification of dyes, stages of dyeing and major dyeing and printing processes. **CO2.** Identify and compare different textile finishes based on their purpose and effect on fabric performance. **CO3.** Identify the types, properties and end uses of special and technical textiles in various industries.
9	**Pedagogy of the Course Work**	Class Room Lecture, Interactive sessions, PPT, Practical demonstrations and Group Discussions, Case Studies etc.
10	**Course Content**	

BFT-501 (Theory)

UNIT– I

1. Introduction and classification of Dyes
2. Stages of Dyeing: fiber, yarn, piece dyeing, product dyeing.
3. Discuss in detail the process of: Batik dyeing, Tie & dye, Marble dyeing

UNIT– II

4. Introduction and Principles of Printing- Direct, Resist, Discharge, Mordant and Transfer printing.
5. Methods of Printing- Block Printing, Blotch Printing, Burn-out Printing, Flock Printing, Roller Printing, Stencil Printing, Screen Printing.

UNIT– III

6. Finishes affecting appearance: Bleaching, Calendaring, Embossing, Glazing, Schreinerizing, and Singeing.
7. Finishes affecting texture: Flocking, Napping, Burnt out Design, Acid Finish, Stiffening.
8. Special purposes finish – Flame retardant, Water-repellent, Durable-press, Moth-proofing, Anti-static.

UNIT– IV

9. Technical Textiles – Introduction, properties and uses of-
    - Industrial Textiles
    - Medical Textiles
    - Geo Textiles
    - Sports Textiles
    - Agro Textiles
    - Packaging Textiles

BFT- 501P (Practical)

Project 1- Learn about the required tools, materials, fabric preparation, and the procedures involved in the following dyeing techniques-

1. Tie and Dye
    a. Marbelling, Twisting, Coiling
    b. Bandhani
    c. Folding- Various accordion folds, variation in handkerchief folds, variation in triangle folds, Chevron Spiral fold
    d. Tritik- open layout, single fold, double fold, multiple folds

e. Ruching
f. Clamping
g. Develop a pair of cushion cover by using combination of tying techniques

2. Batik – Cold dye and acramine dye
3. Natural dyeing on natural fabrics-
    a. Extraction of dyes from various vegetables and fruits
    b. Application of suitable mordants for colour variations and fastness
    c. Testing for fastness to washing and sunlight

Project 2- Explore the essential tools, materials, fabric preparation steps, and processes involved in the following printing techniques

1. Stencil Printing (Direct brush, spray, toothpick, ear buds, textured paper, steel wool etc.)
2. Screen printing
3. Block Printing – (placements- border, corner, center, brick, half drop)
4. Explore the art of eco printing

Project 3- Hand Painting

1. Base Development- Colour blending, colour wash, colour shading, texture development
2. Brush Strokes- Chisel, coma, flat S, Tear drop, Line work, dry brush, wet brush
3. Replication of printed fabric samples- Minimum 5
4. Free hand painting- 5 samples

Project 4- Running fabric development

1. Suit Duptta/ Saree
2. Bedsheets/ Table Runner and mats

ii. Learn the basics of production planning, line layout, workflow, and floor man</td></tr>
</table>

		iii. Understand different apparel manufacturing systems and how production orders are executed. iv. Learn the basics of Lean Management and Six Sigma used for improving quality and reducing waste. v. Develop practical skills in time study, line planning, T&A planning, and basic packaging processes.
8	**Course Outcomes**	**On successful completion of the course, the students will be able to:** **CO1:** Describe the organisational structure, workflow, and production types used in garment industries. **C02:** Design simple production line layouts and prepare a basic line plan for any garment. **CO3:** Understand and compare different manufacturing systems such as assembly lines, modular, and section-based systems. **CO4:** Apply Lean tools (5S, Kaizen, Kanban) to improve productivity in apparel manufacturing. **CO5:** Demonstrate practical understanding through hands-on activities such as time study, layout sketching, and packaging exercises.
9	**Pedagogy of the Course Work**	Class Room Lecture, Interactive sessions, PPT, Practical demonstrations and Group Discussions, Case Studies etc.
10	**Course Content**	

BFT-502 (Theory)

UNIT– I

1. Organisational Structure of a Garment Industry: Departments: Sampling, Cutting, Sewing, Finishing, Merchandising, QC
2. Roles: Production Manager, Industrial Engineer, Floor Supervisor, Quality Head
3. WORKFLOW: Pre-production → cutting → sewing → finishing
4. Types of production: Job, Batch, Mass, Fast Fashion

UNIT-II

5. Steps involved in Production Planning: Packaging and Distribution
6. Line Planning- Definition and Importance.
7. Types of layouts: Straight Line, U-line, Modular, Section-Based Assembly

UNIT-III

8. Terminologies related with apparel production and planning: SAM (Standard Allowed Minute) and SMV (Standard Minute Value), WIP (Work in Progress), JIT (just in time) Bottle neck, Critical operations, Productivity, Line efficiency, Throughput time, Lead time, Pitch time, Floaters & helpers.

UNIT-IV

9. Introduction to Lean Manufacturing, Role of lean in improving efficiency & reducing production waste. 7 wastes (Muda), Muri & Mura.
10. Lean practices in apparel industry: Kaizen, Kanban, 5S
11. Introduction to Six Sigma – DMAIC framework (Define, Measure, Analyze, Improve, Control)

BFT- 502P (Practical)

1. CASE STUDY A GARMENT INDUSTRY: Prepare an organisational chart of a garment factory: Include departments & job roles (submit as a chart/diagram)
2. Map the complete workflow of a garment Manufacturing unit (Select a specific product and map its complete production.)
3. Draft line layout diagrams straight line, U-line, Modular, Section-based assembly (Show machine placement & operator positions)

4. Case Study: Lean Manufacturing and 6 Sigma.
5. Kanban Card Design : Create a kanban card for any garment operation.
6. **5S Implementation Activity:** Students organize their workstation/lab using 5S. Submit before/after photos.

BFT-503 (Theory)

UNIT– I

1. Sleeves Terminology- Sleeves Cap, Cap Height, Bicep Level, Sleeve Ease, Cap Ease, Elbow Levels, Wrist Level, Notches.
    a. Types of sleeve: -
        i. Set-in - Plain, Puff, Bell, Cap, Bishop, Lantern, Leg-of-mutton, Peasant,
        ii. Part of bodice – Raglan, drop shoulder
        iii. Extension of bodice – Kimono, Magyar.

2. Sleeves Finishes
    a. Sleeve armhole finishes
        i. Sleeveless Finish,
        ii. Set-In -Sleeve Method,
        iii. Shirt Sleeve,
        iv. Raglan Sleeve Finish,
        v. Kimono Sleeve Finish (with and without gusset)
    b. Sleeve edge/hem Finishes
        i. Cuff Finishes
            1. Cuffs with placket,
            2. Cuffs without placket (band cuff, straight turn back cuff, shaped turn back cuff)
            3. French cuff, contoured cuffs, d) Roll-up cuff ,
        ii. Shaped facing,
        iii. Self-hem
        iv. Bias binding,
        v. Casing
            1. Self-faced casing (with and without heading)
            2. An applied casing

UNIT– II

3. Collars
    a. Collars Terminology- Neckline edge, Collar stand, Roll line, collar edge, Lapel, revere, breakpoint.
    b. Types of Collar and collar applications:
        i. Flat collars- Peter-pan collar, sailors collar, ruffle

ii. Stand collar- Mandarin collar, Collar with stand
iii. Roll collar- Convertible collar, shawl collar, turtle neck

4. Pockets
    a. Size of pockets and their placements
    b. Types of Pocket-
        i. In-Seam Pocket
        ii. Patch Pocket (with pleat, with flap, curved shaped, square shaped)
        iii. Bellow pocket

UNIT– III

5. Zippers
    a. Types of zippers: - Chain, ladder, open-end and invisible
    b. Types of application- centered, lapped, open ended, concealed, Reversible zipper, fly-front
6. Hem Finishes: - Turned-up hem, faced hem, enclosed hem edge, pinked and fused hem, bound hem
7. Waist band: - Straight-cut, Biased-cut; Tie Belt- Tied belts, belts with bows, Ties with bows

UNIT– IV

8. Application of fasteners: -
    a. Buttons- 2-hole, 4-hole, Snap, Hammer-ons.
    b. Buttonholes- Hand finished, Machine finished
    c. Hooks and eyes
9. Application of different types of trimmings- Laces, Pipings, Bindings, Appliqué.

BFT- 503P (Practical)

Project -1 Dart Manipulation using slash and spread method and pivot method-

1. **Basic Adult bodice block-**
    a. Single dart series
    b. Double dart series
    c. Dart clusters
    d. Asymmetrical darts
2. **Basic skirt block/trouser-** Single dart series, Double dart series

Project-2 Application of Fullness and Contouring Techniques-

1. Adult bodice block (any 3)
    a. Empire with shirred midriff
    b. Surplice (or wrap) design
    c. Off shoulder design
    d. Halters with gradient fullness peplum
    e. Strapless with fullness along princes line
2. Choli-cut blouse
3. Kalidaar Kurta with pointed Placket and Inseam pocket

Project -3 Development of Commercial paper patter of the following patterns-

1. Empire with shirred midriff
2. A trouser/ skirt

Project–4 Designing and Construction of a Theme-Based Garment

1. Sketch a technical design of a garment incorporating dart manipulation and style lines.
2. Draft the basic and adapted pattern corresponding to the design.

3. Construct the garment using suitable fabric, ensuring correct layout, cutting, and sewing procedures
4. Develop a standardized commercial paper pattern with appropriate markings, grain lines, notches, seam allowances, and pattern identification details.

COURSE TITLE		ADVANCE DRAPING
1	**Course Code**	BFT – 504P
2	**Typology of Course**	Core Discipline
3	**Course Duration/LP (Lectures) (Practical)**	120 hours of practical Practical credits= 4 (1 credit = 30 hours of practical learning based on 8 hrs./week) (1 Semester= 15 weeks) 2-groups will be created for the purpose of Practical for each unit
4	**Credits**	4 Credits Practical
5	**Max. Marks, Time and Instructions**	<table><tr><th>External Practical</th><th>Internal Practical</th></tr><tr><td>80</td><td>20</td></tr></table> i) The exam of this course will be of 3 hours duration. ii) There will be no objective type questions. iii) Students are required to have the knowledge of the developments in the subject up to 6 months before the examination. iv) Use of non-programmable calculators by the students in the Examination Hall is allowed. The calculators will not be provided by the University/College to the examinees. **Instructions for practical paper setters and candidates:** i) Examiner will set total of four questions covering the whole syllabus. ii) Student will attempt any three questions iii) Each question carries 15 marks. iv) Practical work done during classes carries 30 marks and 5 marks for viva-voce. Practical paper will be conducted by the college in collaboration with the respective experts and marks will be submitted to Panjab University.
6	**Job Role**	Industrial Engineer, Sourcing Manager and Boutique Manager
7	**Course Objective**	1. To demonstrate simplified method of pattern development employed in the industry 2. To experiment with three-dimensional prototypes by means of toile, pins, pleating and gathering
8	**Course Outcomes**	**On successful completion of the course, the students will be able to:** **CO1.** To work directly with fabric on the dress form and bring their creations to life CO2. To understand the technical aspects of the art of fashion draping. CO3. To develop design creativity CO4.To work as a professional designer for women dresses, blouses, jackets and skirts
9	**Pedagogy of the Course Work**	Class Room Lecture, Interactive sessions, PPT, Practical demonstrations and Group Discussions, Case Studies etc.
10	Course Content	

BFT-504P (Practical)

Section A- Preparation, draping, marking and truing of the following:

1. SkirtsVariation (Any two)- Flared , Pleated , Gathered, Gored, skirt with yoke
2. The Midriff and Bodice Yokes
3. Butterfly twist
4. Collars (Any two)- Mandarin, Shirt collar, Convertible Collar, Peter Pan Collar

5. Dropped Armhole Maxi Jacket

Section B -Sketch, Drape & Construct

1. Sketch a garment using features learnt in section A.
2. Drape the design on muslin of suitable weight (≈4-6 oz).
3. Construct the final garment on chosen fabric

11 Suggested Resources for Reading

1. Fashion Draping Techniques Volume 2, Author- Danilo Attardi, Publisher Hoaki Books,S.L.
2. Draping for Fashion Design, Author- Hilde Jaffe and Nurie Relis, Pearson Education

Practical paper will be conducted by the college in collaboration with the respective experts and marks will be submitted to Panjab University.
6	**Job Role**	Industrial Engineer and Sourcing Manager, Boutique Manager
7	**Course Objective**	i. To understand and apply the complete design process for home furnishing and interior textile products. ii. To conduct independent market research, user profiling, and trend analysis for interior textile design. iii. To develop mood boards, color palettes, material boards, and concept visuals for home furnishing applications. iv. To experiment with advanced textile surface techniques and create, evaluate, and refine samples and prototypes.
8	**Course Outcomes**	**On successful completion of the course, the students will be able to:** **CO1.** Conduct market analysis, user profiling, and trend research for home furnishings independently. **CO2.** Execute design development through sketches, CAD work, repeat patterns, sampling, technical testing, and prototype creation. **CO3**. Product Development
9	**Pedagogy of the Course Work**	Class Room Lecture, Interactive sessions, PPT, Practical demonstrations and Group Discussions, Case Studies etc.
10	**Course Content** **BFT – 505P (Practical)**	

Design and Development of a product from product category of home furnishing.

Section A- Market Research & Concept Development

1. **Understanding product categories in the home furnishing sector through:**
    a. Exploration of offline and online home furnishing brands (photographs, sketches, materials and price points).
    b. Study of current interior trends, color schemes, materials and finishes.
2. **Product category selection and design boards-**
    a. Selection of one furnishing product category for prototype development based on market segment and area of use.
    b. Exploration of suitable fabrics, textures, yarns, and finishes for the same
    c. Development of mood board, color palette and material board

Section B – Design Ideation & techniques exploration-

1. Design ideation through **25 concept sketches** for the selected product category
2. Exploration and experimentation with **relevant textile and surface techniques** (minimum 15 samples)
3. **CAD rendering of five finalized designs** with appropriate product mock-ups
4. Preparation of **detailed technical specification sheets** for two finalized designs

Section C– Branding, packaging and costing

1. Development of essential branding elements, including **brand name, logo concept, brand identity, care instructions, brand tags, and product labels**, aligned with the selected home furnishing product category and target market.
2. **Pre-production sheet creation-** Costing methods: Direct cost, Indirect cost, Overheads, Profit margins, Packaging costing. Complete Cost Sheet: Material + labour + overhead, Per-unit selling price according to market segment

Section D – Prototype Development and Evaluation

1. Development of the selected product based on finalized designs with appropriate construction and finishing techniques
2. Preparation of **prototype review sheets** for evaluation, revision, and design refinement

11 Suggested Resources for Reading

		processes, and eco-friendly materials used in green fashion. iii. To create awareness of environmental impacts, carbon footprint, and eco-labeling systems influencing consumer behavior. iv. To impart practical skills in life-cycle analysis, up-cycling, zero-waste practices, and sustainable product development.
8	**Course Outcomes**	**On successful completion of the course, the students will be able to:** **CO1**. Explain core concepts, terminology, and global movements related to green fashion and sustainability. **CO2.** Identify and assess sustainable fibres, fabrics, dyes, labels, and packaging materials used in eco-friendly apparel. **CO3.** Analyze environmental impacts of fashion products through carbon footprint evaluation, eco-labeling systems, and product life-cycle assessment. **CO4.** Design and develop sustainable fashion products using zero-waste, up-cycling, reconstruction, and deconstruction techniques.
9	**Pedagogy of the Course Work**	Class Room Lecture, Interactive sessions, PPT, Practical demonstrations and Group Discussions, Case Studies etc.
10	**Course Content**	

BFT-601 (Theory)

UNIT-I

1. Introduction to Sustainability and its significance in the fashion industry.
2. Terminology related to Green fashion: eco-friendly fabrics, organic clothing, ethical fashion, recycled and up-cycled fibres, slow fashion, ecosystem, fair trade, and green technology.
3. Green fashion movements and organizations promoting sustainable practices.

UNIT II

4. Overview of sustainable fibres and fabrics used in green apparel:
    a. Sustainable natural and vegan fabrics such as organic cotton, recycled cotton, organic hemp, organic linen, organic bamboo (bamboo linen)
    b. Sustainable semi-synthetic (mostly vegan) fabrics such as lyocell, modal, bamboo lyocell, Piñatex, Caffè fiber, cupro, QMilk.
    c. Vegan synthetic fabrics such as Econyl, recycled polyester.
    d. Animal-derived natural fabrics (sustainability dependent on source) such as sheep wool, merino wool, alpaca wool, cashmere, vegetable-tanned leather.
5. Processes employed for the production of green/sustainable apparel
6. Dyes banned by Government of India

UNIT-III

7. Carbon footprints and environmental impact of the textile and apparel industry
8. Green labeling systems and eco labels in sustainable fashion
9. Consumer awareness of green labeling and its influence on purchasing behavior.
10. Eco- Mark and other Indian eco-certification initiatives

UNIT-IV

11. Zero waste fashion
12. Reconstruction, deconstruction and Up-cycling
13. Refashioning and recycling practices of green clothing.

BFT- 601P (Practical)

Project 1- Sustainable Fashion Brands – Global Perspective

1. Research two sustainable clothing or accessory brands from different countries. Examine the sustainable practices, materials, production methods, and ethical approaches adopted by each brand.
2. Analyze the product range and review customer feedback and market perception based on credible online sources.

3. Critically reflect on each brand's sustainability philosophy and evaluate which brand you would prefer to purchase from, providing justification.
4. Develop a concise 6–10 slide presentation highlighting the SWOT analysis of the study findings.

Project 2- Product Life Cycle Analysis in Fashion

1. Select and critically analyze any one fashion-related products (such as clothing, home fashion, interiors, or lifestyle accessories) based on the product life cycle stages: raw material extraction, production, distribution, consumption, and disposal.
2. Evaluate the environmental and sustainability impacts at each stage.
3. **Submit a detailed analytical report and present your research findings through an interactive presentation.**

Project 3- Explore, collect, and create a swatch file of-

1. Sustainable fabrics and materials
2. Sustainable labels and packaging material

Project 4- Up-Cycling and Reconstruction Techniques

1. Transformation of discarded garments into new products
2. Reconstruction and deconstruction exercises
3. Surface design using fabric waste

Project 5- Sustainable Product Design Project

1. Design a sustainable product that considers the main principles of Sustainable production throughout the product lifecycle, from the extraction of raw materials to the final disposal.
2. The project to be tested based on the rigor of research, discursive justification, the craftsmanship of prototype execution, and include reflection on the different sociocultural norms.
3. The prototypes present should be based on Zero fashion, Reconstruction, deconstruction, Up-cycling.

11 Suggested Resources for Reading

1. Green Fashion and sustainability, Edited by Dr Sumita Sikka, Publisher- Abhishek publications, New Delhi, India
2. Sustainable fashion and textiles: Design journeys by Kate Fetcher -Future fashion White Papers by earth pledge
3. Sustainable fashion: New Approaches Kirsi Niinimaki(ed) Aalto university publication series

		and garment evaluation methods. iii. To familiarize learners with international labelling, packaging standards, and eco-certifications in textiles. iv. To equip students with practical skills to identify defects, maintain quality, and apply quality assurance techniques.
8	**Course Outcomes**	**On successful completion of the course, the students will be able to:** **CO1.** To differentiate between QA and QC and explain the role of quality in apparel manufacturing. **CO2.** To Apply 7QC tools and AQL methods to evaluate garment quality. **CO3**. To inspect fabrics, seams, and finished garments using industry procedures. **CO4**. to interpret care labels, international labelling standards, and eco-labelling requirements confidently.
9	**Pedagogy of the Course Work**	Class Room Lecture, Interactive sessions, PPT, Practical demonstrations and Group Discussions, Case Studies etc.
10	**Course Content**	

BFT-602 (Theory)

UNIT– I

1. Definition of Quality, Importance of Quality in Apparel Industry
2. Quality Assurance vs. Quality Control
3. Concept of Total Quality Management (TQM), Principles of TQM.

UNIT– II

4. 7QC Tools: Check Sheet, Cause & Effect Diagram (Fishbone), Histogram, Control Chart, Scatter Diagram, Flowchart, Pareto Chart.
5. AQL (Acceptable Quality Level)
6. Quality Circle

UNIT–III

7. Inspection Procedures: Raw Material Inspection, In-process Inspection, Final Inspection.
8. Four point system
9. Sewing Quality: Stitch types, seam defects, common sewing defects.

UNIT– IV

10. Packaging: Importance, Types and Various Materials used for Packaging
11. Labelling: Importance of Labels and its Types,
12. International Care Labelling System, :Japan/Canada/ British Care Labelling Systems,
13. Eco- Labelling. Concept, Types, Importance, and Major Textile Eco-Certifications such as ECO-MARK, OEKO-TEX, GOTS, and Blue Angl**es**

BFT- 602P (Practical)

1. Preparing a simple quality checklist for apparel inspection.
2. Make any 4 Quality Control Tools (Check Sheet, Cause & Effect Diagram (Fishbone), Histogram, Control Chart, Scatter Diagram, Flowchart, Pareto Chart.)
3. Collect and Make a Scrap book on types Labels and Packaging.
4. Prepare garment labels (content label, care label, size label).
5. Design an Innovative packaging for a Clothing Brand.
6. Identify eco-labels used in textiles

		across media and industries. ii. To develop an understanding of **image consulting principles**, including body types, face types, color theory, and design elements as applied to styling. iii. To equip students with **practical styling skills** through film analysis, public figure research, client styling, wardrobe planning, and capsule collection development. iv. To prepare students for the **professional styling industry** by imparting knowledge of portfolio development, branding, networking, and business aspects of fashion styling.
8	**Course Outcomes**	On successful completion of the course, the students will be able to: **CO1.**Explain the role, scope, terminology, and major specializations of fashion styling **CO2.** Apply image consulting techniques using body shape, face type, and color analysis to develop styling solutions. **CO3.** Develop professional styling projects such as film analysis, public figure styling, client wardrobe planning, and capsule collections. **CO4.** Execute and document styling work for 2D and 3D media
9	**Pedagogy of the Course Work**	Class Room Lecture, Interactive sessions, PPT, Practical demonstrations and Group Discussions, Case Studies etc.
10	**Course Content**	

BFT-603 (Theory)

UNIT– I

1. Concept of Fashion Styling: scope, role of a stylist and common misconception about Styling, What Fashion Styling entails.
2. Main Specialties of Fashion styling:
3. Print Styling
4. Entertainment industry styling
5. Image Management styling
6. Runway styling
7. Food styling
8. Prop Styling
9. Essential tools and resources required by a professional stylist.

UNIT– II

10. Fashion styling terminology- Fashion Public Relation, The Fashion Calendar, Styling Kit Check, Cheat sheet, Shoot etiquette, Personal Shoppers, Celebrity Stylist
11. Personality traits and professional competencies of a Stylist, Key role and responsibilities of Photo stylist

UNIT– III

12. Image consulting: Understanding sizing, body types, and style categories.
13. Basic elements and principles of design with emphasis on color theory and its application in styling.

UNIT– IV

14. Getting established as fashion Stylist: Portfolio building, Branding, Networking strategies.
15. Business aspects of styling: essential business documents, agency representation versus freelancing, and career opportunities in fashion styling.

BFT-603P (Practical)

Project 1- Film based styling analysis

1. Select a film/web series/music video and analyze its fashion styling approach
2. Research the fashion stylist or costume designer associated with the production
3. Analyze all visual elements and sketch character styling based on:
    a. Narrative and character development
    b. Color palette, silhouette, and fabric selection
    c. Accessories, footwear, hairstyle, and makeup
4. Develop **style form boards** categorized into **Classic, Romantic, Dramatic, and Sport styles** (or other relevant themes).

Project 2- Public figure research

1. Select a public figure (e.g., Amal Clooney).
2. Study the individual's:
    a. Background, profession, lifestyle, and public image
    b. Public appearances across professional, formal, casual, and recreational settings
3. Analyze the appropriateness of garments, colors, silhouettes, and accessories for each occasion.

Project 3- Image consulting and visual designs

1. Identification and study of different figure types—Rectangle, Pear/Triangle, Inverted Triangle, Hourglass, and Apple/Round—with reference to appropriate celebrities, analyzing their styling choices in terms of silhouettes, fabrics, colors, and overall appearance.
2. Identification and study of celebrities having different face types with appropriate hairstyle and makeup recommendations
3. Color analysis:
    a. Skin tone identification
    b. Seasonal color palettes
4. Development of visual styling boards for each figure type and theme.
5. Illustrate the Styling of different figure types through preparation of detailed sheets showing:
    a. Suitable fabrics
    b. Color placements
    c. Textures and prints
    d. Silhouettes and garment cuts

Project 4- Client styling, wardrobe planning and capsule collection

1. Create a client profile (age, profession, lifestyle, occasion needs, budget).
2. Plan wardrobe solutions including:
    a. Mix & Match styling combinations
    b. Must-Have garments
    c. Seasonal and occasion-based outfits
    d. Develop a Capsule Collection (10–15 coordinated looks).
3. Illustrate styling solutions tailored to the client's figure and image.

Project 5- Fashion shoot and styling execution (theme based self-styling and model styling)

1. Develop a styling concept for a fashion shoot.
2. Create looks for:
    a. 2D media (print editorials, catalogues, lookbooks)
    b. 3D media (TV, music videos, advertisements)
3. Prepare mood boards and styling plans.
4. Execute styling with garments, accessories, hairstyle, and makeup.
5. Document the shoot process and final styled looks.

BFT – 605P (Practical)

Design and Development of home furnishing range

Section A- Advanced Design Research & Trend Forecasting

1. Move from product design → collection design- **for an export house or a textile designer** Trend Board (A3 or Digital)
2. Deep dive into trend forecasting (WGSN-type methods)-Minimum 25 trend images, 3 micro trends + 1 macro trend
3. Seasonal color palettes (Spring/Summer or Autumn/Winter). Color story (5–7 dominant colors), Texture & material direction
4. Consumer lifestyle & persona mapping Age Group-Home aesthetic, Spending capacity, Cultural influence,
5. Design preference, Market segmentation: luxury, premium, budget, Research on sustainable alternatives

Section B: Collection Planning & Range Development

1. Preparation and development of a **range plan sheet** showing category mix**; d**evelopment of 10 concept sketches along with **details of:**
    a) Material, techniques and surface development (mixed techniques)
    b) Stitch quality and edge finishing (minimum 5 explorations)
    c) **Pre-production sheet creation-** Costing methods: Direct cost, Indirect cost, Overheads, Profit margins, Packaging costing. Complete Cost Sheet: Material + labour + overhead, Per-unit selling price according to market segment
2. Final 4-6 designs selection (with iterative feedback from the industry and mentor)
    a. Fabric consumption calculation-
    b. Tech Pack for Each Product: Flat sketch front/back, Materials list
    Specs sheet, Construction details, Finishing notes
    d) Size charts for international furnishing standards. Technical Size Sheet Compilation: Standard sizes for selected range
3. Sampling refinement

Section C: Production, Costing & Quality Control

1. Final execution and production with Industrial Mentoring
2. Final Jury Presentation: 10-minute pitch, Brand + collection + costing + display

		visual hierarchy and principles. **CO6**: Build a strong digital professional profile that aligns with fashion industry expectations.
9	**Pedagogy of the Course Work**	Class Room Lecture, Interactive sessions, PPT, Practical demonstrations and Group Discussions, Case Studies etc.

10 Course Content

BFT-606P (Practical)

Project 1

1. Creating CV/ Resume – Fashion Industry Format
2. Writing skills: objectives, skills, internships, achievements
3. LinkedIn profile setup

Project 2: Photography Basics

1. Introduction to Mobile Photography: Camera settings: ISO, Exposure, White Balance, Grids,
2. Lighting: natural, artificial, shadows.
3. Composition rules: Rule of Thirds, Golden Ratio, Leading Lines, Framings.
4. Photo Editing

(Submit: 10 well-composed photographs demonstrating the above rules)

Project 3: Fashion & Product Photography + AI Integration

1. Introduction to Fashion Photography: Poses, Beauty shots & close-up portraits, Concept/Theme fashion photography, Background styling.
   (Submit: Beauty Shot Series – 5 edited photos, Fashion Portrait Series – 5 photos, Theme Based Shoot – 8–10 photos with styling)
2. Basics of product photography: Flat lay, Tabletop, White background, Lifestyle product setups.
   (Submit: Product Photography of your own Home Furnishing Products)
3. **AI in photography:** background change, retouching, color correction, layout assistance.
   (AI Editing: 10 photos (background + retouch + enhancement)

Project 4: Layout Design – Photoshop & Illustrator

1. Grid layouts, editorial spreads, single & double-page layouts.
2. Typography.
   (Create 5 layout designs).
3. Look-book sequencing, theme + visual story.
4. Students must upload their final look book on an Online Digital Portfolio Platform.
   (Behance / Dribbble / Wix / Cargo / Instagram etc)
