PANJAB UNIVERSITY, CHANDIGARH-160014 (INDIA)

NAAC Accredited A++

(Estd. under the Panjab University Act VII of 1947—enacted by the Govt. of India)

FACULTY OF ARTS

NEP 2020 BASEDSYLLABI

FOR

MASTER OF LIBRARY & INFORMATION SCIENCE
(TWO YEAR INTEGRATED PROGRAMME)

AND

MASTER OF LIBRARY & INFORMATION SCIENCE WITH RESEARCH
(TWO YEAR INTEGRATED PROGRAMME)

ACADEMIC SESSIONS:2026- 2027, 2027-2028 and 2028-2029

Master of Library & Information Science
(Two Year Integrated Programme)
Under NEP-2020

SEMESTER-I

SN	Course Code	Course Title	Marks	Credits
DSC				
1.	MLIS-C11	Foundations of Library and Information Science	100	4
2.	MLIS-C12	Knowledge Organisation: Classification (Theory)	100	4
3.	MLIS-C13	Foundations of Library Technology (Theory)	100	4
DSE: Opt any two of the following				
4A	MLIS-DSE11	Knowledge Organisation: Classification - DDC (Practice)	200 (100 each)	8 (4 each)
4B	MLIS-DSE12	Knowledge Organisation: Classification - UDC (Practice)		
4C	MLIS-DSE13	Knowledge Organisation: Classification -CC (Practice)		
			500	20

SEMESTER-II

SN	Course Code	Course Title	Marks	Credits
DSC				
1.	MLIS-C21	Knowledge Organisation: Cataloguing (Theory)	100	4
2.	MLIS-C22	Information Sources and Services(Theory)	100	4
3.	MLIS-C23	Management of Library and Information Centres	100	4
DSE: Opt any one of the following				
4A	MLIS-DSE21	Knowledge Organisation: Cataloguing -AACR 2 R (Practice)	100	4
4B	MLIS-DSE22	Knowledge Organisation: Cataloguing-MARC 21 (Practical)		
DSE: Opt any one of the following				
5A	MLIS-DSE23	Library Automation & Core Digital Skills (Practical)	100	4
5B	MLIS-DSE24	Web Technologies and Digital Tools for Libraries (Practical)		
			500	20

SEMESTER-III

SN	Course Code	Course Title	Marks	Credits
DSC				
1.	MLIS-C31	Information Sources and Services (Practical)	100	4
2.	MLIS-C32	Information Communication and Scholarly Ecosystems	100	4
3.	MLIS-C33	Library Automation and Digital Infrastructures(Theory)	100	4
DSE: Opt any one of the following				
4A	MLIS-DSE31	Social Science Information Sources and Systems	100	4
4B	MLIS-DSE32	Business Information Sources and Systems	100	4
4C	MLIS-DSE33	Health Science Information Sources and Systems	100	4
RBC-RM				
5.	MLIS-RBC-RM31	Research Methods and Statistical Techniques	100	4
			500	20

SEMESTER-IV

SN	Course Code	Course Title	Marks	Credits
DSC				
1.	MLIS-C41	Information Consolidation, Storage and Retrieval	100	4
2.	MLIS-C42	Library Automation &Emerging Technologies (Practical)	100	4
3.	MLIS-C43	Internship	100	4
DSE: Opt any one of the following				
4A	MLIS-DSE41	Academic Library System : College and University Libraries*	100	4
4B	MLIS-DSE42	Public Library System*	100	4
4C	MLIS-DSE43	Special Library System*	100	4
RBC-RM				
5.	MLIS-RBC-RM41	Advanced Research Methodology and Ethics	100	4
			500	20

Note:

2. DSE=Discipline Specific Elective
3. RBC= Research-Based Course
4. RM= Research Methodology

***Field Work/Study Tour:**

i. The Field Work/Study Tour (of 4-6 days duration) wherein the students would be visiting different types of libraries to get practical exposure would be an integral part of curriculum and mandatory for all students.

ii. Students will submit a Field Work/Study Tour report, to be considered as 5-mark written assignment for MLIS-DSE41/42/43 (internal assessment).

iii. A student may be exempted from participation in the Field Work/Study Tour on Medical Grounds /Genuine Reason on the approval of the Chairperson. However, such students(s) shall have to submit the Field Work Report of the assigned Libraries.

INTERNAL ASSESSMENT (20 Marks)
for
Master of Library & Information Science
(Two Year Integrated Programme)
and
Master of Library & Information ScienceWith Research
(Two Year Integrated Programme)

SN.	Description	Marks
1.	Mid-Semester Examination	10
2.	Presentation/Assignment	05
3.	Participation in Class Discussion	03
4.	Attendance	02
Total		**20**

SEMESTER-I

Course Code: MLIS-C11
Course Title: FOUNDATIONS OF LIBRARY AND INFORMATION SCIENCE

Credits allocated: 4
Max. Marks: 100
Theory: 80 Marks
Internal Assessment: 20 Marks
Time: 3 Hours
Teaching Hours: 45
Tutorial Hours: 15

Objective: To study library in the social context, and to acquaint the students with the basic philosophy of Library and Information Science.

Outcomes:
After studying this course, students shall be able to:

1. Understand the historical development of libraries.
2. Classify libraries on the basis of their purpose and functions.
3. Know the role of libraries in the development of various aspects of society.
4. Comprehend the basic philosophy of Library and Information Science.
5. Understand five laws of library science and their implications.
6. Understand librarianship as a profession.
7. Assess the role of national and international library associations and organizations.
8. Highlight the role of library promoters at the national and international level.

Pedagogy: The students would be evaluated at the end of each semester through subjective-type questions/answers (both short and essay type). The scripts would be evaluated by the teacher/instructor teaching the paper and the grade shall be submitted accordingly.

The course relies on a combination of lectures, solving problems and discussing academic articles or real-life situations. The teacher will assign topics for assignments on contemporary themes and issues from the syllabi. Special tutorials/contact hours for one-to-one student-teacher interactions shall also be assigned as per the teaching tutorial ratio of 45:15.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES:

The syllabus of this paper has been divided into four units. There shall be 9 questions in all.

The first question, which would be compulsory, shall be a short-answer type (word limit 25-30 each). It would carry 15 short questions, spread over the entire syllabus. The candidate will be required to attempt any 10 short-answer type questions. Each short-answer-type question would carry 2 marks ($10 \times 2 = 20$). The rest of the paper shall contain 4 units. Each unit shall have two questions, and the candidates shall be required to attempt one question from each Unit. Each question shall carry 15 marks ($15 \times 4 = 60$).

Unit I: Library- Types and Role

- Library: Definition, concept, objectives and role of libraries in Socio-economic, Cultural, Educational, Scientific and Technological Developments
- Historical Development of Libraries
- Types of Libraries: Objectives, features and functions
- Five Laws of Library Science and their implications.

Unit II: Library Legislations and Related Laws/ Concepts

- Library Legislation: Need and features.
- Library Legislation in India with special reference to states of Madras, Andhra Pradesh and Gujarat
- Press and Registration of Periodicals Act, 2023 (PRP Act, 2023)
- Intellectual Property Rights (IPR)

Unit III: LIS Education and role of Professional Associations

- Library and Information Science as a discipline and LIS education in India.
- Librarianship as a Profession and Professional Ethics, Professional Skill Competences.
- National and International Professional Associations and their role: Indian Library Association (ILA), Indian Association of Special Libraries and Information Centers (IASLIC), Indian Association of Teachers of Library and Information science (IATLIS), International Federation of Library Association and Institutions (IFLA), American Library Association (ALA), Chartered Institute of Library and Information Professionals (CILIP)

Unit IV: Library Promoters, Resource Sharing and Public Relations

- Role of United Nations Educational, Scientific and Cultural Organization (UNESCO), INFLIBNET and Raja Ram Mohan Roy Library Foundation (RRRLF) in the promotion and development of libraries
- Resource Sharing: Concept, need, purpose and areas of resource sharing in libraries.
- Public Relations and Extension Activities

Essential Readings:

Course Code: MLIS-C12
Course Title: KNOWLEDGE ORGANISATION: CLASSIFICATION (THEORY)

Credits allocated: 4
Max. Marks: 100
Theory: 80 Marks
Internal Assessment: 20 Marks
Time: 3 Hours
Teaching Hours: 45
Tutorial Hours: 15

Objective: To study Library Classification as a base for knowledge organization.

Outcomes:
After studying this course, students shall be able to:

1. Comprehend the nature and attributes of universe of knowledge.
2. Elaborate meaning and types of subjects and modes of subject formation.
3. Express the meaning, purpose, functions, theories and canons of library classification.
4. Illustrate knowledge as mapped in different classification schemes.
5. Elucidate various facets of notation and call number.
6. Understand the characteristics of major classification schemes.
7. Know current trends in library classification.

Pedagogy: The students would be evaluated at the end of each semester through subjective-type questions/answers (both short and essay type). The scripts would be evaluated by the teacher/instructor teaching the paper and the grade shall be submitted accordingly.

The course relies on a combination of lectures, solving problems and discussing academic articles or real-life situations. The teacher will assign topics for assignments on contemporary themes and issues from the syllabi. Special tutorials/contact hours for one-to-one student-teacher interactions shall also be assigned as per the teaching tutorial ratio of 45:15.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES:

The syllabus of this paper has been divided into four units. There shall be 9 questions in all.

The first question, which would be compulsory, shall be a short-answer type (word limit 25-30 each). It would carry 15 short questions, spread over the entire syllabus. The candidate will be required to attempt any 10 short-answer type questions. Each short-answer-type question would carry 2 marks ($10 \times 2 = 20$). The rest of the paper shall contain 4 units. Each unit shall have two questions, and the candidates shall be required to attempt one question from each Unit. Each question shall carry 15 marks ($15 \times 4 = 60$).

Unit I: Universe of Knowledge

- Universe of Knowledge: Nature and attributes
- Subject: Meaning and types (Basic, Compound and Complex)
- Modes of Subject Formation

Unit II: Library Classification

- Concept, Purpose and functions
- Canons and Postulates of Library Classification.
- Knowledge Classification and Book Classification
- Notation: Meaning, need, functions, types, qualities, Call number

Unit III: Classification Schemes

- Species of Library Classification Schemes
- Dewey Decimal Classification (DDC- 23rd Edition): Salient features
- Colon Classification (CC): Salient features
- Universal Decimal Classification (UDC): Salient features
- Library of Congress Classification (LCC): Salient features

Unit IV: Current Trends

- Simple Knowledge Organization Systems (SKOS)
- Web Dewey, UDC online
- Taxonomies
- Folksonomies, Social Bookmarking
- Ontology

Essential Readings:

1. Batley, S. (2014). *Classification in theory and practice*. Oxford: Chandos Publishing.

Course Code: MLIS-C13
Course Title: FOUNDATIONS OF LIBRARY TECHNOLOGY

Credits allocated: 4
Max. Marks: 100
Theory: 80 Marks
Internal Assessment: 20 Marks
Time: 3 Hours
Teaching Hours: 45
Tutorial Hours: 15

Objective: To equip students with foundational knowledge and skills in information technology and its applications in library and information centres.

Outcomes:

After studying this course, students shall be able to:

1. Explain computer hardware, software, and operating systems for library applications.
2. Analyze computer networks, internet protocols, and web technologies for information access.
3. Evaluate integrated library management systems and automation implementation strategies.
4. Understand digital library concepts, Library 2.0 tools, and emerging technologies.
5. Apply assistive technologies and digital tools to enhance library accessibility and services.

Pedagogy: The students would be evaluated at the end of each semester through subjective-type questions/answers (both short and essay type). The scripts would be evaluated by the teacher/instructor teaching the paper and the grade shall be submitted accordingly.

The course relies on a combination of lectures, solving problems and discussing academic articles or real-life situations. The teacher will assign topics for assignments on contemporary themes and issues from the syllabi. Special tutorials/contact hours for one-to-one student-teacher interactions shall also be assigned as per the teaching tutorial ratio of 45:15.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES:

The syllabus of this paper has been divided into four units. There shall be 9 questions in all.

The first question, which would be compulsory, shall be a short-answer type (word limit 25-30 each). It would carry 15 short questions, spread over the entire syllabus. The candidate will be required to attempt any 10 short-answer type questions. Each short-answer-type question would carry 2 marks ($10 \times 2 = 20$). The rest of the paper shall contain 4 units. Each unit shall have two questions, and the candidates shall be required to attempt one question from each Unit. Each question shall carry 15 marks ($15 \times 4 = 60$).

Unit I: Information Technology Fundamentals

- Introduction to Information Technology: Concept, Components, Need/Purpose; Role of ICT in Libraries
- Computer Hardware: CPU (ALU, Control Unit), Memory Types (RAM, ROM, Cache); Peripherals: Keyboards, Monitors, Printers, Scanners (Basic Functions).
- Computer Software: Concept & Features of Application & System S/W; Proprietary vs Open-source.
- Basic Features of Windows and Linux; Comparison.

Unit II: Web Technologies and Networking

- HTML: Concept and basic Purpose;
- Concept and Features: WWW, Web Browser; E-mail, WiFi;
- Basics of search engines, Working principles and types.
- Computer Networks: Concept, Benefits,
- Classification: PAN, LAN, MAN, WAN; Network Topologies;
- Internet Protocols and Standards – HTTP/HTTPS, TCP/IP, DNS, URL, DOI — basic role.

Unit III: Library Automation and ILMS

- Library Automation: Definition, Need/Purpose & Benefits;
- Implementation Approaches
- Integrated Library Management Systems (ILMS): Concept, Features of ILMS (Librarika).
- Retrospective Conversion (ReCON) and UNICODE: Concept & Importance.

Unit IV: Digital Technologies and Tools for Libraries

- Digital Libraries: Concept, Characteristics, Benefits & Examples.
- Library 2.0: Concept, Characteristics & Key Applications, Introduction to basics of Web 3.0
- Academic Social Networks (ASN): Concept, Benefits and Examples.
- Barcoding and QR Codes: Concept & Applications in library;
- Screen Readers: Concept and Application in libraries.

Essential Readings:

Course Code: MLIS-DSE11
Course Title: KNOWLEDGE ORGANISATION: CLASSIFICATION-DDC (PRACTICE)

Credits allocated: 4
Max. Marks: 100
Theory: 80 Marks
Internal Assessment: 20 Marks
Time: 3 Hours
Teaching Hours: 45
Tutorial Hours: 15

Objective: The objective of this paper is to train the students in classifying titles of documents according to Dewey Decimal Classification (DDC) - 23rd ed.

Outcomes:
After studying this course, students shall be able to:

1. Use the classification schemes.
2. Determine the subject of the document.
3. Build class numbers for documents with simple, compound and complex subjects.
4. Synthesize class numbers by using the standard subdivisions/common isolates.

Pedagogy: The students would be evaluated at the end of each semester through practice based questions/answers. The scripts would be evaluated by the teacher/instructor teaching the paper and the grade shall be submitted accordingly.

The course relies on a combination of lectures and problem solving. The teacher will assign topics for assignments from the syllabi. Special tutorials/contact hours for one-to-one student-teacher interactions shall also be assigned as per the teaching tutorial ratio of 45:15.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES:

This paper will be of 80 marks of 3 hours duration and 20 marks will be for internal assessment. The students will be provided Dewey Decimal Classification (23rdedition) during the examination. The syllabus has been divided into four units. Candidates shall classify 4 Titles out of 8 from each unit. Each title shall carry 5 marks. In no case a title should be asked from outside the syllabus. The question paper should be strictly according to the instructions mentioned above.

Unit I: Classification of documents with simple subjects.

Unit II: Classification of documents using tables.

Unit III: Classification of documents with Compound subjects.

Unit IV: Classification of documents with Complex subjects.

Essential Readings:

1. Dewey, M. (2011). Dewey Decimal Classification and relative index (Julianne Beall, Rebecca Green & Giles Martin, Eds.; 23rd ed., Vol. 4,). Dublin: OCLC.
2. Kaushik, S. K. (2012). Dewey Decimal Classification: A practical manual of the 23rd edition. New Delhi: Ess Ess Publications.
3. Satija, M.P. (2012). Exercises in the 23rd edition of Dewey Decimal Classification. New Delhi: Ess Ess Publications.
4. Satija, M.P. (2013). The theory and practice of the Dewey Decimal Classification system (2nd ed.). Oxford: Chandos Publishing.
5. Snow, K. (2024). A practical guide to Dewey Decimal Classification. London: Bloomsbury Publishing.

Course Code: MLIS-DSE12
Course Title: KNOWLEDGE ORGANISATION: CLASSIFICATION - UDC (PRACTICE)

Credits allocated: 4
Max. Marks: 100
Theory: 80 Marks
Internal Assessment: 20 Marks
Time: 3 Hours
Teaching Hours: 45
Tutorial Hours: 15

Objective: The objective of this paper is to train the students in classifying titles of documents according to Universal Decimal Classification (UDC).

Outcomes:
After studying this course, students shall be able to:

1. Use the classification schemes.
2. Determine the subject of the document.
3. Build class numbers for documents with simple, compound and complex subjects.
4. Synthesize class numbers by using the standard subdivisions/common isolates.

Pedagogy: The students would be evaluated at the end of each semester through practice based questions/answers. The scripts would be evaluated by the teacher/instructor teaching the paper and the grade shall be submitted accordingly.

The course relies on a combination of lectures and problem solving. The teacher will assign topics for assignments from the syllabi. Special tutorials/contact hours for one-to-one student-teacher interactions shall also be assigned as per the teaching tutorial ratio of 45:15.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES:

This paper will be of 80 marks of 3 hours duration and 20 marks will be for internal assessment. The students will be provided Universal Decimal Classification Abridged edition during the examination. The syllabus has been divided into four units. Candidates shall classify 4 Titles out of 8 from each unit. Each title shall carry 5 marks. In no case a title should be asked from outside the syllabus. The question paper should be strictly according to the instructions mentioned above.

Unit I: Classification of documents with simple subjects.

Unit II: Classification of documents using Auxiliaries.

Unit III: Classification of documents with Compound subjects.

Unit IV: Classification of documents with Complex subjects.

Essential Readings:

1. British Standards Institution., & International Federation for Documentation. (1961). Universal Decimal Classification: Abridged English edition (3rd rev. ed.). London: BSI.
2. Kumbhar, M., & Nivedita, B. (2020). Universal Decimal Classification: A practical manual for information organisation. New Delhi: Biogreen.
3. Nigam, Deepmala. (2024). Practical Universal Decimal Classification (3rd ed.). New Delhi: Ess Ess Publications.

Course Code: MLIS-DSE13
Course Title: KNOWLEDGE ORGANISATION: CLASSIFICATION - CC (PRACTICE)

Credits allocated: 4
Max. Marks: 100
Theory: 80 Marks
Internal Assessment: 20 Marks
Time: 3 Hours
Teaching Hours: 45
Tutorial Hours: 15

Objective: The objective of this paper is to train the students in classifying titles of documents according to Colon Classification (CC) - 6th Rev. ed.

Outcomes:
After studying this course, students shall be able to:

1. Use the classification schemes.
2. Determine the subject of the document.
3. Build class numbers for documents with simple, compound and complex subjects.
4. Synthesize class numbers by using the standard subdivisions/common isolates.

Pedagogy: The students would be evaluated at the end of each semester through practice based questions/answers. The scripts would be evaluated by the teacher/instructor teaching the paper and the grade shall be submitted accordingly.

The course relies on a combination of lectures and problem solving. The teacher will assign topics for assignments from the syllabi. Special tutorials/contact hours for one-to-one student-teacher interactions shall also be assigned as per the teaching tutorial ratio of 45:15.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES:
This paper will be of 80 marks of 3 hours duration and 20 marks will be for internal assessment. The students will be provided Colon Classification (6th Rev. ed.) during the examination. The syllabus has been divided into four units. Candidates shall classify 4 Titles out of 8from each unit. Each title shall carry 5 marks. In no case a title should be asked from outside the syllabus. The question paper should be strictly according to the instructions mentioned above.

Unit I: Classification of documents with simple subjects.

Unit II: Classification of documents using Common Isolates.

Unit III: Classification of documents with Compound subjects.

Unit IV: Classification of documents with Complex subjects.

Essential Readings:

1. Chattopadhyay, P., Shit, N., & Shit, N. (2024). A practical guide to the Colon Classification (7th ed.). New Delhi: Ess Ess Publications.
2. Ranganathan, S. R. (2007). Colon classification (6th Ed., Reprint). New Delhi: Ess Ess Publication.
3. Ranganathan, S.R., & Gopinath, M.A. (2006). Prolegomena to library classification (Reprint). New Delhi: Ess Ess Publication.
4. Satija, M. P. (2002). Manual of Practical Colon Classification (4th ed.). New Delhi: Concept Publishing Co.
5. Satija, M. P. (2019). Colon classification: A student companion. New Delhi: Ess Ess Publication.

SEMESTER-II

Course Code: MLIS-C21
Course Title: KNOWLEDGE ORGANISATION: CATALOGUING (THEORY)

Credits allocated: 4
Max. Marks: 100
Theory: 80 Marks
Internal Assessment: 20 Marks
Time: 3 Hours
Teaching Hours: 45
Tutorial Hours: 15

Objective: To study the principles and theories of Library Cataloguing.

Outcomes:
After studying this course, students shall be able to:

1. Understand the concept of library catalogue.
2. Comprehend the inner and outer forms of library catalogue.
3. Understand the main and added entries of library catalogue.
4. Understand various approaches of deriving subject headings.
5. Comprehend about the normative principles of cataloguing.
6. Know the standards for bibliographic interchange and communication.
7. Know the current trends in library cataloguing.

Pedagogy: The students would be evaluated at the end of each semester through subjective-type questions/answers (both short and essay type). The scripts would be evaluated by the teacher/instructor teaching the paper and the grade shall be submitted accordingly.

The course relies on a combination of lectures, solving problems and discussing academic articles or real-life situations. The teacher will assign topics for assignments on contemporary themes and issues from the syllabi. Special tutorials/contact hours for one-to-one student-teacher interactions shall also be assigned as per the teaching tutorial ratio of 45:15.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES:

The syllabus of this paper has been divided into four units. There shall be 9 questions in all.

The first question, which would be compulsory, shall be a short-answer type (word limit 25-30 each). It would carry 15 short questions, spread over the entire syllabus. The candidate will be required to attempt any 10 short-answer type questions. Each short-answer-type question would carry 2 marks ($10 \times 2 = 20$). The rest of the paper shall contain 4 units. Each unit shall have two questions, and the candidates shall be required to attempt one question from each Unit. Each question shall carry 15 marks ($15 \times 4 = 60$).

UnitI: Library Catalogue

- Library Catalogue: Concept, objectives and functions
- Physical Forms of Library Catalogue: Conventional and non-conventional
- Types of Catalogues: Dictionary Catalogue, Classified Catalogue, Alphabetico-Classed Catalogue, Alphabetico-Subject Catalogue
- Authority File, ISBN, ISSN: Concept and use.

UnitII: Catalogue Codes and Normative Principles

- Catalogue Codes: History and development
- Canons and Normative Principles of cataloguing
- Catalogue Entries according to CCC (5th edition)
- Catalogue Entries according to AACR-2R

Unit III: Subject and Union Catalogue

- Subject Catalogue: Concept, need, purpose and usefulness.
- Tools and techniques for deriving Subject Headings (Chain Procedure and Sears list of Subject Headings).
- Union Catalogue: Concept and purpose. Union catalogue of INFLIBNET.
- Selective, Simplified, Cooperative and Centralized Cataloguing

Unit IV: Current Trends in Cataloguing

- ISBD, RDA and FRBR
- Bibframe: concept.
- Metadata: Meaning, purpose, types, uses
- MARC21

Essential Readings:

Course Code: MLIS-C22
Course Title: INFORMATION SOURCES AND SERVICES (THEORY)

Credits allocated: 4
Max. Marks: 100
Theory: 80 Marks
Internal Assessment: 20 Marks
Time: 3 Hours
Teaching Hours: 45
Tutorial Hours: 15

Objective: The aim of this paper is to impart knowledge regarding reference and information sources, services and systems to the students.

Outcomes:
After studying this course, students shall be able to:

1. Understand, identify and explore different types of information sources.
2. Understand the nature of print and electronic resources.
3. Acquire the understanding of reference services.
4. Know various methods of user education.
5. Provide various information services.
6. Comprehend the activities and services of various information systems and networks.

Pedagogy: The students would be evaluated at the end of each semester through subjective-type questions/answers (both short and essay type). The scripts would be evaluated by the teacher/instructor teaching the paper and the grade shall be submitted accordingly.

The course relies on a combination of lectures, solving problems and discussing academic articles or real-life situations. The teacher will assign topics for assignments on contemporary themes and issues from the syllabi. Special tutorials/contact hours for one-to-one student-teacher interactions shall also be assigned as per the teaching tutorial ratio of 45:15.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES:

The syllabus of this paper has been divided into four units. There shall be 9 questions in all.

The first question, which would be compulsory, shall be a short-answer type (word limit 25-30 each). It would carry 15 short questions, spread over the entire syllabus. The candidate will be required to attempt any 10 short-answer type questions. Each short-answer-type question would carry 2 marks (10 × 2 = 20). The rest of the paper shall contain 4 units. Each unit shall have two questions, and the candidates shall be required to attempt one question from each Unit. Each question shall carry 15 marks (15 × 4 = 60).

Unit I: Information Sources

- Nature, Characteristics, types and formats

- Documentary, Non-Documentary and Electronic sources
- Primary, Secondary and Tertiary sources of information
- Human sources, Institutional sources.

Unit II: Reference Service

- Reference Service: Concept, purpose, functions, types, theories and trends.
- Reference Interview
- Information Users: Categories and ascertaining information needs
- User studies: Concept, need, purpose, techniques and methods
- User education: concept, goal, objectives and methods.

Unit III: Information Services

- Current Awareness Service (CAS),
- Selective Dissemination of Information (SDI),
- Translation Service,
- Bibliographical Service,
- Document Delivery Service.

Unit IV: Information Systems and Networks

- Information Systems: Characteristics and functions
- National Information Systems and Networks: National Institute of Science Communication and Policy Research (NIScPR), Defense Scientific Information and Documentation Centre (DESIDOC)
- Global Information Systems and Network: International System for Agricultural Science and Technology (AGRIS), International Nuclear Information System (INIS), Information System for Physics, Electronics and Computing (INSPEC)

Course Code: MLIS-C23
Course Title: MANAGEMENT OF LIBRARY AND INFORMATION CENTRES

Credits allocated: 4
Max. Marks: 100
Theory: 80 Marks
Internal Assessment: 20 Marks
Time: 3 Hours
Teaching Hours: 45
Tutorial Hours: 15

Objective: The aim of this paper is to give students an idea of the principles of management and to acquaint them with the management techniques, functions, activities and routines of various sections and departments in a library / information Centre.

Outcomes:
After studying this course, students shall be able to:

1. Understand the concept, principles and functions of management
2. Carry out various operations of Library and Information Centres
3. Understand the Human Resource Management in Library and Information Centres
4. Understand the financial management of Library and Information Centres
5. Maintain the library statistics and prepare annual report

Pedagogy: The students would be evaluated at the end of each semester through subjective-type questions/answers (both short and essay type). The scripts would be evaluated by the teacher/instructor teaching the paper and the grade shall be submitted accordingly.

The course relies on a combination of lectures, solving problems and discussing academic articles or real-life situations. The teacher will assign topics for assignments on contemporary themes and issues from the syllabi. Special tutorials/contact hours for one-to-one student-teacher interactions shall also be assigned as per the teaching tutorial ratio of 45:15.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES:

The syllabus of this paper has been divided into four units. There shall be 9 questions in all.

The first question, which would be compulsory, shall be a short-answer type (word limit 25-30 each). It would carry 15 short questions, spread over the entire syllabus. The candidate will be required to attempt any 10 short-answer type questions. Each short-answer-type question would carry 2 marks ($10 \times 2 = 20$). The rest of the paper shall contain 4 units. Each unit shall have two questions, and the candidates shall be required to attempt one question from each Unit. Each question shall carry 15 marks ($15 \times 4 = 60$).

Unit I: Principles and Functions of Management

- Management: Concept, scope, principles and functions
- Schools of Management Thoughts
- Management Information System (MIS): Concept, scope and characteristics.

- Management By Objectives (MBO): Concept, need and steps.
- Library Committee, Library Authority

Unit II: Library Housekeeping Operations

- Acquisition Section: Activities
- Technical Section: Activities
- Circulation Section: Activities
- Periodical Section: Activities
- Reference Section: Activities
- Maintenance Section: Activities

Unit III: Human Resource Management

- Human Resource Management: Policy and Staffing
- Recruitment and Training, Job Description, Job Analysis, and Job Evaluation.
- Motivation: Definition and Theories of McGregor, Herzberg and Maslow.
- SWOT analysis: Concept

Unit IV: Financial Management, Library Rules and Reports

- Sources of library finance, Estimation of library's financial requirements
- Budgeting techniques
- Cost Effectiveness Analysis and Cost Benefit Analysis: Concept
- Library statistics and Annual Report
- Library rules and regulations
- Library building and Space management

Essential Readings:

Course Code: MLIS-DSE21
Course Title:KNOWLEDGE ORGANISATION: CATALOGUING-AACR2 R (PRACTICE)

Credits allocated: 4
Max. Marks: 100
Theory: 80 Marks
Internal Assessment: 20 Marks
Time: 3 Hours
Teaching Hours: 45
Tutorial Hours: 15

Objective: To acquaint the students with cataloguing of documents according to AACR-2R.

Outcomes:
After studying this course, students shall be able to:

1. Use the catalogue code - AACR-2R.
2. Prepare catalogue entries for different types of documents.
3. Derive subject headings using Sears List of Subject Headings.

Pedagogy: The students would be evaluated at the end of each semester through subjective-type questions/answers (both short and essay type). The scripts would be evaluated by the teacher/instructor teaching the paper and the grade shall be submitted accordingly.

The course relies on a combination of lectures, solving problems and discussing academic articles or real-life situations. The teacher will assign topics for assignments on contemporary themes and issues from the syllabi. Special tutorials/contact hours for one-to-one student-teacher interactions shall also be assigned as per the teaching tutorial ratio of 45:15.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES:

The paper will be of 80 marks of 3 hours duration, and 20 marks will be for internal assessment.The students will be provided Sears List of Subject Headings (22^{nd}edition) during the examination on sharing basis.The syllabus has been divided into four units.The paper will contain 4units consisting of 8questions/titles in all (i.e. 2 titles in each unit). Candidates shall catalogue 4 Titles out of 8 selecting one from each unit.Each question shall carry 20 marks (20 x 4=80).

Unit I: Cataloguing of:

- Single Authorship
- Shared Authorship
- Pseudonyms
- Mixed Responsibilities

Unit II: Cataloguing of:

- Editorial works

- Composite works
- Multi-volume works

Unit III: Cataloguing of:

- Serial Publications
- Uniform Titles
- Non-Book Materials: Electronic Resources

Unit IV: Cataloguing of :

- Corporate Authorship: Institutions, Conferences, Seminars, Associations and Government Bodies.

Essential Readings:

Course Code: MLIS-DSE22
Course Title: KNOWLEDGE ORGANISATION:CATALOGUING -MARC 21 (PRACTICAL)

Credits allocated: 4
Max. Marks: 100
Practical: 80 Marks
Internal Assessment: 20 Marks
Time: 3 Hours
Teaching Hours: 90
Tutorial Hours: 15

Objective:
To train students to create bibliographic records according to MARC21 using open source ILMS such as Koha.

Outcomes:
After completing this practical course, students will be able to:

1. Understand MARC frameworks
2. Identify the main elements in the MARC 21 bibliographic format;
3. Understand how MARC 21 encodes bibliographic content;
4. Create Bibliographic record of various types of documents according to MARC21

Pedagogy: The course relies on a combination of guided/ supervised practical sessions/demonstrations, and discussions of experimental results. Special tutorials/contact hours for one-to-one student-teacher interactions as prescribed in the syllabus/as per the time table. Students will be evaluated through continuous performance assessment, practical records, and end-semester examinations. Special tutorials/contact hours for one-to-one student-teacher interactions shall also be assigned as per the teaching tutorial ratio of 90:15.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES:

The syllabus for this paper is divided into four units. Assessment will be through Internal Assessment and an End-Semester Practical Examination. The students will be provided Sears List of Subject Headings (22ndedition) during the examination on sharing basis.Evaluation will consider the number of practicals performed, performance in practical work and viva-voce. The practical paper is assessed as 60 marks for practical performance and 20 marks for the viva-voce.

Unit I: To create bibliographic records according to MARC 21:

- Single Authorship
- Shared Authorship
- Series Entry

Unit II: To create bibliographic records according to MARC 21:

- Editorial works

- Multi-volume works
- Uniform Titles

Unit III: To create bibliographic records according to MARC 21:

- Serial Publications
- Electronic Resources

Unit IV: To create bibliographic records according to MARC 21:

- Corporate Authorship: Institutions, Conferences, Seminars, Associations and Government Bodies.

Course Code: MLIS-DSE23
Course Title: LIBRARY AUTOMATION AND CORE DIGITAL SKILLS (PRACTICAL)

Credits allocated: 4
Max. Marks: 100
Practical Examination: 80 Marks
Internal Assessment: 20 Marks
Time: 3 Hours
Teaching Hours: 90
Tutorial Hours: 15

Objective: To equip students with practical skills in library automation, digital resource management, and essential IT tools for efficient library operations.

Outcomes:
By the end of this paper, students will be able to:

1. Use office productivity tools for creating documents, spreadsheets, presentations, and handling PDFs.
2. Apply web-based tools for mobile cataloguing, metadata entry, and library outreach activities.
3. Perform manual cataloguing and circulation transactions using library management systems.
4. Manage acquisitions workflows and configure basic system administration settings.
5. Generate QR codes and embed interactive elements to enhance library services.

Pedagogy: The course relies on a combination of guided/ supervised practical sessions/demonstrations, and discussions of experimental results. Special tutorials/contact hours for one-to-one student-teacher interactions as prescribed in the syllabus/as per the time table. Students will be evaluated through continuous performance assessment, practical records, and end-semester examinations. Special tutorials/contact hours for one-to-one student-teacher interactions shall also be assigned as per the teaching tutorial ratio of 90:15.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES:

The syllabus for this paper is divided into four units. Assessment will be through Internal Assessment and an End-Semester Practical Examination. Evaluation will consider the number of practicals performed, performance in practical work and viva-voce. The practical paper is assessed as 60 marks for practical performance and 20 marks for the viva-voce.

Unit I : Core Office and Document Handling Skills

- Word processing: Document creation, paragraph/character formatting, headers/footers, styles, templates, automated table of contents, tables,
- Spreadsheets: Data entry, best practices, cell formatting, named ranges, Basic formulas, sorting/filtering, Basic Pivot Tables, charts for data visualization.

- Presentations: Slide masters/themes, layouts, inserting visuals, animations and transitions.
- Handling PDF Files: Online Tools

UnitII: Web Based Library Tools

Using cloud based web-apps apps like Libib or Librarika:

- Mobile-Based Cataloguing: Creating and managing bibliographic records.
- Manual Metadata Entry for Digital Assets
- Creating Event Posters and Promotional Flyers Using Free Tools
- Generating QR Codes for OPAC Links and Library Services
- Embedding Google Map, OPAC Search Box, and YouTube Library Tour

UnitIII : Cataloguing and Circulation

- Creating Bibliographic Records Manually
- Adding Records Using ISBN or Keyword Search
- Performing Bulk Import of Records via CSV
- Adding Items Using Mobile App Barcode Scanning
- Editing Item Details (Tags, Notes, Groups)
- Performing Circulation Transactions (Check-out, Check-in, Reserve, Renewal, Quick Return)
- Generating Basic Service Reports

UnitIV: Acquisitions & System Administration

- Managing Supplier Records
- Creating and Tracking Purchase Orders
- Overview of Acquisitions Module
- Adding and Managing Library Staff
- Setting Up Library Information

Essential Readings:

Course Code: MLIS-DSE24
Course Title: WEB TECHNOLOGIES AND DIGITAL TOOLS FOR LIBRARIES (PRACTICAL)

Credits allocated: 4
Max. Marks: 100
Practical Examination: 80 Marks
Internal Assessment: 20 Marks
Time: 3 Hours
Teaching Hours: 90
Tutorial Hours: 15

Objective: To develop practical skills in using web technologies, digital tools, and AI-assisted applications for enhancing library services, accessibility, and user engagement.

Outcomes:
By the end of this paper, students will be able to:

1. Test and optimize library web pages for usability and accessibility, including support for print-disabled patrons.
2. Create and manage blogs, RSS feeds, and bookmarking tools for library communication and engagement.
3. Build digital collections and exhibits using platforms like Omeka and Greenstone with appropriate metadata.
4. Apply specialized tools such as Dewey-Cutter, QR code generators, and AI-assisted applications for library workflows.
5. Demonstrate effective prompting skills for generating accurate outputs from AI tools for library services.

Pedagogy: The course relies on a combination of guided/ supervised practical sessions/demonstrations, and discussions of experimental results. Special tutorials/contact hours for one-to-one student-teacher interactions as prescribed in the syllabus/as per the time table. Students will be evaluated through continuous performance assessment, practical records, and end-semester examinations. Special tutorials/contact hours for one-to-one student-teacher interactions shall also be assigned as per the teaching tutorial ratio of 90:15.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES:

The syllabus for this paper is divided into four units. Assessment will be through Internal Assessment and an End-Semester Practical Examination. Evaluation will consider the number of practicals performed, performance in practical work and viva-voce. The practical paper is assessed as 60 marks for practical performance and 20 marks for the viva-voce.

Unit I: Web Usability and Accessibility

- Testing Mobile-Friendly Pages and Optimizing Responsiveness
- Using Text-to-Speech Tools/Screen-Readers for Print-Disabled Patrons
- Building Online Forms for Service Requests and Feedback

- Setting Up RSS Feed Reader: Configuring RSS tools for library news and updates.

UnitII: Web 2.0 and User Engagement

- Blog Creation: Setting up and managing a blog for library news and updates.
- Bookmarking Tools for Content Curation & Sharing (e.g., Raindrop.io, Wakelet)
- RSS and Current Awareness Services: Configuring RSS feeds for library alerts and updates.

UnitIII: Digital Collections and Repositories

- Omeka: Creating digital collections and exhibits; adding items with metadata (Dublin Core).
- Greenstone: Building and distributing digital library collections; organizing content and configuring search options.

UnitIV: Specialized Library Tools

- Dewey-Cutter Program
- QR Code Generators: Creating QR codes for OPAC links and library services.
- Effective Prompting Skills: Crafting prompts for AI tools to generate accurate and relevant outputs.
- AI-Assisted Tools: Using AI for cataloguing support, metadata generation, and creating content for library services (FAQs, summaries, announcements).

Essential Readings:

SEMESTER-III

Course Code: MLIS-C31
Course Title: INFORMATION SOURCES AND SERVICES (PRACTICAL)

Credits allocated: 4
Max. Marks: 100
End Semester Examination: 80 Marks
Internal Assessment: 20 Marks
Time: 3 Hours
Teaching Hours: 90
Tutorial Hours: 15

Objective: To impart practical knowledge to the students about the evaluation and use of reference and information sources.

Outcomes:
After studying this course, students shall be able to:

1. Acquaint themselves with various print and electronic Information Sources.
2. Identify various types of information sources in different formats.
3. Distinguish between offline, online and Open Access Resources.
4. Evaluate the reference and information sources in terms of their accuracy, authority, bias, and relevance.
5. Carry out the basic and advances searches to locate information from such sources/databases.
6. Access information sources on a particular topic.
7. Solve the users' queries.

Pedagogy: The course relies on a combination of guided/ supervised practical sessions/demonstrations, and discussions on the information sources. Special tutorials/contact hours for one-to-one student-teacher interactions as prescribed in the syllabus. Students will be evaluated through continuous performance assessment, practical records, and end-semester examinations consisting of written examination, practical and viva-voce. Special tutorials/contact hours for one-to-one student-teacher interactions shall also be assigned as per the teaching tutorial ratio of 90:15.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES:

The examiner during the end semester practical examination will assess the examinees on the basis of their practical performance (30 marks), written examination (30 marks) and viva (20 marks).All the reference and information sources mentioned below will actually be consulted by the students.

Unit I: Evaluation of the following Information sources:
Dictionaries

- Oxford English Dictionary.

- Peter Roget's International Thesaurus.
- Harrod's Librarian Glossary and reference book.

Encyclopaedias

- New Encyclopaedia Britannica.
- International Encyclopedia of the Social & Behavioral Sciences
- Access Science.
- Encyclopedia of Library and Information Science (Marcel Dekker).

Biographical Dictionaries

- International Who's Who.
- Oxford Dictionary of National Biography.

Gazetteers/Geographical Dictionaries

- Columbia Gazetteer of the World.
- Fodor's Essential India

Unit II: Evaluation of the following Information sources

Year Books

- The Europa world Yearbook.
- The Statesman's Yearbook
- India: A Reference Annual.
- Universities Handbook: India.
- The Europa World of Learning.

Statistical Sources

- Census of India.
- UNO Statistical Abstracts.

Bibliographies

- British National Bibliography.
- Indian National Bibliography.

Directories

- Ulrich's Periodicals Directory

Unit III: Evaluation of the following Information sources

Aggregators

- EBS COhost.
- ProQuest

Databases

- Science Direct.
- Bio Med Central.
- JSTOR
- IEEE Xplore
- ONOS
- Open Government Data (OGD).

- National Portal of India.

Unit IV: Evaluation of the following Information sources:
Indexing and abstracting services

- Library Information Science Technology Abstract (LISTA)
- PubMed
- SCOPUS
- Google Scholar
- SciFinder
- Education Resources Information Centre (ERIC).
- ProQuest Dissertations & Theses (PQDT) (A&I).

Repositories

- National Digital Library of India (NDLI).
- arXiv.
- E-LIS.
- TKDL

Course Code: MLIS-C32
Course Title: INFORMATION COMMUNICATION AND SCHOLARLY ECOSYSTEMS

Credits allocated: 4
Max. Marks: 100
Theory: 80 Marks
Internal Assessment: 20 Marks
Time: 3 Hours
Teaching Hours: 45
Tutorial Hours: 15

Objectives: To introduce core concepts of information communication, scholarly publishing, open access, digital and AI literacies, and research data management for effective library andinformation services.

Outcomes:
By the end of this course, learners will be able to:

1. Explain the DIKW continuum and information flow in digital environments.
2. Discuss scholarly communication, open access models, and emerging trends in open science.
3. Demonstrate understanding of information, digital, data, and AI literacy frameworks.
4. Describe basic strategies for digital preservation and research data management aligned with FAIR principles.
5. Interpret fundamentals of copyright, licensing, and ethical practices in digital contexts.

Pedagogy: The students would be evaluated at the end of each semester through subjective-type questions/answers (both short and essay type). The scripts would be evaluated by the teacher/instructor teaching the paper and the grade shall be submitted accordingly.

The course relies on a combination of lectures, solving problems and discussing academic articles or real-life situations. The teacher will assign topics for assignments on contemporary themes and issues from the syllabi. Special tutorials/contact hours for one-to-one student-teacher interactions shall also be assigned as per the teaching tutorial ratio of 45:15.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES:

The syllabus of this paper has been divided into four units. There shall be 9 questions in all.

The first question, which would be compulsory, shall be a short-answer type (word limit 25-30 each). It would carry 15 short questions, spread over the entire syllabus. The candidate will be required to attempt any 10 short-answer type questions. Each short-answer-type question would carry 2 marks ($10 \times 2 = 20$). The rest of the paper shall contain 4 units. Each unit shall have two questions, and the candidates shall be required to attempt one question from each Unit. Each question shall carry 15 marks ($15 \times 4 = 60$).

Unit I: Information, Communication and Digital Ecosystems

- Basic concepts of Data, Information, Knowledge and Wisdom (DIKW)
- Characteristics and types of information
- Information flow in digital environments: generation, storage, dissemination
- Communication: concepts, components, types, models, channels and barriers
- Scholarly information ecosystem: publishers, repositories, academic networks, and infrastructure services (DOI, ORCID, ROR)

Unit II: Scholarly Communication and Open Access

- Scholarly communication: concept, cycle and stakeholders
- Introduction to Open Access and Open Science: models (gold, green, diamond, hybrid), preprints, open peer review
- Identification of predatory journals: indicators and evaluation tools
- Research metrics: Impact Factor, h-index, Altmetrics – basic concepts and limitations
- Emerging trends in scholarly publishing: open data, open code, and policy frameworks (Plan S, Rights Retention Strategy)

Unit III: Information, Digital and AI Literacies

- Information literacy frameworks and their application in libraries
- Digital literacy: evaluating digital content and ethical use
- Data literacy: basic interpretation and visualization of data
- AI literacy: introduction to generative AI, search algorithms, and ethical considerations
- Role of libraries in promoting digital and AI literacies

Unit IV: Digital Initiatives, Licensing and Preservation

- Major digital initiatives: NDLI, TKDL, Open Library and global repository infrastructures
- Copyright and licensing in digital environments: Creative Commons, rights retention, fair use
- Digital preservation: need, purpose, basic standards and strategies
- Research Data Management: lifecycle, data management plans, FAIR principles – introduction and significance

Course Code: MLIS-C33
Course Title: LIBRARY AUTOMATION AND DIGITAL INFRASTRUCTURES (THEORY)

Credits allocated: 4
Max. Marks: 100
Theory: 80 Marks
Internal Assessment: 20 Marks
Time: 3 Hours
Teaching Hours: 45
Tutorial Hours: 15

Objective: To provide theoretical understanding of library automation, digital infrastructures, and emerging technologies that support modern library services and digital preservation.

Outcomes:

By the end of this paper, students will be able to:

1. Understand core concepts of library automation and compare major systems (ILS vs. LSP).
2. Describe digital library platforms, metadata standards, and content management technologies.
3. Analyze digitization workflows, interoperability standards, and digital preservation strategies.
4. Discuss emerging technologies such as IoT, AI, Big Data, Cloud Computing, and Blockchain in library contexts.
5. Evaluate the role of discovery services, remote access, and sustainable digital infrastructures.

Pedagogy: The students would be evaluated at the end of each semester through subjective-type questions/answers (both short and essay type). The scripts would be evaluated by the teacher/instructor teaching the paper and the grade shall be submitted accordingly.

The course relies on a combination of lectures, solving problems and discussing academic articles or real-life situations. The teacher will assign topics for assignments on contemporary themes and issues from the syllabi. Special tutorials/contact hours for one-to-one student-teacher interactions shall also be assigned as per the teaching tutorial ratio of 45:15.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES:

The syllabus of this paper has been divided into four units. There shall be 9 questions in all.

The first question, which would be compulsory, shall be a short-answer type (word limit 25-30 each). It would carry 15 short questions, spread over the entire syllabus. The candidate will be required to attempt any 10 short-answer type questions. Each short-answer-type question would carry 2 marks ($10 \times 2 = 20$). The rest of the paper shall contain 4 units. Each unit shall have two questions, and the candidates shall be required to attempt one question from each Unit. Each question shall carry 15 marks ($15 \times 4 = 60$).

Unit I: Library Automation & Core Technologies

- Core Concepts of Library Automation: ILS vs. LSP, Proprietary vs. Open Source, On-Premise Vs Saas.
- Overview of Koha core modules: Administration & System Preferences, Acquisitions, Cataloguing, Circulation, Serials, Patron Management, Report Generation and OPAC.
- RFID: Concept, Barcode vs RFID, Components, Applications in Library.

Unit II: Content Management & Digital Library Technologies

- CMS basics: Concept & Features of LibGuides, SubjectPLUS.
- Scanners and OCR technologies; AI-assisted OCR and HTR
- Digital Library Platforms: DSpace, Zenodo — Key Features.
- Digital Library Architecture: Core Components.
- Metadata Concepts and Roles; Dublin Core elements; MARC21 key Tags

Unit III:Digital Libraries & Preservation

- Digitization Workflow: Selection, Scanner Types, OCR, File Formats (TIFF, PDF/A, JPEG2000), Quality Control, Rights Considerations.
- Persistent Identifiers: DOI, Handle, ORCID, ROR.
- Retrieval Standards & Interoperability: Z39.50, SRU/SRW, OAI-PMH.
- FAIR Principles for Data Management.
- Digital Preservation Strategies: PREMIS, METS, Emulation vs. Migration.
- Geographically Distributed Dark Archives (CLOCKSS, Portico).

Unit IV: Emerging Technologies

- Discovery Services: Concept, Need, and Features (Primo, VuFind)
- Remote Access and Authentication: Concept, Need & Purpose.
- Library Service Platforms (LSP): Concept & Features (FOLIO and Ex Libris Alma)
- Applications of IoT&AI in Smart Libraries
- Big Data and Cloud Computing: Concept and Applications in Libraries.
- Blockchain in Libraries: Basic Concept

Course Code: MLIS-DSE31
Course Title: SOCIAL SCIENCE INFORMATION SOURCES AND SYSTEMS

Credits allocated: 4
Max. Marks: 100
Theory: 80 Marks
Internal Assessment: 20 Marks
Time: 3 Hours
Teaching Hours: 45
Tutorial Hours: 15

Objectives: To acquaint the students about the Information Sources and System in the field of Social Sciences.

Outcomes:
After studying this course, students shall be able to:

1. Examine the structure and development of Social Sciences.
2. Know the recent research trends in the field of Social Sciences.
3. Know about the Social Science Information sources, Databases and Repositories.
4. Critically evaluate various Social Sciences information sources.
5. Develop acquaintance with the role of National and International Social Science Institutions engaged in Information generation and dissemination.
6. Understand the role of Social Science associations and networks in the upliftmentof social sciences.

Pedagogy: The students would be evaluated at the end of each semester through subjective-type questions/answers (both short and essay type). The scripts would be evaluated by the teacher/instructor teaching the paper and the grade shall be submitted accordingly.

The course relies on a combination of lectures, solving problems and discussing academic articles or real-life situations. The teacher will assign topics for assignments on contemporary themes and issues from the syllabi. Special tutorials/contact hours for one-to-one student-teacher interactions shall also be assigned as per the teaching tutorial ratio of 45:15.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES:

The syllabus of this paper has been divided into four units. There shall be 9 questions in all.

The first question, which would be compulsory, shall be a short-answer type (word limit 25-30 each). It would carry 15 short questions, spread over the entire syllabus. The candidate will be required to attempt any 10 short-answer type questions. Each short-answer-type question would carry 2 marks ($10 \times 2 = 20$). The rest of the paper shall contain 4 units. Each unit shall have two questions, and the candidates shall be required to attempt one question from each Unit. Each question shall carry 15 marks ($15 \times 4 = 60$).

Unit I: Structure and Development of Social Sciences:

- Social Sciences: Definition, scope, landmarks and research trends.
- Political Science: Definition, scope, landmarks and research trends.
- Economics: Definition, scope, landmarks and research trends.
- Sociology: Definition, scope, landmarks and research trends.
- History: Definition, scope, landmarks and research trends.

UnitII: Social Science Institutions engaged in Information generation anddissemination:
Role of Social Science Institutions:

- Centre for Policy Research.
- Indian Council of Social Science Research.
- Indian Institute of Public Administration.
- National Council for Applied Economic Research.
- Tata Institute of Social Sciences.
- Indian Council of Historical Research.
- United Nation Educational Scientific and Cultural Organisation (UNESCO).

Unit III: Social Science Information System, Associations and Networks:

- Information System: Concept and evaluation.
- Information Associations in Social Sciences:
  - International Political Science Association.
  - International Sociological Association.
- Information Networks in Social Sciences:
  - SocioSite
  - Social Science Research Network (SSRN).

Unit IV: Social Science Aggregators, Databases and Repositories:
Evaluation of the following Databases:

- J-STOR.
- J-Gate.
- Project Muse.
- Shodhganga
- Networked Digit Library of Theses and Dissertations (NDLTD).
- UN Data.
- OpenDOAR (Directory of Open Access Repositories)

Course Code: MLIS-DSE32
Course Title: BUSINESS INFORMATION SOURCES AND SYSTEMS

Credits allocated: 4
Max. Marks: 100
Theory: 80 Marks
Internal Assessment: 20 Marks
Time: 3 Hours
Teaching Hours: 45
Tutorial Hours: 15

Objectives: To make the students aware of the Business Information System.

Outcomes:
After studying this course, students shall be able to:

1. Understand the nature and characteristics of business information.
2. Acquaint with the components of Industrial Information System.
3. Know about the Industrial Information sources, products and services.
4. Develop acquaintance with the role of industrial Institutions and networks.
5. Organise business information for end user.

Pedagogy: The students would be evaluated at the end of each semester through subjective-type questions/answers (both short and essay type). The scripts would be evaluated by the teacher/instructor teaching the paper and the grade shall be submitted accordingly.

The course relies on a combination of lectures, solving problems and discussing academic articles or real-life situations. The teacher will assign topics for assignments on contemporary themes and issues from the syllabi. Special tutorials/contact hours for one-to-one student-teacher interactions shall also be assigned as per the teaching tutorial ratio of 45:15.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES:

The syllabus of this paper has been divided into four units. There shall be 9 questions in all.

The first question, which would be compulsory, shall be a short-answer type (word limit 25-30 each). It would carry 15 short questions, spread over the entire syllabus. The candidate will be required to attempt any 10 short-answer type questions. Each short-answer-type question would carry 2 marks ($10 \times 2 = 20$). The rest of the paper shall contain 4 units. Each unit shall have two questions, and the candidates shall be required to attempt one question from each Unit. Each question shall carry 15 marks ($15 \times 4 = 60$).

Unit I: Business Information:

- Nature and characteristics: Its role, generation and utilization.
- Systems view of business information.
- Components of Business Information Systems: Resources, centres, consultants, suppliers, financial organisations, industrial promoters, etc.

- Users of business information: Categories, role, functions, and need.

Unit II: Business Information Sources and Products

- Sources of Information: Directories, Digests, Market, Research Reports, Trade Literature, Technical Notes, Company Profiles, Patent, Design and Trade Marks, Standards, Databases.
- Information services: CAS, SDI, Technical Enquiry Service, other computerised services.

Unit III: Business Information Institutions and Networks:

- Information Networks: overview of Business Information Networks.
- Activities of: Indian Institute of Foreign Trade (IIFT), India Trade Promotion Organisation (ITPO), Confederation of Indian Industry (CII), Federation of Indian Chambers of Commerce and Industry (FICCI), United Nations Industrial Development Organization (UNIDO), United Nations Conference on Trade and Development (UNCTAD)

Unit IV: Organising Business Information for End user Support

- Database System: Business Measurement System
- Business Planning System. Text Management System: Text retrieval system
- Office systems Management Support Systems: Decision support systems; information centres.

Essential Readings:

Course Code: MLIS-DSE33
Course Title: HEALTH SCIENCE INFORMATION SOURCES AND SYSTEMS

Credits allocated: 4
Max. Marks: 100
Theory: 80 Marks
Internal Assessment: 20 Marks
Time: 3 Hours
Teaching Hours: 45
Tutorial Hours: 15

Objectives: To make the students aware of the Health Science Information System

Outcomes:
After studying this course, students shall be able to:

1. Understand the health science information.
2. Use health science Information sources, products and services
3. Find out the role of Health Science Information Institutions at National and International level.
4. Acquaint with the health science Information System.
5. Understand the role of various health science information system and networks.

Pedagogy: The students would be evaluated at the end of each semester through subjective-type questions/answers (both short and essay type). The scripts would be evaluated by the teacher/instructor teaching the paper and the grade shall be submitted accordingly.

The course relies on a combination of lectures, solving problems and discussing academic articles or real-life situations. The teacher will assign topics for assignments on contemporary themes and issues from the syllabi. Special tutorials/contact hours for one-to-one student-teacher interactions shall also be assigned as per the teaching tutorial ratio of 45:15.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES:
The syllabus of this paper has been divided into four units. There shall be 9 questions in all.

The first question, which would be compulsory, shall be a short-answer type (word limit 25-30 each). It would carry 15 short questions, spread over the entire syllabus. The candidate will be required to attempt any 10 short-answer type questions. Each short-answer-type question would carry 2 marks ($10 \times 2 = 20$). The rest of the paper shall contain 4 units. Each unit shall have two questions, and the candidates shall be required to attempt one question from each Unit. Each question shall carry 15 marks ($15 \times 4 = 60$).

Unit I: Health Science Information

- Growth and development of Health Science.
- Types of Health Science libraries/information centres.
- Information Services: Current Awareness Service, SDI service, Indexing and abstracting service.

- Literature search.
- Users of Health Science information.

Unit II: Health Science Information Sources:

- Sources of Information:
- Printed
- Non-print. (List to be provided by the concerned teacher).

Unit III: Health Science Information Institutions:

- National Medical Library (NML).
- World health Organisation (WHO).
- Indian council of Medical Research (ICMR).
- Department of Biotechnology (DBT).
- National Institute of Health and Family Welfare.
- Central Drug Research Institute (CDRI).
- Central Institute of Mining and Fuel Research (CFRI).
- Central Food Technological Research Institute (CFTRI)
- National Institute of Nutrition (NIN).
- National Institute of Immunology (NII).
- National Informatics Centre (NIC)

Unit IV: Information Systems and Networks:

- Health Literature, Library, and Information Services (HELLIS).
- Medical Literature Analysis and Retrieval System (MEDLARS)
- Bio Sciences Information Service (BIOSIS).
- Trends in Health Science Information System.
- Application of Hypertext, Hypermedia, Multimedia.
- Expert System and Artificial Intelligence.

Essential Readings:

1. Abdelhak, M., Hanken, M. A. (2015). Health information: Management of a strategic resource (5th ed.). Amsterdam: Elsevier.
2. Huber, J. T. (2014). Introduction to Reference Sources in the Health Sciences. (6th ed.). United States: American Library Association.

6. Younger, P., & Morgan, P. (2011). Using Web 2.0 for health information. UK: Facet Publishing.

Course Code:MLIS-RBC-RM31
Course Title:RESEARCH METHODS AND STATISTICAL TECHNIQUES

Credits allocated: 4
Max. Marks: 100
Theory: 80 Marks
Internal Assessment: 20 Marks
Time: 3 Hours
Teaching Hours: 45
Tutorial Hours: 15

Objective: To familiarize students with the various aspects of research methods and statistical techniques, and their application in the field of Library and Information Science.

Outcomes:
After studying this course, students shall be able to:

1. Understand the basics of research
2. Identify and formulate research problem
3. Construct the suitable research instrument to gather the data.
4. Apply various sampling techniques to select representative sample from target population.
5. Understand the basics of descriptive and inferential statistics.
6. Apply various techniques for research evaluation.

Pedagogy: The students would be evaluated at the end of each semester through subjective-type questions/answers (both short and essay type). The scripts would be evaluated by the teacher/instructor teaching the paper and the grade shall be submitted accordingly.

The course relies on a combination of lectures, solving problems and discussing academic articles or real-life situations. The teacher will assign topics for assignments on contemporary themes and issues from the syllabi. Special tutorials/contact hours for one-to-one student-teacher interactions shall also be assigned as per the teaching tutorial ratio of 45:15.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES:

The syllabus of this paper has been divided into four units. There shall be 9 questions in all.

The first question, which would be compulsory, shall be a short-answer type (word limit 25-30 each). It would carry 15 short questions, spread over the entire syllabus. The candidate will be required to attempt any 10 short-answer type questions. Each short-answer-type question would carry 2 marks ($10 \times 2 = 20$). The rest of the paper shall contain 4 units. Each unit shall have two questions, and the candidates shall be required to attempt one question from each Unit. Each question shall carry 15 marks ($15 \times 4 = 60$).

Unit I: Concept of Research

- Research: Definition, objectives, need and characteristics.
- Literature search. Literature review: Need, role in research, types and steps.

- Identification and formulation of research problem.
- Hypothesis: Definition, need, sources, characteristics, functions and errors. Difference between proposition and hypothesis.
- Research Process

UnitII: Sampling and Data collection Techniques

- Data collection tools:
  - Questionnaire
  - Interview
  - Observation
  - Documentary sources
- Sampling techniques:
  - Probability
  - Non-probability.

Unit III: Data Analysis and Its Techniques

- Descriptive and inferential statistics: An Introduction.
- Measures of Central Tendency: Mean, Mode, Median.
- Measures of Dispersion. Mean deviation and Standard deviation.
- Representation of Data: Tabular and graphic.
- Computerized data analysis: Introduction to SPSS.

Unit IV: Research Reporting and Metrics

- Research Report: Structure, contents and guidelines
- Reference Styles: APA(latest edition)
- Bibliometrics: Concept, definition and laws.
- Scientometrics, Infometrics and Webometrics: Concept, definition and their relationship

Essential Readings:

1. Aguinis, H. (2024). Research methodology: Best practices for rigorous, credible, and impactful research. Thousand Oaks: Sage Publications.
2. Cox, K. S., & Holcomb, Z. C. (2022). Interpreting basic statistics : A workbook based on excerpts from journal articles (9th ed.). Abingdon, Oxon: Routledge.
3. Kothari, C. R., Kothari, C., Garg, G. (2024). Research methodology: Methods and techniques. (5th ed.). New Delhi: New Age International Limited.
4. Kumar, R. (2014). Research methodology: A step-by-step guide for beginners. (4th ed.). Thousand Oaks: Sage Publications.
5. Landrum, R. E., & Gurung, R. a. R. (2025). An easy guide to APA style (5th ed.). Thousand Oaks: Sage Publications.

7. Ormrod, R. P. (2023). How to structure a thesis, report or paper :A guide for students. Abingdon, Oxon: Routledge.

8. Pickard, A. J. (2017). Research methods in information (2nd ed.). London: Facet Publishing.
9. Strunk, K. K., & Mwavita, M. (2025). Design and analysis in quantitative educational research : Univariate designs in SPSS (2nd ed.). Abingdon, Oxon: Routledge.
10. Trochim, W. M. K., Donnelly, J. P., & Arora, K. (2016). Research methods: The essential knowledge base (2nd ed.). Boston : Cengage.

Course Code: MLIS-RBC-DST32
Course Title: SYNOPSIS

Credits allocated: 4
Max. Marks: 100
Synopsis: 75
Viva-voce:25
Teaching Hours: 60

Objective: To acquaint the students about writing a research proposal.

Outcome:
After studying the paper, the students shall be able to:

1. Identify and formulate research problem.
2. Summarize relevant literature and identify the research gap.
3. Formulate hypotheses.
4. Select appropriate methodology and methods.
5. Produce a concise, well-structured, referenced synopsis suitable for assessment and ethics review.

Pedagogy: The Supervisor will be appointed through BOC/RAC in accordance with the procedure laid down by university regulations. The supervisor must be a regular faculty and an approved Ph.D. supervisor in Library & Information Science by the Panjab University, Chandigarh. The supervisor shall be responsible for the continuous evaluation of the performance of the student.

Aconcise, well-structured synopsishaving maximum of 3000 words using the prescribed template shall be prepared by the candidate and a presentation before the members of RAC shall be arranged immediately after the end of the semester examination to evaluate the performance of candidate.

INSTRUCTIONS FOR THE EVALUATORS AND CANDIDATES

The synopsis presentations shall be conducted after the odd-semester examinations on date and time notified. Synopsis will be evaluated by the supervisor prior to the presentation. The RAC, in consultation with the Supervisor, will award a score out of 100 for RBC□DST (4 credits).

SEMESTER-IV

Course Code: MLIS-C41
Course Title:INFORMATION CONSOLIDATION, STORAGE AND RETRIEVAL

Credits allocated: 4
Max. Marks: 100
Theory: 80 Marks
Internal Assessment: 20 Marks
Time: 3 Hours
Teaching Hours: 45
Tutorial Hours: 15

Objective: To familiarise the students about the principles and practices of information consolidation, subject indexing, abstracting and information retrieval sys

Outcomes:
After studying this course, students shall be able to:

1. Understand the concept of information analysis, consolidation and repackaging.
2. Understand the Indexing systems and techniques.
3. Understand the qualities of good abstracts and process of abstracting.
4. Understand the techniques and strategies of online searching.
5. Understand the various information retrieval models.
6. Analyse and evaluate ISAR tools and systems.

Pedagogy: The students would be evaluated at the end of each semester through subjective-type questions/answers (both short and essay type). The scripts would be evaluated by the teacher/instructor teaching the paper and the grade shall be submitted accordingly.

The course relies on a combination of lectures, solving problems and discussing academic articles or real-life situations. The teacher will assign topics for assignments on contemporary themes and issues from the syllabi. Special tutorials/contact hours for one-to-one student-teacher interactions shall also be assigned as per the teaching tutorial ratio of 45:15.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES:

The syllabus of this paper has been divided into four units. There shall be 9 questions in all.

The first question, which would be compulsory, shall be a short-answer type (word limit 25-30 each). It would carry 15 short questions, spread over the entire syllabus. The candidate will be required to attempt any 10 short-answer type questions. Each short-answer-type question would carry 2 marks ($10 \times 2 = 20$). The rest of the paper shall contain 4 units. Each unit shall have two questions, and the candidates shall be required to attempt one question from each Unit. Each question shall carry 15 marks ($15 \times 4 = 60$).

Unit I: Information Analysis, Consolidation and Repackaging

- Information Analysis, Consolidation and Repackaging: Concept, need and process.
- Guiding Principles for arrangement and presentation of idea in a helpful sequence.
- Information Consolidation Products: Newsletter and Reviews: Concepts, types, design, development and methodology.
- Knowledge and skills required for information analysis and consolidation.

Unit II: Indexing Systems and Techniques:

- Assigned and Derived Indexing.
- Pre Coordinate and Post Coordinate indexing.
- Chain Indexing, PRECIS, POPSI. Key Word Indexing (KWIC, KWAC, KWOC).
- Citation Indexing: Features of Scopus and Web of Science (WoS).
- Concept of Automatic Indexing.

Unit III:Abstracting and Searching Techniques:

- Abstract: Definition, types, characteristics and qualities of good abstracts.
- Abstracting: need and process.
- Search Methods and Strategies: Boolean Search, Heuristic Search, Proximity Search, Phrase Search, Truncation search, etc.
- Federated Search: Concept and features.
- Data Mining.

Unit IV: Information Retrieval System:

- IRS: Concept, definition, types, characteristics and components.
- Information Retrieval Models.
- Evaluation of an Information Retrieval System: Recall, Precision and Relevance, Relevance feedback.
- Semantic web and Linked Data: Concept and features

Essential Readings:

1. Bajpai, S. K. (2016). Modern information retrieval. New Delhi: Ess Ess Publications.
2. Bates, M. J. (Ed.). (2011). Understanding information retrieval systems: Management, types, and standards. Abingdon, Oxol: Routledge.

11. Manning, C. D., Raghavan, P., & Schutze, H. (2008). Introduction to Information Retrieval. Cambridge: Cambridge University Press.
12. Singh, S. (2014). *Information Analysis, Consolidation and Repackaging.* New Delhi: Atlantic Publishing Group.
13. Tan, P.-N., Steinbach, M., Kumar, V., & Karpatne, A. (2023). *Introduction to data mining, global edition* (2nd ed.). USA: Pearson Education.

Course Code: MLIS-C42
Course Title: LIBRARY AUTOMATION &EMERGING TECHNOLOGIES (PRACTICAL)

Credits allocated: 4
Max. Marks: 100
Practical Examination: 80 Marks
Internal Assessment: 20 Marks
Time: 3 Hours
Teaching Hours: 90
Tutorial Hours: 15

Objective: To develop practical expertise in library automation systems, digital repositories, reference tools, and AI applications for modernizing library operations and user services.

Outcomes:
By the end of this practical course, students will be able to:

1. Configure and manage Koha system preferences and core functional modules.
2. Manage DSpace and Zenodo repositories
3. Use Zotero and Mendeley for reference capture, organization, citation insertion, and bibliography generation.
4. Design and customize library websites using free WYSIWYG platforms.
5. Deploy AI chatbots for virtual reference services and apply prompt engineering to optimize user interactions.

Pedagogy: The course relies on a combination of guided/ supervised practical sessions/demonstrations, and discussions of experimental results. Special tutorials/contact hours for one-to-one student-teacher interactions as prescribed in the syllabus/as per the time table. Students will be evaluated through continuous performance assessment, practical records, and end-semester examinations. Special tutorials/contact hours for one-to-one student-teacher interactions shall also be assigned as per the teaching tutorial ratio of 90:15.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES:

The syllabus for this paper is divided into four units. Assessment will be through Internal Assessment and an End-Semester Practical Examination. Evaluation will consider the number of practicals performed, performance in practical work and viva-voce. The practical paper is assessed as 60 marks for practical performance and 20 marks for the viva-voce.

UnitI: Koha configuration & Workflows

- Koha Administration and Global System Preferences configuration
- Core Functional Modules workflow: Acquisitions, Cataloguing, Patrons, Circulation, and Serials Modules
- Using Tools module and generating guided/custom reports.
- Koha Installation on Lightweight Ubuntu variant

Unit II: DSpace&Zenodo Repositories

DSpace Demo Instance:

- User account management and role-based permissions
- Repository structure design (Communities & Collections):
- Item submission workflow with metadata entry
- Content workflow management
- Discovery testing

Zenodo (InvenioRDM SaaS):

- Account creation
- Self-archiving research outputs with rich metadata standards (Dublin Core) in the designated Community
- Assigning DOI,
- Applying Creative Commons Licenses
- Choosing access modes: Open, Closed, or Embargoed
- Access Levels (Public vs. Restricted).

UnitIII: Reference Management & Website Design

Reference Management with Zotero & Mendeley:

- Installation, account creation, and sync
- Capturing references and PDFs (browser capture, drag-drop, import)
- Organizing libraries: collections/tags/notes
- Inserting citations and generating bibliographies in Word processor
- Changing citation styles and updating references

Library website design — free WYSIWYG platforms:

- Designing and customizing a live library website using free WYSIWYG platforms like Google Sites.

UnitIV: AI Chatbot& Prompting

- AI Chatbot Widget on Library Website with embedded Virtual Reference Services (Ask-a-Librarian)
- AI prompting essentials: Prompt design fundamentals (context, intent, constraints, examples)

Essential Readings:

1. Bilal, D. (2014). Library automation: Core concepts and practical systems analysis (3rd ed.). Exeter, Devon: Libraries Unlimited.

Course Code: MLIS-C43
Course Title: INTERNSHIP

Credits allocated: 4
Max. Marks: 100
Report: 60 Marks
Viva-voce: 40 Marks
Internship Hours: 120

Objective: To enable the student learn about the working of the libraries and their various sections & functions and also to have practical knowledge.

Outcome:
After completing this course, students shall be able to:

1. Critically analyse the in-house operations of the libraries.
2. Adapt themselves with the functioning of the library in different settings.
3. Practice the technologies used for managing routine operations of the library and also for rendering services to the users.

Pedagogy: Students shall participate in guided tasks with library professionals tolearn library operations with emphasison practical exposure.

INSTRUCTIONS AND ASSESSMENT METHODS:

1. Every student shall have to undergo an internship.
2. The department shall allocate a library to each student for internship.
3. The student shall submit a certificate issued by the Librarian/ Head of the Institution regarding the successful completion of an Internship with a minimum duration of 120 hours.
4. Students shall submit the Internship report consisting of actual work performed by them in the library.
5. On successful completion of internship and submission of the report, viva-voce will be conducted.
6. A Panel of Examiners will be constituted by the Chairperson for the conduct of viva-voce.

Course Code: MLIS-DSE41
Course Title: ACADEMIC LIBRARY SYSTEM: COLLEGE AND UNIVERSITY LIBRARIES

Credits allocated: 4
Max. Marks: 100
Theory: 80 Marks
Internal Assessment: 20 Marks
Time: 3 Hours
Teaching Hours: 45
Tutorial Hours: 15

Objective: To acquaint the students with the present set up of academic library system in India

Outcomes:
After studying this course, students shall be able to:

1. Understand the academic library system and its functions.
2. Know the clientele and the services required in academic libraries.
3. Analyse the functions of libraries in academic institutions.
4. Develop skills for designing collection development policies in academic libraries.
5. Interpret the role of human resources in academic libraries.
6. Summarize the overall organization and administration of academic libraries.

Pedagogy: The students would be evaluated at the end of each semester through subjective-type questions/answers (both short and essay type). The scripts would be evaluated by the teacher/instructor teaching the paper and the grade shall be submitted accordingly.

The course relies on a combination of lectures, solving problems and discussing academic articles or real-life situations. The teacher will assign topics for assignments on contemporary themes and issues from the syllabi. Special tutorials/contact hours for one-to-one student-teacher interactions shall also be assigned as per the teaching tutorial ratio of 45:15.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES:

The syllabus of this paper has been divided into four units. There shall be 9 questions in all.

The first question, which would be compulsory, shall be a short-answer type (word limit 25-30 each). It would carry 15 short questions, spread over the entire syllabus. The candidate will be required to attempt any 10 short-answer type questions. Each short-answer-type question would carry 2 marks ($10 \times 2 = 20$). The rest of the paper shall contain 4 units. Each unit shall have two questions, and the candidates shall be required to attempt one question from each Unit. Each question shall carry 15 marks ($15 \times 4 = 60$).

Unit I: Academic Libraries

- Academic Libraries: Definition, Aims, Objectives and Types.
- Role of UGC in Strengthening Academic library system in India.
- Academic Library as a Space/Place: Concept, Significance and Components.
- Library Learning Commons. Library Maker spaces in Academic Libraries.
- Library Research Support (LRS): Concept, Relevance and Scope.

Unit II: Collection Development and Evaluation

- Collection Development Policy (CDP): Concept, Need and Elements.
- Evidence-Based Acquisition Model (EBA): Concept, Significance and Features. Concept of Demand-Driven Acquisition (DDA)/Patron-Driven Acquisition (PDA).
- Collection Evaluation and Assessment Methods: Quantitative and Qualitative Techniques
- Creative commons (CC): Concepts & Types of Licenses.

Unit III: HRM and Library Quality Management

- Performance Appraisal: Need, Importance & Evaluation Process in Indian Academic Libraries.
- Professional Development of Library Staff: Concepts & Need. Opportunities for Continuous Professional Development CPD.
- Library Quality: Concept and Components of TQM and Six-Sigma.
- NAAC Quality Indicators in Library and Information Services: College and University Libraries.

Unit IV: Open Courseware, Green Library & Marketing

- Open Courseware and MOOCs: Concepts, Significance and Role of Academic Libraries.
- NMeICT initiatives: ePG-Pathshala and SWAYAM
- Green Libraries: Concept, Need & Features.
- Marketing of Library Products & Services: Concepts & Rationale. Marketing Mix in Academic Libraries.

Course Code: MLIS-DSE42
Course Title: PUBLIC LIBRARY SYSTEM

Credits allocated: 4
Max. Marks: 100
Theory: 80 Marks
Internal Assessment: 20 Marks
Time: 3 Hours
Teaching Hours: 45
Tutorial Hours: 15

Objective: To acquaint the students with the present set up of public library system in India.

Outcomes:
After studying this course, students shall be able to:

1. Understand the public library system and its functions.
2. Critically assess the nature, organization and governance of public libraries.
3. Know the clientele and the services required in public libraries.
4. Examine the need for library legislation and polices for public libraries.
5. Determine the resource sharing and automation procedure in public library system.
6. Provide services to special groups of clientele.

Pedagogy: The students would be evaluated at the end of each semester through subjective-type questions/answers (both short and essay type). The scripts would be evaluated by the teacher/instructor teaching the paper and the grade shall be submitted accordingly.

The course relies on a combination of lectures, solving problems and discussing academic articles or real-life situations. The teacher will assign topics for assignments on contemporary themes and issues from the syllabi. Special tutorials/contact hours for one-to-one student-teacher interactions shall also be assigned as per the teaching tutorial ratio of 45:15.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES:

The syllabus of this paper has been divided into four units. There shall be 9 questions in all.

The first question, which would be compulsory, shall be a short-answer type (word limit 25-30 each). It would carry 15 short questions, spread over the entire syllabus. The candidate will be required to attempt any 10 short-answer type questions. Each short-answer-type question would carry 2 marks ($10 \times 2 = 20$). The rest of the paper shall contain 4 units. Each unit shall have two questions, and the candidates shall be required to attempt one question from each Unit. Each question shall carry 15 marks ($15 \times 4 = 60$).

Unit I: Public Libraries

- Public Libraries: Meaning, importance, functions.
- Role of Public Library in literacy and mass education.

- Public Library Movement in India: Recommendation by S.R. Ranganathan, Advisory Committee for India
- Role of Raja Ram Mohan Roy Library Foundation (RRRLF) and National Library (Kolkata).
- UNESCO manifesto on Public Libraries.
- Organisation of Public Library System: National, regional and State, Library governance.

Unit II: Public Library Legislation in India and Library and Information policy

- Library acts in India: Salient features of library acts of Tamil Nadu, Andhra Pradesh, Karnataka, Maharashtra, West Bengal, Manipur, Kerala, Haryana, Goa and Mizoram.
- Library and Information Policy: Library and Information Policy at National and International level.

Unit III: Organisation of Public Libraries

- Manpower Development: Qualifications, recruitment, job description. job analysis, staff manual.
- Library Finance: Sources, budgeting, accounting and auditing.
- Library Building: Planning, Concept of Modular Building.
- Library Furniture and Equipment.
- Collection Development: Print, Non-Print (including Electronic documents).
- Organisation of various Sections: Periodical, Technical, Reference, Circulation and Maintenance Section.

Unit IV: Resource Sharing and Automation

- Networking and Resource Sharing, Integrated public library system.
- Library Automation: Automating the housekeeping services in various sections in the public libraries.
- Library services to special groups of people including physically handicapped, mentally challenged, visually impaired, Prisoners and Children.

Essential Readings:

Course Code: MLIS-DSE43
Course Title: SPECIAL LIBRARY SYSTEM

Credits allocated: 4
Max. Marks: 100
Theory: 80 Marks
Internal Assessment: 20 Marks
Time: 3 Hours
Teaching Hours: 45
Tutorial Hours: 15

Objective: To acquaint the students with the present set up of Special library system in India.

Outcomes:
After studying this course, students shall be able to:

1. Understand the special library system and its functions.
2. Know the services required in special libraries.
3. Analyse the functions of special libraries to serve the specialist users.
4. Develop skills for designing collection development policies in special libraries.
5. Interpret the role of human and financial resources in special libraries.
6. Understand the overall organization and administration of special libraries.

Pedagogy: The students would be evaluated at the end of each semester through subjective-type questions/answers (both short and essay type). The scripts would be evaluated by the teacher/instructor teaching the paper and the grade shall be submitted accordingly.

The course relies on a combination of lectures, solving problems and discussing academic articles or real-life situations. The teacher will assign topics for assignments on contemporary themes and issues from the syllabi. Special tutorials/contact hours for one-to-one student-teacher interactions shall also be assigned as per the teaching tutorial ratio of 45:15.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES:

The syllabus of this paper has been divided into four units. There shall be 9 questions in all.

The first question, which would be compulsory, shall be a short-answer type (word limit 25-30 each). It would carry 15 short questions, spread over the entire syllabus. The candidate will be required to attempt any 10 short-answer type questions. Each short-answer-type question would carry 2 marks ($10 \times 2 = 20$). The rest of the paper shall contain 4 units. Each unit shall have two questions, and the candidates shall be required to attempt one question from each Unit. Each question shall carry 15 marks ($15 \times 4 = 60$).

Unit I: Special Libraries

- Special Libraries: Concept, role, characteristics, and functions.
- Development of special libraries in India.
- Role of IASLIC and NIScPR

Unit II: Library Organisation and Administration

- Collection Development and Management: Government documents, maps, manuscripts, newspaper clippings, serials, specifications (patents and Standards) technical reports, theses.
- Financial Management auditing: Sources of finance, budgeting techniques. Accounting and Auditing.
- Manpower development and recruitment: Qualifications, Job Description, Staff Manual.

Unit III: Information Services, Systems and Databases

- Information Services: CAS, SDI, eDDS, Translation Services and Trend Reports
- MEDLARS
- INIS
- INSPEC
- AGRIS
- Patent Information System
- AccessScience

Unit IV: Resource Sharing

- Resource Sharing: Concept, areas and factors of Development
- Role of CSIR, DRDO and BARC
- Role of SLA and IFLA Section on Special Libraries

Essential Readings:

Course Code: MLIS-RBC-RM41
Course Title: ADVANCED RESEARCH METHODOLOGY AND ETHICS

Credits allocated: 4
Max. Marks: 100
Theory: 80 Marks
Internal Assessment: 20 Marks
Time: 3 Hours
Teaching Hours: 45
Tutorial Hours: 15

Objective: To familiarize students with the various aspects of research methodology, ethics & metrics and their application in the field of Library and Information Science.

Outcomes:
After studying this course, students shall be able to:

1. Comprehend the paradigms of research in terms of qualitative and quantitative approaches.
2. Formulate research questions and hypotheses.
3. Apply the research methods in the field of in Library and Information Science.
4. Apply various techniques for measuring research output.
5. Understand need and fundamentals of research ethics
6. Prepare scholarly research proposals, reports, dissertations, and publications.

Pedagogy: The students would be evaluated at the end of each semester through subjective-type questions/answers (both short and essay type). The scripts would be evaluated by the teacher/instructor teaching the paper and the grade shall be submitted accordingly.

The course relies on a combination of lectures, solving problems and discussing academic articles or real-life situations. The teacher will assign topics for assignments on contemporary themes and issues from the syllabi. Special tutorials/contact hours for one-to-one student-teacher interactions shall also be assigned as per the teaching tutorial ratio of 45:15.

INSTRUCTIONS FOR THE PAPER-SETTER AND CANDIDATES:

The syllabus of this paper has been divided into four units. There shall be 9 questions in all.

The first question, which would be compulsory, shall be a short-answer type (word limit 25-30 each). It would carry 15 short questions, spread over the entire syllabus. The candidate will be required to attempt any 10 short-answer type questions. Each short-answer-type question would carry 2 marks (10 × 2 = 20). The rest of the paper shall contain 4 units. Each unit shall have two questions, and the candidates shall be required to attempt one question from each Unit. Each question shall carry 15 marks (15 × 4 = 60).

Unit I:Foundation of Research

- Types of research
- Qualitative and Quantitative Approaches

- Concept, construct, propositions, hypothesis, theory, laws, and fact: Definitions and their relationships.
- Writing literature review
- Spiral of Scientific method
- Research questions: An Introduction
- Hypothesis: Types, Process, Formulation, Necessity, Misconception, and Testing. Logic of disconfirming hypothesis.

Unit II: ResearchDesign and Methods

- Research Design
- Research Methods and their Application in Library and Information Science:
  - Historical
  - Survey
  - Experimental
  - Case Study

Unit III:Research Communication,Metrics and AI

- Synopsis Writing
- Thesis Writing
- AI and Research
- Research Metrics: Impact Factor, Source Normalized Impact per Paper (SNIP),SCImago Journal Rank Indicator (SJR),SCImago Institution Rankings (SIR),Impact Per Publication (IPP) and CiteScore.

Unit IV: Research Ethics and Misconducts

- Ethical issues in Research.
- Research misconducts: Falsification, Fabrication, and Plagiarism.Various forms and reasons of Plagiarism. UGC (Promotion of Academic Integrity and Prevention of Plagiarism in Higher Educational Institutions) Regulations, 2018.
- Publication ethics: definition, introduction and importance
- Publication misconduct: definition, concept, problems that lead to unethical behaviour and vice versa, types.

Essential Readings:

12. Wildemuth, B.M. (2017). Applications of social research methods to questions in information and library science.(2nd ed.). Westport: Libraries Unlimited.

Course Code: MLIS-RBC-DST42
Course Title:DISSERTATION

Credits allocated: 8
Max. Marks: 200
Dissertation: 150
Viva Voce: 50
Teaching Hours: 120

Objective: To acquaint students with the various stages of research and enable them to plan, conduct, and report a study culminating in a dissertation.

Outcome:
After studying the paper, the students shall be able to:

1. Apply analytical and logical reasoning throughout the research process.
2. Design appropriate research instrument.
3. Collect, manage, and analyse data using discipline-relevant tools and techniques.
4. Interpret research findings critically in light of existing literature, theoretical frameworks, and practical implications.
5. Produce a coherent, well-referenced dissertation and present findings.
6. Apply the implications of Library & Information Science research to generate and contextualise new knowledge.

Pedagogy: Students will write a dissertation that clearly articulates the research objectives, supports them with robust evidence, presents a well-reasoned conclusion, and critically discusses the study's social relevance and future research directions. Students will develop skills in scholarly writing, critical thinking, and synthesis of knowledge.

INSTRUCTIONS FOR THE EVALUATORS AND CANDIDATES

The dissertation submitted by the student shall be evaluated by the supervisor and external subject expert(s). The supervisor and the external expert(s), as applicable, shall be appointed in accordance with Panjab University regulations.

The viva-voce shall be conducted by the external expert in the presence of themembers of RAC. Marks out of 200 shall be awarded during the viva-voce examination with the consensus of the member of RAC and the external expert. The bifurcation of 200 marks shall be as follows:

i) Marks out of 150 shall be awarded for the quality of dissertation work; and

ii) Marks out of 50 shall be awarded on the basis of candidate's performance in viva-voce.

The grade shall be decided on the basis of the percentage of marks obtained out of 200. Passing marks for a dissertation shallbe 40% (i.e., 80 out of 200) with a grade letter 'P'.

Note: It is not necessary to score passing marks/grade separately but a sum of marks obtained from dissertation evaluation (marks out of 150) and viva-voce examination (marks out of 50) shall be considered to fulfill passing grade criterion.

The dissertation shall be an original contribution thatshall pass through the plagiarism tests conducted through professional software recommended by UGC for higher level research. The exclusion of references, quoted material, and less than 05 words phrase is recommended through filters. In the introductory and review chapters' maximum 20% similarity is allowed while in empirical chapters, the similarity must be under 10%. Any sort of plagiarism detected post-submission of dissertation above the prescribed limits shall be subject to the UMC rules and regulations of the Panjab University, Chandigarh.

Note: The evaluation of dissertation (the entire process from allocation of supervisor to the conduct of viva-voce examination shall be handled by the BOC/RAC adhering to the guidelines as stipulated in the university regulations). Only the duly compiled award/grade shall be forwarded to the office of COE, Panjab University, Chandigarh, for the declaration of the result.

Structure of Dissertation

The dissertation must include introduction, rationale of study, a thorough survey of literature, research gaps and so the research questions arising out of the gaps, the objectives of the study, hypotheses of the study in empirical research, detailed evidences to substantiate the research objectives, a conclusion of study, the social relevance and future scope of research in the field. The dissertation must be written in Times New Roman, 12 size fonts with 1.5 line spacing, having margin of 2cm on all four sides of an A4 page. The dissertation may be typed in either MS-Word, Overleaf (LaTeX) or Open-Officeformat. The printout of the dissertation shall be on both sides long-edged on A4 page. The cover of the dissertation shall be Black with Gold Times New Roman Fonts. The logo of the University can be used on the cover page that must show, i) Title of the Dissertation; ii) Name of Candidatewith University Roll Number; iii) Name of Supervisor; iv) Name of Department/College/Institution (with PU-approved Research Centre) along with the name of the University.

****
