Course Outline for
B.Voc. (Medical lab Technology)

As per NEP 2020

w.e.f. session2026-27

Course Outline for B.Voc Medical Lab Technology
as per NEP 2020 w.e.f. session 2025-26
Semester-I

Paper Code	Type of Course	Subject Name	Credits			Marks				
			Th	Pr	Total	Ext (Th)	Int (Th)	Ext (Pr)	Int (Pr)	Total
MLT 101	Core Discipline	Basics of Human Anatomy	3	1	4	40	10	40	10	100
MLT 102	Core Discipline	Fundamentals of Microbiology	3	1	4	40	10	40	10	100
MLT 103	Core Discipline	Introduction to Hematology	3	1	4	40	10	40	10	100
AEC / MIL	Ability Enhancement Course	Common Basket			2					50
SEC I	Skill Enhancement Course	Common Basket			3					75
MDSC 101	Multidisciplinary Course	Common Basket			3					75
VAC I	Value-Added Course	Common Basket			2					50
PW I	Project Work	Project Work-I& Viva-Voce	-	2	2	-	-	50	-	50
Total Credits					**24**					**600**

Semester-II

Paper Code	Type of Course	Subject Name	Credits			Marks				
			Th	Pr	Total	Ext (Th)	Int (Th)	Ext (Pr)	Int (Pr)	Total
MLT 201	Core Discipline	Basics of Physiology	3	1	4	40	10	40	10	100
MLT 202	Core Discipline	Basics of Biochemistry	3	1	4	40	10	40	10	100
MLT 203	Core Discipline	Analytical Laboratory Testing Process-I	3	1	4	40	10	40	10	100
AEC / MIL	Ability Enhancement Course	Common Basket			2					50
SEC II	Skill Enhancement Course	Common Basket			3					75
MDSC201	Multidisciplinary Course	Common Basket			3					75
SIT 201*	Internship	Summer Industrial Training (SIT)*	-	4	4	-	-	100	-	100
Total Credits					**24**					**600**

Job Role –Medical Lab Technician

*SummerIndustrialTrainingof2-4weeksinarelevantIndustryafter2nd SemesterExaminations during summer break. Training report by the student to be submitted within oneweek of start of 3rd Semester. Viva-Voce examination to be held within 3weeks of the start of 3rdsemester.

** Minimum Credits required to get Certificate Course in Medical lab technology= 48 + 4 #.

#Exit 1: Certificate Course-Student can exit after completion of 1st year having secured 48 Credits and will be awarded a UG Certificate provided they complete a vocational course/internship of 4 credits during the summer vacation of the first year, in addition to the 6 credits from skill enhancement courses earned during first and second semester.

Semester-III

Paper Code	Type of Course	Subject Name	Credits			Marks				
			Th	Pr	Total	Ext (Th)	Int (Th)	Ext (Pr)	Int (Pr)	Total
MLT 301	Core Discipline	Introduction to Parasitology and Medical Entomology	3	1	4	40	10	40	10	100
MLT 302	Core Discipline	Introduction to Laboratory Equipments	3	1	4	40	10	40	10	100
MLT 303	Core Discipline	Bacteriology, Mycology and Virology	3	1	4	40	10	40	10	100
AEC / MIL	Ability Enhancement Course	Common Basket			2					50
SEC I	Skill Enhancement Course	Common Basket			3					75
MDSC 301	Multidisciplinary Course	Common Basket			3					75
VAC I	Value-Added Course	Common Basket			2					50
PW II	Project Work	Project Work-I& Viva-Voce	-	2	2	-	-	50	-	50
Total Credits					**24**					**600**

Semester-IV

Paper Code	Type of Course		Credits			Marks				
			Th	Pr	Total	Ext (Th)	Int (Th)	Ext (Pr)	Int (Pr)	Total
MLT 401	Core Discipline	Clinical Laboratory Management	4		4	80	20	-	-	100
MLT 402	Core Discipline	Introduction to Histopathology	3	1	4	40	10	40	10	100
MLT 403	Core Discipline	Introduction to Cytopathology	3	1	4	40	10	40	10	100
MLT 404	Core Discipline	Microbiology-I	3	1	4	40	10	40	10	100
AEC / MIL	Ability Enhancement Course	Common Basket			2					50
VAC III	Value-Added Course	Common Basket			2					75
SIT II*	Internship	Summer Industrial Training (SIT)*	-	4	4	-	-	100	-	100
Total Credits					**24**					**600**

Job Role – Medical Lab Technician

*Summer Industrial Training of 2-4 weeks in a relevant Industry after 4th Semester Examinations during summer break. Training report by the student to be submitted within one week of start of 5th Semester. Viva-Voce examination to be held within 3 weeks of the start of 5th semester.

Semester-V

Paper Code	Type of Course	Subject Name	Credits			Marks				
			Th	Pr	Total	Ext (Th)	Int (Th)	Ext (Pr)	Int (Pr)	Total
MLT 501	Core Discipline	Introduction to Medical Technology Healthcare Systems	4		4	80	20			100
MLT 502	Core Discipline	Clinical Biochemistry-I	3	1	4	40	10	40	10	100
MLT 503	Core Discipline	Introduction to Biochemical Techniques	3	1	4	40	10	40	10	100
MLT 504	Core Discipline	Serology : Introduction & Serological Lab Procedures	3	1	4	40	10	40	10	100
MLT 505	Core Discipline	Introduction to Immunology	3	1	4	40	10	40	10	100
VAC 4	Value-Added Course VAC	VAC			2					50
PW II	Project Work	Project Work-I& Viva-Voce			2					50
Total Credits					**24**					**600**

Semester-VI

Paper Code	Type of Course	Subject Name	Credits			Marks				
			Th	Pr	Total	Ext (Th)	Int (Th)	Ext (Pr)	Int (Pr)	Total
MLT 601	Core Discipline	Safe Laboratory Practices	4	-	4	80	20			100
MLT 602	Core Discipline	Sensitization to Blood Banking and Infection Control	4	-	4	80	20			100
MLT 603	Core Discipline	Microbiology -II	3	1	4	40	10	40	10	100
MLT 604	Core Discipline	Clinical Biochemistry-II	3	1	4	40	10	40	10	100
MLT 605	Core Discipline	Hematology	3	1	4	40	10	40	10	100
MLT 606	Core Discipline	Introduction to Quality and Patient safety	4	-	4	80	20			100
Total Credits					**24**					**600**

Project Work to be undertaken after 5th Semester Examinations during winter break. Project report by the student to be submitted within one week of start of 6th Semester. Viva-Voce examination to be held within 3-weeks of the start of 6th semester.

PROGRAMMEOUTCOMES

PO1. Demonstrate technical skills, social behavior and professional awareness for functioning effectively as a laboratory technician.

PO2.Recognize the impact of laboratory tests in a global and environmental context.

PO3Apply knowledge and technical skills associated with medical laboratory technology for delivering quality clinical investigations support.

PO4: Perform routine clinical laboratory procedures within acceptable quality control parameters in hematology, biochemistry, immunohematology and microbiology.

PO5: Demonstrate technical skills, social behavior and professional awareness for functioning effectively as a laboratory technician.

PO6: Operate and maintain laboratory equipments utilizing appropriate quality control and safety procedures.

PO7: Communicate effectively by oral, written and graphical means.

PO8: Function as a leader / team member in diverse professional and industrial research areas.

PO9: Function in an ethical and professional manner without bias against any ethnicity, race, religion, caste or gender.

PO10: Practice professional and ethical responsibilities with high degree of credibility, integrity and social concern.

Semester I

<table>

PPT, Practical and Group Discussions, Case Studies etc.</td></tr>
<tr><td>11</td><td>Instructions for paper setters and candidates</td><td>1. The syllabus of this paper has been divided into FOUR units.
2. Examiner will set a total of NINE questions comprising two questions from each unit, including Question No. 1 (compulsory) of short answer type covering the whole syllabus.
3. The students are required to attempt one question from each unit and the entire Compulsory Question No. 1.
4. All questions carry equal marks.</td></tr>
</table>

12 Course Content

Credits 3
Theory: 40
Internal Assessment: 10
Total Marks: 50

UNIT I

• Basic unit of body - Cell
• The anatomical organization of body cells, tissues, organs, organ systems.
• Introduction to different types of tissues: Epithelial Tissue, Muscular Tissue, Nervous Tissue
Brief Introduction of different types of body fluids ,secretions and excretions
• Skeletal system: bones and joints

UNIT II

Digestive Organs:
• Tongue
• Teeth
• Oral cavity
• Stomach
• Small intestine
• Large intestine
• Liver, Pancreas and Spleen

UNIT III

Respiratory Organs:
• Pharynx
• Larynx
• Trachea
• Bronchi
• Lungs
• Thoracic cavity
• Pleura and Pleural cavity
Circulation System: Structure of Heart and Brief introduction of main blood vessels.

UNIT IV

Reproductive Organs Male and Female Gonads
Nervous system and Sense organs : Brief Introduction of Central Nervous System and Peripheral Nervous System
Anatomy of Brain , Spinal Cord, Nerves, Eye, Ear
Excretory Organs:
• Cortex and medulla of Kidney
• Ureter
• Urinary Bladder
Urethra (male and female)

PRACTICAL

Credits 1
Practical: 40
Internal Assessment: 10
Total Marks: 50

To Study of various organ systems through Charts and Models

13 Suggested Resources for Reading

1. Anatomy & Physiology: Ross and Wilson
2. Anatomy and Physiology: N Murgesh
3. Anatomy and Physiology for nurses: Evelyn Pearce
4. Anatomy and Physiology for nurses : Sears
5. Anatomy and Physiology for nurses : Pearson
6. Human Anatomy: Harie R. Berasari

</table>

UNIT I

- **Introduction and brief History, development, scope and applications of Microbiology.**
- **Nature of Microbial World : Prokaryotes and eukaryotes, growth pattern in microbes**
- **Morphology and Structure of Microorganisms**
- **Growth and nutrition of microbes**
- **Safety measures in microbiology.**

UNIT II

- **Morphology, General characteristics & fine structure of bacteria, fungi, actinomycete and algae**
- **Classification of bacteria.**
- **Organization of cell wall, cell membrane, flagella and capsules in bacteria.**
- **Morphogenesis in bacteria, formation of spores and cysts.**

UNIT III

- **General characteristics actinomycete and algae**
- **Morphology, General characteristics and classification of pathogenic fungi.**
- **Classification and general properties of Viruses**
- **Morphology, Pathogenicity and laboratory diagnosis of human viruses.**
- **Bacteriophages: Morphology, multiplication, detection and enumeration.**

UNIT IV

- **Methods of Microbiology isolation of pure cultures, theory and practice of sterilization.**
- **Staining of microbes, Theory of Gram staining.**
- **Preparation, uses and standardization of culture media.**
- **Principles of staining methods and preparation of reagents.**
- **Principles and methods of sterilization.**
- **Uses and mode of action antiseptics and disinfectants.**

PRACTICAL

Credits 1
Practical: 40
Internal Assessment: 10
Total Marks: 50

- **Use of microscope in examination of unstained bacteria, fungi, algae, parasites and stained cell preparations including simple staining,**

- **Gram's staining, acid fast staining, capsule staining, spore staining using prokaryotic and eukaryotic cells, hanging drop preparation.**

- **Preparation of culture media, spread plates, pour plates, selective media, differential media**
- **Separation of pure cultures**

13 Suggested Resources for Reading

1. **Mims' Medical Microbiology Richard Goering, Hazel Dockrell , Mark Zuckerman , Ivan M. Roitt , Professor Peter L. Chiodini Publisher Elsevier Health Sciences**
2. **Ananthnaryans and Paniker's Text book of Microbiology edited by CKJ paniker 7th edition,Publisher Orient Longman**

3. **Roitt's Essential immunology Delves, Peter J.,Martin, seamusJ.Burton,DennisR.Roitt, Ivan M Ananthanarayan and Paniker'sTextbookof microbiology Kapil , artied**
4. **Microbiology: an Introduction,12th edition Gerard J. TortoraBerdell R. Funke and Christine L. Case**
5. **Parasitology Chatterjee K.D.**
6. **Microbiology Pelczar, Michal J and Others**
7. **Medical microbiology Greenwood David and Other**
8. **Ananthanarayan and Panikar's text book of Microbiology Artikapil**
9. **Immunology Male David and Other**
10. **Mackie and Mc Cartney practical Medical Microbiology Collee J.G and Other**
11. **Bailey and Scott's Diagnostic Microbiology,13th edition Patricia Tille**
12. **Sherris Medical Micrbiology , 6th edition Pottinger, L. Barth Reller and Charles R. Sterling**
13. **Stephenson Calculations for Molecular Biology**
14. **Gerald Karp Cell Molecular Biology**

Medical Informatics Mohan Bansal **Note: Latest edition of text books may be used.**

</table>

12 Course Content

Credits 3
Theory: 40
Internal Assessment: 10
Total Marks: 50

UNIT I

- Introduction to hematology and laboratory organization Composition and functions of blood and lymph.
- Detailed study of Hemoglobin and its functions of hemoglobin
- Blood groups including Rh. Factor
- Detailed study of Reticulocytes
- Formation of blood. Morphology of normal blood cells and their identifications
- Hemostasis, Mechanism of blood coagulation. Fibrinolysis.

UNIT II

- Various anticoagulants, their uses, mode of action and their merits and demerits. Normal and absolute in hematology.

UNIT III

- Descriptive study of RBC abnormalities, Disorders related to RBC Normal white cell count & physiological variation Normal white cell count & physiological variation Hematological Diseases: Anemia and various types of anemia, Thalassemia, Polycythemia, hemolytic disease of new born, multiple myeloma, parasitic infections of blood Leukemia: definition and classification (General & FAB).

UNIT IV

- Laboratory Investigation & Bleeding Disorders
- Laboratory preparation for coagulation tests, Routine coagulation tests, prothrombin time , plasma recalcification time ,partial thromboplastin time , activated partial thromboplastin time, thrombin time, Laboratory diagnosis of bleeding disorders .

PRACTICAL

Credits 1
Practical: 40
Internal Assessment: 10
Total Marks: 50

1. **Cleaning of Laboratory glassware in hematology**
2. **Clinical significance, specimen collection, laboratory investigation & preservation of blood for various hematological investigations.**
3. **Preparations of blood smear.**
4. **Haemocytometery, procedures for cell counts-visual as well as electronic**
5. **Total leukocyte count and Differential leukocyte count.**
6. **Determination of total erythrocyte(RBC) count and platelet counts. Errors involved and mean to minimize such errors. .**
7. **Haemoglobinometery, various methods of estimation of Hb, errors involved and standardization of instrument for adaptation for Hb estimation.**
8. **Romanowskydyes , preparation and staining procedures of blood smears.**
9. **Laboratory tests for assessing bleeding disorders**

13 Suggested Resources for Reading

1. **Atlas of haematology (5/e) G.A. McDonald**
2. **Clinical Haematology Christopher A. Ludlam**
3. **Practical Haematology J.B. Dacie**
4. **Practical Haematology (8/e) S ir John**
5. **Haematology (International edition) Emmanuel C.Besa**
6. **Haematology (Pathophysiological basis for clinical practice (3/e) Stephen M. Robinson**
7. **Haematology for students Practitioners RamnikSood**

8. **Hand book of Medical Laboratory Technology (2/e) V.H. Talib**

Note: Latest edition of text books may be used.

</table>

12 Course Content

Credits 3
Theory: 40
Internal Assessment: 10
Total Marks: 50

UNIT I

- Nutrition- Different types of Nutrients and Vitamins
- Digestive system: Physiology of digestion of food and its absorption.

UNIT II

- Excretory System: Urine formation, osmoregulation and counter current mechanism.
- Cardiovascular system: Origin and regulation of heart beat, cardiac cycle, electrocardiogram, cardiac output, blood pressure and micro-circulation.

UNIT III

- Respiratory system- Transport of O2 and CO2, Oxygen dissociation curve of hemoglobin, Bohr effect, chloride(-) shift, Haldane effect
- Muscular System: Ultra structure and physiological basis of skeletal muscle contractions.
- Reproductive System- Brief Introduction to Female Reproductive System and Male Reproductive System

UNIT IV

- Neural Physiology- Structure of neuron, resting membrane potential, origin and propagation of impulse along the axon, synapse and myoneural junction.
- Endocrine System- Structure, and functions of hormones of thyroid, parathyroid, adrenal, pineal, hypothalamus, pituitary, pancreas, gonads, thymus.
- Hormones of alimentary canal

PRACTICAL

Credits 1

Practical: 40
Internal Assessment: 10
Total Marks: 50

- **To Study of body systems mentioned in theory through Charts.**
- **To demonstrate the separate the plasma and serum from given blood sample.**
- **To study of various endocrine glands through permanent slides /Charts.**

</table>

12 Course Content

Credits 3
Theory: 40
Internal Assessment: 10
Total Marks: 50

UNIT I

- Elementary Knowledge of Inorganic Chemistry: Structure of atom, atomic weight, molecular and equivalent weight. Acids, bases and salts. Acid Base Balance, pH, pH indicators pH-measurement (pH meter, pH paper, universal indicator). Normality, Molarity and Molality, Mole, Molar solutions, normal solutions, buffer solutions, percent solutions, saturated solutions, standard solutions
- Radio isotopes and their use in Biochemistry

UNIT II

- Elementary Knowledge of Organic Chemistry: Organic compounds, aliphatic, aromatic, alcohol, ethers, phenols, acids, etc.
- Elementary Knowledge of Physical Chemistry- Osmosis, osmotic pressure, dialysis, surface tension, diffusion, hypotonic, hypertonic and isotonic solutions. Definition and classification of some colloids and crystalloids.

UNIT III

- Elementary Knowledge of Analytical Chemistry: balances- monopan, twopan, toppan, centrifuges, pH meter, colorimeter, spectrophotometer, fluorimeter, flame photometer, ion selective electrodes, urinometer, chromatograph, electrophoresis, densitometer.
- Basic Steps of Analytic Techniques titrimetry ,photometry, Electrochemistry, Immuno - chemistry

UNIT IV

- Introduction and properties of carbohydrates, proteins and fat.
- Introduction and general properties of Nucleic acids and Enzymes
- Elementary knowledge of Minerals, Electrolytes and hormones
- Therapeutic Drug Monitoring
- Metabolism of carbohydrates, proteins and fat.

Practical

Credits 1
Practical: 40
Internal Assessment: 10
Total Marks: 50

1. **Preparation and storage of distilled water**
2. **Preparation of laboratory reagents and standard solutions, storage of chemicals.**
3. **Units of measurements. S.I. Units, measurement of volume, volumetric apparatus.(pipettes,**
4. **flasks, Cylinders)**
5. **Preparation and standardization of volumetric solutions**
6. **Preparation of buffer solution and measurement of their pH**
7. **To prepare the different concentration of solutions**
8. **To prepare of the 1/10 N HCL**
9. **To find out the normality of given solution**

13 Suggested Resources for Reading

1. **A guidebook to Biochemistry Michael Yudkin**
2. **A Manual of Laboratory & Diagnostic Tests (6/ e) Frances Fischbach**
3. **Biochemistry Voet and Voet**
4. **Biochemistry Stryer**
5. **Biochemistry U. Satyanarayan. & U. Chakrapani**
6. **Clinical Biochemistry Richard Luxton**
7. **Clinical Diagnosis & Management by Laboratory method0 (20/e) John Bernard Henary**
8. **Clinical Biochemistry G. Guru**
9. **Handbook of Biochemistry M.A. Siddique**
10. **Textbook of Medical Biochemistry S. Ramkrishnan**
11. **Biochemical Techniques K. Choudhary**
12. **Text book of Medical Biochemistry Chaterjee&Shinde**
13. **Principles of Biochemistry David L. Nelson**
14. **Textbook of Biochemistry and Human Biology G.P. Talwar**
15. **Textbook of Medical Laboratory Technology Godkar and Godkar**
16. **Outline of Biochemistry Conn Stumpf**
17. **Principles of Internal Medicine Isselbacher**
18. **Proteins and Proteomics : Laboratory Manual Richard J. Simpson**
19. **Purifying Proteins for Proteomics: Laboratory Manual Richard J. Simpson**
20. **Enzymes: Biochemistry, Biotechnology & Clinical chemistry, (2001) Palmer Trevor, Publisher: Horwood Pub. Co., England.**
21. **Outlines of Biochemistry: 5th Edition, Erice Conn & Paul Stumpf ; John Wiley and Sons, USA**
22. **Fundamentals of Biochemistry. 3rd Edition (2008), Donald Voet& Judith Voet , John Wiley and Sons, Inc. USA**
23. **Lehninger, Principles of Biochemistry. 5th Edition (2008), David Nelson & Michael Cox, W.H. Freeman and company, NY.**
24. **Biochemistry: 7th Edition, (2012), Jeremy Berg, LubertStryer, W.H.Freeman and company, NY**
25. **Biochemical Methods for Agricultural Sciences – Sadasivam and Manikam. Wiley Eastern Limited, 1992..**
26. **Practical Clinical Biochemistry Harold Varley, CBS; 6 edition (1 December 2006)**
27. **An Introduction to Practical Biochemistry (3rd Edition) – David T Plummer. Tata McGraw-Hill Publishing Company Limited, 1992.**
28. **Biometrics Identity by Sameer Nanawati**
29. **Medicinal Chemistry by AshutoshKar**

Note: Latest edition of text books may be used.

4. All questions carry equal marks.</td></tr>
</table>

1 Course Content

Credits 3
Theory: 40
Internal Assessment: 10
Total Marks: 50

UNIT I

- Collection and recording of biological specimens, Collection ,Handling and transportation of Blood Sample,
- Correct method of blood sample collection, Collection methods of samples other than blood samples.
- Examinations of sample for serum Urea and Uric acid.
- Determination of blood sugar level of plasma (or serum) (a) Orthotoluidine method, (b) Glucose oxidase method Determination of the serum urea nitrogen (a) Diacetyl monoxime method Determination of serum creatinine : Alkaline picrate method Determination of serum total cholesterol

UNIT II

- Determination of serum bilirubin a.Malloy and Evelyn b.DMSO method
- Determination of TSH Laboratory investigation for megaloblastic anaemia
- Platelet function tests and their interpretation
- Estimation of Essential electrolytes: Sodium, potassium, calcium, chloride and phosphorus etc.

UNIT III

- Erythrocyte sedimentation rate, factors influencing ESR and various procedures for its estimation with their significance. Haematocrit value by macro and micro methods their merits and demerits. Determination of pack cell volume (PCV) Physiological variations in HB, PCV, TLC and platelets
- Determination and calculation of red blood indices MCH,MCH,MCHC
- Determination of absolute Eosinophil count and Reticulocyte count
- Enumeration of formed elements, Automated systems in hematology

UNIT IV

Urine Examination

- Collection, Handling, transportation of Urine
- Examination of Urine.
- Urine analysis, routine examination of urine(physical examination of urine) rapid chemical tests of Urine
- Determination of specific gravity of urine by urinometer and refractormeter
- Microscopic examination of urine
- Clinical significance and Detailed Examination of Urine
- Biochemical Test Profile (Quantitative determination of Urine)
- Amylase, Calcium, Chlorides, Creatinine, Sodium, Potassium, Glucose, Proteins, Urea nitrogen, uric acid bile pigments, ketone bodies, porphobilinogen, faecal occult blood.

Practical

SECTION I

- **General characters and classification of protozoa of medical importance.**
- **Morphology and life cycles of intestinal Protozon-Amoebic-Giardia.**
- **Laboratory diagnosis of intestinal protozonal infection:- Amoebae-Giardia**
- **Morphology and diagnosis of oral and vaginal flagellates -Trichomonas, - E.gingvalia**
- **Morphology and life cycle of Haemoprotozoa - Malarial Parasite - Laboratory diagnosis of Malarial infection**

SECTION II.

- **Morphology and life cycles of Nematodes (Intestinal) -Ascari -Enterobions - Ancylostoma - Strongyloides- Laboratory diagnosis of intestinal Nematode infection.**
- **Morphology and life cycle of Haemoflagellates. -Leishmania-Trypansomes, Laboratory diagnosis of Leishmania, Trypanosomes.**
- **Morphology and life cycle of tissue and blood nematodes –Filaria –TrichinellDracuncullus**
- **Lab. Diagnosis of tissue & blood nematode infection. Morphology and life cycle of intestinal cestodes -Taenia-Echinococcus -H.nana-D. latum**
- **Laboratory diagnosis of cesstode infection -Hydatid-Cysticercosis**
- **Life cycle, pathogenic, mechanisms and control of parasitic infections viz. amoebiasis, Kala-azar, toxoplasmosis, ascariasis, filarasis, hook worm infections.**

SECTION III

- **Culture techniques for protozon amoeba, Glardia, Leishmania**
- **Culture methods for Helminths Hookworm round worm.**
- **Egg counting techniques.**
- **Preparation of stains and staining procedures of malaria.**
- **Identification of different plasmodium species.**
- **Preparation of media and maintenance of cultures of E. histolytica.-Giardia -Leishmania**
- **Culture methods for helminthes**
- **Putting up Casoni's test and its interpretation.**
- **Examination of hydatid cyst and processing for preparation of antigen for Casoni's Test.**
- **Examination and processing of Cysticercosis cyst.**

SECTION IV

- **Introduction to Entomology Identification of Adultworms- mosquitoes, flies, ticks and fleas**
- **Animal care, handling and uses in parasitology.**
- **Preparation of parasitic antigens, antigens and antisera**
- **Handling and operating of sophisticated equipment**

Laboratory processing, staining and examination of samples

Practical

Credits :1
Practical: 40
Internal Assessment: 10
Total Marks: 50

1. **Introduction to operation of laboratory instruments and safety precautions.**
2. **Macroscopic examination of adult worms, cysts, tissues and processing of stool sample for routine examination.**
3. **Saline preparation for protozoan cysts and trophozoites.**
4. **Concentration procedures for helminthic ova and cyst. Examination and identification of ova and cyst of parasites of medical importance.**
5. **Study of malarial parasite.**
6. **Laboratory diagnosis of kalaazar.**

7. **Detection of trypanosomes(the causal agent of sleeping sickness)**
8. **Laboratory diagnosis of microfilaria(Wuchereriabancroftii)**
9. **Quantitative determination of serum (or plasma) igG class antibodies to toxoplasma gondii by ELISA**
10. **Determination of IgM class antibodies to toxoplasma gondii by ELISA**

</table>

Credits: 3
Theory: 40
Internal Assessment: 10
Total Marks: 50

Section I

- **Brief understanding of laboratory planning and laboratory key learning outcome operations.**
- **Laboratory safety rules, hazards and precautions**
- **Handling and Disposal of laboratory waste (Chemical and Biological)**
- **Storage and handling of Chemicals.**
- **Laboratory Equipment and their Principles &working: Colorimeter, Autoclave, Centrifuge, Spectrophotometer, Weighing Balance, pH meter, distillation apparatus, Incubator, Hot Air Oven, Water Bath , Anaerobic Jar, , burettes & pipettes , neubauer's Chamber .**
- **Setting up, calibrating and validating, operating, cleaning, maintaining, troubleshooting of laboratory equipment used in quantitative or qualitative analysis**

Section II

- **Techniques of Disinfection**
- **Sterilization: General Principle and methods of Sterilization of glassware & other laboratory instruments**
- **Sterilization of rubber goods, laboratory equipment & other instruments**
- **The cleaning and maintenance procedures of the machine**
- **Identify the cause of errors or other problems or defects in equipments**
- **Glassware – Description of Glassware, its use, handling and care**
- **Importance and methods of cleaning of glass apparatus**
- **Calibration of apparatus and glassware**

Section III

- **Compound microscope: Parts & working**
- **Microscopy, working principle, maintenance and applications of various types of microscopes:-**
    - **Dark ground microscope.**
    - **Polarizing microscope.**
    - **Phase contrast microscope.**
    - **Interference microscope.**
    - **U.V. light microscope.**

SECTION IV

- **Microscopic examination of micro-organism, bright field microscopy, dark field microscopy, phase contrast microscopy, electron microscopy.**
- **Electron microscope: working principle, components and allied techniques for electron microscopy, ultra-microtomy Care and handling of various microscopes-Binocular, DGI, Phase-contrast, fluorescence and electron microscopes**
- **Museum techniques**
- **Lab safety and Instrumentation**

Practical

Credits :1
Practical: 40
Internal Assessment: 10
Total Marks: 50

- **Demonstration of the use of autoclave, centrifuge and spectrophotometer**
- **Cleaning and sterilization of glassware.**
- **Study of the parts of compound microscope.**
- **Using pH meter**
- **Demonstration of setting up, calibrating, operating, cleaning, maintaining, troubleshooting of laboratory equipment used in quantitative or qualitative analysis mentioned in theory paper.**
- **To Calibrate and Validate the Clinical Laboratory instruments and glass wares**
- **To understand Microscopy, working principle, maintenance and applications of various types of microscopes.**

12 Course Content

Credits: 3
Theory: 40
Internal Assessment: 10
Total Marks: 50

Section I

IDENTIFICATION OF BACTERIA:

- **Micrococci, Staphylococci, Streptococci, pneumococci, Corynebacteria, Escherichia, Klebsiella,**
- **E-coli, Enterobacter, Proteus- providencia Salmonella, Citrobacter, Yersinia,**
- **Pseudomonas, Vibrio, Haemophilus, Mycoplasma, Ricketssia, Chalmydia.**
- **Introduction to important diseases caused by Streptococcus, Pneumococcus, Neisseria, Corynebacterium, Bacillus ,Clostridium tetani, Clostridium perfringens, enterobacteriaceae (Proteus, Shigella, Salmonella), Vibrio cholerae, Yersinia, Hemophilus, Mycobacterium, The operative pathogenic mechanisms, laboratory diagnosis, prevention and control of these diseases.**
- **Systematic grouping of pathogenic bacteria.**
- **Laboratory identification of infectious agents, Diagnosis of anaerobic infections ,idenifying characteristics of common pathogenic bacteria,Antimicrobial susceptibility test. IMViC, Urease, catalase, geletineliquification, coagulase, oxidase, sugar fermentation, antibiotic sensitivity test.**

Section II

PATHOGENIC AND NEW-PATHOGENIC FUNGI:

- **Introduction to Human mycotic infections vizCryptococcosis, Dermatophytosis, Blastomycosis, Opportunisitc Mycosis; Candidiasis and Aspergillosis.**
- **Candida, Cryptococci, Dermatophytes, Sporotrichoums, Histoplasma, Blastomyces, Coccidioides, Para-coccidiodes, Dematiaceous fungi, Mycetoma, Actinomyces, Nocardia and common laboratory contaminants. Biochemical tests used for identification of bacteria and fungi.**
- **Preparation and standardization of antigens and antisera.**
- **Lab diagnosis of fungal infections Superficial dermatophyte fungal infections, Candidiasis, creptococosis, Pulmonary infections, Mycetoma, other deep mycotic infections, subcutaneous fungal infections subcutaneous fungal infections spozotrichosis, chromoblastomycosis, Eye and Ear fungi infections**

Section III

VIROLOGY:-

- **Chemotherapy of Viral diseases, Oncogenic Viruses, RNA/DNA Viruses,AIDS, Miscellaneous viruses,**
- **Structure of viruses, lysogenic cycle, lytic cycle, smallpox, polio, HIV,Hepatitis B**
- **Morphology, pathogenesis, life cycle, laboratory diagnosis, prevention and control of viral diseases viz. Rabies, Polio, Small pox, Herpes, Measles, Influenza and AIDS**
- **Introduction to use of different laboratory instruments and their safety precautions. Principles of biosafety hoods use of pipettes, syringes and other virus contaminated**
- **Washing, cleaning and sterilization of Media and glassware in Virology.**

Section IV

- **Instruments in the laboratory. Mode of transmission of viral agents. Prevention of viral diseases. Immunity in viral infection**
- **Collections, handling, and storage of samples for viral diagnosis. Demonstration of preservation of viruses, viral antigens, infects biological materials and viruses.**
- **Different staining techniques used in virology.**
- **Use of Embronated eggs in clinical Virology.**
- **Principles of animal cell culture and their use in virology.**

Practical

Credits :1
Practical: 40
Internal Assessment: 10
Total Marks: 50

1. Demonstration of staining procedures: Preparation of the following stains and demonstration of viral inclusion bodies:
a) Seller's stain for Negri body demonstration.
b) Giemsa Stain for CMV and Herpes viral inclusions.
2. Preparation of reagents for serological tests:
Phosphate buffered saline,Veronal buffered saline, Alsever's solution and Tris buffer.
3. Principles and performance of viral haemagglutination and Haemagglutination inhibition test.
4. Demonstration of Haemadsorption test, IHA, and RPHA tests.
5. Demonstration of complement fixation test.
6. Demonstration of Immunofluorescence test and lmmunoperoxidase test.
7. Demonstration of ELISA for HbsAg detection.

Section I

- **Organization of Laboratory**
- **Functional components of clinical laboratories,(cleanliness, precautions to be taken WRT patients ,reports, analysis**
- **Communication between physician ,patients, and the medical laboratory professional**
- **Basic needs of clinical laboratory technician, awareness of soft skills**
- **How to deal with various people.**
- **Principles and processes for providing customer and personal services including needs assessment techniques**
- **Quality service standards, alternative delivery systems, and customer satisfaction evaluation techniques**

Section II

- **Observing and reporting**
- **Quality control of clinical investigations, Automation in clinical biochemistry laboratory, laboratory organization**
- **Management and maintenance of records.**
- **Understand the importance and method of Observing and reporting while dealing with patients during sample and report collection**
- **The relevant legislation, standards, policies, and procedures followed in the Organization**
- **Role and importance of assisting other healthcare providers in delivering care**
- **Supervise and guide other laboratory personnel**
- **Manage people/patient effectively as per the guidelines.**
- **The principles of leadership and guidance.**
- **Importance and method of Observing and reporting while assisting the pathologists and other members of the team**
- **Importance of verbally informing the person in authority**
- **Research procedures and protocol:**
- **The process of generating or using different sets of rules to combine or groupthings in different ways**

Section III

- **Documentation**
- **Guidelines for documentation , Guidelines for Collecting documentation**
    - **Various types of records in laboratory set up**
- **Uses and importance of records in laboratory set up**
    - **Essential requirement of records**
    - **Understand abbreviations and symbols**
    - **Enter, transcribe, record, store, or maintain information in written or electronic/magnetic form**
- **Usage of LMIS(Laboratory information management system)**

Section IV

- **Professional Behavior in Healthcare Settings**
- **How to maintain restful environment , Business, mission, and objectives of the organization**
  - **General and Specific etiquettes to be observed on duty**
  - **Understand need for compliance of organizational hierarchy and reporting**
  - **legal and ethical issues**
  - **Importance of conservation of resources in laboratories**
- **Effective working relationships with the people ,The importance of planning, prioritizing and organizing work, Efficient use of time, Importance of keeping the work area clean and tidy**

12 Course Content

Credits: 3
Theory: 40
Internal Assessment: 10
Total Marks: 50

SECTION I

- **Introduction to histopathology and laboratory organization.**
- **Elementary knowledge of sample collection**
- **Reception, recording and labelling of histology specimens.**

SECTION II

- **Fixation and various tissue fixatives.**
- **Processing of histological tissues for paraffin-embedding.**
- **Embedding and embedding media.**

SECTION III

- **Microtome-various types, their working principle and maintenance.**
- **Microtome knives and knife sharpening.**
- **Practical section cutting, cutting faults and remedies.**
- **Routine staining procedures, mounting and mounting media.**

SECTION IV

- **Dye chemistry, theory and practice of staining.**
- **Solvents mordents, accelerators and accentutators.**
- **Metachromasia and metachromatic dyes.**
- **Haematoxylin stain. Its importance in histology.**
- **Carbohydrates and amyloid – special stains and procedures.**
- **Connective tissues trichrome staining and other special stains for muscle fibres, elastic, reticulinfibres and collagen fibers.**
- **Principles of metal impregnation techniques.**
- **Demonstration and identification of minerals and pigments**
- **Elementary knowledge of Decalcification**

Practical

Credits :1
Practical: 40
Internal Assessment: 10
Total Marks: 50

1. **Tissue processing by using tissue processor**
2. **Sharpening of the microtome knife**
3. **Gross examination and fixation of the specimen**
4. **Decalcification of calcified tissue**
5. **Processing of the tissue by manual method**
6. **Section cutting of paraffin wax embedded tissue**
7. **To fix the section on the slide**
8. **Staining of the tissue section by using hematoxylin and eosin staining method**

</table>

12 Course Content

Credits: 3
Theory: 40
Internal Assessment: 10
Total Marks: 50

SECTION I

- **Cytoplasmic constituents and their demonstration**
- **Brief introduction of cytology and cytopathology**
- **Elementary knowledge of sample collection and transportation**
- **Exfoliative Cytology-Specimen Preparation**
- **Elementary knowledge of precautions to be taken for gynecological samples**
- **Elementary knowledge of specimen collection transportation and preservation of precautions to be taken for non gynecological samples**

SECTION II

- **Exfoliative Cytology- Staining Techniques**
- **Understanding of Fluid Specimen**
- **Cytological stains, Papanicolaou stain , other and special stains**
- **Staining techniques**

SECTION III

- **Characteristics of benign and malignant cells**
- **Cervical cytology-basis of detection of malignant and premalignant lesions Hermoral assessment with cytologic techniques and sex chromatin and pregnancy tests.**

SECTION IV

- **Fine needle aspiration cytology (FNAC)**
- **Aspiration cytology principles, indications and utility of the technique with special emphasis on role of cytotechnicial in FNAC clinics**
- **Procedure of fine needle aspiration and section cutting.**
- **Preparation for the procedure**
- **Educate the patient about procedure & Calm down the anxious patients**

Practical

Credits :1
Practical: 40
Internal Assessment: 10
Total Marks: 50

1. **Cytochemical staining procedure in various haemopioetic disorders**
2. **Techniques available for cytogenetic studies**
3. **Use of Radioisotopes in hematology**
4. **Safety measures for handling Radioisotopes**

12 Course Content

Credits: 3
Theory: 40
Internal Assessment: 10
Total Marks: 50

Section I

- **Physiology of bacteria, anatomy of bacterial cell, growth requirement of bacteria-growth curve, nutrients required. Gram positive & Gram negative Bacteria.**
- **Elementary knowledge of Pyogenic cocci, Gram Negative Bacilli, Gram Positive bacilli, anaerobes , mycobacteria and spirochetes.**
- **Difference between cocci & bacilli,**
- **Normal flora of human body.**

Section II

- **Lab diagnosis of common Bacterial infections viz:- pyogenic infections, Respiratory tract infections, Meningitis, Diphtheria,**
- **Whooping Cough, Gas gangrene, food poisoning, Enteric fever, Acute diarrhea diseases, cholera, Urinary tract infection,**
- **Tuberculosis, Leprosy, Plague, Anthrax, Typhus fever, syphilis, Gonorrhea and other STD's.**

Section III

- **Disease oriented microbiology, culture & sensitivity test, aerobic, anaerobic techniques**
- **Introduction to Fungi and parasitic fungi, specimen collection, Laboratory diagnosis of mycotic infections, Diagnostic mycology**
- **Principles of Antigen-Antibody reactions.**
- **Principles and mode of action of antibiotics and chemotherapeutic agents for bacteria and fungi.**

Section IV

- **Diagnostic Microbiology & Micro Techniques**
- **Role of microbiology laboratory, specimen handling , laboratory records, safety Regulations, Basic procedures of Diagnostic Rapid and automation methods in Diagnostic Microbiology, Culture environments of microbes , Quality control in microbiology, Quick reference of media and biochemical tests**
- **Collection and handling of faecal specimen, Laboratory techniques in parasitological investigation of stool, Processing of specimens other than stool, Lab identification of human parasites**
- **Collection, transportation and processing of clinical samples for microbiology investigations.**

Practical

Credits :1
Practical: 40
Internal Assessment: 10
Total Marks: 50

1. **Preparation of Smear**
2. **Bacteriophage and Bacteriocine typing methods**
3. **Lab diagnosis of common Bacterial infections viz:- pyogenic infections, Respiratory tract infections,**

Meningitis, Diphtheria,

4. **Whooping Cough, Gas gangrene, food poisoning, Enteric fever, Acute diarrhea diseases, cholera, Urinary tract infection,**
5. **Tuberculosis, Leprosy, Plague, Anthrax, Typhus fever, syphilis, Gonorrhea and other STD's**
6. **Monochrome staining (simple staining),**
7. **Gram's staining**
8. **Study of motility of capsule**
9. **Study of bacterial capsule**
10. **Study of acid fast bacilli**
11. **Isolation of bacteria by streak plate techniques**
12. **To perform qualitative widal test**

Section I

Introduction to medical technology

- **Healthcare Systems, Laboratory and Delivery System**
- **Health care service provider(primary, secondary & tertiary)**
- **Understanding of Hospital Functions**
- **Understanding of Diagnostic Centers and medical laboratory facilities**
- **Understanding of Laboratory at different level (National / State / District)**
- **Role of Medical Laboratory Technician**
- **maintenance needs to be taken care by MLT**
- **Understanding of Laboratory Test Results**

Section II

- **Use of laboratory related medical terminology in daily activities with colleagues, patients and family**
- **Organisations' policies and commitments towards quality assurance**
- **Ethical Behaviour**
- **Patient's Rights &its sensitivities &Responsibilities**
- **Understanding of Patient Comforts and Safety**
- **Medical laboratory technician's role in maintaining patient's rights**

SECTION III

Patient's Environment

- **Importance of health, safety, and security in the workplace**
- **Common Hazard**
- **Create safety records and maintaining them**
- **Organizational structure and the various processes related to reporting and monitoring**
- **To make the patient feel safe and comfortable while collection**
- **Impact of comfort on patients health**

SECTION IV

Personal Hygiene

- **Importance and methodology of cleanliness, and hygiene environment in collection space**
- **Understanding & procedures of healthy Hygiene**
- **Techniques of Grooming**
- **Techniques of Use of PPE**
- **Vaccinations against common infectious diseases**

The syllabus of this paper has been divided into FOUR units.
Examiner will set a total of NINE questions comprising two questions from each unit, including Question No. 1 (compulsory) of short answer type covering the whole syllabus.
The students are required to attempt one question from each unit and the entire Compulsory Question No. 1.
All questions carry equal marks.

</td></tr>
<tr><td>12</td><td>Course Content</td><td>Credits: 3
Theory: 40
Internal Assessment: 10
Total Marks: 50</td></tr>
</table>

SECTION I

- **Spectroscopic Technique**
- **Spectroscopic Techniques: Beer-Lambert's Law. Light absorption and its transmittance. Applications of following spectroscopic techniques in elucidating structure of Bio molecules- Visible, U.V., infra-red and fluorescence spectroscopy.**

SECTION II

- **Electrophoretic Techniques**
- **Electrophoretic Techniques: Principles and applications of the following electrophoresis techniques. Paper and gel electrophoresis, high voltage electrophoresis, SDS-PAGE: Discontinuous electrophoresis, isotachophoresis, isoelectric focusing and immune electrophoresis.**
- **Centrifugation Techniques :**
- **Various centrifugation techniques and their applications in Biochemistry. Preparative and analytical ultra-centrifugation procedures. Application of partial specific volume, diffusion coefficient and viscosity measurements in the study of macromolecules of biochemical importance.**

SECTION III

- **Chromatographic Techniques**
- **Chromatographic Techniques :Introduction to Chromatography**
- **General principles of chromatography and the application of following chromatographic procedures in isolation and purification of biomolecules: Adsorption, partition, paper and thin layer chromatography.**
- **Gas liquid chromatography. High performance liquid chromatography (HPLC), Ion exhange and Exclusion chromatography. Affinity chromatography**

SECTION IV

- **Radio Isotopic Techniques**
- **Radio Isotopic Techniques: Nature of isotopes and radioisotopes. Radioactive decay.**
- **Properties of radioactive emissions. Units of radioactivity. Techniques used to measure radioactivity; GM counter and liquid scintillation counting and gamma counter. Labelling of Biochemical compounds and autoradiography.**
- **Use of radioactive tracers in the study of enzyme reaction mechanisms and metabolic pathways.**
- **Biological hazards of radiation and safety measures in handling radioisotopes**

Practical

Credits :1
Practical: 40
Internal Assessment: 10
Total Marks: 50

Demonstrations of the techniques:

- **Spectroscopic Technique**
- **Electrophoretic Techniques**
- **Chromatographic Techniques**

Credits: 4
Theory: 80
Internal Assessment: 20
Total Marks: 100

Section I

Safety & First Aid

- **Human health and Homeostasis, medical care in India, Medical Laboratories of developing countries**
- **Basic causes of accidents, common types of laboratory accidents**
- **Ethics, responsibility ,safety measure,**
- **Basics of first aid precautions to ensure self-safety**
- **Sample preservation and precautions while Transporting**
- **First aid in laboratory understanding and precautions to ensure Patient's Safety**
    - **Common emergency conditions and what to do in medical emergencies**
    - **Basics of first aid**

Section II

Biomedical Waste Management-I

Biomedical waste management in a clinical laboratory:

- **Disposal of used samples, reagents and other biomedical waste**
- **Importance of Biomedical Waste.**
- **Disposal of biological samples material.**
- **Bio-medical waste – colour coding, types of containers, transportation of waste**
- **Disposal of Laboratory waste, Means of bio-medical waste treatment, NABL and SOP**
- **Categorize waste according to national, local and organizational guidelines**
- **Appropriate approved disposal routes for waste**

Section III

Biomedical Waste Management-II

- **Organizational and national waste management principles and procedures**
- **Hazards and risks associated with the disposal and the importance of risk assessments and how to provide these**
- **Personal protective equipment required to manage the different types of waste generated by different work activities**
- **Actions and reporting procedures for any accidents, spillages and contamination involving waste**
- **External agencies involved in the transport and receipt of your waste**
- **Importance of segregating different types of waste and how to do this**
- **Safe methods of storage and maintaining security of waste and the permitted accumulation times**
- **Current national legislation, guidelines, local policies and protocols which affect work practice**

Section IV

Best Practices in Lab

- **Sensitization on current best practices in laboratory**
- **Elementary knowledge on Good Clinical Laboratory Practices (GCLP) of WHO**
- **Elementary Knowledge of laboratory safety guidance of OSHA (Occupational Safety and Health Administration), U.S. Department of Labor**
- **Elementary Knowledge of other current practices in laboratory used worldwide.**

3	**Typology of Course**	**Core Discipline**
4	**Course Duration/ LP** (Lectures) (Practical)	**45 hours of lectures for Theory + 30 hours of practicals** (1 credit = 15 hours of theory learning based on 3 hrs./week) (1 credit = 30 hours of practical based on 2 hrs./week) **(1 Semester = 15 weeks)** **Groups will be created for the purpose of Practical**
5	**Credits**	4 Credits
6	**Max. Marks and Time**	<table><tr><th>External Theory</th><th>Internal Theory</th><th>External practical</th><th>Internal Practical</th></tr><tr><td>40</td><td>10</td><td>40</td><td>10</td></tr></table> • The exam of this course will be of 3hours duration. • There will be no objective type questions. • Students are required to have the knowledge of the developments in the subject up to 6 months before the examination. • Use of non-programmable calculators by the students in the Examination Hall is allowed. The calculators will not be provided by the University/College to the examinees
7	**Job Role**	**Medical Lab Technician**
8	**Course Objectives**	➢ **To understand various tests of Clinical Biochemistry and advanced techniques and future trends in field of biochemistry.**
9	**Course Outcomes**	**On successful completion of the course, the students will be able** ➢ **CO: To understand various tests of Clinical Biochemistry and advanced techniques and future trends in field of biochemistry.**
10	**Pedagogy of the Course Work**	**Class Room, Lecture, Laboratory, Interactive sessions,** **PPT, Practical and Group Discussions, Case Studies etc.**
11	**Instructions for paper setters and candidates**	• **The syllabus of this paper has been divided into FOUR units.** • **Examiner will set a total of NINE questions comprising two questions from each unit, including Question No. 1 (compulsory) of short answer type covering the whole syllabus.** • **The students are required to attempt one question from each unit and the entire Compulsory Question No. 1.** • **All questions carry equal marks.**
12	**Course Content**	**Credits: 3** **Theory: 40** **Internal Assessment: 10** **Total Marks: 50**

SECTION I

- **Glucose tolerance test, insulin tolerance test, gastric analysis, Xylose absorption test**
- **Clearance test for renal function**
- **Analysis of calculi and CSF**
- **Automation in clinical biochemistry laboratory**

SECTION II

- **Mechanism and testing in detail**
- **Bone marrow in detail**
- **Detailed Examination of Stool**
- **Detailed Examination of Semen**
- **Detailed Examination of Sputum**
- **Detailed Examination of CSF, and other body fluids like pleural fluid, pericardial, peritoneal,synovial,ascitic fluid.**

SECTION III

- **Advanced techniques and future trends in field of biochemistry**
- **Advanced techniques and future trends in field of clinical pathology**

SECTION IV

- **Describe archiving protocol emphasizing on storage and retrieval of samples,**
- **specimens data and records,**
- **Describe source of error/ interference/ quality of work and initiate corrective action as applicable**
- **Describe assessment of results to initiate follow-up testing, Understanding of chemicals/reagents useful in sample analysis**
- **Understanding of maintaining record of inventory , test results, etc.**
- **Inspect the availability of medical supplies or diagnostic kits**
- **Differentiation between clinically significant and insignificant findings ,**
- **Able to establish and monitor quality assurance programs or activities to ensure the accuracy of insignificant findings ,**
- **Quality control of clinical investigations, Able to establish and monitor quality assurance programs or activities to ensure the accuracy of laboratory results**

Practical

Credits :1
Practical: 40
Internal Assessment: 10
Total Marks: 50

Glucose tolerance test
insulin tolerance test
gastric analysis
Xylose absorption test
Clearance test for renal function
Analysis of calculi and CSF
Automation in clinical biochemistry laboratory
Detailed Examination of Stool
Detailed Examination of Semen
Detailed Examination of Sputum
Detailed demonstrations of examinations of bone marrow, CSF, and other body fluids like pleural fluid, pericardial, peritoneal, synovial,ascitic fluid.

Credits: 3
Theory: 40
Internal Assessment: 10
Total Marks: 50

SECTION I

- **Laboratory tests for assessing bleeding disorders**
- **Laboratory investigation for disseminated intravascular coagulation(DIC)**

SECTION II

- **Mechanism of fibrinolysis test for fibrinolysis**
- **Platelet function tests and their interpretation**

SECTION III

- **Techniques available for cytogenetic studies**
- **Use of Radioisotopes in hematology**
- **Safety measures for handling Radioisotopes**

SECTION IV

- **Advanced techniques and future trends in field of hematology & blood banking**
- **Advanced techniques and future trends in field of clinical pathology**

Practical

Credits :1
Practical: 40
Internal Assessment: 10
Total Marks: 50

1. **Tests for assessing bleeding disorders**
2. **Laboratory investigation for disseminated intravascular coagulation(DIC)**
3. **Mechanism of fibrinolysis test for fibrinolysis**
4. **Platelet function tests and their interpretation**

The calculators will not be provided by the University/College to the examinees
7	**Job Role**	**Medical Lab Technician**
8	**Course Objectives**	➢ **To help students to understand the basic concepts of quality in health Care and develop skills to implement sustainable quality assurance program in the health system. • To understand the basics of emergency care and life support skills. • To Manage an emergency including moving a patient • To help prevent harm to workers, property, the environment and the general public. • To provide a broad understanding of the core subject areas of infection prevention and control. •To provide knowledge on the principles of on-site disaster management**
9	**Course Outcomes**	**On successful completion of the course, the students will be able to** ➢ **CO1: Understand and apply principles of quality assurance, patient safety, and NABH standards relevant to medical laboratory services.** ➢ **CO2: Demonstrate safe practices including basic life support, infection prevention and control, and appropriate use of PPE in healthcare settings.** ➢ **CO3: Recognize and respond appropriately to antimicrobial resistance issues and disaster situations, contributing to patient safety and healthcare preparedness.**
10	**Pedagogy of the Course Work**	**Class Room, Lecture, Laboratory, Interactive sessions, PPT, Practical and Group Discussions, Case Studies etc.**
11	**Instructions for paper setters and candidates**	• **The syllabus of this paper has been divided into FOUR units.** • **Examiner will set a total of NINE questions comprising two questions from each unit, including Question No. 1 (compulsory) of short answer type covering the whole syllabus.** • **The students are required to attempt one question from each unit and the entire Compulsory Question No. 1.** • **All questions carry equal marks**

12 Course Content

Credits: 4
Theory: 80
Internal Assessment: 20
Total Marks: 100

SECTION I

Quality and Patient Safety Basics

- **Meaning and importance of quality in healthcare**
- **Concepts of Quality of Care, Quality Improvement Approaches, Standards and Norms**
- **Quality assurance and patient safety concepts**
- **Introduction to NABH and laboratory-related standards**
- **Basic life support (BLS) overview**
- **Vital signs and primary assessment**
- **Ventilations including use of bag-valve-masks (BVMs), Choking, rescue breathing methods**
- **Adult CPR (one- and two-rescuer – demonstration level)**

SECTION II

Infection Prevention and Control

- **Chain of infection and modes of transmission**
- **Hand hygiene principles**
- **Personal Protective Equipment (PPE): types and correct use**
- **Cleaning, disinfection, and sterilization (basic concepts)**
- **Prevention of common healthcare-associated infections**
- **Role of laboratory personnel in infection control**
- **Guidelines (NABH and JCI) for Hospital Infection Control**

SECTION III

Antibiotic Resistance (Basics)

- **What are antibiotics and why they are important**
- **Meaning and causes of antibiotic resistance**
- **Types of resistance: intrinsic and acquired**
- **Antibiotic sensitivity testing – basic awareness**
- **Actions to Fight Resistance**
- **Consequences of antibiotic resistance.**
- **Bacterial persistence**
- **Antibiotic sensitivity**

SECTION IV

Disaster Preparedness (Overview)

- **Meaning and types of disasters**
- **Hospital disaster preparedness , resource management and risk reduction (basic concepts)**
- **Fundamentals of emergency management**
- **Role of healthcare workers during disasters**
- **Psychological impact of disasters (brief overview)**
